NATIONAL BUDGET SYSTEM.

Title I.—Definitions.

Section 1. This act may be cited as the "Budget and accounting act, 1921."

Sec. 2. When used in this act—

The terms "department and establishment" and "department or establishment" mean any executive department, independent commission, board, bureau, office, agency, or other establishment of the government, including the municipal government of the District of Columbia, but do not include the legislative branch of the government or the Supreme court of the United States;

The term "the budget" means the budget required by section 201 to be transmitted to congress;

The term "bureau" means the bureau of the budget;

The term "director" means the director of the bureau of the budget; and

The term "assistant director" means the assistant director of the bureau of the budget.

Title II.—The Budget.

Sec. 201. The president shall transmit to congress on the first day of each regular session the budget, which shall set forth in summary and in detail:

(a) Estimates of the expenditures and appropriations necessary in his judgment for the support of the government for the ensuing fiscal year; except that the estimates for such year for the legislative branch of the government and the Supreme court of the United States shall be transmitted to the president on or before Oct. 15 of each year, and shall be included by him in the budget without revision;

(b) His estimates of the receipts of the government during the ensuing fiscal year, under (1) laws existing at the time the budget is transmitted and also (2) under the revenue proposals, if any, contained in the budget;

(c) The expenditures and receipts of the government during the last completed fiscal year;

(d) Estimates of the expenditures and receipts of the government during the fiscal year in progress;

(e) The amount of annual, permanent, or other appropriations, including balances of appropriations for prior fiscal years, available

for expenditure during the fiscal year in progress, as of Nov. 1 of such year:

(f) Balanced statements of (1) the condition of the treasury at the end of the last completed fiscal year, (2) the estimated condition of the treasury at the end of the fiscal year in progress, and (3) the estimated condition of the treasury at the end of the ensuing fiscal year if the financial proposals contained in the budget are adopted;

(g) All essential facts regarding the bonded and other indebtedness of the government; and

(h) Such other financial statements and data as in his opinion are necessary or desirable in order to make known in all practicable detail the financial condition of the government.

Sec. 202. (a) If the estimated receipts for the ensuing fiscal year contained in the budget, on the basis of laws existing at the time the budget is transmitted, plus the estimated amounts in the treasury at the close of the fiscal year in progress, available for expenditure in the ensuing fiscal year, are less than the estimated expenditures for the ensuing fiscal year contained in the budget, the president in the budget shall make recommendations to congress for new taxes, loans or other appropriate action to meet the estimated deficiency.

(b) If the aggregate of such estimated receipts and such estimated amounts in the treasury is greater than such estimated expenditures for the ensuing fiscal year, he shall make such recommendations as in his opinion the public interests require.

Sec. 203. (a) The president from time to time may transmit to congress supplemental or deficiency estimates for such appropriations or expenditures as in his judgment (1) are necessary on account of laws enacted after the transmission of the budget, or (2) are otherwise in the public interest. He shall accompany such estimates with a statement of the reasons therefor, including the reasons for their omission from the budget.

(b) Whenever such supplemental or deficiency estimates reach an aggregate which, if they had been contained in the budget, would have required the president to make a recommendation under subdivision (a) of section 202, he shall thereupon make such recommendation.

Sec. 204. (a) Except as otherwise provided in this act, the contents, order and arrangement of the estimates of appropriations and the statements of expenditures and estimated expenditures contained in the budget or transmitted under section 203, and the notes and other data submitted therewith, shall conform to the requirements of existing law.

(b) Estimates for lump-sum appropriations contained in the budget or transmitted under section 203 shall be accompanied by statements showing, in such detail and form as may be necessary to inform congress, the manner of expenditure of such appropriations and of the corresponding appropriations for the fiscal year in progress and the last completed fiscal year. Such statements shall be in lieu of statements of like character now required by law.

Sec. 205. The president, in addition to the budget, shall transmit to congress on the first Monday in December, 1921, for the service of the fiscal year ending June 30, 1923, only, an alternative budget, which shall be prepared in such form and amounts and according to such system of classification and itemization as is, in his opinion, most appropriate, with such explanatory notes and tables as may be necessary to show where the various items embraced in the budget are contained in such alternative budget.

Sec. 206. No estimate or request for an appropriation and no request for an increase in an item of any such estimate or request, and no recommendation as to how the revenue needs of the government should be met, shall be submitted to congress or any committee thereof by any officer or employe of any department or establishment, unless at the request of either house of congress.

Sec. 207. There is hereby created in the treasury department a bureau to be known as the bureau of the budget. There shall be in the bureau a director and an assistant director, who shall be appointed by the president and receive salaries of $10,000 and $7,500 a year, respectively. The assistant director shall perform such duties as the director may designate, and during the absence or incapacity of the director or during a vacancy in the office of director he shall act as director. The bureau, under such rules and regulations as the president may prescribe, shall prepare for him the budget, the alternative budget, and any supplemental or deficiency estimates, and to this end shall have authority to assemble, correlate, revise, reduce or increase the estimates of the several departments or establishments.

Sec. 208. (a) The director, under such rules and regulations as the president may prescribe, shall appoint and fix the compensation of attorneys and other employes and make expenditures for rent in the District of Columbia, printing, binding, telegrams, telephone service, law books, books of reference, periodicals, stationery, furniture, office equipment, other supplies, and necessary expenses of the office, within the appropriations made therefor.

(b) No person appointed by the director shall be paid a salary at a rate in excess of $6,000 a year, and not more than four persons so appointed shall be paid a salary at a rate in excess of $5,000 a year.

(c) All employes in the bureau whose compensation is at a rate of $5,000 a year or less shall be appointed in accordance with the civil-service laws and regulations.

(d) The provisions of law prohibiting the transfer of employes of executive departments and independent establishments until after service of three years shall not apply during the fiscal years ending June 30, 1921, and June 30, 1922, to the transfer of employes to the bureau.

(e) The bureau shall not be construed to be a bureau or office created since Jan. 1, 1916, so as to deprive employes therein of the additional compensation allowed civilian employes under the provisions of section 6 of the legislative, executive and judicial appropriation act for the fiscal years ending June 30, 1921, and June 30, 1922, if otherwise entitled thereto.

Sec. 209. The bureau, when directed by the president, shall make a detailed study of the departments and establishments for the purpose of enabling the president to determine what changes (with a view of securing greater economy and efficiency in the conduct of the public service) should be made in (1) the existing organization, activities and methods of business of such departments or establishments, (2) the appropriations therefor, (3) the assignment of particular activities to particular services, or (4) the regrouping of services. The results of such study shall be embodied in a report or reports to the president, who may transmit to congress such report or reports or any part thereof with his recommendations on the matters covered thereby.

Sec. 210. The bureau shall prepare for the president a codification of all laws or parts

of laws relating to the preparation and transmission to congress of statements of receipts and expenditures of the government and of estimates of appropriations. The president shall transmit the same to congress on or before the first Monday in December, 1921, with a recommendation as to the changes which, in his opinion, should be made in such laws or parts of laws.

Sec. 211. The powers and duties relating to the compiling of estimates now conferred and imposed upon the division of bookkeeping and warrants of the office of the secretary of the treasury are transferred to the bureau.

Sec. 212. The bureau shall, at the request of any committee of either house of congress having jurisdiction over revenue or appropriations, furnish the committee such aid and information as it may request.

Sec. 213. Under such regulations as the president may prescribe, (1) every department and establishment shall furnish to the bureau such information as the bureau may from time to time require, and (2) the director and the assistant director, or any employe of the bureau when duly authorized, shall, for the purpose of securing such information, have access to, and the right to examine, any books, documents, papers or records of any such department or establishment.

Sec. 214. (a) The head of each department and establishment shall designate an official thereof as budget officer therefor, who, in each year under his direction and on or before a date fixed by him, shall prepare the departmental estimates.

(b) Such budget officer shall also prepare, under the direction of the head of the department or establishment, such supplemental and deficiency estimates as may be required for its work.

Sec. 215. The head of each department and establishment shall revise the departmental estimates and submit them to the bureau on or before Sept. 15 of each year. In case of his failure so to do, the president shall cause to be prepared such estimates and data as are necessary to enable him to include in the budget estimates and statements in respect to the work of such department or establishment.

Sec. 216. The departmental estimates and any supplemental or deficiency estimates submitted to the bureau by the head of any department or establishment shall be prepared and submitted in such form, manner and detail as the president may prescribe.

Sec. 217. For expenses of the establishment and maintenance of the bureau there is appropriated, out of any money in the treasury not otherwise appropriated, the sum of $225,000 to continue available during the fiscal year ending June 30, 1922.

Title III.—General Accounting Office.

Sec. 301. There is created an establishment of the government to be known as the general accounting office, which shall be independent of the executive departments and under the control and direction of the comptroller-general of the United States. The offices of comptroller of the treasury and assistant comptroller of the treasury are abolished, to take effect July 1, 1921. All other officers and employes of the office of the comptroller of the treasury shall become officers and employes in the general accounting office at their grades and salaries on July 1, 1921, and all books, records, documents, papers, furniture, office equipment and other property of the office of the comptroller of the treasury shall become the property of the general accounting office. The comptroller-general is authorized to adopt a seal for the general accounting office.

Sec. 302. There shall be in the general accounting office a comptroller-general of the United States and an assistant comptroller-general of the United States, who shall be appointed by the president with the advice and consent of the senate, and shall receive salaries of $10,000 and $7,500 a year, respectively. The assistant comptroller-general shall perform such duties as may be assigned to him by the comptroller-general, and during the absence or incapacity of the comptroller-general, or during a vacancy in that office, shall act as comptroller-general.

Sec. 303. Except as hereinafter provided in this section, the comptroller-general and the assistant comptroller-general shall hold office for fifteen years. The comptroller-general shall not be eligible for reappointment. The comptroller-general or the assistant comptroller-general may be removed at any time by joint resolution of congress after notice and hearing, when, in the judgment of congress, the comptroller-general or assistant comptroller-general has become permanently incapacitated or has been inefficient, or guilty of neglect of duty, or of malfeasance in office, or of any felony or conduct involving moral turpitude, and for no other cause and in no other manner except by impeachment. Any comptroller-general or assistant comptroller-general removed in the manner herein provided shall be ineligible for reappointment to that office. When a comptroller-general or assistant comptroller-general attains the age of 70 years he shall be retired from his office.

Sec. 304. All powers and duties now conferred or imposed by law upon the comptroller of the treasury or the six auditors of the treasury department, and the duties of the division of bookkeeping and warrants of the office of the secretary of the treasury relating to keeping the personal ledger accounts of disbursing and collecting officers, shall, so far as not inconsistent with this act, be vested in and imposed upon the general accounting office and be exercised without direction from any other officer. The balances certified by the comptroller-general shall be final and conclusive upon the executive branch of the government. The revision by the comptroller-general of settlements made by the six auditors shall be discontinued, except as to settlements made before July 1, 1921.

The administrative examination of the accounts and vouchers of the postal service now imposed by law upon the auditor for the postoffice department shall be performed on and after July 1, 1921, by a bureau in the postoffice department to be known as the bureau of accounts, which is hereby established for that purpose. The bureau of accounts shall be under the direction of a comptroller, who shall be appointed by the president with the advice and consent of the senate, and shall receive a salary of $5,000 a year. The comptroller shall perform the administrative duties now performed by the auditor for the postoffice department and such other duties in relation thereto as the postmaster-general may direct. The appropriation of $5,000 for the salary of the auditor for the postoffice department for the fiscal year 1922 is transferred and made available for the salary of the comptroller, bureau of accounts, postoffice department. The officers and employes of the office of the auditor for the postoffice department engaged in the administrative examination of accounts shall become officers and employes of the bureau of accounts at their grades and salaries on July 1, 1921. The appropriations for salaries and for contingent and miscellaneous expenses and tabulating equipment for such office for the fiscal year 1922, and all books, records, documents, papers, furniture, office equipment and other property shall be apportioned

between, transferred to and made available for the bureau of accounts and the general accounting office, respectively, on the basis of duties transferred.

Sec. 305. Section 236 of the revised statutes is amended to read as follows:

"Sec. 236. All claims and demands whatever by the government of the United States or against it, and all accounts whatever in which the government of the United States is concerned, either as debtor or creditor, shall be settled and adjusted in the general accounting office."

Sec. 306. All laws relating generally to the administration of the departments and establishments shall, so far as applicable, govern the general accounting office. Copies of any books, records, papers or documents, and transcripts from the books and proceedings of the general accounting office, when certified by the comptroller-general or the assistant comptroller-general under its seal, shall be admitted as evidence with the same effect as the copies and transcripts referred to in sections 882 and 886 of the revised statutes.

Sec. 307. The comptroller-general may provide for the payment of accounts or claims adjusted and settled in the general accounting office, through disbursing officers of the several departments and establishments, instead of by warrant.

Sec. 308. The duties now appertaining to the division of public moneys of the office of the secretary of the treasury, so far as they relate to the covering of revenues and repayments into the treasury, the issue of duplicate checks and warrants and the certification of outstanding liabilities for payment, shall be performed by the division of bookkeeping and warrants of the office of the secretary of the treasury.

Sec. 309. The comptroller-general shall prescribe the forms, systems and procedure for administrative appropriation and fund accounting in the several departments and establishments, and for the administrative examination of fiscal officers' accounts and claims against the United States.

Sec. 310. The offices of the six auditors shall be abolished, to take effect July 1, 1921. All other officers and employes of these offices, except as otherwise provided herein, shall become officers and employes of the general accounting office at their grades and salaries on July 1, 1921. All books, records, documents, papers, furniture, office equipment and other property of these offices, and of the division of bookkeeping and warrants, so far as they relate to the work of such division transferred by section 304, shall become the property of the general accounting office. The general accounting office shall occupy temporarily the rooms now occupied by the office of the comptroller of the treasury and the six auditors.

Sec. 311. (a) The comptroller-general shall appoint, remove and fix the compensation of such attorneys and other employes in the general accounting office as may from time to time be provided for by law.

(b) All such appointments, except to positions carrying a salary at a rate of more than $5,000 a year, shall be made in accordance with the civil-service laws and regulations.

(c) No person appointed by the comptroller-general shall be paid a salary at a rate of more than $6,000 a year and not more than four persons shall be paid a salary at a rate of more than $5,000 a year.

(d) All officers and employes of the general accounting office, whether transferred thereto or appointed by the comptroller-general, shall perform such duties as may be assigned to them by him

(e) All official acts performed by such officers or employes specially designated therefor by the comptroller-general shall have the same force and effect as though performed by the comptroller-general in person.

(f) The comptroller-general shall make such rules and regulations as may be necessary for carrying on the work of the general accounting office, including rules and regulations concerning the admission of attorneys to practice before such office.

Sec. 312. (a) The comptroller-general shall investigate, at the seat of government or elsewhere, all matters relating to the receipt, disbursement and application of public funds, and shall make to the president when requested by him, and to congress at the beginning of each regular session, a report in writing of the work of the general accounting office, containing recommendations concerning the legislation he may deem necessary to facilitate the prompt and accurate rendition and settlement of accounts and concerning such other matters relating to the receipt, disbursement and application of public funds as he may think advisable. In such regular report, or in special reports at any time when congress is in session, he shall make recommendations looking to greater economy or efficiency in public expenditures.

(b) He shall make such investigations and reports as shall be ordered by either house of congress or by any committee of either house having jurisdiction over revenue, appropriations or expenditures. The comptroller-general shall also, at the request of any such committee, direct assistants from his office to furnish the committee such aid and information as it may request.

(c) The comptroller-general shall specially report to congress every expenditure or contract made by any department or establishment in any year in violation of law.

(d) He shall submit to congress reports upon the adequacy and effectiveness of the administrative examination of accounts and claims in the respective departments and establishments and upon the adequacy and effectiveness of departmental inspection of the offices and accounts of fiscal officers.

(e) He shall furnish such information relating to expenditures and accounting to the bureau of the budget as it may request from time to time.

Sec. 313. All departments and establishments shall furnish to the comptroller-general such information regarding the powers, duties, activities, organization, financial transactions and methods of business of their respective offices as he may from time to time require of them; and the comptroller-general, or any of his assistants or employes, when duly authorized by him, shall, for the purpose of securing such information, have access to and the right to examine any books, documents, papers or records of any such department or establishment. The authority contained in this section shall not be applicable to expenditures made under the provisions of section 291 of the revised statutes.

Sec. 314. The civil service commission shall establish an eligible register for accountants for the general accounting office and the examinations of applicants for entrance upon such register shall be based upon questions approved by the comptroller-general.

Sec. 315. (a) All appropriations for the fiscal year ending June 30, 1922, for the offices of the comptroller of the treasury and the six auditors are transferred to and made available for the general accounting office, except as otherwise provided herein.

(b) During such fiscal year the comptroller-general, within the limit of the total appropriations available for the general accounting office, may make such changes in the number and compensation of officers and employes ap-

pointed by him or transferred to the general accounting office under this act as may be necessary.

(c) There shall also be transferred to the general accounting office such portions of the appropriations for rent and contingent and miscellaneous expenses, including allotments for printing and binding, made for the treasury department for the fiscal year ending June 30, 1922, as are equal to the amounts expended from similar appropriations during the fiscal year ending June 30, 1921, by the treasury department for the offices of the comptroller of the treasury and the six auditors.

(d) During the fiscal year ending June 30, 1922, the appropriations and portions of appropriations referred to in this section shall be available for salaries and expenses of the general accounting office, including payment for rent in the District of Columbia, traveling expenses, the purchase and exchange of law books, books of reference, and for all necessary miscellaneous and contingent expenses.

Sec. 316. The general accounting office and the bureau of accounts shall not be construed to be a bureau or office created since Jan. 1, 1916, so as to deprive employes therein of the additional compensation allowed civilian employes under the provisions of section 6 of the legislative, executive and judicial appropriation act for the fiscal year ending June 30, 1922, if otherwise entitled thereto.

Sec. 317. The provisions of law prohibiting the transfer of employes of executive departments and independent establishments until after service of three years shall not apply during the fiscal year ending June 30, 1922, to the transfer of employes to the general accounting office.

Sec. 318. This act shall take effect upon its approval by the president: Provided, that sections 301 to 317, inclusive, relating to the general accounting office and the bureau of accounts, shall take effect July 1, 1921. (Approved June 10, 1921.)

STRENGTH OF THE ARMY.

The act making appropriations for the support of the army, approved June 30, 1921, fixed the number of enlisted men in the army at 150,000. The paragraph making this change follows:

For pay of the enlisted men of the line and staff, $77,741,370. The secretary of war shall discharge from the military service with pay and with the form of discharge certificate to which the service of each, after enlistment, shall entitle him, all enlisted men under the age of 18 on the application of either of their parents or legal guardian, and shall also furnish to each transportation in kind from the place of discharge to the railroad station at or nearest to the place of acceptance for enlistment, or to his home if the distance thereto is no greater than from the place of discharge to the place of acceptance for enlistment, but if the distance be greater he may be furnished with transportation in kind for a distance equal to that from place of discharge to place of acceptance for enlistment; and the secretary of war is directed under such reasonable regulations as he may prescribe to grant applications for discharge of enlisted men serving in the continental United States without regard to the provisions of existing law respecting discharges until the number in the army has been reduced to 150,000 enlisted men, not including the Philippine scouts. The provisions of this paragraph shall take effect immediately upon the approval of this act.

INCREASE OF THE NAVY

The naval appropriation act, approved July 12, made the following provision for the increase of the navy:

Increase of the navy, construction and machinery: On account of hulls and outfits of vessels and machinery of vessels heretofore authorized, to be available until expended, $53,000,000.

Increase of the navy, torpedo boats: On account of submarine torpedo boats heretofore authorized, to be available until expended, $4,000,000.

Increase of the navy, armor and armament: Toward the armor and armament for vessels heretofore authorized, to be available until expended, $33,000,000.

Total increase of the navy heretofore authorized, $90,000,000: Provided, That no part of this appropriation can be expended except on vessels now being constructed.

ARMY AIR SERVICE.

The act making appropriations for the support of the army, approved June 30, 1921, contained the following provisions for the army air service:

For creating, maintaining and operating at established flying schools and balloon schools courses of instruction for officers, students and enlisted men, including list of equipment and supplies necessary for instruction, purchase of tools, equipment, materials, machines, textbooks, books of reference, scientific and professional papers, instruments and materials for theoretical and practical instruction; for maintenance, repair, storage and operation of airships, war balloons and other aerial machines, including instruments, materials, gas plants, hangars and repair shops, and appliances of every sort and description necessary for the operation, construction or equipment of all types of aircraft; and all necessary spare parts and equipment connected therewith; for purchase of supplies for securing, developing, printing and reproducing photographs in connection with aerial photography, improvement, equipment, maintenance and operation of plants for testing and experimental work, and procuring and introducing water, electric light and power, gas and sewerage, including maintenance, operation and repair of such utilities at such plants; for the acquisition of land or interest in land by purchase, lease or condemnation where necessary to explore for, procure or reserve helium gas, and also for the purchase, manufacture, construction, maintenance and operation of plants for the production thereof and experimentation therewith; salaries and wages of civilian employes as may be necessary and payment of their traveling and other necessary expenses as authorized by existing law; experimental investigation and purchase and development of new types of aircraft, accessories thereto and aviation engines, including patents and other rights thereto, and plans, drawings and specifications thereof; for the purchase, manufacture and construction of airships, balloons and other aerial machines, including instruments, gas plants, hangars and repair shops, and appliances of every sort and description necessary for the operation, construction or equipment of all types of aircraft, and all necessary spare parts and equipment connected therewith; for the purchase, manufacture and issue of special clothing, wearing apparel and similar equipment for aviation purposes; for all necessary expenses connected with the sale or disposal of surplus or obsolete aeronautical equipment and the rental of buildings, and other facilities for the handling or storage of such equipment; for the services of such consulting engineers at experimental stations of the air service as the secretary of war may deem necessary, including necessary traveling expenses; purchase of special apparatus and appliances, repairs and replacements of same used in connection with special scientific

medical research in the air service; for printing and binding, including supplies, equipment and repairs for such air service printing plants outside of the District of Columbia as may be authorized in accordance with law; for publications, station libraries, special furniture, supplies and equipment for offices, shops and laboratories; for special services, including the salvaging of wrecked aircraft, $19,200,000: Provided, that not to exceed $4,000,000 from this appropriation may be expended for pay and expenses of civilian employes other than those employed in experimental and research work; not exceeding $250,000 may be expended for experimentation, conservation and production of helium; not exceeding $4,300,000 may be expended for experimental and research work with airplanes or lighter-than-air craft and their equipment, including the pay of necessary civilian employes; not exceeding $500,000 may be expended for the production of lighter-than-air equipment; and not exceeding $350,000 may be expended for improvement of stations, hangars and gas plants: Provided further, That not less than $5,500,000 shall be expended for the production and purchase of new airplanes and their equipment, spare parts and accessories.

NAVAL BUREAU OF AERONAUTICS.

The naval appropriation bill approved July 12, 1921, contained the following section:

There is hereby created and established in the department of the navy a bureau of aeronautics, which shall be charged with matters pertaining to naval aeronautics as may be prescribed by the secretary of the navy, and all of the duties of said bureau shall be performed under the authority of the secretary of the navy and its orders shall be considered as emanating from him, and shall have full force and effect as such.

There shall be a chief of the bureau of aeronautics, appointed by the president, by and with the advice and consent of the senate, from among the officers of the active list of the navy or marine corps who shall, within one year after his appointment, qualify as an aircraft pilot or observer, for a period of four years, and who shall, while holding such position, have the corresponding rank and receive the same pay and allowances as are now or may hereafter be prescribed by or in pursuance of law for chiefs of bureaus of the department of the navy.

An officer of the active list of the navy or marine corps may be detailed as assistant chief of the bureau of aeronautics, and such officer shall receive the highest pay of his grade, and in case of the death, resignation, absence or sickness of the chief of the bureau shall, until otherwise directed by the president, as provided by section 179 of the revised statutes, perform the duties of such chief until his successor is appointed or such absence or sickness shall cease.

There shall be a chief clerk at a salary of $2,250 per annum.

The secretary of the navy is authorized to transfer to the bureau of aeronautics such number of the civilian, technical, clerical and messenger personnel, together with such records, equipment and facilities now assigned for aeronautic work under the various bureaus of the department of the navy or marine corps, as in his judgment may be necessary. The unexpended and unobligated portion of all moneys heretofore appropriated for any bureau of the department of the navy or marine corps used in connection with aeronautics, including the appropriation "aviation, navy," is hereby made available for the use of the bureau of aeronautics.

The number of officers and enlisted men of the navy and marine corps detailed to duty in aircraft and involving actual flying and to duties in connection with aircraft shall hereafter be in accordance with the requirements of naval aviation as determined by the secretary of the navy. Provided, That not to exceed 30 per centum of the officers in each grade below that of rear-admiral who fail to qualify as aircraft pilots or as aircraft observers within one year after the date of their detail into the bureau of aeronautics shall be permitted to remain detailed in this bureau: Provided further, That flying units or detachments, with the exception of aircraft carriers or other vessels, shall in all cases be commanded by flying officers.

The act set aside for aviation, to be expended under the direction of the secretary of the navy, the following amounts: For aircraft and accessories in course of construction or manufacture on June 30, 1921, $440,000; for new construction and procurement of aircraft and equipment, $5,323,000; for navigational, photographic and aerological equipment, including repairs thereto, for use with aircraft built or building on June 30, 1921, $49,250; for maintenance, repair and operation of aircraft factory, helium plant, air stations, fleet activities, testing laboratories, and for overhauling of planes, $4,534,181; for continuing experiments and development work on all types of aircraft, $1,615,000; for drafting, clerical, inspection and messenger service for aircraft stations, $275,000; new construction, buildings and improvements at air stations at a total cost not to exceed $1,177,000, as follows: Coco Solo, $392,000; Hampton roads, $70,000; Lakehurst, $280,000; Pearl Harbor, $185,000; Pensacola, $100,000; San Diego, $150,000; in all, $13,413,431.

DEPOSITS FOR FEDERAL LAND BANKS.

Section 32 of the federal farm loan act, approved July 17, 1916, as amended, is hereby amended by adding after the first paragraph a new paragraph to read as follows:

"Until such time as the aggregate paid-in capital stock of the twelve federal land banks shall be $50,000,000, or more, the secretary of the treasury may in his discretion make deposits in addition to those authorized by the preceding paragraph, to be secured, redeemed and paid in the same manner as provided in such paragraph, except that any additional deposit made hereunder shall be called by the secretary of the treasury and redeemed by the bank or banks holding the same, within fifteen days after the conclusion of each general offering of farm loan bonds by such bank or banks. The aggregate of such additional deposits outstanding at any time shall not exceed the difference between the aggregate paid-in capital stock of the twelve federal land banks on the last day of the preceding month and the sum of $50,000,000. The certificates of indebtedness issued to the secretary of the treasury by the federal land bank for such additional deposits shall bear a rate of interest not exceeding by more than one-half of 1 per centum per annum the rate borne by the last bond issue of the land bank receiving such deposits." (Approved July 1, 1921.)

IMMIGRATION OF ALIENS LIMITED.

As used in this act the term "United States" means the United States and any waters, territory or other place subject to the jurisdiction thereof except the Canal Zone and the Philippine islands; but if any alien leaves the Canal Zone or any insular possession of the United States and attempts to enter any other place under the jurisdiction of the United States nothing contained in this act shall be construed as permitting him to enter

under any other conditions than those applicable to all aliens.

The word "alien" includes any person not a native-born or naturalized citizen of the United States, but this definition shall not be held to include Indians of the United States not taxed nor citizens of the islands under the jurisdiction of the United States.

The term "immigration act" means the act of Feb. 5, 1917, entitled "An act to regulate the immigration of aliens to, and the residence of aliens in, the United States"; and the term "immigration laws" includes such act and all laws, conventions and treaties of the United States relating to the immigration, exclusion or expulsion of aliens.

Sec. 2. (a) The number of aliens of any nationality who may be admitted under the immigration laws to the United States in any fiscal year shall be limited to 3 per centum of the number of foreign-born persons of such nationality resident in the United States as determined by the United States census of 1910. This provision shall not apply to the following and they shall not be counted in reckoning any of the percentage limits provided in this act: (1) Government officials, their families, attendants, servants and employes; (2) aliens in continuous transit through the United States; (3) aliens lawfully admitted to the United States who later go in transit from one part of the United States to another through foreign contiguous territory; (4) aliens visiting the United States as tourists or temporarily for business or pleasure; (5) aliens from countries immigration from which is regulated in accordance with treaties or agreements relating solely to immigration; (6) aliens from the so-called Asiatic barred zone, as described in section 3 of the immigration act; (7) aliens who have resided continuously for at least one year immediately preceding the time of their admission to the United States in the dominion of Canada, Newfoundland, the republic of Cuba, the republic of Mexico, countries of Central or South America or adjacent islands; or (8) aliens under the age of 18 who are children of citizens of the United States.

(b) For the purposes of this act nationality shall be determined by country of birth, treating as separate countries the colonies or dependencies for which separate enumeration was made in the United States census of 1910.

(c) The secretary of state, the secretary of commerce and the secretary of labor, jointly, shall, as soon as feasible after the enactment of this act, prepare a statement showing the number of persons of the various nationalities resident in the United States as determined by the United States census of 1910, which statement shall be the population basis for the purposes of this act. In case of changes in political boundaries in foreign countries occurring subsequent to 1910 and resulting (1) in the creation of new countries the governments of which are recognized by the United States, or (2) in the transfer of territory from one country to another, such transfer being recognized by the United States, such officials, jointly, shall estimate the number of persons resident in the United States in 1910 who were born within the area included in such new countries or in such territory so transferred, and revise the population basis as to each country involved in such change of political boundary. For the purpose of such revision and for the purposes of this act generally aliens born in the area included in any such new country shall be considered as having been born in such country, and aliens born in any territory so transferred shall be considered as having been born in the country to which such territory was transferred.

(d) When the maximum number of aliens of any nationality who may be admitted in any fiscal year under this act shall have been admitted all other aliens of such nationality, except as otherwise provided in this act, who may apply for admission during the same fiscal year shall be excluded: Provided, That the number of aliens of any nationality who may be admitted in any month shall not exceed 20 per centum of the total number of aliens of such nationality who are admissible in that fiscal year: Provided, further, That aliens returning from a temporary visit abroad, aliens who are professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, aliens belonging to any recognized, learned profession or aliens employed as domestic servants, may, if otherwise admissible, be admitted notwithstanding the maximum number of aliens of the same nationality admissible in the same month or fiscal year, as the case may be, shall have entered the United States; but aliens of the classes included in this proviso who enter the United States before such maximum number shall have entered shall (unless excluded by subdivision (a) from being counted) be counted in reckoning the percentage limits provided in this act: Provided, further, That in the enforcement of this act preference shall be given so far as possible to the wives, parents, brothers, sisters, children under 18 years of age and fiancees (1) of citizens of the United States, (2) of aliens now in the United States who have applied for citizenship in the manner provided by law or (3) of persons eligible to United States citizenship who served in the military or naval citizens of the United States, (2) of aliens tween April 6, 1917, and Nov. 11, 1918, both dates inclusive, and have been separated from such forces under honorable conditions.

Sec. 3. That the commissioner-general of immigration, with the approval of the secretary of labor, shall, as soon as feasible after the enactment of this act, and from time to time thereafter, prescribe rules and regulations necessary to carry the provisions of this act into effect. He shall, as soon as feasible after the enactment of this act, publish a statement showing the number of aliens of the various nationalities who may be admitted to the United States between the date this act becomes effective and the end of the current fiscal year, and on June 30 thereafter he shall publish a statement showing the number of aliens of the various nationalities who may be admitted during the ensuing fiscal year. He shall also publish monthly statements during the time this act remains in force showing the number of aliens of each nationality already admitted during the then current fiscal year and the number who may be admitted under the provisions of this act during the remainder of such year, but when 75 per centum of the maximum number of any nationality admissible during the fiscal year shall have been admitted, such statements shall be issued weekly thereafter. All statements shall be made available for general publication and shall be mailed to all transportation companies bringing aliens to the United States who shall request the same and shall file with the department of labor the address to which such statements shall be sent. The secretary of labor shall also submit such statements to the secretary of state, who shall transmit the information contained therein to the proper diplomatic and consular officials of the United States, which officials shall make the same available to persons intending to emigrate to the United States and to others who may apply.

Sec. 4. That the provisions of this act are in addition to and not in substitution for the provisions of the immigration laws.

Sec. 5. That this act shall take effect and be enforced fifteen days after its enactment (except sections 1 and 3 and subdivisions (b) and (c) of section 2, which shall take effect immediately upon the enactment of this act), and shall continue in force until June 30, 1922, and the number of aliens of any nationality who may be admitted during the remaining period of the current fiscal year, from the date when this act becomes effective to June 30, shall be limited in proportion to the number admissible during the fiscal year 1922. (Approved May 19, 1921.)

EMERGENCY TARIFF.

An act imposing temporary duties upon certain agricultural products to meet present emergencies and to provide revenue; to regulate commerce with foreign countries; to prevent dumping of foreign merchandise on the markets of the United States; to regulate the value of foreign money, and for other purposes. Be it enacted, etc.

Title I.—Emergency Tariff.

That on and after the day following the passage of this act, for the period of six months, there shall be levied, collected and paid upon the following articles, when imported from any foreign country into the United States or into any of its possessions (except the Philippine islands, the Virgin islands and the islands of Guam and Tutuila), the rates of duty which are prescribed by this section, namely:

1. Wheat, 35 cents per bushel.

2. Wheat flour and semolina, 20 per centum ad valorem.

3. Flaxseed, 30 cents per bushel of fifty-six pounds.

4. Corn or maize, 15 cents per bushel of fifty-six pounds.

5. Beans, provided for in paragraph 197 of the act entitled "An act to reduce tariff duties and to provide revenue for the government and for other purposes," approved Oct. 3, 1913, 2 cents per pound.

6. Peanuts or ground beans, 3 cents per pound.

7. Potatoes, 25 cents per bushel of sixty pounds.

8. Onions, 40 cents per bushel of fifty-seven pounds.

9. Rice, cleaned, 2 cents per pound, except rice cleaned for use in the manufacture of canned foods, on which the rate of duty shall be 1 cent per pound; uncleaned rice, or rice free of the outer hull and still having the inner cuticle on, 1¾ cents per pound; rice flour, and rice meal, and rice broken which will pass through a number twelve wire sieve of a kind prescribed by the secretary of the treasury, one-fourth of 1 cent per pound; paddy, or rice having the outer hull on, three-fourths of 1 cent per pound.

10. Lemons, 2 cents per pound.

11. Oils: Peanut, 26 cents per gallon; cottonseed, coconut and soya bean, 20 cents per gallon; olive, 40 cents per gallon in bulk, 50 cents per gallon in containers of less than five gallons.

12. Cattle, 30 per centum ad valorem.

13. Sheep: One year old or over, $2 per head; less than one year old, $1 per head.

14. Fresh or frozen beef, veal, mutton, lamb and pork, 2 cents per pound. Meats of all kinds, prepared or preserved, not specially provided for herein, 25 per centum ad valorem.

15. Cattle and sheep and other stock imported for breeding purposes shall be admitted free of duty.

16. Cotton having a staple of one and three-eighths inches or more in length, 7 cents per pound.

17. Manufactures of which cotton of the kind provided for in paragraph 16 is the component material of chief value, 7 cents per pound in addition to the rates of duty imposed thereon by existing law.

18. Wool, commonly known as clothing wool, including hair of the camel, angora goat and alpaca, but not such wools as are commonly known as carpet wools: Unwashed, 15 cents per pound; washed, 30 cents per pound; scoured, 45 cents per pound. Unwashed wools shall be considered such as shall have been shorn from the animal without any cleaning; washed wools shall be considered such as have been washed with water only on the animal's back or on the skin; wools washed in any other manner than on the animal's back or on the skin shall be considered as scoured wool. On wool and hair provided for in this paragraph which is sorted or increased in value by the rejection of any part of the original fleece the duty shall be twice the duty to which it would otherwise be subject, but not more than 45 cents per pound.

19. Wool and hair of the kind provided for in paragraph 18 when advanced in any manner or by any process of manufacture beyond the washed or scoured condition, and manufactures of which wool or hair of the kind provided for in paragraph 18 is the component material of chief value, 45 cents per pound in addition to the rates of duty imposed thereon by existing law.

20. Sugars, tank bottoms, sirups of cane juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above seventy-five degrees, one and sixteen one-hundredths of 1 cent per pound, and for every additional degree shown by the polariscopic test, four one-hundredths of 1 cent per pound additional, and fractions of a degree in proportion; molasses testing not above forty degrees, 24 per centum ad valorem; testing above forty degrees and not above fifty-six degrees, 3½ cents per gallon; testing above fifty-six degrees, 7 cents per gallon; sugar drainings and sugar sweepings shall be subject to duty as molasses or sugar, as the case may be, according to polariscopic test.

21. Butter and substitutes therefor, 6 cents per pound.

22. Cheese and substitutes therefor, 23 per centum ad valorem.

23. Milk, fresh, 2 cents per gallon; cream, 5 cents per gallon.

24. Milk, preserved or condensed or sterilized by heating or other processes, including weight of immediate coverings, 2 cents per pound; sugar of milk, 5 cents per pound.

25. Wrapper tobacco and filler tobacco when mixed or packed with more than 15 per cent of wrapper tobacco, and all leaf tobacco the product of two or more countries or dependencies when mixed or packed together, if unstemmed, $2.35 per pound; stemmed, $3 per pound; filler tobacco not specially provided for in this section, if unstemmed, 35 cents per pound; if stemmed, 50 cents per pound.

The term "wrapper tobacco" as used in this section means that quality of leaf tobacco which has the requisite color, texture and burn and is of sufficient size for cigar wrappers, and the term "filler tobacco" means all other leaf tobacco.

26. Apples, 30 cents per bushel.

27. Cherries, in a raw state, preserved in brine or otherwise, 3 cents per pound.

28. Olives, in solution, 25 cents per gallon; olives, not in solution, 3 cents per pound.

Sec. 2. The rates of duty imposed by section 1 (except under paragraphs 17 and 19) in the case of articles on which a rate of duty is imposed by existing law shall be in lieu of such rate of duty during the six months' period referred to in section 1.

Sec. 3. After the expiration of the six months' period referred to in section 1, the rates of duty upon the articles therein enumerated shall be those, if any, imposed thereon by existing law.

Sec. 4. The duties imposed by this title shall be levied, collected and paid on the same basis, in the same manner and subject to the same provisions of law, including penalties, as the duties imposed by such act of 1913.

Sec. 5. That this title shall be cited as the "Emergency tariff act."

Title II.—Antidumping.

Dumping Investigation.

Sec. 201. (a) That whenever the secretary of the treasury (hereinafter in this act called the "secretary"), after such investigation as he deems necessary, finds that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation into the United States of a class or kind of foreign merchandise and that merchandise of such class or kind is being sold or is likely to be sold in the United States or elsewhere at less than its fair value, then he shall make such finding public to the extent he deems necessary, together with a description of the class or kind of merchandise to which it applies in such detail as may be necessary for the guidance of the appraising officers.

(b) Whenever, in the case of any imported merchandise of a class or kind as to which the secretary has not so made public a finding, the appraiser or person acting as appraiser has reason to believe or suspect, from the invoice or other papers or from information presented to him, that the purchase price is less or that the exporter's sales price is less or likely to be less than the foreign market value (or in the absence of such value than the cost of production) he shall forthwith, under regulations prescribed by the secretary, notify the secretary of such fact and withhold his appraisement report to the collector as to such merchandise until the further order of the secretary or until the secretary has made public a finding as provided in subdivision (a) in regard to such merchandise.

Special Dumping Duty.

Sec. 202. (a) That in the case of all imported merchandise, whether dutiable or free of duty, of a class or kind as to which the secretary has made public a finding as provided in section 201, and as to which the appraiser or person acting as appraiser has made no appraisement report to the collector before such finding has been so made public, if the purchase price or the explorer's sales price is less than the foreign market value (or, in the absence of such value, than the cost of production) there shall be levied, collected and paid, in addition to the duties imposed thereon by law, a special dumping duty in an amount equal to such difference.

(b) If it is established to the satisfaction of the appraising officers that the amount of such difference between the purchase price and the foreign market value is wholly or partly due to the fact that the wholesale quantities, in which such or similar merchandise is sold or freely offered for sale to all purchasers for exportation to the United States in the ordinary course of trade, are greater than the wholesale quantities in which such or similar merchandise is sold or freely offered for sale to all purchasers in the principal markets of the country of exportation in the ordinary course of trade for home consumption (or, if not so sold or offered for sale for home consumption, then for exportation to countries other than the United States), then due allowance shall be made therefor in determining the foreign market value for the purposes of this section.

(c) If it is established to the satisfaction of the appraising officers that the amount of such difference between the exporter's sales price and the foreign market value is wholly or partly due to the fact that the wholesale quantities, in which such or similar merchandise is sold or freely offered for sale to all purchasers in the principal markets of the United States in the ordinary course of trade, are greater than the wholesale quantities in which such or similar merchandise is sold or freely offered for sale to all purchasers in the principal markets of the country of exportation in the ordinary course of trade for home consumption (or, if not sold or offered for sale for home consumption, then for exportation to countries other than the United States), then due allowance shall be made therefor in determining the foreign market value for the purposes of this section.

Purchase Price.

Sec. 203. That for the purposes of this title the purchase price of imported merchandise shall be the price at which such merchandise has been purchased or agreed to be purchased, prior to the time of exportation, by the person by whom or for whose account the merchandise is imported, plus, when not included in such price, the cost of all containers and coverings and all other costs, charges and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, less the amount, if any, included in such price, attributable to any additional costs, charges and expenses, and United States import duties, incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States; and plus the amount, if not included in such price, of any export tax imposed by the country of exportation on the exportation of the merchandise to the United States; and plus the amount of any import duties imposed by the country of exportation which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States; and plus the amount

of any taxes imposed in the country of exportation upon the manufacturer, producer or seller, in respect to the manufacture, production or sale of the merchandise, which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States.

Exporter's Sales Price.

Sec. 204. That for the purpose of this title the exporter's sales price of imported merchandise shall be the price at which such merchandise is sold or agreed to be sold in the United States, before or after the time of importation, by or for the account of the exporter, plus, when not included in such price, the cost of all containers and coverings and all other costs, charges and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, less (1) the amount, if any, included in such price, attributable to any additional costs, charges and expenses and United States import duties, incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States, (2) the amount of the commissions, if any, for selling in the United States the particular merchandise under consideration, (3) an amount equal to the expenses, if any, generally incurred by or for the account of the exporter in the United States in selling identical or substantially identical merchandise, and (4) the amount of any export tax imposed by the country of exportation on the exportation of the merchandise to the United States; and plus the amount of any import duties imposed by the country of exportation which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States; and plus the amount of any taxes imposed in the country of exportation upon the manufacturer, producer or seller in respect to the manufacture, production or sale of the merchandise, which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States.

Foreign Market Value.

Sec. 205. That for the purpose of this title the foreign market value of imported merchandise shall be the price, at the time of exportation of such merchandise to the United States, at which such or similar merchandise is sold or freely offered for sale to all purchasers in the principal markets of the country from which exported, in the usual wholesale quantities and in the ordinary course of trade for home consumption (or, if not so sold or offered for sale for home consumption, then for exportation to countries other than the United States), plus, when not included in such price, the cost of all containers and coverings and all other costs, charges and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, except that in the case of merchandise purchased or agreed to be purchased by the person by whom or for whose account the merchandise is imported, prior to the time of exportation, the foreign market value shall be ascertained as of the date of such purchase or agreement to purchase. In the ascertainment of foreign market value for the purposes of this title no pretended sale or offer for sale, and no sale or offer for sale intended to establish a fictitious market, shall be taken into account.

Cost of Production.

Sec. 206. That for the purposes of this title the cost of production of imported merchandise shall be the sum of—

(1) The cost of materials of, and of fabrication, manipulation or other process employed in manufacturing or producing, identical or substantially identical merchandise, at a time preceding the date of shipment of the particular merchandise under consideration which would ordinarily permit the manufacture or production of the particular merchandise under consideration in the usual course of business;

(2) The usual general expenses (not less than 10 per centum of such cost) in the case of identical or substantially identical merchandise;

(3) The cost of all containers and coverings, and all other costs, charges and expenses incident to placing the particular merchandise under consideration in condition, packed ready for shipment to the United States; and

(4) An addition for profit (not less than 8 per centum of the sum of the amounts found under paragraphs 1 and 2) equal to the profit which is ordinarily added, in the case of merchandise of the same general character as the particular merchandise under consideration, by manufacturers or producers in the country of manufacture or production who are engaged in the same general trade as the manufacturer or producer of the particular merchandise under consideration.

Exporter.

Sec. 207. That for the purposes of this title the exporter of imported merchandise shall be the person by whom or for whose account the merchandise is imported into the United States:

(1) If such person is the agent or principal of the exporter, manufacturer or producer; or

(2) If such person owns or controls, directly or indirectly, through stock ownership or control or otherwise, any interest in the business of the exporter, manufacturer or producer; or

(3) If the exporter, manufacturer or producer owns or controls, directly or indirectly, through stock ownership or control or otherwise, any interest in any business conducted by such person; or

(4) If any person or persons, jointly or severally, directly or indirectly, through stock ownership or control or otherwise, own or control in the aggregate 20 per centum or more of the voting power or control in the business carried on by the person by whom or for whose account the merchandise is imported into the United States, and also 20 per centum or more of such power or control in the business of the exporter, manufacturer or producer.

Oaths and Bonds on Entry.

Sec. 208. That in the case of all imported merchandise, whether dutiable or free of duty, of a class or kind as to which the secretary has made public a finding as provided in section 201, and delivery of which has not been made by the collector before such finding has been so made public, unless the person by whom or for whose account such merchandise is imported makes oath before the collector, under regulations prescribed by the secretary, that he is not an exporter, or unless such person declares under oath at the time of entry, under regulations prescribed by the secretary, the exporter's sales price of such merchandise, it shall be unlawful for the collector to deliver the merchandise until such person has made oath before the collector, under regulations prescribed by the secretary, that the merchandise has not been sold or agreed to be sold by such person, and has given bond to the collector, under regulations prescribed by the secretary, with sureties approved by the collector, in an amount equal to the estimated value of the merchandise, conditioned: (1) that he will report to the collector the exporter's sales price of the merchandise within 30 days after such merchan-

dise has been sold or agreed to be sold in the United States, (2) that he will pay on demand from the collector the amount of special dumping duty, if any, imposed by this title upon such merchandise, and (3) that he will furnish to the collector such information as may be in his possession and as may be necessary for the ascertainment of such duty, and will keep such records as to the sale of such merchandise as the secretary may by regulation prescribe.

Duties of Appraisers.

Sec. 209. That in the case of all imported merchandise, whether dutiable or free of duty, of a class or kind as to which the secretary has made public a finding as provided in section 201, and as to which the appraiser or person acting as appraiser has made no appraisement report to the collector before such finding has been so made public, it shall be the duty of each appraiser or person acting as appraiser, by all reasonable ways and means, to ascertain, estimate and appraise (any invoice or affidavit thereto or statement of cost of production to the contrary notwithstanding) and report to the collector the foreign market value or the cost of production, as the case may be, the purchase price, and the exporter's sales price, and any other facts which the secretary may deem necessary for the purposes of this title.

Appeals and Protests.

Sec. 210. That for the purposes of this title the determination of the appraiser or person acting as appraiser as to the foreign market value or the cost of production, as the case may be, the purchase price, and the exporter's sales price, and the action of the collector in assessing special dumping duty, shall have the same force and effect and be subject to the same right of appeal and protest, under the same conditions and subject to the same limitations; and the general appraisers, the board of general appraisers and the court of customs appeals shall have the same jurisdiction, powers and duties in connection with such appeals and protests as in the case of appeals and protests relating to customs duties under existing law.

Drawbacks.

Sec. 211. That the special dumping duty imposed by this title shall be treated in all respects as regular customs duties within the meaning of all laws relating to the drawback of customs duties.

Short Title.

Sec. 212. That this title may be cited as the "Antidumping act, 1921."

Title III.—Assessment of ad Valorem Duties.

Sec. 301. That whenever merchandise which is imported into the United States is subject to an ad valorem rate of duty or to a duty based upon or regulated in any manner by the value thereof, duty shall in no case be assessed on a value less than the export value of such merchandise.

Export Value.

Sec. 302. That for the purpose of this title the export value of imported merchandise shall be the price, at the time of exportation of such merchandise to the United States, at which such or similar merchandise is sold or freely offered for sale to all purchasers in the principal markets of the country from which exported, in the usual wholesale quantities and in the ordinary course of trade, for exportation to the United States, plus, when not included in such price, the cost of all containers and coverings and all other costs, charges and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, less the amount, if any, included in such price, attributable to any additional costs, charges and expenses, and United States import duties, incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States, and plus, if not included in such price, the amount of any export tax imposed by the country of exportation on merchandise exported to the United States.

References to "Value" in Existing Law.

Sec. 303 (a). That wherever in title I of this act, or in the tariff act of 1913 as amended, or in any law of the United States in existence at the time of the enactment of this act relative to the appraisement of imported merchandise (except sections 2874, 2976 and 3016 of the revised statutes and section 801 of the revenue act of 1916), reference is made to the value of imported merchandise (irrespective of the particular phraseology used and irrespective of whether or not such phraseology is limited or qualified by words referring to country or port of exportation or principal markets) such reference shall, in respect to all merchandise imported on or after the day this act takes effect, be construed to refer, except as provided in subdivision (b), to actual market value as defined by the law in existence at the time of the enactment of this act, or to export value as defined by section 302 of this act, whichever is higher.

(b) If the rate of duty upon imported merchandise is in any manner dependent upon the value of any component material thereof, such value shall be an amount determined under the provisions of the tariff act of 1913, as in force prior to the enactment of this act.

Definitions.

Sec. 304. That when used in this title the term "Tariff act of 1913" means the act entitled "An act to reduce tariff duties and provide revenue for the government, and for other purposes," approved Oct. 3, 1913.

Title IV.—General Provisions.

Statements in Invoice.

Sec. 401. That all invoices of imported merchandise and all statements in the form of an invoice, in addition to the statements required by law in existence at the time of the enactment of this act, shall contain such other statements as the secretary may by regulation prescribe, and a statement as to the currency in which made out, specifying whether gold, silver or paper.

Statements at Time of Entry.

Sec. 402. That the owner, importer, consignee or agent making entry of imported merchandise shall set forth upon the invoice, or statement in the form of an invoice, and in the entry, in addition to the statements required by law in existence at the time of the enactment of this act, such statements, under oath if required, as the secretary may by regulation prescribe.

Conversion of Currency.

Sec. 403. (a) That section 25 of the act of Aug. 27, 1894, entitled "An act to reduce taxation, to provide revenue for the government, and for other purposes," is amended to read as follows:

"Sec. 25. That the value of foreign coin as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the director of the mint and be proclaimed by the secretary of the treasury quarterly on the first day of January, April, July and October in each year.

(b) For the purpose of the assessment and

collection of duties upon merchandise imported into the United States on or after the day of the enactment of this act, wherever it is necessary to convert foreign currency into currency of the United States, such conversion, except as provided in subdivision (c), shall be made at the values proclaimed by the secretary under the provisions of section 25 of such act of Aug. 27, 1894, for the quarter in which the merchandise was exported.

(c) If no such value has been proclaimed, or if the value so proclaimed varies by 5 per centum or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate. For the purposes of this subdivision such buying rate shall be the buying rate for cable transfers payable in the foreign currency so to be converted; and shall be determined by the Federal Reserve bank of New York and certified daily to the secretary, who shall make it public at such times, and to such extent as he deems necessary. In ascertaining such buying rate such Federal Reserve bank may in its discretion (1) take into consideration the last ascertainable transactions and quotations, whether direct or through the exchange of other currencies, and (2) if there is no market buying rate for such cable transfers, calculate such rate from actual transactions and quotations in demand or time bills of exchange.

(d) Sections 2903 and 3565 of the revised statutes are repealed.

(e) Section 25 of such act of August 27, 1894, as in force prior to the enactment of this act, and section 2903 of the revised statutes, shall remain in force for the assessment and collection of duties on merchandise imported into the United States prior to the day of the enactment of this act.

Inspection of Exporter's Books.

Sec. 404. That if any person manufacturing, producing, selling, shipping or consigning merchandise exported to the United States fails, at the request of the secretary, or an appraiser, or person acting as appraiser, or a collector, or a general appraiser, or the board of general appraisers, as the case may be, to permit a duly accredited officer of the United States to inspect his books, papers, records, accounts, documents or correspondence pertaining to the market value or classification of such merchandise, then while such failure continues the secretary, under regulations prescribed by him, (1) shall prohibit the importation into the United States of merchandise manufactured, produced, sold, shipped or consigned by such person, and (2) may instruct the collectors to withhold delivery of merchandise manufactured, produced, sold, shipped or consigned by such person. If such failure continues for a period of one year from the date of such instructions the collector shall cause the merchandise, unless previously exported, to be sold at public auction as in the case of forfeited merchandise.

Inspection of Importer's Books.

Sec. 405. That if any person importing merchandise into the United States or dealing in imported merchandise fails, at the request of the secretary, or an appraiser, or person acting as appraiser, or a collector, or a general appraiser, or the board of general appraisers, as the case may be, to permit a duly accredited officer of the United States to inspect his books, papers, records, accounts, documents or correspondence pertaining to the value or classification of such merchandise, then while such failure continues the secretary, under regulations prescribed by him, (1) shall prohibit the importation of merchandise into the United States by or for the account of such person, and (2) shall instruct the collectors to withhold delivery of merchandise imported by or for the account of such person. If such failure continues for a period of one year from the date of such instructions the collector shall cause the merchandise, unless previously exported, to be sold at public auction as in the case of forfeited merchandise.

Definitions.

Sec. 406. That when used in Title II. or Title III. or in this title—

The term "person" includes individuals, partnerships, corporations and associations; and

The term "United States" includes all territories and possessions subject to the jurisdiction of the United States, except the Philippine islands, the Virgin islands, the islands of Guam and Tutuila and the Canal Zone.

Rules and Regulations.

Sec. 407. That the secretary shall make rules and regulations necessary for the enforcement of this act.

Title V.—Dyes and Chemicals.

Sec. 501. (a) That on and after the day following the enactment of this act, for the period of three months, no sodium nitrite, no dyes or dyestuffs, including crudes and intermediates, no product or products derived directly or indirectly from coal tar (including crudes, intermediates, finished or partly finished products, and mixtures and compounds of such coal-tar products), and no synthetic organic drugs or synthetic organic chemicals, shall be admitted to entry or delivered from customs custody in the United States or in any of its possessions unless the secretary determines that such article or a satisfactory substitute therefor is not obtainable in the United States or in any of its possessions in sufficient quantities and on reasonable terms as to quality, price and delivery, and that such article in the quantity to be admitted is required for consumption by an actual consumer in the United States or in any of its possessions within six months after receipt of the merchandise.

(b) Upon the day following the enactment of this act the war trade board section of the department of state shall cease to exist; all clerks and employes of such war trade board section shall be transferred to and become clerks and employes of the treasury department, and all books, documents and other records relating to such dye and chemical import control of such war trade board section shall become books, documents and records of the treasury department. All individual licenses issued by such war trade board section prior to the enactment of this act shall remain in effect during the period of their validity and the importations under such licenses shall be permitted. All unexpended funds and appropriations for the use and maintenance of such war trade board section shall become funds and appropriations available to be expended by the secretary in the exercise of the power and authority conferred upon him by this section.

Sec. 502. That this title may be cited as the "Dye and chemical control act, 1921." (Approved May 27, 1921.)

POSTAL SERVICE RECLASSIFICATION.

From and after July 1, 1921, postmasters of the fourth class shall be paid the same compensation as now provided by law, except that they shall receive 145 per centum of the cancellations of the first $75 or less per quarter, 70 per centum of the next $100 or less per quarter, and on the balance 60 per centum.

As a reward for faithful and meritorious

service special clerks may be appointed in the executive, finance, money order, postal savings, registry, mailing and other divisions of first-class postoffices. Clerks in the executive, finance, money order, postal savings, registry and other divisions of first-class postoffices who were designated as special clerks, finance clerks, cashiers, foremen, bookkeepers, chief stamp clerks, chief mailing clerks and stenographers on June 30, 1920, and who were, on and after July 1, 1920, assigned as clerks of grade five shall, from and after the passage of this act, unless they were demoted for cause, be given the designation and status of special clerks, and assigned to the first or second grade: Provided, That clerks who have been designated as special clerks shall not be demoted except for cause.

Clerks and carriers in the intermediate or automatic grades who were appointed to regular positions before June 5, 1920, and are receiving less than the maximum grade of salary, shall receive credit for all time served as substitute on a basis of one year for each 306 days of eight hours served as substitute, and be promoted to the grade to which such clerk or carrier would have progressed had his original appointment as substitute been to grade one.

Effective July 1, 1921, the minimum salary of foreman in first-class offices shall be $2,100 per annum.

Effective July 1, 1921, the minimum salary of assistant superintendents of mails in postoffices with receipts of $1,000,000, but less than $2,000,000, shall be $2,300 per annum.

Effective July 1, 1921, the salary of assistant postmasters at offices of the second class, where the gross postal receipts are $8,000, but less than $12,000, shall be $1,850 per annum.

The postmaster-general is authorized to pay to the clerks and laborers in first and second class postoffices and letter carriers in the city delivery service the amount due them as overtime in lieu of compensatory time for work performed by them on Sundays intervening between June 5 and July 1, 1920.

The postmaster-general is authorized to pay to persons who have been retired under the act of congress entitled "An act for the retirement of employes in the classified civil service, and for other purposes," approved May 22, 1920, and who have since their retirement been employed in the postal service, the sums to which they are entitled for services heretofore rendered.

The paragraph in the act of congress entitled "An act to reclassify postmasters and employes of the postal service and readjust their salaries and compensation on an equitable basis," approved June 5, 1920, which reads as follows: "On and after July 1, 1921, no supervisory official or employe in the postal service shall be promoted more than $300 during any one year, except when appointed postmaster, inspector in charge or superintendent of the railway mail service." is repealed. (Approved July 21, 1921.)

LANDING OF SUBMARINE CABLES.

No person shall land or operate in the United States any submarine cable directly or indirectly connecting the United States with any foreign country, or connecting one portion of the United States with any other portion thereof, unless a written license to land or operate such cable has been issued by the president of the United States. Provided, That any such cable now laid within the United States without a license granted by the president may continue to operate without such license for a period of ninety days from the date this act takes effect: And provided further, That the conditions of this act shall not apply to cables all of which, including both terminals, lie wholly within the continental United States.

The president may withhold or revoke such license when he shall be satisfied after due notice and hearing that such action will assist in securing rights for the landing or operation of cables in foreign countries, or in maintaining the rights or interests of the United States or of its citizens in foreign countries, or will promote the security of the United States, or may grant such license upon such terms as shall be necessary to assure just and reasonable rates and service in the operation and use of cables so licensed: Provided, That the license shall not contain terms or conditions granting to the licensee exclusive rights of landing or of operation in the United States: And provided further, That nothing herein contained shall be construed to limit the power and jurisdiction heretofore granted the interstate commerce commission with respect to the transmission of messages.

The president is empowered to prevent the landing of any cable about to be landed in violation of this act. When any such cable is about to be or is landed or is being operated, without a license, any district court of the United States exercising jurisdiction in the district in which such cable is about to be or is landed, or any district court of the United States having jurisdiction of the parties, shall have jurisdiction, at the suit of the United States, to enjoin the landing or operation of such cable or to compel, by injunction, the removal thereof.

Whoever knowingly commits, instigates or assists in any act forbidden by section 1 of this act shall be guilty of a misdemeanor and shall be fined not more than $5,000 or imprisoned for not more than one year, or both.

The term "United States" as used in this act includes the Canal Zone, the Philippine islands and all territory, continental or insular, subject to the jurisdiction of the United States of America.

No right shall accrue to any government, person or corporation under the terms of this act that may not be rescinded, changed, modified or amended by the congress. (Approved May 27, 1921.)

PACKERS AND STOCKYARDS ACT, 1921.

Title I.—Definitions.

This act may be cited as the "packers and stockyards act, 1921."

Sec. 2. (a) When used in this act—

(1) The term "person" includes individuals, partnerships, corporations and associations;

(2) The term "secretary" means the secretary of agriculture;

(3) The term "meat food products" means all products and by-products of the slaughtering and meat-packing industry—if edible;

(4) The term "live stock" means cattle, sheep, swine, horses, mules or goats—whether live or dead;

(5) The term "live-stock products" means all products and by-products (other than meats and meat food products) of the slaughtering and meat-packing industry derived in whole or in part from live stock, and

(6) The term "commerce" means commerce between any state, territory or possession or the District of Columbia and any place outside thereof; or between points within the same state, territory or possession or the District of Columbia, but through any place outside thereof, or within any territory or possession or the District of Columbia.

(b) For the purpose of this act (but not in any wise limiting the foregoing definition) a transaction in respect to any article shall be considered to be in commerce if such article

is part of that current of commerce usual in the live-stock and meat-packing industries, whereby live stock, meats, meat food products, live-stock products, dairy products, poultry, poultry products or eggs are sent from one state with the expectation that they will end their transit, after purchase, in another, including, in addition to cases within the above general description, all cases where purchase or sale is either for shipment to another state or for slaughter of live stock within the state and the shipment outside the state of the products resulting from such slaughter. Articles normally in such current of commerce shall not be considered out of such current through resort being had to any means or device intended to remove transactions in respect thereto from the provisions of this act. For the purpose of this paragraph the word "state" includes territory, the District of Columbia, possession of the United States and foreign nation.

Title II.—Packers.

Sec. 201. When used in this act—

The term "packer" means any person engaged in the business (a) of buying live stock in commerce for purposes of slaughter, or (b) of manufacturing or preparing meats or meat food products for sale or shipment in commerce, or (c) of manufacturing or preparing live-stock products for sale or shipment in commerce, or (d) of marketing meats, meat food products, live-stock products, dairy products, poultry, poultry products or eggs in commerce; but no person engaged in such business of manufacturing or preparing live-stock products or in such marketing business shall be considered a packer unless—

(1) Such person is also engaged in any business referred to in clause (a) or (b) above, or unless

(2) Such person owns or controls, directly or indirectly, through stock ownership or control or otherwise, by himself or through his agents, servants or employes, any interest in any business referred to in clause (a) or (b) above, or unless

(3) Any interest in such business of manufacturing or preparing live-stock products or in such marketing business is owned or controlled, directly or indirectly, through stock ownership or control or otherwise by himself or through his agents, servants or employes, by any person engaged in any business referred to in clause (a) or (b) above, or unless

(4) Any person or persons jointly or severally, directly or indirectly, through stock ownership or control or otherwise, by themselves or through their agents, servants or employes, own or control in the aggregate 20 per centum or more of the voting power or control in such business of manufacturing or preparing live-stock products or in such marketing business and also 20 per centum or more of such power or control in any business referred to in clause (a) or (b) above.

Sec. 202. It shall be unlawful for any packer to—

(a) Engage in or use any unfair, unjustly discriminatory or deceptive practice or device in commerce, or

(b) Make or give, in commerce, any undue or unreasonable preference or advantage to any particular person or locality in any respect whatsoever, or subject, in commerce, any particular person or locality to any undue or unreasonable prejudice or disadvantage in any respect whatsoever, or

(c) Sell or otherwise transfer to or for any other packer, or buy or otherwise receive from or for any other packer, any article for the purpose or with the effect of apportioning the supply in commerce between any such packers, if such apportionment has the tendency or effect of restraining commerce or of creating a monopoly in commerce, or

(d) Sell or otherwise transfer to or for any other person, or buy or otherwise receive from or for any other person, any article for the purpose or with the effect of manipulating or controlling prices in commerce or of creating a monopoly in the acquisition of, buying, selling or dealing in any article in commerce, or of restraining commerce, or

(e) Engage in any course of business or do any act for the purpose or with the effect of manipulating or controlling prices in commerce, or of creating a monopoly in the acquisition of, buying, selling or dealing in any article in commerce, or of restraining commerce, or

(f) Conspire, combine, agree or arrange with any other person (1) to apportion territory for carrying on business in commerce, or (2) to apportion purchases or sales of any article in commerce or (3) to manipulate or control prices in commerce; or

(g) Conspire, combine, agree or arrange with any other person to do or aid or abet the doing of any act made unlawful by subdivision (a), (b), (c), (d) or (e).

Sec. 203. (a) Whenever the secretary has reason to believe that any packer has violated or is violating any provision of this title he shall cause a complaint in writing to be served upon the packer, stating his charges in that respect and requiring the packer to attend and testify at a hearing at a time and place designated therein, at least thirty days after the service of such complaint; and at such time and place there shall be afforded the packer a reasonable opportunity to be informed as to the evidence introduced against him (including the right of cross-examination) and to be heard in person or by counsel and through witnesses, under such regulations as the secretary may prescribe. Any person for good cause shown may on application be allowed by the secretary to intervene in such proceeding and appear in person or by counsel. At any time prior to the close of the hearing the secretary may amend the complaint; but in case of any amendment adding new charges the hearing shall, on the request of the packer, be adjourned for a period not exceeding fifteen days.

(b) If, after such hearing, the secretary finds that the packer has violated or is violating any provisions of this title covered by the charges, he shall make a report in writing in which he shall state his findings as to the facts and shall issue and cause to be served on the packer an order requiring such packer to cease and desist from continuing such violation. The testimony taken at the hearing shall be reduced to writing and filed in the records of the department of agriculture.

(c) Until a transcript of the record in such hearing has been filed in the Circuit Court of Appeals of the United States, as provided in section 204, the secretary at any time, upon such notice and in such manner as he deems proper, but only after reasonable opportunity to the packer to be heard, may amend or set aside the report or order, in whole or in part.

(d) Complaints, orders and other processes of the secretary under this section may be served in the same manner as provided in section 5 of the act entitled "An act to create a federal trade commission, to define its powers and duties and for other purposes," approved Sept. 26, 1914.

Sec. 204. (a) An order made under section 203 shall be final and conclusive unless within thirty days after service the packer appeals to the Circuit Court of Appeals for the circuit in which he has his principal place of business, by filing with the clerk of such court a written petition praying that the secretary's order be set aside or modified in the manner stated in the petition, together with a bond in such sum as the court may determine.

conditioned that such packer will pay the costs of the proceedings if the court so directs.

(b) The clerk of the court shall immediately cause a copy of the petition to be delivered to the secretary, and the secretary shall forthwith prepare, certify and file in the court a full and accurate transcript of the record in such proceedings, including the complaint, the evidence and the report and order. If before such transcript is filed the secretary amends or sets aside his report or order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, on notice to the secretary.

(c) At any time after such transcript is filed the court, on application of the secretary, may issue a temporary injunction restraining, to the extent it deems proper, the packer and his officers, directors, agents and employes, from violating any of the provisions of the order pending the final determination of the appeal.

(d) The evidence so taken or admitted, duly certified and filed as aforesaid as a part of the record, shall be considered by the court as the evidence in the case. The proceedings in such cases in the Circuit Court of Appeals shall be made a preferred cause and shall be expedited in every way.

(e) The court may affirm, modify or set aside the order of the secretary.

(f) If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the hearing to be reopened for the taking of such evidence, in such manner and upon such terms and conditions as the court may deem proper. The secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings and his recommendations, if any, for the modification or setting aside of his order, with the return of such additional evidence.

(g) If the Circuit Court of Appeals affirms or modifies the order of the secretary, its decree shall operate as an injunction to restrain the packer and his officers, directors, agents and employes from violating the provisions of such order or such order as modified.

(h) The Circuit Court of Appeals shall have exclusive jurisdiction to review and to affirm, set aside or modify such orders of the secretary, and the decree of such court shall be final except that it shall be subject to review by the Supreme court of the United States upon certiorari, as provided in section 240 of the judicial code, if such writ is duly applied for within sixty days after entry of the decree. The issue of such writ shall not operate as a stay of the decree of the Circuit Court of Appeals, in so far as such decree operates as an injunction, unless so ordered by the Supreme court.

(i) For the purpose of this title the term "Circuit Court of Appeals," in case the principal place of business of the packer is in the District of Columbia, means the Court of Appeals of the District of Columbia.

Sec. 205. Any packer or any officer, director, agent or employe of a packer, who fails to obey any order of the secretary issued under the provisions of section 203, or such order as modified—

(1) After the expiration of the time allowed for filing a petition in the Circuit Court of Appeals to set aside or modify such order, if no such petition has been filed within such time; or

(2) After the expiration of the time allowed for applying for a writ of certiorari, if such order, or such order as modified, has been sustained by the Circuit Court of Appeals and no such writ has been applied for within such time; or

(3) After such order, or such order as modified, has been sustained by the courts as provided in section 204; shall on conviction be fined not less than $500 nor more than $10,000, or imprisoned for not less than six months nor more than five years, or both. Each day during which such failure continues shall be deemed a separate offense.

Title III.—Stockyards.

Sec. 301. When used in this act—

(a) The term "stockyard owner" means any person engaged in the business of conducting or operating a stockyard;

(b) The term "stockyard services" means services or facilities furnished at a stockyard in connection with the receiving, buying or selling on a commission basis or otherwise, marketing, feeding, watering, holding, delivery, shipment, weighing or handling, in commerce, of live stock;

(c) The term "market agency" means any person engaged in the business of (1) buying or selling in commerce live stock at a stockyard on a commission basis or (2) furnishing stockyard services; and

(d) The term "dealer" means any person, not a market agency, engaged in the business of buying or selling in commerce live stock at a stockyard, either on his own account or as the employe or agent of the vender or purchaser.

Sec. 302. (a) When used in this title the term "stockyard" means any place, establishment, or facility commonly known as stockyards, conducted or operated for compensation or profit as a public market, consisting of pens, or other inclosures, and their appurtenances, in which live cattle, sheep, swine, horses, mules or goats are received, held or kept for sale or shipment in commerce. This title shall not apply to a stockyard of which the area normally available for handling live stock, exclusive of runs, alleys or passageways, is less than twenty thousand square feet.

(b) The secretary shall from time to time ascertain, after such inquiry as he deems necessary, the stockyards which come within the foregoing definition, and shall give notice thereof to the stockyard owners concerned, and give public notice thereof, by posting copies of such notice in the stockyard, and in such other manner as he may determine. After the giving of such notice to the stockyard owner and to the public, the stockyard shall remain subject to the provisions of this title until like notice is given by the secretary that such stockyard no longer comes within the foregoing definition.

Sec. 303. After the expiration of thirty days after the secretary has given public notice that any stockyard is within the definition of section 302, by posting copies of such notice in the stockyard, no person shall carry on the business of a market agency or dealer at such stockyard unless he has registered with the secretary under such rules and regulations as the secretary may prescribe, his name and address, the character of business in which he is engaged and the kinds of stockyard services, if any, which he furnishes at such stockyard. Whoever violates the provisions of this section shall be liable to a penalty of not more than $500 for each such offense and not more than $25 for each day it continues, which shall accrue to the United States and may be recovered in a civil action brought by the United States.

Sec. 304. It shall be the duty of every stockyard owner and market agency to fur-

nish upon reasonable request, without discrimination, reasonable stockyard services at such stockyard.

Sec. 305. All rates or charges made for any stockyard services furnished at a stockyard by a stockyard owner or market agency shall be just, reasonable and nondiscriminatory, and any unjust, unreasonable or discriminatory rate or charge is prohibited and declared to be unlawful.

Sec. 306. (a) Within sixty days after the secretary has given public notice that a stockyard is within the definition of section 302, by posting copies of such notice in the stockyard, the stockyard owner and every market agency at such stockyard shall file with the secretary, and print and keep open to public inspection at the stockyard, schedules showing all rates and charges for the stockyard services furnished by such person at such stockyard. If a market agency commences business at the stockyard after the expiration of such sixty days such schedules must be filed before any stockyard services are furnished.

(b) Such schedules shall plainly state all such rates and charges in such detail as the secretary may require, and shall also state any rules or regulations which in any manner change, affect or determine any part or the aggregate of such rates or charges, or the value of the stockyard services furnished. The secretary may determine and prescribe the form and manner in which such schedules shall be prepared, arranged and posted, and may from time to time make such changes in respect thereto as may be found expedient.

(c) No changes shall be made in the rates or charges so filed and published, except after ten days' notice to the secretary and to the public, filed and published as aforesaid, which shall plainly state the changes proposed to be made and the time such changes will go into effect; but the secretary may, for good cause shown, allow changes on less than ten days' notice, or modify the requirements of this section in respect to publishing, posting and filing of schedules, either in particular instances or by a general order applicable to special or peculiar circumstances or conditions.

(d) The secretary may reject and refuse to file any schedule tendered for filing which does not provide and give lawful notice of its effective date, and any schedule so rejected by the secretary shall be void and its use shall be unlawful.

(e) Whenever there is filed with the secretary any schedule, stating a new rate or charge, or a new regulation or practice affecting any rate or charge, the secretary may either upon complaint or upon his own initiative without complaint, at once, and if he so orders without answer or other formal pleading by the person filing such schedule, but upon reasonable notice, enter upon a hearing concerning the lawfulness of such rate, charge, regulation or practice, and pending such hearing and decision thereon the secretary, upon filing with such schedule and delivering to the person filing it a statement in writing of his reason for such suspension, may suspend the operation of such schedule and defer the use of such rate, charge, regulation or practice, but not for a longer period than thirty days beyond the time when it would otherwise go into effect; and after full hearing, whether completed before or after the rate, charge, regulation or practice goes into effect, the secretary may make such order with reference thereto as would be proper in a proceeding initiated after it had become effective. If any such hearing cannot be concluded within the period of suspension the secretary may extend the time of suspension for a further period not exceeding thirty days, and if the proceeding has not been concluded and an order made at the expiration of such thirty days, the proposed change of rate, charge, regulation or practice shall go into effect at the end of such period.

(f) After the expiration of the sixty days referred to in subdivision (a) no person shall carry on the business of a stockyard owner or market agency unless the rates and charges for the stockyard services furnished at the stockyard have been filed and published in accordance with this section and the orders of the secretary made thereunder; nor charge, demand or collect a greater or less or different compensation for such services than the rates and charges specified in the schedules filed and in effect at the time; nor refund or remit in any manner any portion of the rates or charges so specified (but this shall not prohibit a co-operative association of producers from bona fide returning to its members, on a patronage basis, its excess earnings on their live stock, subject to such regulations as the secretary may prescribe); nor extend to any person at such stockyard any stockyard services except such as are specified in such schedules.

(g) Whoever fails to comply with the provisions of this section or of any regulation or order of the secretary made thereunder shall be liable to a penalty of not more than $500 for each such offense, and not more than $25 for each day it continues, which shall accrue to the United States and may be recovered in a civil action brought by the United States.

(h) Whoever willfully fails to comply with the provisions of this section or of any regulation or order of the secretary made thereunder shall on conviction be fined not more than $1,000, or imprisoned not more than one year, or both.

Sec. 307. It shall be the duty of every stockyard owner and market agency to establish, observe and enforce just, reasonable and nondiscriminatory regulations and practices in respect to the furnishing of stockyard services, and every unjust, unreasonable or discriminatory regulation or practice is prohibited and declared to be unlawful.

Sec. 308. (a) If any stockyard owner, market agency or dealer violates any of the provisions of sections 304, 305, 306 or 307, or any order of the secretary made under this title, he shall be liable to the person or persons injured thereby for the full amount of damages sustained in consequence of such violation.

(b) Such liability may be enforced either (1) by complaint to the secretary as provided in section 309, or (2) by suit in any District court of the United States of competent jurisdiction; but this section shall not in any way abridge or alter the remedies now existing at common law or by statute, but the provisions of this act are in addition to such remedies.

Sec. 309. (a) Any person complaining of anything done or omitted to be done by any stockyard owner, market agency, or dealer (hereinafter in this section referred to as the "defendant") in violation of the provisions of sections 304, 305, 306 or 307, or of an order of the secretary made under this title, may, at any time within ninety days after the cause of action accrues, apply to the secretary by petition, which shall briefly state the facts, whereupon the complaint thus made shall be forwarded by the secretary to the defendant, who shall be called upon to satisfy the complaint or to answer it in writing, within a reasonable time to be specified by the secretary. If the

defendant within the time specified makes reparation for the injury alleged to be done he shall be relieved of liability to the complainant only for the particular violation thus complained of. If the defendant does not satisfy the complaint within the time specified, or there appears to be any reasonable ground for investigating the complaint, it shall be the duty of the secretary to investigate the matters complained of in such manner and by such means as he deems proper.

(b) The secretary, at the request of the live-stock commissioner, board of agriculture or other agency of a state or territory having jurisdiction over stockyards in such state or territory, shall investigate any complaint forwarded by such agency in like manner and with the same authority and powers as in the case of a complaint made under subdivision (a).

(c) The secretary may at any time institute an inquiry on his own motion in any case and as to any matter or thing concerning which a complaint is authorized to be made to or before the secretary, by any provision of this title or concerning which any question may arise under any of the provisions of this title or relating to the enforcement of any of the provisions of this title. The secretary shall have the same power and authority to proceed with any inquiry instituted upon his own motion as though he had been appealed to by petition, including the power to make and enforce any order or orders in the case or relating to the matter or thing concerning which the inquiry is had, except orders for the payment of money.

(d) No complaint shall at any time be dismissed because of the absence of direct damage to the complainant.

(e) If after hearing on a complaint the secretary determines that the complainant is entitled to an award of damages the secretary shall make an order directing the defendant to pay to the complainant the sum to which he is entitled on or before a day named.

(f) If the defendant does not comply with an order for the payment of money within the time limit in such order, the complainant, or any person for whose benefit such order was made, may within one year of the date of the order file in the District court of the United States for the district in which he resides or in which is located the principal place of business of the defendant or in any state court having general jurisdiction of the parties, a petition setting forth briefly the causes for which he claims damages and the order of the secretary in the premises. Such suit in the District court shall proceed in all respects like other civil suits for damages except that the findings and orders of the secretary shall be prima facie evidence of the facts therein stated, and the petitioner shall not be liable for costs in the District court nor for costs at any subsequent stage of the proceedings unless they accrue upon his appeal. If the petitioner finally prevails he shall be allowed a reasonable attorney's fee to be taxed and collected as a part of the costs of the suit.

Sec. 310. Whenever after full hearing upon a complaint made as provided in section 309 or after full hearing under an order for investigation and hearing made by the secretary on his own initiative, either in extension of any pending complaint or without any complaint whatever, the secretary is of the opinion that any rate, charge, regulation or practice of a stockyard owner or market agency, for or in connection with the furnishing of stockyard services, is or will be unjust, unreasonable or discriminatory, the secretary—

(a) May determine and prescribe what will be the just and reasonable rate or charge, or rates or charges, to be thereafter observed in such case, or the maximum or minimum, or maximum and minimum, to be charged, and what regulation or practice is or will be just, reasonable and nondiscriminatory to be thereafter followed, and

(b) May make an order that such owner or operator (1) shall cease and desist from such violation to the extent to which the secretary finds that it does or will exist; (2) shall not thereafter publish, demand or collect any rate or charge for the furnishing of stockyard services other than the rate or charge so prescribed, or in excess of the maximum or less than the minimum so prescribed, as the case may be, and (3) shall conform to and observe the regulation or practice so prescribed.

Sec. 311. Whenever in any investigation under the provisions of this title or in any investigation instituted by petition of the stockyard owner or market agency concerned, which petition is hereby authorized to be filed, the secretary after full hearing finds that any rate, charge, regulation or practice of any stockyard owner or market agency, for or in connection with the buying or selling on a commission basis or otherwise, receiving, marketing, feeding, holding, delivery, shipment, weighing or handling, not in commerce, of live stock, causes any undue or unreasonable advantage, prejudice or preference as between persons or localities in intrastate commerce in live stock on the one hand and interstate or foreign commerce in live stock on the other hand, or any undue, unjust or unreasonable discrimination against interstate or foreign commerce in live stock, which is hereby forbidden and declared to be unlawful, the secretary shall prescribe the rate, charge, regulation or practice thereafter to be observed, in such manner as, in his judgment, will remove such advantage, preference or discrimination. Such rates, charges, regulations or practices shall be observed while in effect by the stockyard owners or market agencies parties to such proceeding affected thereby, the law of any state or the decision or order of any state authority to the contrary notwithstanding.

Sec. 312. (a) It shall be unlawful for any stockyard owner, market agency or dealer to engage in or use any unfair, unjustly discriminatory or deceptive practice or device in connection with the receiving, marketing, buying or selling on a commission basis or otherwise, feeding, watering, holding, delivery, shipment, weighing or handling in commerce at a stockyard, of live stock.

(b) Whenever complaint is made to the secretary by any person, or whenever the secretary has reason to believe that any stockyard owner, market agency or dealer is violating the provisions of subdivision (a), the secretary after notice and full hearing may make an order that he shall cease and desist from continuing such violation to the extent that the secretary finds that it does or will exist.

Sec. 313. Except as otherwise provided in this act all orders of the secretary under this title, other than orders for the payment of money, shall take effect within such reasonable time, not less than five days, as is prescribed in the order, and shall continue in force until his further order or for a specified period of time, according as is prescribed in the order, unless such order is suspended or modified or set aside by the secretary or is suspended or set aside by a court of competent jurisdiction.

Sec. 314. (a) Any stockyard owner, market agency or dealer who knowingly fails to obey any order made under the provisions of sections 310, 311 or 312 shall forfeit to the United States the sum of $500 for each offense. Each distinct violation shall be a separate offense, and in case of a continuing violation each day shall be deemed a separate offense. Such forfeiture shall be recoverable

in a civil suit in the name of the United States.

(b) It shall be the duty of the various district attorneys, under the direction of the attorney-general, to prosecute for the recovery of forfeitures. The costs and expense of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Sec. 315. If any stockyard owner, market agency or dealer fails to obey any order of the secretary other than for the payment of money while the same is in effect, the secretary, or any party injured thereby, or the United States by its attorney-general, may apply to the District court for the district in which such person has his principal place of business for the enforcement of such order. If after hearing the court determines that the order was lawfully made and duly served and that such person is in disobedience of the same, the court shall enforce obedience to such order by a writ of injunction or other proper process, mandatory or otherwise, to restrain such person, his officers, agents or representatives from further disobedience of such order or to enjoin upon him or them obedience to the same.

Sec. 316. For the purposes of this title, the provisions of all laws relating to suspending or restraining the enforcement, operation or execution of or the setting aside in whole or in part of the orders of the interstate commerce commission, are made applicable to the jurisdiction, powers and duties of the secretary in enforcing the provisions of this title and to any person subject to the provisions of this title.

Title IV.—General Provisions.

Sec. 401. Every packer, stockyard owner, market agency and dealer shall keep such accounts, records and memoranda as fully and correctly disclose all transactions involved in his business, including the true ownership of such business by stockholding or otherwise. Whenever the secretary finds that the accounts, records and memoranda of any such person do not fully and correctly disclose all transactions involved in his business, the secretary may prescribe the manner and form in which such accounts, records and memoranda shall be kept, and thereafter any such person who fails to keep such accounts, records and memoranda in the manner and form prescribed or approved by the secretary shall upon conviction be fined not more than $5,000, or imprisoned not more than three years, or both.

Sec. 402. For the efficient execution of the provisions of this act, and in order to provide information for the use of congress, the provisions (including penalties) of sections 6, 8, 9 and 10 of the act entitled "An act to create a federal trade commission, to define its powers and duties, and for other purposes," approved Sept. 26, 1914, are made applicable to the jurisdiction, powers and duties of the secretary in enforcing the provisions of this act and to any person subject to the provisions of this act, whether or not a corporation. The secretary, in person or by such agents as he may designate, may prosecute any inquiry necessary to his duties under this act in any part of the United States.

Sec. 403. When construing and enforcing the provisions of this act, the act, omission, or failure of any agent, officer, or other person acting for or employed by any packer, stockyard owner, market agency, or dealer, within the scope of his employment or office, shall in every case also be deemed the act, omission or failure of such packer, stockyard owner, market agency, or dealer, as well as that of such agent, officer, or other person.

Sec. 404. The secretary may report any violation of this act to the attorney-general of the United States, who shall cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States without delay.

Sec. 405. Nothing contained in this act, except as otherwise provided herein, shall be construed—

(a) To prevent or interfere with the enforcement of, or the procedure under, the provisions of the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved Oct. 15, 1914, the interstate commerce act as amended, the act entitled "An act to promote export trade, and for other purposes," approved April 10, 1918, or sections 73 to 77, inclusive, of the act of Aug. 27, 1894, entitled "An act to reduce taxation, to provide revenue for the government, and for other purposes," as amended by the act entitled "An act to amend sections seventy-three and seventy-six of the act of Aug. 27, 1894, entitled 'An act to reduce taxation, to provide revenue for the government, and for other purposes,'" approved Feb. 12, 1913, or

(b) To alter, modify or repeal such acts or any part or parts thereof, or

(c) To prevent or interfere with any investigation, proceedings or prosecution begun and pending at the time this act becomes effective.

Sec. 406. (a) Nothing in this act shall affect the power or jurisdiction of the interstate commerce commission, nor confer upon the secretary concurrent power or jurisdiction over any matter within the power or jurisdiction of such commission.

(b) On and after the enactment of this act, and so long as it remains in effect, the federal trade commission shall have no power or jurisdiction so far as relating to any matter which by this act is made subject to the jurisdiction of the secretary, except in cases in which, before the enactment of this act, complaint has been served under section 5 of the act entitled "An act to create a federal trade commission, to define its power and duties, and for other purposes," approved Sept. 26, 1914, or under section 11 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved Oct. 15, 1914, and except when the secretary of agriculture, in the exercise of his duties hereunder, shall request of the said federal trade commission that it make investigations and report in any case.

Sec. 407. The secretary may make such rules, regulations and orders as may be necessary to carry out the provisions of this act and may co-operate with any department or agency of the government, any state, territory, district, or possession, or department, agency or political subdivision thereof, or any person; and shall have the power to appoint, remove, and fix the compensation of such officers and employes, not in conflict with existing law, and make such expenditures for rent outside the District of Columbia, printing, telegrams, telephones, law books, books of reference, periodicals, furniture, stationery, office equipment, travel, and other supplies and expenses as shall be necessary to the administration of this act in the District of Columbia and elsewhere, and as may be appropriated for by congress, and there is hereby authorized to be appropriated, out of any money in the treasury not otherwise appropriated, such sums as may be necessary for such purpose.

Sec. 408. If any provision of this act or the application thereof to any person or cir-

cumstances is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby. (Approved August 15, 1921.)

REGULATING BOARDS OF TRADE.

This act shall be known by the short title of "The future trading act."

Sec. 2. That for the purposes of this act "contract of sale" shall be held to include sales, agreements of sale and agreements to sell. That the word "person" shall be construed to import the plural or singular and shall include individuals, associations, partnerships, corporations and trusts. That the word "grain" shall be construed to mean wheat, corn, oats, barley, rye, flax and sorghum. The term "future delivery," as used herein, shall not include any sale of cash grain for deferred shipment or delivery. The words "board of trade" shall be held to include and mean any exchange or association, whether incorporated or unincorporated, of persons who shall be engaged in the business of buying or selling grain or receiving the same for sale on consignment. The act, omission, or failure of any official, agent, or other person acting for any individual, association, partnership, corporation, or trust within the scope of his employment or office shall be deemed the act, omission, or failure of such individual, association, partnership, corporation, or trust, as well as of such official, agent, or other person.

Sec. 3. That in addition to the taxes now imposed by law there is hereby levied a tax amounting to 20 cents per bushel on each bushel involved therein, whether the actual commodity is intended to be delivered or only nominally referred to, upon each and every privilege or option for a contract either of purchase or sale of grain, intending hereby to tax only the transactions known to the trade as "privileges," "bids," "offers," "puts and calls," "indemnities," or "ups and downs."

Sec. 4. That in addition to the taxes now imposed by law there is hereby levied a tax of 20 cents a bushel on every bushel involved therein upon each contract of sale of grain for future delivery except—

(a) Where the seller is at the time of making of such contract the owner of the actual physical property covered thereby, or is the grower thereof, or in case either party to the contract is the owner or renter of land on which the same is to be grown, or is an association of such owners, or growers of grain, or of such owners or renters of land; or

(b) Where such contracts are made by or through a member of a board of trade which has been designated by the secretary of agriculture as a "contract market," as hereinafter provided, and if such contract is evidenced by a memorandum in writing which shows the date, the parties to such contract and their addresses, the property covered and its price, and the terms of delivery, and provided that each board member shall keep such memorandum for a period of three years from the date thereof, or for a longer period if the secretary of agriculture shall so direct, which record hall at all times be open to the inspection of any representative of the United States department of agriculture or the United States department of justice.

Sec. 5. That the secretary of agriculture is hereby authorized and directed to designate boards of trade as "contract markets" when, and only when, such boards of trade comply with the following conditions and requirements:

(a) When located at a terminal market upon which cash grain is sold in sufficient volumes and under such conditions as fairly to reflect the general value of the grain and the difference in value between the various grades of grain, and having recognized official weighing and inspection service.

(b) When the governing board thereof provides for the making and filing, by the board or any member thereof, as the secretary of agriculture may direct, of reports in accordance with the rules and regulations, and in such manner and form and at such times as may be prescribed by the secretary of agriculture, showing the details and terms of all transactions entered into by the board, or the members thereof, either in cash transactions consummated at, on, or in a board of trade, or transactions for future delivery, and when such governing board provides, in accordance with such rules and regulations, for the keeping of a record by the board or the members of the board of trade, as the secretary of agriculture may direct, showing the details and terms of all cash and future transactions entered into by them, consummated at, on, or in a board of trade, such record to be in permanent form, showing the parties to all such transactions, any assignments or transfers thereof, with the parties thereto, and the manner in which said transactions are fulfilled, discharged, or terminated. Such record shall be required to be kept for a period of three years from the date thereof, or for a longer period if the secretary of agriculture shall so direct, and shall at all times be open to the inspection of any representative of the United States department of agriculture or United States department of justice.

(c) When the governing board thereof prevents the dissemination, by the board or any member thereof, of false, misleading or inaccurate reports concerning crop or market information or conditions that affect or tend to affect the price of commodities.

(d) When the governing board thereof provides for the prevention of manipulation of prices, or the cornering of any grain, by the dealers or operators upon such board.

(e) When the governing board thereof admits to membership thereof and all privileges thereon on such boards of trade any duly authorized representative of any lawfully formed and conducted co-operative associations of producers having adequate financial responsibility: Provided, That no rule of a contract market against rebating commissions shall apply to the distribution of earnings among the bona fide members of any such co-operative association.

(f) When the governing board shall provide for making effective the final orders or decisions entered pursuant to the provisions of paragraph (b) section 6 of this act.

Sec. 6. That any board of trade desiring to be designated a "contract market" shall make application to the secretary of agriculture for such designation and accompany the same with a showing that it complies with the above conditions, and with a sufficient assurance that it will continue to comply with the above requirements.

(a) A commission composed of the secretary of agriculture, the secretary of commerce, and the attorney-general is authorized to suspend for a period not to exceed six months or to revoke the designation of any board of trade as a "contract market" upon a showing that such board of trade has failed or is failing to comply with the above requirements or is not enforcing its rules of government made a condition of its designation as set forth in section 5. Such suspension or revocation shall only be after a notice to the officers of the board of trade affected and upon a hearing: Provided, that such sus-

pension or revocation shall be final and conclusive unless within fifteen days after such suspension or revocation by the said commission such board of trade appeals to the Circuit Court of Appeals for the circuit in which it has its principal place of business by filing with the clerk of such court a written petition praying that the order of the said commission be set aside or modified in the manner stated in the petition, together with a bond in such sum as the court may determine, conditioned that such board of trade will pay the costs of the proceedings if the court so directs. The clerk of the court in which such a petition is filed shall immediately cause a copy thereof to be delivered to the secretary of agriculture, chairman of said commission, or any member thereof, and the said commission shall forthwith prepare, certify, and file in the court a full and accurate transcript of the record in such proceedings, including the notice to the board of trade, a copy of the charges, the evidence, and the report and order. The testimony and evidence taken or submitted before the said commission, duly certified and filed as aforesaid as a part of the record, shall be considered by the court as the evidence in the case. The proceedings in such cases in the Circuit Court of Appeals shall be made a preferred cause and shall be expedited in every way. Such a count may affirm or set aside the order of the said commission or may direct it to modify its order. No such order of the said commission shall be modified or set aside by the Circuit Court of Appeals unless it is shown by the board of trade that the order is unsupported by the weight of the evidence or was issued without due notice and a reasonable opportunity having been afforded to such board of trade for a hearing, or infringes the constitution of the United States, or is beyond the jurisdiction of said commission: Provided further, That if the secretary of agriculture shall refuse to designate as a contract market any board of trade that has made application therefor, then such board of trade may appeal from such refusal to the commission described therein, consisting of the secretary of agriculture, the secretary of commerce, and the attorney-general of the United States, with the right to appeal as provided for in other cases in this section, the decision on such appeal to be final and binding on all parties interested.

(b) That if the secretary of agriculture has reason to believe that any person is violating any of the provisions of this act, or is attempting to manipulate the market price of any grain in violation of the provisions of section 5 hereof, or of any of the rules or regulations made pursuant to its requirements, he may serve upon such person a complaint stating his charge in that respect, to which complaint shall be attached or contained therein a notice of hearing, specifying a day and place not less than three days after the service thereof, requiring such person to show cause why an order should not be made directing that all contract markets until further notice of the said commission refuse all trading privileges thereon to such person. Said hearing may be held in Washington, District of Columbia, or elsewhere, before the said commission, or before a referee designated by the secretary of agriculture, who shall cause all evidence to be reduced to writing and forthwith transmit the same to the secretary of agriculture as chairman of the said commission. That for the purpose of securing effective enforcement of the provisions of this act, the provisions, including penalties, of section 12 of the interstate commerce act, as amended, relating to the attendance and testimony of witnesses, the production of documentary evidence, and the immunity of witnesses are made applicable to the power, jurisdiction and authority of the secretary of agriculture, the said commission, or said referee in proceedings under this act, and to persons subject to its provisions. Upon evidence received the said commission may require all contract markets to refuse such person all trading privileges thereon for such period as may be specified in said order. Notice of such order shall be sent forthwith by registered mail or delivered to the offending person and to the governing boards of said contract markets. After the issuance of the order by the commission, as aforesaid, the person against whom it is issued may obtain a review of such order or such other equitable relief as to the court may seem just by filing in the United States Circuit Court of Appeals of the circuit in which the petitioner is doing business a written petition praying that the order of the commission be set aside. A copy of such petition shall be forthwith served upon the commission by delivering such copy to its chairman, or to any member thereof, and thereupon the commission shall forthwith certify and file in the court a transcript of the record theretofore made, including evidence received. Upon the filing of the transcript the court shall have jurisdiction to affirm, to set aside, or modify the order of the commission, and the findings of the commission as to the facts, if supported by the weight of evidence, shall in like manner be conclusive. In proceedings under paragraphs (a) and (b) the judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme court upon certiorari, as provided in section 240 of the judicial code.

Sec. 7. That the tax provided for herein shall be paid by the seller, and such tax shall be collected either by the affixing of stamps or by such other method as may have been prescribed by the secretary of the treasury by regulations, and such regulations shall be published at such times and in such manner as shall be determined by the secretary of the treasury.

Sec. 8. That any board of trade that has been designated a contract market, in the manner herein provided, may have such designation vacated and set aside by giving notice in writing to the secretary of agriculture requesting that its designation as a contract market be vacated, which notice shall be served at least ninety days prior to the date named therein as the date when the vacation of designation shall take effect. Upon receipt of such notice the secretary of agriculture shall forthwith order the vacation of the designation of such board of trade as a contract market, effective upon the day named in the notice, and shall forthwith send a copy of the notice and his order to all other contract markets. From and after the date upon which the vacation became effective, the said board of trade can thereafter be designated again a contract market by making application to the secretary of agriculture in the manner herein provided for an original application.

Sec. 9. That the secretary of agriculture may make such investigations as he may deem necessary to ascertain the facts regarding the operations of boards of trade and may publish from time to time, in his discretion, the result of such investigation, and such statistical information gathered therefrom, as he may deem of interest to the public, except data and information which would separately disclose the business transactions of any person, and trade secrets or names of customers: Provided, That nothing in this section shall be construed to prohibit

the secretary of agriculture from making or issuing such reports as he may deem necessary relative to the conduct of any board of trade, or of the transactions of any person found guilty of violating the provisions of this act under the proceedings prescribed in section 6 of this act: Provided further, That the secretary of agriculture in any report may include the facts as to any actual transaction. The secretary of agriculture, upon his own initiative or in co-operation with existing governmental agencies, shall investigate marketing conditions of grain and grain products, and by-products, including supply and demand for these commodities, cost to the consumer, and handling and transportation charges. He shall likewise compile and furnish to producers, consumers, and distributors, by means of regular or special reports, or by such methods as he may deem most effective, information respecting the grain markets, together with information on supply, demand, prices, and other conditions, in this and other countries that affect the markets.

Sec. 10. That any person who shall fail to evidence any such contract by a memorandum in writing, or to keep the record, or make a report, or who shall fail to pay the tax, as provided in sections 4 and 5 hereof, or who shall fail to pay the tax required in section 3 hereof, shall pay in addition to the tax a penalty equal to 50 per centum of the tax levied against him under this act and shall be guilty of a misdemeanor, and upon conviction thereof, be fined not more than $10,000 or imprisoned for not more than one year, or both, together with the costs of prosecution.

Sec. 11. That if any provision of this act or the application thereof to any person or circumstances is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby.

Sec. 12. That no tax shall be imposed by this act within four months after its passage, and no fine, imprisonment, or other penalty shall be enforced for any violation of this act occurring within four months after its passage.

Sec. 13. The secretary of agriculture may co-operate with any department or agency of the government, any state, territory, district, or possession, or department, agency or political subdivision thereof, or any person; and shall have the power to appoint, remove and fix the compensation of such officers and employes, not in conflict with existing law, and make such expenditures for rent outside the District of Columbia, printing, telegrams, telephones, law books, books of reference, periodicals, furniture, stationery, office equipment, travel, and other supplies and expenses as shall be necessary to the administration of this act in the District of Columbia and elsewhere, and there is hereby authorized to be appropriated, out of any moneys in the treasury not otherwise appropriated, such sums as may be necessary for such purposes. (Approved Aug. 24, 1921.)

UNITED STATES VETERANS' BUREAU.

Title I.—Veterans' Bureau.

Section 1. There is hereby established an independent bureau under the president to be known as the veterans' bureau [see joint resolution attached amending title], the director of which shall be appointed by the president, by and with the advice and consent of the senate. The director of the veterans' bureau shall receive a salary of $10,000 per annum, payable monthly.

The word "director," as hereinafter used in this act, shall mean the director of the veterans' bureau.

The powers and duties pertaining to the office of the director of the bureau of war risk insurance now in the treasury department are hereby transferred to the director, subject to the general direction of the president, and the said office of the director of the bureau of war risk insurance is hereby abolished.

There shall be included on the technical and administrative staff of the director such staff officers, experts and assistants as the director shall prescribe; and there shall be in the veterans' bureau such sections and subdivisions thereof as the director shall prescribe.

Sec. 2. The director, subject to the general direction of the president, shall administer, execute and enforce the provisions of this act, and for that purpose shall have full power and authority to make rules and regulations not inconsistent with the provisions of this act, which are necessary or appropriate to carry out its purposes and shall decide all questions arising under this act except as otherwise provided herein.

Sec. 3. The functions, powers and duties conferred by existing law upon the bureau of war risk insurance are hereby transferred to and made a part of the veterans' bureau.

The functions, powers and duties conferred upon the federal board for vocational education by the act entitled "An act to provide for vocational rehabilitation and return to civil employment of disabled persons discharged from the military or naval forces of the United States, and for other purposes," approved June 27, 1918, and amendments thereto, are hereby transferred to and made a part of the veterans' bureau.

Sec. 4. All personnel, facilities, property and equipment, including leases, contracts and other obligations and instrumentalities in the District of Columbia and elsewhere of the bureau of war risk insurance, of the United States public health service, as described and provided in a written order of the treasury department issued and signed by the secretary of the treasury on April 19, 1921, and designated "Order relative to the transfer of certain activities of the United States public health service, relating to the bureau of war risk insurance, including the trainees of the rehabilitation division of the federal board for vocational education," and of the rehabilitation division of the federal board for vocational education, as a result of the administration of the act approved June 27, 1918, and amendments thereto, are hereby transferred to and made a part of the veterans' bureau under the control, management, operation and supervision of the director, and subject to such change in designation and organization as he may deem necessary in carrying out the provisions of this act: Provided, That all commissioned personnel detailed or hereafter detailed from the United States public health service to the veterans' bureau shall hold the same rank and grade, shall receive the same pay and allowances, and shall be subject to the same rules for relative rank and promotion as now or hereafter may be provided by law for commissioned personnel of the same rank or grade or performing the same or similar duties in the United States public health service.

Sec. 5. All records, files, documents, correspondence and other papers relating to service rendered or to be rendered by the United States public health service in the medical examination, assignment to hospitals and treatment of persons who are now or have been patients and beneficiaries of the bureau of war risk insurance or of the rehabilitation division of the federal board for vocational education, as a

result of the administration of the act approved June 27, 1918, and amendments thereto, and as described and provided in a written order of the treasury department issued and signed by the secretary of the treasury on April 19, 1921, and designated "Order relative to the transfer of certain activities of the United States public health service relating to the bureau of war risk insurance, including the trainees of the rehabilitation division of the federal board for vocational education," shall be transferred to the veterans' bureau.

All records, files, documents, correspondence and other papers in the possession of the bureau of war risk insurance, and those which as a result of the administration of the act approved June 27, 1918, and amendments thereto, are in the possession of the rehabilitation division of the federal board for vocational education shall be transferred to the veterans' bureau.

Sec. 6. The director shall establish a central office in the District of Columbia, and not more than fourteen regional offices and such suboffices, not exceeding 140 in number, within the territory of the United States and its outlying possessions as may be deemed necessary by him and in the best interests of the work committed to the veterans' bureau and to carry out the purposes of this act. Such regional offices may, pending final action by the director in case of an appeal, under such rules and regulations as may be prescribed by the director, exercise such powers for hearing complaints and for examining, rating and awarding compensation claims, granting medical, surgical, dental and hospital care, convalescent care and necessary and reasonable after care, making insurance awards, granting vocational training and all other matters delegated to them by the director as could be performed lawfully under this act by the central office. The suboffices shall have such powers as may be delegated to them by the director, except to make compensation and insurance awards and to grant vocational training.

The regional offices and suboffices, with all authority to establish such offices, shall terminate on June 30, 1926, but nothing herein shall prevent the director from terminating any regional offices or suboffices when in his judgment this may be done without detriment to the administration of this act, and upon such termination all records and supplies pertaining thereto shall be delivered to the central office.

Sec. 7. The beneficiaries of the bureau of war risk insurance and the rehabilitation division of the federal board for vocational education shall hereafter be the beneficiaries of the veterans' bureau and complete individual record of each beneficiary shall be kept by the veterans' bureau.

Sec. 8. All sums heretofore appropriated for carrying out the provisions of the war risk insurance act and amendments thereto, and to carry out the provisions of the act entitled "An act to provide for vocational rehabilitation and return to civil employment of disabled persons discharged from the military or naval forces of the United States, and for other purposes," approved June 27, 1918, and amendments thereto, shall, where unexpended, be made available for the veterans' bureau, and may be expended in such manner as the director deems necessary in carrying out the purposes of this act, with the restrictions heretofore imposed as to number of persons that may be employed at stated salaries.

Sec. 9. The director, subject to the general directions of the president, shall be responsible for the proper examination, medical care, treatment, hospitalization, dispensary and convalescent care, necessary and reasonable after care, welfare of, nursing, vocational training and such other services as may be necessary in the carrying out of the provisions of this act, and for that purpose is hereby authorized to utilize the now existing or future facilities of the United States public health service, the war department, the navy department, the interior department, the national homes for disabled volunteer soldiers and such other governmental facilities as may be made available for the purposes set forth in this act; and such governmental agencies are hereby authorized and directed to furnish such facilities, including personnel, equipment, medical, surgical and hospital services and supplies as the director may deem necessary and advisable in carrying out the provisions of this act, in addition to such governmental facilities as are hereby made available.

In order to standardize the character of examination, medical care, treatment, hospitalization, dispensary and convalescent care, nursing, vocational training and such other services as may be necessary for beneficiaries under this act, the director shall maintain an inspection service, with authority to examine all facilities and services utilized in carrying out the purpose of this act, and for this purpose, with the approval of the president, may utilize such other government or private agencies as may be deemed practicable and necessary. The head of the inspection service shall report to the director in the manner the director may prescribe the result of each examination of facilities and services, and shall recommend to him methods of standardizing such facilities and services.

When, in the opinion of the director, the facilities and services utilized for the hospitalization, medical care and treatment for beneficiaries under this act are unsatisfactory, the director shall make arrangements for the further hospitalization, care and treatment of such beneficiaries by other means.

In the event that there are not sufficient governmental hospital and other facilities for the proper medical care and treatment of beneficiaries under this act, and the director deems it necessary and advisable to secure additional government facilities, he may, within the limits of appropriations made for carrying out the provisions of this paragraph, and with the approval of the president, improve or extend existing governmental facilities or acquire additional facilities by purchase or otherwise. Such new property and structures as may be so improved, extended or acquired shall become part of the permanent equipment of the veterans' bureau or of some one of the now existing agencies of the government, including the war department, navy department, interior department, treasury department, the national homes for disabled volunteer soldiers, in such a way as will best serve the present emergency, taking into consideration the future services to be rendered the veterans of the world war, including the beneficiaries under this act.

In the event government hospital facilities and other facilities are not thus available or are not sufficient, the director may contract with state, municipal or private hospitals for such medical, surgical and hospital services and supplies as may be required, and such contracts may be made for a period of not exceeding five years and may be for the use of a ward or other hospital unit or on such other basis as may be in the best interest of the beneficiaries under this act.

The president is hereby authorized, should he deem it necessary and advisable for the proper medical care and treatment of beneficiaries under this act, to transfer to the director the operation, management and control of specifically designated hospitals now under

the jurisdiction of the public health service. Such hospitals when transferred shall be used exclusively for beneficiaries under this act and shall be under the operative control of the director for such period of time as the president may prescribe.

Sec. 10. For the purpose of this act, the director is authorized to detail from time to time clerks or persons employed in the bureau, to make examinations into the merits of compensation and insurance claims, whether pending or adjudicated, as he may deem proper and to aid in the preparation, presentation or examination of such claims; and any such person so detailed shall have power to administer oaths, take affidavits and certify to the correctness of the papers and documents pertaining to the administration of this act. Nothing in this section shall be construed to authorize a travel allowance to clerks or persons for transportation or subsistence outside of the district in which they are employed.

Sec. 11. The director is hereby authorized to make such rules and regulations as may be deemed necessary in order to promote good conduct on the part of persons who are receiving care or treatment in hospitals, homes or institutions as patients or beneficiaries of said bureau during their stay in such hospitals, homes, institutions or training centers. Penalties for the breach of such rules and regulations may, with the approval of the director, extend to a forfeiture by the offender of such portion of the compensation payable to him, not exceeding three-fourths of the monthly installment per month for three months, for a breach committed while receiving treatment in such hospital, home, institution or training center as may be prescribed by such rules and regulations: Provided, That the offender shall have the right to appeal the decision involving the forfeiture of a part of his compensation to a board of three persons which shall be established and appointed by the director in September of each year for each regional district. Such board shall be known as the board on discipline and morale. It shall serve without compensation, and at least one of the members of such board shall be an ex-service man and a member of some war veterans' organization. No person who is in the employ of the United States shall be a member of such board. The decision of such board, after hearing all the evidence presented by the offender and those charging a breach of the rules and regulations, shall be final.

Sec. 12. The director may set forth in regulations to be prescribed by him the conditions and limitations whereby all patients or beneficiaries of the veterans' bureau who are receiving treatment through the bureau as inmates of a hospital may allot any proportion or proportions or any fixed amount or amounts of their monthly compensation for such purposes and for the benefit of such person or persons as they may direct.

In case such inmate has not allotted three-fourths of his monthly compensation, regulations to be made by the director may provide that any unallotted portion of such three-fourths compensation may be deposited to his credit with the treasurer of the United States to accumulate at such rate of interest as the secretary of the treasury may determine but at a rate never less than 3½ per centum per annum, payable for no period, however, of less than six months, and when payable shall be paid, principal and interest, to such patient if living; otherwise, to any beneficiary or beneficiaries he may have designated, or, if there be no such beneficiary, then to the executor or administrator of the estate of such deceased person: Provided, That this paragraph shall not be so construed as to prevent payment by the bureau from the amounts due to the decedent's estate of his funeral expenses, expenses of last illness, board, rent, lodging or other household expenses for which decedent is liable, provided a claim therefor is presented by the creditors or by the person or persons who actually paid the same before settlement by the veterans' bureau.

The secretary of the treasury is hereby authorized to invest and reinvest the said allotments deposited with him, or any part thereof, in interest-bearing obligations of the United States and to sell the obligations for the purposes of said funds.

Sec. 13. In addition to the care, treatment and appliances now authorized by law, said bureau also shall provide without charge therefor, hospital, dental, medical, surgical and convalescent care and treatment and prosthetic appliances for any member of the military or naval forces of the United States separated therefrom under honorable conditions, disabled by reason of any wound or injury received or disease contracted, or by reason of any aggravation of a pre-existing injury or disease specifically noted at examination for entrance into or employment in the active military or naval service, while in the active military or naval service of the United States on or after April 6, 1917: Provided, That the wound or injury received or disease contracted or aggravation of a pre-existing injury or disease, for which such hospital, dental, medical, surgical and convalescent care and treatment and prosthetic appliances shall be furnished, was incurred in line of duty and not caused by his own willful misconduct: Provided further, That application for such care and treatment and appliances provided for in this section shall be made within one year from date of separation from service or from the date this act goes into effect, whichever is the later.

Sec. 14. The director shall file with the clerk of the house and the secretary of the senate on the first day of the next regular session after this act takes effect an itemized account of all expenditures, classified by regional offices and suboffices, made under this act, including names, classifications and salaries of all staff officers, experts, assistants and employes, and the nature and terms of all contracts made under the authority of this act, and the names and principal place of business of the parties thereto. Thereafter, on the first Monday in December of each year the director shall make a report to congress of his doings under this act for the preceding fiscal year.

Any person who shall knowingly make or cause to be made, or conspire, combine, aid or assist in, agree to, arrange for, or in anywise procure the making or presentation of a false or fraudulent affidavit, declaration, certificate, statement, voucher, or paper or writing purporting to be such, concerning any claim or the approval of any claim for compensation or the payment of any money, for himself or for any other person, under article III. of the war risk insurance act, or any acts amendatory of or supplemental to such article III., shall forfeit all rights, claims, and benefits under such article III. and in addition to any and all other penalties imposed by law shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than $1,000 or imprisonment for not more than one year, or by both such fine and imprisonment, for each such offense.

Title II.—Amendments to the War Risk Insurance Act.

Sec. 15. Section 29 of the war risk insurance act is hereby amended to read as follows:

"Sec. 29. The discharge or dismissal of any

person from the military or naval forces on the ground that he is an enemy alien, conscientious objector, or a deserter, or is guilty of mutiny, treason, spying, or any offense involving moral turpitude, or willful and persistent misconduct, shall terminate any insurance granted on the life of such person under the provisions of article IV., and shall bar all rights to any compensation under article III. or any insurance under article IV.: Provided, That, as to converted insurance, the cash surrender value thereof, if any, on the date of such discharge or dismissal shall be paid the insured, if living, and if dead to the designated beneficiary: Provided further, That an enemy alien who volunteered or who was drafted into the army, navy, or marine corps of the United States during the world war, and who was not discharged from the service on his own application or solicitation, by reason of his being an enemy alien, and whose service was honest and faithful, shall be entitled to the benefit of the war risk insurance act and all amendments thereto: Provided further, That in case any person has been dishonorably discharged from the military or naval forces as a result of a court-martial trial, and it is thereafter established to the satisfaction of the director that at the time of the commission of the offense resulting in such court-martial trial and discharge that such person was insane, such person shall be entitled to the compensation and insurance benefits of the war risk insurance act."

Sec. 16. Section 31 of the war risk insurance act is hereby amended by adding thereto a subsection to be known as subsection (a) and to read as follows:

"(a) Any person who between the 6th day of April, 1917, and the 11th day of November, 1918, applied for enlistment or enrollment in the military or naval forces, and who was accepted provisionally and directed or ordered to a camp, post, station, or other place for final acceptance into such service, shall be deemed to have the same status as an inducted man not yet accepted and enrolled for active service during the period while such person was complying with such order or direction, and during such compliance, and until his final acceptance or rejection for enlistment or enrollment into the military or naval forces, shall be entitled to the same benefits under articles III. and IV. of the war risk insurance act as an inducted man not yet accepted and enrolled for active service."

Sec. 17. Section 210 of the war risk insurance act as amended is hereby amended to read as follows:

"Sec. 210. Upon receipt of any application for family allowance, the director shall make all proper investigations and shall make an award, on the basis of which award the amount of the allotments to be made by the man shall be certified to the war department or navy department, as may be proper. Whenever the director shall have reason to believe that an allowance has been improperly made or that the conditions have changed, he shall investigate or reinvestigate and may modify the award. The amount of each monthly allotment and allowance shall be determined according to the family conditions existing on the first day of the month: Provided, That whenever an award of allotment or allowance, or both, covering any period has been paid to, or on behalf of, a person designated by the enlisted man as beneficiary of his allotment, no recovery of the allotments paid in such cases shall hereafter be made for any reason whatsoever; and no recovery of the allowances paid in such cases shall hereafter be made for any reason whatsoever except where it is shown that the person receiving the allowance does not bear the relationship to the enlisted man which is required by the war risk insurance act, and except, also, in cases of manifest fraud."

Sec. 18. Section 300 of the war risk insurance act is hereby amended to read as follows:

"Sec. 300. For death or disability resulting from personal injury suffered or disease contracted in the line of duty on or after April 6, 1917, or for an aggravation of a disability existing prior to examination, acceptance and enrollment for service, when such aggravation was suffered and contracted in the line of duty on or after April 6, 1917, by any commissioned officer or enlisted man, or by any member of the army nurse corps (female) or of the navy nurse corps (female) when employed in the active service under the war department or navy department, the United States shall pay to such commissioned officer or enlisted man, member of the army nurse corps (female), or of the navy nurse corps (female), or, in the discretion of the director, separately to his or her dependents, compensation as hereinafter provided; but no compensation shall be paid if the injury, disease or aggravation has been caused by his own willful misconduct. That for the purposes of this section every such officer, enlisted man or other member employed in the active service under the war department or navy department who was discharged or who resigned prior to the date of approval of this amendatory act, and every such officer, enlisted man or other member employed in the active service under the war department or navy department on or before Nov. 11, 1918, who hereafter is discharged or resigns, shall be held and taken to have been in sound condition when examined, accepted and enrolled for service, except as to defects, disorders or infirmities, made of record in any manner by proper authorities of the United States at the time of, or prior to, inception of active service, to the extent to which any such defect, disorder or infirmity was so made of record: Provided further, That an ex-service man who is shown to have an active pulmonary tuberculosis or neuropsychiatric disease (of more than 10 per centum degree of disability in accordance with the provisions of subdivision (2) of section 302 of the war risk insurance act, as amended) developing within two years after separation from the active military or naval service of the United States shall be considered to have acquired his disability in such service, or to have suffered an aggravation of a pre-existing pulmonary tuberculosis or neuropsychiatric disease in such service, but nothing in this proviso shall be construed to prevent a claimant from receiving the benefits of compensation and medical care and treatment for a disability due to these diseases of more than 10 per centum degree (in accordance with the provisions of subdivision (2) of section 302 of the war risk insurance act as amended) at a date more than two years after separation from such service, if the facts of the case substantiate his claim. This section shall be deemed to be in effect as of April 6, 1917."

Sec. 19. Section 305 of the war risk insurance act is hereby amended to read as follows:

"Sec. 305. Upon its own motion or upon application the bureau may at any time review an award, and, in accordance with the facts found upon such review, may end, diminish or increase the compensation previously awarded, or, if compensation is increased, or, if compensation has been refused, reduced or discontinued, may award compensation in proportion to the degree of disability sustained as of the date such degree of

disability began, but not earlier than the date of discharge or resignation."

Sec. 20. Section 306 of the war risk insurance act is hereby amended to read as follows:

"Sec. 306. No compensation shall be payable for death or disability which does not occur prior to or within one year after discharge or resignation from the service, except that where, after a medical examination made pursuant to regulations, a certificate has been obtained from the director at the time of discharge or resignation from the service, or within one year thereafter, or within one year after the passage of this amendatory act, whichever is the later, to the effect that the injured person at the time of his discharge or resignation was suffering from injury likely to result in death or disability, compensation shall be payable for death or disability whenever occurring, approximately resulting from such injury."

Sec. 21. Section 313 of the war risk insurance act, as amended, is hereby amended by adding thereto, immediately following subsection (2) thereof, a new subsection to be known as subsection (2a) and to read as follows:

"(2a) The veterans' bureau is hereby authorized to pay the beneficiary or other person or persons in whose name an action may have been commenced or prosecuted, and to all witnesses in such action, fees and mileage, the same as is now paid and allowed to witnesses in the United States courts, in going to, remaining at and returning from place of trial, and without any regard to whether the action, if any, is brought or prosecuted in a court of the United States or some other court.

"In all cases of assignment of causes of action under this section, whether the assignment be heretofore or hereafter made, where it shall appear to the director to be to the best interests of the beneficiary so to do, the director, acting for and in the name of the United States, may assign the cause of action back to the beneficiary or to his personal representatives."

Sec. 22. A new section is hereby added to article III. of the war risk insurance act to be known as section 315, and to read as follows:

"Sec. 315. That no person admitted into the military or naval forces of the United States after six months from the passage of this amendatory act shall be entitled to the compensation or any other benefits or privileges provided under the provisions of article III. of the war risk insurance act, as amended."

Sec. 23. Section 402 of the war risk insurance act is hereby amended by adding thereto a subsection to be known as subsection (a) and to read as follows:

"(a) Where a beneficiary at the time of designation by the insured is within the permitted class of beneficiaries and is the designated beneficiary at the time of the maturity of the insurance because of the death of the insured, such beneficiary shall be deemed to be within the permitted class even though the status of such beneficiary shall have been changed."

Sec. 24. Section 404 of the war risk insurance act is hereby amended to read as follows:

"Sec. 404. During the period of the war and thereafter until converted the insurance shall be term insurance for successive terms of one year each. Not later than five years after the date of the termination of the war as declared by proclamation of the president of the United States the term insurance shall be converted, without medical examination, into such form or forms of insurance as may be prescribed by regulations and as the insured may request. Regulations shall provide for the right to convert into ordinary life, twenty-payment life, endowment maturing at age sixty-two, and into other usual forms of insurance, and shall prescribe the time and method of payment of the premiums thereon, but payments of premiums in advance shall not be required for periods of more than one month each and may be deducted from the pay or deposit of the insured or be otherwise made at his election.

"In case where an insured whose yearly renewable term insurance has matured by reason of total permanent disability is found and declared to be no longer permanently and totally disabled, and where the insured is required under regulations to renew payment of premiums on said term insurance, and where this contingency is extended beyond the five-year period during which said yearly renewable term insurance otherwise must be converted, there shall be given such insured an additional period of two years from the date on which he is required to renew payment of premiums in which to convert said term insurance as hereinbefore provided."

Sec. 25. A new section is hereby added to article IV. of the war risk insurance act to be known as section 406, and to read as follows:

"Sec. 406. Whenever benefits under United States government life insurance (converted insurance) become or have become payable because of total permanent disability of the insured or because of the death of the insured as a result of disease or injury traceable to the extra hazard of the military or naval service, as such hazard may be determined by the director, the liability shall be borne by the United States, and the director is hereby authorized and directed to transfer from the military and naval insurance appropriation to the United States government life insurance fund a sum which, together with the reserve of the policy at the time of maturity by total permanent disability or death, will equal the then value of such benefits. When a person receiving total permanent disability benefits under a United States government life policy (converted policy) recovers from such disability and is then entitled to continue a reduced amount of insurance, the director is hereby authorized and directed to transfer to the military and naval insurance appropriation all of the loss reserve to the credit of such policy claim except a sum sufficient to set up the then required reserve on the reduced amount of insurance that may be continued, which sum shall be retained in the United States government life insurance fund for the purpose of such reserve.

Sec. 26. A new section is hereby added to article IV. of the war risk insurance act (including therein section 14 of the act entitled "An act to amend and modify the war risk insurance act," approved Dec. 24, 1919), to be known as section 407, and to read as follows:

"Sec. 407. If no person within the permitted class of beneficiaries survive the insured, then there shall be paid to the estate of the insured the monthly installments payable and applicable under the provisions of article IV. of the war risk insurance act: Provided, That in cases where the estate of the insured would escheat under the laws of the place of his residence the insurance shall not be paid to the estate of the insured, but shall escheat to the United States and shall be credited to the United States government life insurance fund or the military and naval insurance appropriation, as may be proper. This section shall be deemed to be in effect as of Oct. 6, 1917."

Sec. 27. A new section is hereby added to article IV. of the war risk insurance act, to be known as section 408, and to read as follows:

"Sec. 408. In the event that all provisions of the rules and regulations other than the requirements as to the physical condition of the applicant for insurance have been complied with, an application for reinstatement of

lapsed or canceled yearly renewable term insurance or application for United States government life insurance (converted insurance) hereafter made may be approved: Provided, That the applicant's disability is the result of an injury or disease or of an aggravation thereof suffered or contracted in the active military or naval service during the world war: Provided further, That the applicant during his lifetime submits proof satisfactory to the director showing the service origin of the disability or aggravation thereof and that the applicant is not totally and permanently disabled. As a condition, however, to the acceptance of an application for the reinstatement of lapsed or canceled yearly renewable term insurance or United States government life insurance (converted insurance) the applicant shall be required to pay all the back monthly premiums which would have become payable if such insurance had not lapsed, together with interest at the rate of 5 per centum per annum compounded annually on each premium from the date said premium is due by the terms of the policy: Provided further, That where any soldier has heretofore allowed his insurance to lapse, while suffering from wounds or disease suffered or contracted in line of service, and was at the time he allowed his said policy to lapse entitled to compensation on account thereof in a sum equal to or in excess of the amount due from him in premiums on his said insurance, and has since died from said wounds or disease without collecting or making claim for said compensation, or being allowed to reinstate his said policy on account of his physical condition, then and in that event said policy shall not be considered as lapsed, and the veterans' bureau is hereby authorized and directed to pay to the beneficiaries of said soldier under said policy the amount of said insurance less the premiums and interest thereon at 5 per centum per annum compounded annually in installments as provided by law."

Sec. 28. A new section is hereby added to article IV. of the war risk insurance act to be known as section 409, and to read as follows:

"Sec. 409. The veterans' bureau is authorized to make provision in accordance with regulations, whereby the payment of premiums on yearly renewable term insurance and United States government life insurance (converted insurance) on the due date thereof may be waived and the insurance may be deemed not to lapse in the cases of the following persons, to-wit: (a) Those who are confined in a hospital under said bureau for a compensable disability during the period while they are so confined; (b) those who are rated as temporarily totally disabled by reason of an injury or disease entitling them to compensation during the period of such total disability and while they are so rated: Provided, That such relief from payment of premiums on renewable term insurance on the due date thereof shall be for full calendar months, beginning with the month in which said confinement to hospital, or temporary total disability rating begins, and ending with that month during the half or major fraction of which the person is confined in hospital, or is rated as temporarily totally disabled: Provided further, That all premiums, the payment of which when due is waived as above provided, shall bear interest at the rate of 5 per centum per annum compounded annually from the due date of each premium, and if not paid by the insured shall be deducted from the insurance when the same matures either because of permanent total disability or death."

Sec. 29. A new section is hereby added to article IV. of the war risk insurance act to be known as section 410, and to read as follows:

"Sec. 410. Under such rules and regulations as the director of the veterans' bureau and the postmaster-general may prescribe, the postmaster-general is hereby authorized to receive the premiums on yearly renewable term insurance and United States government life insurance (converted insurance) and to act for and turn over to the treasurer of the United States the money so received, and if the money-order system is used as an agency for the transmission of such money, the postmaster-general may adopt a specially designed money-order form for such purpose, and he also is authorized to receive and transmit to the veterans' bureau applications for reinstatement of lapsed insurance and applications for conversion of yearly renewable term insurance."

Sec. 30. A new section is hereby added to article IV. of the war risk insurance act to be known as section 411, and to read as follows:

"Sec. 411. Subject to the provisions of section 29 of the war risk insurance act and amendment thereto, policies of insurance heretofore or hereafter issued in accordance with article IV. of the war risk insurance act shall be incontestable after six months from date of issuance, or reinstatement, except for fraud or nonpayment of premiums." (Approved Aug 9, 1921.)

Title Amended.

Resolved, etc., That the veterans' bureau, created by the act entitled "An act to establish a veterans' bureau and to improve the facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved Aug. 9, 1921, shall be known as the "United States veterans' bureau," and whenever used in such act the term "veterans' bureau" shall mean "United States veterans' bureau." (Approved Aug. 24, 1921.)

FARMERS' EXPORT CREDITS ACT.

Be it enacted, etc., That when used in this act the term "person" includes partnerships, corporations and associations, as well as individuals.

Sec. 2. That section 1 of title I. of the war finance corporation act, approved April 5, 1918, as amended, is amended to read as follows:

"That the secretary of the treasury, the secretary of agriculture, and four additional persons (who shall be the directors first appointed as hereinafter provided) are hereby created a body corporate and politic in deed and in law by the name, style, and title of the war finance corporation (herein called the corporation), and shall have succession for a period of ten years: Provided, That except as otherwise provided by this act the corporation shall not exercise any of the powers conferred by this act except such as are incidental to the liquidation of its assets and the winding up of its affairs, after July 1, 1922."

Sec. 3. The war finance corporation act, approved April 5, 1918, as amended, is amended by adding after section 21 of title I. thereof the following new sections:

"Sec. 22. Whenever the board of directors of the corporation shall be of the opinion that conditions arising out of the war, or out of the disruption of foreign trade created by the war, have resulted in or may result in an abnormal surplus accumulation of any staple agricultural product of the United States or lack of a market for the sale of same or that the ordinary banking facilities are inadequate to enable producers of or dealers in such products to carry them until they can be exported or sold for export in an orderly manner, the corporation shall thereupon be empowered to make advances, for periods not ex-

ceeding one year from the respective dates of such advances, upon such terms, not inconsistent with this act, as it may determine:

"(a) To any person engaging in the United States in dealing in or marketing any such products, or to any association composed of persons engaged in producing such products, for the purpose of assisting such person or association to carry such products until they can be exported or sold for export in an orderly manner. Any such advance shall bear interest at a rate not exceeding 1½ per centum in excess of the rate of discount for ninety-day commercial paper prevailing at the federal reserve bank of the district in which the borrower is located at the time when such advance is made;

"(b) To any person without the United States purchasing such products, but in no case shall any of the money so advanced be expended without the United States. Every such advance shall be secured by adequate security of such character as shall be prescribed by the board of directors of the corporation. The rate of interest charged on any such advance shall be determined by the board of directors. The corporation shall retain power to recall an advance or require additional security at any time.

"(c) To any bank, banker, or trust company in the United States which makes or has made an advance or advances to any such person as is described in paragraph (a) of this section for the purpose therein set forth or which makes or has made an advance or advances to any producer for the purpose set forth in paragraph (a). The aggregate of advances made to any bank, banker or trust company shall not exceed the amount remaining unpaid of the advances made by such bank, banker or trust company for purposes herein described. Such advances shall bear interest at the rates fixed by the corporation.

"Sec. 23. Notwithstanding the limitation of section 1 the advances provided for by section 21 and section 22 of this act may be made until July 1, 1922. The corporation may from time to time extend the time of payment of any such advance or advances through renewals, substitution of new obligations or otherwise, but the time for the payment of any advance made under authority of section 21 and section 22 shall not be extended beyond three years from the date upon which such advance was originally made.

"All advances made under section 21 or under section 22 of this act shall be made against promissory note or notes or other instrument or instruments in writing imposing on the borrower a primary and unconditional obligation to repay the advance at maturity, with interest as stipulated therein, with full and adequate security in each instance by indorsement, guaranty, pledge or otherwise. The corporation shall retain the power to require additional security at any time. All notes or other instruments evidencing advances to persons outside the United States shall be in terms payable in the United States, in currency of the United States and shall be secured by adequate guaranties or indorsements in the United States, or by warehouse receipts, acceptable collateral or other instruments in writing conveying or securing marketable title to agricultural products in the United States.

"Sec. 24. Whenever in the opinion of the board of directors of the corporation the public interest may require it, the corporation shall be authorized and empowered to make advances, upon such terms not inconsistent with this act as it may determine, to any bank, banker or trust company in the United States or to any co-operative association of producers in the United States which may have made advances for agricultural purposes, including the breeding, raising, fattening and marketing of live stock, or may have discounted or rediscounted notes, drafts, bills of exchange or other negotiable instruments issued for such purposes. Such advance or advances may be made upon promissory note or notes or other instrument or instruments, in such form as to impose on the borrowing bank, banker, trust company or co-operative association a primary and unconditional obligation to repay the advance at maturity with interest as stipulated therein and shall be fully and adequately secured in each instance by indorsement, guaranty, pledge or otherwise. Such advances may be made for a period not exceeding one year and the corporation may from time to time extend the time of payment of any such advance through renewals, substitution of new obligations or otherwise, but the time for the payment of any such advance shall not be extended beyond three years from the date upon which such advance was originally made. The aggregate of advances made to any bank, banker, trust company or co-operative association shall not exceed the amount remaining unpaid of the advances made by such bank, banker, trust company or co-operative association for purposes herein described.

"The corporation may, in exceptional cases, upon such terms not inconsistent with this act as it may determine, purchase from domestic banks, bankers or trust companies notes, drafts, bills of exchange or other instruments of indebtedness secured by chattel mortgages, warehouse receipts, bills of lading or other instruments in writing conveying or securing marketable title to staple agricultural products, including live stock. The corporation may from time to time, upon like security, extend the time of payment of any note, draft, bill of exchange or other instrument acquired under this section, but the time for the payment of any such note, draft, bill of exchange or other instrument shall not be extended beyond three years from the date upon which such note, draft, bill of exchange or other instrument was acquired by the corporation. The corporation is further authorized, upon such terms as it may prescribe, to purchase, sell or otherwise deal in acceptances, adequately secured, issued by banking corporations organized under section 25 (a) of the federal reserve act: Provided, That no purchase of acceptances of the said banking corporations shall be made except for the purpose of assisting the said banking corporations in financing the exportation of agricultural and manufactured products from the United States to foreign countries. No such acceptances shall be purchased which have a maturity at the time of such purchase of more than three years.

"Advances or purchases may be made under this section at any time prior to July 1, 1922.

"Sec. 25. The aggregate amount of all advances made under sections 21, 22 and 24, and of all notes, drafts, bills of exchange or other securities purchased under section 24 remaining unpaid, shall not at any one time exceed $1,000,000,000.

"Sec. 26. Whenever in this act the words 'bank, banker or trust company' are used they shall be deemed to include any reputable and responsible financing institution incorporated under the laws of any state or of the United States with resources adequate to the undertaking contemplated.

"Sec. 27. In order to enable the corporation to carry out the purposes of this act the comptroller of the currency is hereby authorized to furnish to the corporation for its confidential use such reports, records or other information as he may have available relating to financial condition of national banks to which the corporation has made or contemplates

making advances, and to make, through his examiners, for the confidential use of the corporation, examinations of banks, bankers or trust companies, other than national banks, to which the corporation has made or contemplates making advances: Provided, That no such examination shall be made without the consent of such bank, banker or trust company.

"Sec. 28. No person, bank, banker or trust company receiving money under the provisions of this act shall loan such money at a rate of interest greater than 2 per centum per annum in excess of the rate of interest charged or received by the corporation upon such money.

"Sec. 4. Section 21 of title I. of the war finance corporation act is hereby amended by striking out paragraphs (b) and (c) thereof, and by striking out at the beginning of the first paragraph the letter (a).

"Sec. 5. The first paragraph of section 12 of title I. of the war finance corporation act is hereby amended and re-enacted to read as follows:

"Sec. 12. That the corporation shall be empowered and authorized to issue and have outstanding at any one time its notes or bonds in an amount aggregating not more than three times its paid-in capital, such notes or bonds to mature not less than six months nor more than five years from the respective dates of issue, and may be redeemable before maturity at the option of the corporation, as may be stipulated in such notes or bonds, and to bear such rate or rates of interest as may be determined by the board of directors, but such rate or rates of interest shall be subject to the approval of the secretary of the treasury. Such notes or bonds shall have a first and paramount floating charge on all the assets of the corporation, and the corporation shall not at any time mortgage or pledge any of its assets. Such notes or bonds may be issued at not less than par in payment of any advances authorized by this title, or may be offered for sale publicly or to any individual, firm, corporation or association at such price or prices at not less than par as the board of directors, with the approval of the secretary of the treasury, may determine."

The power of the corporation to issue notes or bonds may be exercised at any time prior to Jan. 1, 1925, but no notes or bonds shall mature later than July 1, 1925.

Sec. 6. Paragraph 1 of section 13 of title I. of the war finance corporation act is hereby amended and re-enacted to read as follows:

"That the federal reserve banks shall be authorized, subject to the maturity limitations of the federal reserve act and to regulations of the federal reserve board, to discount the direct obligation of member banks secured by such notes or bonds of the corporation and to rediscount notes or other negotiable instruments secured by such notes or bonds and indorsed by a member bank. Discounts or rediscounts under this section shall be at an interest rate equal to the prevailing rate for eligible commercial paper of corresponding maturities."

Sec. 7. That section 15 of title I. of the war finance corporation act be amended and re-enacted to read as follows:

"Sec. 15. That all moneys of the corporation not otherwise employed may be kept on deposit, subject to check, with the treasurer of the United States, or in any of the federal reserve banks, or may, upon the direction of the board of directors of the corporation, with the approval of the secretary of the treasury, be invested in bonds or other obligations of the United States issued or converted after Sept. 24, 1917, or upon like direction and approval may be used from time to time in the purchase or redemption of any bonds issued by the corporation.

"The federal reserve banks are hereby authorized to act as depositories for and as fiscal agents of the corporation in the general performance of the powers conferred by this title.

"Beginning July 1, 1922, the directors of the corporation shall proceed to liquidate its assets and wind up its affairs, except as specifically provided in this title; but the directors of the corporation in their discretion may, from time to time prior to such liquidation, sell and dispose of any securities or other property acquired by the corporation.

"After July 1, 1922, the corporation may, with the approval of the secretary of the treasury, deposit with the treasurer of the United States, as a special deposit, out of money belonging to the corporation, or from time to time received by it in the course of liquidation or otherwise, an amount equal to the aggregate amount of all outstanding bonds or notes of the corporation, including principal and interest to maturity. Moneys so deposited shall constitute a special fund for the payment of principal and interest of such bonds or notes, or for the purchase or redemption of such bonds or notes at not more than par and accrued interest, and may be drawn upon or paid out for no other purpose.

"Whenever there shall have been deposited in such special fund an amount equal to the aggregate amount of all bonds or notes of the corporation then outstanding, including principal and interest to maturity, the corporation may, with the approval of the secretary of the treasury, pay into the treasury of the United States, as miscellaneous receipts, any moneys belonging to the corporation, or received from time to time in the course of liquidation or otherwise, in excess of a reasonable reserve to meet all liabilities and expenses during liquidation. Whenever any such payment is made an amount of capital stock of the corporation equal in par value to the amount so paid in shall be canceled and retired.

"All net earnings of the corporation not required for its operations shall be accumulated as a reserve fund until such time as the corporation liquidates under the terms of this title.

"Any balance remaining after the payment of all the corporation's debts, and after the retirement of all its capital stock as herein provided, shall be paid into the treasury of the United States as miscellaneous receipts, and thereupon the corporation shall be dissolved." (Approved Aug. 24, 1921.)

NAME OF GRAND RIVER CHANGED.

From and after the passage of this act the river heretofore known as the Grand river, from its source in the Rocky Mountain National park in Colorado to the point where it joins the Green river in the state of Utah and forms the Colorado river, shall be known and designated on the public records as the Colorado river.

The change in the name of the river shall in no wise affect the rights of the state of Colorado, the state of Utah or of any county, municipality, corporation, association or person; and all records, surveys, maps and public documents of the United States in which the river is mentioned or referred to under the name of the Grand river shall be held to refer to the river under the name of the Colorado river. (Approved July 25, 1921.)

TO CO-OPERATE IN REORGANIZATION.

The president of the United States is authorized to appoint a representative of the execu-

tive to co-operate with the joint committee on reorganization created under the joint resolution of Dec. 17, 1920, entitled a "Joint resolution to create a joint committee on the reorganization of the administrative branch of the government," who shall receive an annual salary of $7,500, payable monthly, such salary to be paid in equal parts from the contingent funds of the senate and house of representatives as from time to time may be duly authorized by resolutions of those bodies. (Approved May 5, 1921.)

FARM LOAN BONDS.

The first paragraph of section 20 of the federal farm loan act is amended to read as follows:

"Sec. 20. That bonds provided for in this act shall be issued in denominations of $40, $100, $500, $1,000 and such larger denominations as the federal farm loan board may authorize; they shall run for specified minimum and maximum periods, subject to payment and retirement, at the option of the land bank, at any time after the minimum period specified in the bonds, which shall not be longer than ten years from the date of their issue. They shall have interest coupons attached, payable semi-annually, and shall be issued in series of not less than $50,000, the amount and terms to be fixed by the federal farm loan board. They shall bear a rate of interest not to exceed 5½ per centum per annum, but no bonds issued or sold after June 30, 1923, shall bear a rate of interest to exceed 5 per centum per annum." (Approved Aug. 13, 1921.)

CANADIAN PULP EXPORT CONFERENCE.

The president of the United States is authorized to appoint a commission of five persons and, by appropriate authority, to confer on this commission the power, on behalf of the administration and the congress, to negotiate with said dominion government, also with the provincial governments thereof, in respect to the cancellation of said restrictive orders in council, and as well any other restrictions on the exportation of pulp wood and newsprint and other printing paper composed of mechanical and chemical products of pulp and pulp wood, from the dominion of Canada to the United States.

Sec 2. In the event the cancellation of the restrictive orders in council cannot be agreed to by mutual arrangement of the governments of the United States of America and the dominion of Canada, the commission shall investigate, consider and report to the president, on or before Dec. 1, 1921, what action in its opinion should be taken by the congress that will aid in securing the cancellation of the restrictive orders in council, so that they may not continue to militate against the interests of the people of the United States.

Sec. 3. For the necessary expenses of the commission the sum of $10,000 is appropriated: Provided, however, That the members of the commission shall serve without compensation. (Approved Aug. 15, 1921.)

DYE AND CHEMICAL CONTROL ACT AMENDED.

Be it enacted, etc., That subdivision (a) of section 501 of the dye and chemical control act, approved May 27, 1921, is amended by striking out the words "three months" and inserting in lieu thereof the words "six months."

Sec. 2. That all furniture, file cases, typewriters and other office appliances in use by the war trade section of the department of state on May 28, 1921, shall be transferred to and become the property of the treasury department. (Approved Aug. 24, 1921.)

HONORS FOR UNKNOWN SOLDIER.

The president of the United States is authorized to bestow with appropriate ceremonies, military and civil, the congressional medal of honor and the distinguished service cross upon the unknown, unidentified American to be buried in the Memorial amphitheater of the National cemetery at Arlington, Va., on Nov. 11, 1921. (Approved Aug. 24, 1921.)

PORT OF NEW YORK.

The consent of congress is given to an agreement between the states of New York and New Jersey for the creation of the port of New York district and the establishment of the port of New York authority for the comprehensive development of the port of New York. The compact defines the area of the district and provides that the port authority shall consist of six commissioners, three from each state, two to be residents of New York city and two of the New Jersey portion of the district. The port authority is to have full power to purchase, construct, lease and (or) operate any terminal or transportation facility within the district, and to make charges for the use thereof, and for any of such purposes to own, hold, lease and (or) operate real or personal property, to borrow money and secure the same by bonds or by mortgages upon any property held or to be held by it. (Approved Aug. 23, 1921.)

EXPOSITION AT PORTLAND, ORE.

The president of the United States is authorized and requested to invite foreign countries to participate in an exposition to be held in the city of Portland, state of Oregon, in the year 1925, to celebrate the completion of transcontinental and Pacific highways, the centennial of the invention of the electromagnet and to exemplify the development of hydro-electric energy. Provided, That the United States government shall be put to no expense by reason of the extending of the invitation. (Approved Aug. 10, 1921.)

DISASTROUS FLOOD IN PUEBLO, COL.

The city of Pueblo, Col., was visited by a flood late on the afternoon of June 3, 1921, which caused a loss of more than 100 lives and of property valued at between $15,000,000 and $20,000,000. The Arkansas river, which flows through the town, was already at a high stage, caused by rains in the foothills and mountains, when a cloudburst occurred about fifteen miles to the west. This caused a sudden rise of several feet and the waters overflowed the banks and swept onward at a rate of about seven miles an hour. The city's fire whistles gave the alarm at 5 o'clock in the afternoon that floods were coming down the Arkansas river from the west and the Fountain river from the north. This gave many a chance to escape to the hills around the town, but others failed to heed the warning and they either were drowned or had narrow escapes from death. The floods reached the city proper at 7 o'clock and soon the bridges were swept away, small houses were set afloat and the street cars and electric lights put out of business. Two trains near the union station were wrecked and some of the passengers lost their lives. Lightning started several fires and a number of houses were burned.

Most of the casualties occurred in the Grove street district to the southeast, but the heaviest property loss was in the business district.

Every store within six blocks of Main street was inundated, some of them to the second story. The newspaper offices were flooded and publication had to be suspended. Connection with the outside world was cut off by the destruction of telegraph and telephone poles and it was not until June 5 that people in other places knew the details of the disaster.

The flooded area extended through the Denver & Rio Grande yards to the south; on the north to 5th and Main streets, inundating eighteen blocks on Main street, twenty blocks on Santa Fe avenue and forty-five blocks in the Grove street district, the poorest in the city. All of the railroad yards, equivalent to forty blocks, were flooded. On the west the flood extended to the state asylum lowlands. The total number of city blocks under water was 125.

To prevent looting and to care for the homeless the city was placed under martial law and all kinds of relief agencies were established. All the able-bodied workers were called upon to clear the streets of debris and of the mud left by the flood waters of the Arkansas. As soon as railroad communication was restored supplies were rushed in from the north, east and west and it was not long before the business sections and the districts less seriously damaged were placed in their usual condition. Relief was sent to a number of smaller places along the Arkansas and Fountain rivers where there had been loss of life and property.

It was slow work to clear away the debris where most of the fatalities had occurred. A few bodies were recovered each day until the number recorded at the morgue reached forty-seven. There were on June 10 not fewer than 130 names on the official list of the missing. It was concluded that many of the bodies had been swept down the river and would never be recovered.

BUCK'S STOVE COMPANY BOYCOTT CASE.

Proceedings were brought in the Supreme court of the District of Columbia in August, 1907, against the officers of the American Federation of Labor to enjoin them from conducting a boycott against the Buck's Stove and Range Company of St. Louis, Mo., by advertising that the concern was on the "unfair" and "we don't patronize" lists of the federation's official organ. The injunction was issued by Judge Gould Dec. 23, 1907. On the plea that the injunction was being violated proceedings for contempt of court were brought against Samuel Gompers, president; John Mitchell, vice-president, and Frank Morrison, secretary of the federation. They were declared guilty by Justice Wright of the Supreme court of the District of Columbia Dec. 23, 1908. Mr. Gompers was sentenced to one year's imprisonment, Mr. Mitchell to nine months' and Mr. Morrison to six months' imprisonment. They were admitted to bail and the case was taken to the Court of Appeals of the District of Columbia, which tribunal decided Nov. 2, 1909, that the decree against them was valid.

An appeal was taken to the United States Supreme court, which on May 15, 1911, reversed the judgments of the lower courts and remanded the case. May 5, 1913, the Court of Appeals of the District of Columbia again affirmed the original findings in the contempt case, but reduced Mr. Gompers' sentence to thirty days in jail and held that Mitchell and Morrison should be exempt from prison sentences, but should each pay a fine of $500. June 19, 1913, Chief Justice White of the United States Supreme court granted an appeal by the defendants that the case be heard again by the highest tribunal.

May 11, 1914, the United States Supreme court set aside the sentences imposed upon Gompers, Mitchell and Morrison on the ground that they were barred by the statute of limitations. Justice Holmes, who read the opinion, held that the contempt proceedings should have been begun within three years from the date of the offense.

CONSTITUTION OF THE FAR EASTERN REPUBLIC.

April 27, 1921.

PART I.

General Regulations.

1. The Far Eastern Republic is established as a democratic republic.

2. The republic is governed strictly according to the laws given in this constitution, equally obligatory without exceptions for all institutions, all officials and the citizens of other countries coming upon the territory of the republic.

3. The laws of the republic can be annulled and changed only by the force of laws enacted in the order fixed by the present constitution.

4. Ignorance of the laws of the republic cannot serve as a reason for their nonexecution or nonobservance or for transferring the responsibility for that nonexecution or nonobservance.

5. The laws of the republic ought not to conflict with the provisions of the present constitution.

6. The manner of publication and the date when the laws become operative is fixed by a special law.

PART II.

The Territory of the Republic.

7. All the territory of the former Russian empire to the east of the Selenga river and of Lake Baikal to the Pacific ocean, including therein the regions Pri-Baikal, Zai-Baikal, Amur, Maritime, Pri-Amur with the northern portion of Sakhalien, is defined as the independent Far Eastern Republic. All the rights and obligations of the Russian empire pass to the republic not only under the statement of territories named, but in addition relating to the treaties and agreements made with foreign nations by the established Russian government relative to the territories and waters of China and other countries which border on the frontiers of the republic.

8. The frontier between the Russian Socialistic Federative Soviet Republic and the Far Eastern Republic, according to their mutual treaty, is declared to be: The River Selenga from where it emerges from Mongolia to as far as the administrative boundary of the former districts of Selenga, Bargousin and Verkhne-Udinsk, the boundary of these districts as far as Lake Baikal, the middle of Lake Baikal, the old frontier between the regions of Yakoot, Zai-Baikal and Amur, as far as the watershed between the Kiran and Pesmoot rivers and the watershed of these rivers as far as the shores of the Okhotsk sea near Cape Medjelinda, thus including all the islands situated south of the parallel of the aforenamed cape.

PART III.

Chapter I.—The Civil Right.

9. The recognized citizens of the Far Eastern Republic are:

(1) All Russian citizens born on the territory of the republic within the boundaries fixed by the first part of the present constitution.

(2) All Russian citizens who at the time of the declaration of the independence of the republic (April 6, 1921,) were living on its territory.

(3) Russian citizens arriving within the territory of the republic after the declaration of independence as well as those who arrived in the republic after the promulgation of the present law and who are not registered according to the prescribed order as citizens of the Russian Socialistic Federative Soviet Republic.

(4) All Russian citizens who live within the territory of the line of demarcation of the Chinese Eastern railroad and who have not declared during the six months since the publication of the present law that they were subjects of some other nation and who have not presented during that term documents proving their citizenship of such other nation.

(5) All foreign subjects who have passed under the domination of the republic according to the method established by law.

10. From the number of citizens of the republic are excluded all the natives of the territory of the former Russian empire who within six months from the publication of the present law have presented a written declaration with the accompanying documents to prove their citizenship in the Russian Socialistic Federative Soviet Republic or of some other independent nation which is formed on the territory of the former Russian empire.

Chapter II.—The Rights of Citizens.

11. The equality of all citizens before the law is established independent of sex, occupations, nationality, religion or affiliation with one or another political party. All the divisions of citizens into classes and all the privileges are annulled as well as civil and military titles and grades.

12. All citizens are responsible for their crimes and misdemeanors only before the court according to the laws of the republic.

13. Full liberty of conscience is guaranteed to all citizens of the republic. The enjoyment of civil and political rights is entirely independent of religion and no person within the limits of the republic can be persecuted by any authority and limited in his rights on account of his religious convictions.

14. The church is separated from the state. Each citizen can profess any religion or none.

15. Only those acts by the civil authority which are worked out by the organs of competent civil authority according to the rules fixed by law have lawful power.

16. In the documents given by public institutions and officials to citizens no reference to their religion or whether they profess any religion shall be made.

17. Entire liberty of assembly, of the press and of speech is guaranteed to all citizens. Punishments for crimes committed by writings or speeches can be imposed only by the court. Citizens are not held responsible for the free expression of their personal opinions.

18. The springing up and the existence of societies and unions (among whose number also can be religious societies) is declared to be free so long as they do not have any purpose punishable by the criminal laws of the republic.

Note 1. The acquiring by societies and unions (among whose number can be religious societies) of juridical rights is fixed by the general civil law.

Note 2. The closing of a union or society can take place only after a decree of a court.

19. Workers have the liberty of combinations which are not subject to any restriction on the part of the state.

20. The person, the home and the correspondence of every citizen are inviolable.

21. No one can be punished without being tried and no one can be arrested, submitted to a search of home or person, or submitted to any restriction of liberty whatever without causes fixed by law and then entirely according to the specifications of the judicial authority, which must be presented to the person arrested. The only exception that can be made is when a culprit is taken in the act of committing a crime. One can arrest him then without legal papers, but the charge of the judicial authority must be presented to him within 24 hours.

22. Every prisoner as well as every citizen can demand the immediate statement of the charge against him or his release.

23. Entrance into a home without the consent of the householder is permitted only when a call for help comes from within the building, when there is some sort of accident or according to instructions from the judicial authority. The only possible exception is when a person is arrested in the act of committing a crime.

24. Censorship of mail, of telegraph and of telephone is not permitted.

25. Every citizen has the right freely to choose his occupations, his residence and has the right of unrestricted movement not only in the limits of the republic but abroad, except in cases provided for by law.

26. Bodily punishments and the penalty of death are banned forever.

27. Prohibition of ownership and of disposal of any kind of property or of a business or of any product of industry as well as restricting the right of possessing these can take place only through a judicial order and exclusively in case of the public interest.

28. All the small groups of people of other races which are included in the enumeration of the republic have the right of the larger body politic whose limits are fixed by law.

29. In the reports of public institutions and officials as well as official correspondence and commercial books, each citizen has the right to use his national language. A special law should specify the form and regulations which will define the use of the languages in the branches of the local government, the judiciary and official reports.

30. Foreigners living within the territory of the republic have the rights given to citizens of the republic except in cases which are specified by the appropriate laws.

PART IV.

Section I., Chapter I.—The Central Authority.

31. The supreme authority of government within the territory of the republic belongs only to the people of the far east.

32. The people achieve their supreme authority through the intermediary of the popular assembly and through the government selected by it.

Chapter II.—The Popular Assembly.

33. The popular assembly is selected by all the population of the republic by means of a general vote, just, equal and secret, by the proportional system of representation, for a term of two years, and is composed in the ratio of one deputy for each 15,000 citizens of the republic.

34. The popular assembly has full legislative authority.

35. All citizens of the republic without distinction as to sex, religion and nationality, who have reached the age of 18 years, who are in right mind and are not restricted in their rights by the court have the rights of election, active and passive, in the popular assembly.

36. Persons in military service have the electoral right in the popular assembly the same as all citizens and vote at elections with all the population. The only exception which can be made is for armies which are at the front or on the march.

37. All military or civilians who may be elected in the membership of the popular assembly are relieved of the duty of service for the time that they are members of the popular assembly.

38. Sessions of the popular assembly shall convene Feb. 1 and Nov. 1, of each year. The length of the sessions depends on the popular assembly, but they shall be suspended during the season for work in the fields. The popular assembly can be convened for extraordinary session on the initiative of the government or by the demand of half of the members of the popular assembly.

39. The power of each session of the popular assembly ceases with the opening of a popular assembly with a new membership.

40. A newly elected popular assembly is opened by the president of the membership of the former popular assembly or by his assistant. Immediately upon the opening of the session it shall choose the officials from its personnel by means of a secret ballot. The first meeting is regarded as legitimate when not less than two-thirds of the total number of members are present and the other meetings when more than one-half are present.

41. No member of the popular assembly can be arrested or forced to submit to judicial investigations without the order of the assembly itself, except when in the act of committing a crime. In the latter case the president must be informed not later than twenty-four hours after the arrest. The president can release the prisoner by his own authority, but in the next meeting of the popular assembly he must put his action to the question so that the assembly can make the decision.

42. The popular assembly decides the following questions:

(1) The discussion and approval of laws relative to all questions of the social life and of the state.

(2) The discussion and approval of all international treaties between the republic and foreign governments.

(3) The adoption of the budget of national revenues and expenses and the examination of the accounts which go to make up that budget, the granting of supplemental appropriations, the adoption of taxes, customs and duties, the discussion and approval of public bonds, the permission of issues, the approval of treaties of concessions except those which are delegated to the government and the council of ministers.

(4) The adoption and alteration of the system of coinage and money as well as the system of measures and weights in the territory of the republic.

(5) The adoption of the bases of organization for the armed forces of the republic.

(6) The supreme supervision over the method of governing.

(7) The granting of amnesty.

(8) The declaration of war and the conclusion of peace, and

(9) The deciding of all other questions which the popular assembly considers as necessary of consideration.

43. During an interval between sessions of the popular assembly the government has the authority to publish temporary laws in cases of emergency, effective until the calling together of the following session of the public assembly. Such temporary laws cannot change the constitution of the republic or suspend its action in full or in part and ought to include a reference to the present article. Laws published in this manner shall be examined and approved by the assembly immediately upon the renewal of its sessions. The popular assembly can stop the action of such laws before their examination.

Chapter III.—The Government.

44. The government of the republic consists of seven members and is elected by the assembly for the term of two years.

45. The elections of the government shall take place in a session of the popular assembly by secret ballot and shall be considered as accomplished when not less than two-thirds of all the members of the popular assembly are present at the meeting. Candidates balloted for are considered elected as members of the

government when they have received the votes of not less than half of all the members present during the meeting of the assembly.

46. Elections of the government before the specified term can take place only when four of its members have retired from the government.

47. Only citizens of the republic who have an electoral right in the assembly can be members of the government.

48. The government shall concern itself with:

(1) The nomination or dismissal of the president of the council of ministers and the controller of the state; of ministers and their assistants upon the presentation by the president of the council, as well as of other authorized agents whose nomination and dismissal depend upon the government.

(2) The national representation of the republic in its relations with foreign nations.

(3) The calling of the popular assembly for extraordinary sessions.

(4) The granting of amnesty.

(5) The publication of laws passed by the popular assembly.

(6) The issuance of temporary laws in the interval between sessions of the popular assembly according to article 43 of the present law.

(7) The annulling of any acts of the council of ministers which may be considered by the government to be contrary to the laws or the constitution.

49. The government acting with the council of ministers achieves the supreme executive authority in the territory of the republic which is concerned with:

(1) The general government of the country and the direction of its external and internal policies.

(2) The organization of the military forces of the republic.

(3) The preliminary decision on questions concerning the conclusion of peace and the defense of the territorial inviolability of the republic.

(4) The accepting or giving of bonds, the granting of concessions, making financial agreements or customs, commercial or other financial treaties, subject to the review and revision of the assembly, and

(5) The compiling of the preliminary estimate of revenues and expenses of the republic.

50. The government has the right to suspend the operation of laws, enacted by the popular assembly, in cases where they are considered contrary to the constitution. A law suspended by the government and returned to the popular assembly is considered adopted by the latter if more than two-thirds of the members present in the assembly vote for it again. Such a law, enacted for a second time by the assembly, cannot be suspended from operation by the government.

51. All acts of the government, as well as the temporary laws promulgated according to article 43, are effective only when they are approved by the council of ministers or by one of the ministers of the council of ministers, for whom all are responsible before the popular assembly for that approval.

52. Members of the government can be placed on trial by act of the popular assembly in case of treason to the state.

Chapter IV.—The Council of Ministers.

53. All the ministers compose the membership of the council of ministers. The number of ministers and their duties are defined by special laws creating their positions.

54. The president of the council of ministers may take a portfolio or continue as a minister without a portfolio.

55. The controller of the state assists at all sessions of the council of ministers and of the government, with the right of debate.

56. Only citizens of the republic who have the electoral right to the popular assembly can be ministers.

57. The office of minister is inconsistent with that of member of the government, but it is consistent with the title of member of the popular assembly.

58. All the ministers have the right to present questions which concern their departments to the popular assembly.

59. All the ministers, collectively and individually, are responsible before the popular assembly for all acts, orders and the conduct of the council of ministers in general, as well as of each minister individually, and for their approval of acts of the government. Except for political responsibility, the popular assembly has the right, regardless of the general rule, to place the ministers on trial for crimes committed in their official capacity.

60. In case the popular assembly expresses its opposition to the council of ministers, the latter is required to resign.

61. The ministers are required to answer all questions and all requests of the popular assembly.

Chapter V.—Legislative Initiative.

62. All citizens of the republic have the right to initiate legislation if they have the electoral right to the popular assembly. This right is realized under conditions detailed in the following article:

63. A petition for the enactment of a law or of any other action ought to be signed by 1,000 citizens. A draft of the law or action proposed for enactment ought to be included with the petition.

64. The council of ministers, acting as such, has the right to introduce legislation. The same right belongs to the government of the republic.

65. The members of the popular assembly have the right to introduce legislation. A petition for the enactment of a law or of any other action ought to be signed by at least five members of the popular assembly, and a draft of the law or other action proposed for enactment ought to be included with the petition.

Section II., Chapter I.—Organs of Local Authority.

66. The organs of local authority of the nation are autonomous organs, selected by all the population of the particular locality by a general vote, equal, just and secret, according to proportional representation.

67. The organs of local authority of the provinces, districts (counties), communes (townships) and villages manage the governmental affairs and local economy in the provinces, districts, cities, communes and villages, and in addition execute all the laws and decrees of the central authority of the state.

68. The organs of local authority manage the economic affairs of the local government independently; in accordance with the laws established by national authority and under the control established by the law they have the power to promulgate, without violating the constitution, regulations which are obligatory on all persons and institutions the same as national decrees. The local decrees, though suitably published, can be suspended and annulled by the government if they conflict with the interests of the republic.

69. The carrying out of the laws, regulations and orders of the central authority ought to be conducted by the organs of local authority in accordance with the directions of the central authority, holding themselves liable for all legitimate responsibility for the improper execution of these orders and regulations.

70. For the carrying out of national affairs which demand a strict centralization (mili-

tary affairs, railroads, etc.), as well as for the administration of lands, of buildings and other enterprises administered by the central authority, this latter shall be conducted by the representative organs of central authority in the localities. The law defines the manner and the basis for the participation of the organs of local authority in the aforesaid affairs of state.

Chapter II.—The Organs of Provincial Authority—The Provincial Assembly.

71. The supreme organ of national authority in the province is the assembly of provincial delegates elected by the population of the province by a general vote, equal, just and secret, according to the proportional system of representation for a period of two years.

72. Elections to the provincial assembly conform to the election laws of the popular assembly of the republic, counting one delegate for each 2,500 citizens.

73. Elections to the provincial assembly before the sessions are made either according to the regulations of the national legislative authority or according to the decrees of the provincial assembly or upon the request of one-third of the electors of the particular province. New elections of delegates before the session can be established only according to the request of one-third of the electors of the particular electoral district.

74. The provincial assembly is convened for indefinite sessions for periods fixed by itself, but not less often than twice each year. Special sessions of the provincial assembly are called by the provincial government, or by its own initiative, or on the request of not less than one-third of the members of the provincial assembly.

75. The provincial assembly concerns itself with:

(a) The election of the provincial government.

(b) The control of all organs of provincial authority.

(c) The deciding of questions of local government and provincial economy.

(d) The putting into execution of the laws, orders and regulations of the national central authority.

(e) The deciding of all other questions specified by a special law regarding the special subjects within the jurisdiction of the provincial assembly as well as those questions which concern the province and which the provincial assembly wishes to consider without violating the constitution and the laws of the republic.

76. In order to execute the duties imposed on the provincial assembly the latter has the right of:

(a) The promulgation of regulations concerning all subjects within the jurisdiction of the provincial assembly.

(b) The establishing of taxes and duties in accordance with the national legislation.

(c) The discussion and approval of the budget.

(d) The creation of plans for enforcing all the laws, regulations and decrees of the provincial authority in the province.

(e) The approval of the system of provincial government activity as well as the discussion and approval of the report of its activity, and

(f) The taking of all necessary steps for the carrying out of provincial government affairs.

The Provincial Government.

77. The provincial government is elected by the popular assembly of the province for a term of two years.

78. The provincial assembly can elect a new provincial government before the term has expired the same as it has the right to put its members on trial in cases of violations. The central government also has the right to bring up the question of provincial government elections before the term, for which purpose it must convene the provincial assembly in a special session.

79. The provincial government shall organize the following departments: Administration, labor, justice, public safety, public welfare, education, finance, agriculture, supplies, commerce, industry, health, etc.

80. The provincial department shall be under the proper ministers through the intermediary of the provincial government, which is responsible for the work of all the departments.

81. Within the circle of government jurisdiction enters:

(a) The carrying out of all the regulations and orders of the central authority.

(b) The execution of all the regulations and decrees of the provincial assembly.

(c) The organization, observation and guidance of all the authorized organs under the provincial government.

(d) Taking steps to fight against crime.

(e) Making up the preliminary budget.

(f) Calling the provincial assembly and in case of default the district assembly.

(g) The settling of such other questions as are placed by particular laws within the jurisdiction of the provincial government.

82. The provincial government has the power to promulgate compulsory regulations in the interval between sessions of the provincial assembly, presenting all these regulations without fail for the review of the provincial assembly at its next session.

83. Regulations and orders of the provincial assembly and of the provincial government, in case they conflict with the laws and regulations of the central government, may be vetoed by the representatives of the central authority. The individuals and institutions interested also can protest against them in the manner specified by a particular law.

Chapter III.—The Emissars of the Provincial Government.

84. For the purpose of establishing liaison between the central authority of the nation and the organs of local authority as well as to establish legality and democratic order, a temporary institute of emissars of the government is created.

85. The provincial emissar is named by the national government and is its representative in the province.

86. The provincial emissar should observe and direct the carrying out of the laws, orders and regulations of the national government through the organs of local authority as well as through the institutions and agents of the central authority.

Chapter IV.—District, City, Commune and Village Organs of Authority.

87. The organs of authority prevail within the limits of a district, city, commune or village according to the order and establishment explained in the preceding chapters of this constitution under the heading of provincial organs of authority. The commune organs of authority in their relations with those of the village; the district organs of authority in their relations with those of the commune and village, as well as the provincial organs of authority in their relations with those of the district and city, have the same powers as the government has in its relations with the provincial organs of authority.

88. Cities with a population of more than 20,000 have the rights of independent districts. Others are embraced in the district organization with the rights of communes.

89. District as well city (having more than 20,000 population) assemblies having the authority in that district are elected for the period of two years in the same manner as that of the province, in the ratio of one delegate for 1,000 citizens, on condition, however, that the total delegates from each district shall not be less than thirty nor more than 150.

90. Commune as well as city (having less than 20,000 population) assemblies having the authority in that commune are elected for the period of one year in the same manner as for provincial and district assemblies in the ratio of one delegate for 100 citizens, on condition, however, that the total number of delegates shall not be less than twenty nor more than 100, while the city assembly cannot have more than fifty.

91. District, city and commune assemblies are convened by the method established for those of the provinces, with the especial condition that the city assembly shall hold not less than twelve sessions a year and the commune not less than three.

92. The village assembly consists of all the citizens of the particular village who have the electoral rights in the popular assembly and is convened according to necessity.

93. The village assembly elects from its membership a village committee for a period of not less than six months or more than one year.

Section III.—The Judiciary.

94. The only tribunal existing within the territory of the republic is the independent people's court.

95. The court is independent of other authorities and dispenses justice in the name of the people of the republic.

96. The courts of justice are the protectors of the law in the republic and their authority extends over all the territory and all the population of the republic. The membership, the circle of jurisdiction and the manner of procedure of the courts of justice are established by specific law.

97. Judges are elected from the ranks of those citizens who are able to fulfill all the conditions established by law, for a term defined by law, and they cannot be removed before its expiration except by conviction.

98. Citizens of the republic take part in the administration of justice as assessors who equally with the judges decide cases. The method and the basis for the citizens' participation in the administration of justice are fixed by a specific law.

99. In the administration of justice the judges are to be guided by the laws in force and by the dictates of their conscience.

100. Arguments, sentences and decisions are to be made in public. Arguments behind closed doors can take place only in accordance with rulings of the court based on the law.

101. The organization of special courts as well as the matters within the jurisdiction of such tribunals shall be strictly defined by law.

102. The entering of an appeal is abolished. Only the cassation of sentences is permitted; the agency for cassation has the right to annul sentences if they are manifestly unjust.

Section IV.—The People's Control.

103. The people's control is independent and subordinate only to the legislative authority as to the limits of its authority.

104. Included in the personnel of the national people's control are:

(1) The people's national controller of the state and his two assistants, named by the government.

(2) The college of the people's controller.

(3) The councilor of the people's controller.

(4) The central people's control.

(5) The local civil institutions of the people's control, and

(6) The military field institutions of the people's control.

105. Included in the organization of the central college of the people's controller are: The people's national controller (who is the president of the college), his two assistants and five members of the college, the latter elected, one by the workers' union of the far east, three by the peasants' union and one by the native populations of the republic. The absolute power of the elected members is formally approved by legislative authority.

106. The provincial college of people's control shall consist of a manager (who is the president of the college) and his assistant named by the central college and three members elected by the provincial assembly for the term of its power.

107. The district colleges of the people's control shall consist of a governor (who is the president of the college) appointed by the central college and two members elected by the district assembly for the term of its power.

108. The people's national controller shall assist at all meetings of the ministry and government with the right of debate.

109. The people's control shall:

(a) Watch the legality and expediency of all actions of national institutions, of individuals or public organizations, of private undertakings within the people's sphere of economy.

(Note—Public organizations and private undertakings are subject to revision by the people's control if they receive aid or are financed or subsidized by the government or if they act under orders of the government or when there is a government guarantee and only under these conditions.)

(b) Observe the impartial and unvarying execution of the laws and regulations in capital and country and official orders issued concerning the people's economy.

(c) Verify the regularity of the distribution of the products of industry and of all supplies.

(d) Examine the different lines of the people's economy and publish the result of the examination to the legislative branches.

(e) Examine the budget, the proposals, the estimates of revenues and expenses and publish its conclusions in regard to these lists to the legislative branches at the same time as the budget is presented to the popular assembly.

(f) Observe the regularity of the voting of credits.

(g) Give its opinion on all sorts of financial and economic plans and proposals of the disbursing institutions, the same as it gives its opinion on all plans and projects which are advanced by all the departments for the approval of legislative authority and which suggest new expenses for the treasury or any change in the financial and economic policy of the republic.

(h) In extraordinary cases which threaten to cause a manifest loss to the people it can suspend the corresponding plans of the disbursing institutions.

(i) Prepare an account of the public property and make an annual report on its standing and circulation for presentation to the legislative institution at the times established for presentation of the budget.

(j) The closest scrutiny on the activity of all the departments, of their local branches, and in general on all the organs of authority.

(k) Bring officials to trial for administrative crimes and neglect of duty, as well as private individuals for crimes which cause loss to the public treasury, and to announce the dismissal of such officials to the organs of the corresponding authority.

110. For the achievement of the tasks outlined, the great bulk of the population is invited to participate with the control in its unending work and in its acts of special revision.

111. A bureau of complaints is established in each institution of the people's control to receive complaints and charges against irregular acts, abuses and shortcomings of officials of all departments.

112. The military field institutions of the people's control, which are included among the institutions of the people's control, are subordinate only to the central college of the people's control and by it to the legislative authority.

Section V., Chapter I.—The National Autonomies.

113. All the native populations and all the national minorities within the territory of the republic have the right to autonomy to the largest degree.

114. The organs of national autonomy shall be guided by the laws of the republic in their activities.

115. A minister of national affairs with the corresponding national departments is created for the control and administration of the activity of the organs of national autonomy.

Chapter II.—The Autonomy of the Buriat-Mongol Nationality.

116. All the territory populated by the Buriats and Mongols shall form a definite province, named "the Autonomous Province of the Buriats and Mongols," whose boundaries are established by law.

117. The territorial relations of the Buriat-Mongol population with the neighboring Russian population for the purpose of preventing mutual encroachments are regulated by a special commission created by the government of the republic in which the representatives of both parties have equal membership.

118. The population of "the Autonomous Province of the Buriats and Mongols" is subject to the general laws of the republic, but within the limits of the province it is independent in the field of organization, of justice, of administrative and economic life as well as in its national civilization.

119. "The Autonomous Province of the Buriat-Mongols" within the limits of its jurisdiction is governed according to the general laws of the republic by an assembly of delegates, which elects an executive organ—the provincial government. The assembly of delegates has the right within the limits of independence mentioned in article 118 of the present law to promulgate local laws for the province not contradicting the general laws of the republic.

120. All national laws, orders and regulations of the central government are executed within the territory of the Buriat-Mongol autonomy by the government of the province.

Chapter III.—The Autonomy of National Minorities.

121. All national minorities which live within the territory of the republic have the autonomy of their national civilization.

122. The autonomy of national civilization is realized by the organs of national government, elected by general vote, equal, just and secret, according to proportional representation.

123. The national autonomies are publicly authorized organs and the sphere of their competence is limited to the area of the cultural life of the particular nationality.

124. In the smaller scattered cultural autonomies the language of the particular nationality can be employed: Tatar, Yiddish, Korean, Little Russian, etc.

125. Satisfying the necessities of civilization of each nationality, conforming to its special needs, is guaranteed by a proportional part of the state budget.

PART V.

Section 1. Fundamentals of the National Economic Organization.—The Land.

126. All ownership of land, what is beneath the surface, the forests, the waters and their riches within the limits of the republic is annulled for all time.

127. All the land, regardless of previous use or ownership, is declared to be property of the toilers. The land is occupied without any payment to the former proprietors and is held as public domain.

128. The manner of exploiting the land, its underground depths, the forests and waters and their riches is provided for in a specific law.

129. The setting aside of lands which are important to the rural economy for development by workers is made according to regulations established by the territorial organs of provincial autonomies, conforming to conditions of climate and soil.

130. Personal labor is the broad source and the foundation of the right to exploit land. Exceptions to this rule are permitted only in cases provided for by specific land laws. The right of exploitation cannot depend upon religion, nationality or sex.

131. The manner of exploitation can be collective, by groups or individuals, according to the wishes of the population itself.

Section II.—Labor.

132. Having for its end the organization of the national economy and the equal distribution of burdens for its reconstruction, the republic considers work to be the obligation of every citizen of the republic.

133. The length of working time for each worker cannot be greater than eight hours by day or six hours by night, having each week a rest of forty-two consecutive hours.

134. For individuals who have not reached the age of 18 years and for whom the work is too heavy and injurious to the health, the length of the working day shall not be more than six hours.

135. Overtime work shall be permitted only in exceptional cases and after the consent of the professional union and the local departments of labor.

136. In the tasks of rural economy, considering its peculiarities, overtime work is permitted and shall be paid for at the rate of eight hours per working day.

137. The valuation of the products of a peasant's labor, who cultivates the land by his individual efforts, is established in the legislative order according to the representation of the peasants' union, counting eight hours as a working day and including therein his necessary expenditures.

138. Overtime work which is especially difficult or injurious to the health is absolutely forbidden for all persons of either sex who have not reached the age of 18 years, the same as night work is absolutely forbidden for males who have not reached the age of 18 years and for all females.

139. Women are relieved from work during eight weeks before childbirth and during eight weeks after childbirth when they are engaged in physical labor. If they are not engaged in physical labor they are relieved for six weeks before childbirth and for six weeks after childbirth.

140. Employment of children who have not reached the age of 16 years is forbidden.

141. For the purpose of assuring the normal living minimum to workers, according to the workers' presentation through the central professional organs, the republic by legislative

act fixes the wage minimum obligatory for all enterprises in the state, public or private.

142. Workers through their professional and industrial unions are guaranteed the rights of participation, with the right of debate and vote, in all the economic organs of the state, in the administration of state enterprises, as well as in the state control of private enterprises.

143. The republic guarantees the greatest protection to work through enacting appropriate laws. Workers have a large participation by the inspection of labor, which is elected by the professional unions.

144. Social insurance is established, with the fullest participation of the workers, to care for all classes of occupational risks for everybody employed to work in undertakings and institutions in the state, public and private. Payment is imposed entirely on the employers without any deduction from the salaries of those who are insured.

145. Laborers and employes who have worked one year receive one month's vacation and those who have worked six months receive two weeks' vacation, their salaries continuing.

Section III., Chapter I.—The Economic Financial System.

146. The system of private property is preserved. The integrity of all goods, movable and immovable, is guaranteed to all citizens and private societies under the restrictions provided for by the constitution.

147. The reservation to individuals and private societies of the right temporarily to exploit their holdings of land, of forest wealth and of waters in the form of concessions shall be made in accordance with the terms of specific legislation, and the term of any type of concession cannot be for more than thirty-six years. Concessionary rights can be granted to foreign individuals and organizations, but in cases of competition, these privileges should be granted to citizens and organizations of the Far Eastern Republic and the Russian Socialist Federative Soviet Republic, all other conditions being equal. When private individuals and social institutions compete the privilege is given to the social institutions, all other conditions being equal.

148. The state asks all possible assistance to the task of village economy, and especially to the smallest economy, and it encourages all phases of collective economy for the purpose of developing its social organization.

Chapter II.—Taxes.

149. No person shall be relieved of the obligation of paying taxes, except in cases provided for by law.

150. Except in the cases which are definitely excluded by the law, no collections for the profit of the nation or of the local autonomies shall be demanded of citizens in any other form than of taxes.

151. No taxes, direct or indirect, nor charges shall be proposed or levied on the territory of the republic other than by the force of law.

152. The instituting of national taxes and charges is the prerogative of the legislative authority. The instituting of taxes, charges and collections by the organs of local autonomy shall be made in the manner indicated in Article 76 of the local autonomy.

153. Indirect taxes on food products in bulk are permitted only as a temporary measure and upon the basis and within the limits strictly defined by law. Indirect taxes on objects of luxury are permitted as a permanent measure which shall be reviewed each year in the legislative program.

Chapter III.—State Revenues and Expenses and the National Budget.

154. The fundamental revenues of the state should consist of progressive taxes on income, the tax on business, on inheritances, on the unearned increment of articles of value, on gifts, etc., and other incomes from state undertakings and monopolies. (Note—The minimum income which is exempt from taxation, as well as the minimum of land and of personal property which is exempt from taxation, is fixed by law.)

155. State monopolies—commercial and productive—and the proportion of their interests going to state benefit are fixed by legislative order.

156. All national revenues and expenses are to be included in the national budget.

157. The national budget shall be presented to the popular assembly for its approval at least two months before the beginning of the period of estimates. (Until the approval of the first budget the credits to cover national expenses shall be opened by the government according to legislative order for each specific occasion.)

158. If the national budget is not approved at the beginning of the period of estimates, the government, for supplying the necessities of the nation, can avail itself of the credits of the previous year's list, but not for a longer period than one-third of a year.

159. Not a single expenditure of national resources can be made unless the credit is established, or without the promulgation of a specific law.

160. No pension and no award taken from the funds in the national treasury can be made except by the authority of law.

161. Credits granted in conformity with the national budget are distributed immediately to their destinations within the limits of the subdivision and cannot be used for the satisisfying of any other necessities if there is no special decree of the government.

Chapter IV.—Public Bonds.

162. No public bonds, internal or external, no financial obligations which are a liability on the national treasury and no pledges can be concluded or made except by the authority of law. (Bonds, financial obligations and pledges concluded or made by the government of the republic prior to the acceptance of the present constitution are approved by the constitutional assembly and are recognized by the republic as binding and guaranteed the same as after the introduction of the constitution.)

Chapter V.—The Monetary System.

163. No system of circulation of money can be established, no depreciation, no withdrawal from circulation or issuing of new notes or coins can be effected except by legislative act.

164. The weight, alloy and value of the coinage shall be established by law. The control and supervision of everything which concerns coinage, the decision of debates regarding the alloy and the scrutiny of everything relative thereto as well as to the circulation of paper money are regulated by law.

PART VI.

The Defense of the Republic.

165. The armed populace is the sole defense of personal liberty. Consequently for the defense of the country, general military instruction on the principles of the militia system is established for men from 18 to 45 years of age.

166. The general instruction shall be held in the unions of territorial troops. It shall be so regulated that citizens can continue to

carry out their usual duties of productive social labor. (The division of the republic into territorial military districts as well as the plan of general instruction is established by legislative act.)

167. For the continuous defense of the country the regular army is created—the people's revolutionary army. The army is organized on the basis of general recruiting for all citizens of the republic and is composed of:

(1) Citizens who are called for their military service when they have reached the age of 20 years, for a period of two years, and

(2) Volunteers above the age of 18 years whose number is established by legislative act.

168. Military service for native populations of the republic is established by a special law.

169. The supreme authority directing the people's revolutionary army is the government of the republic.

170. The manner of the creation and organization of the people's revolutionary army is established in a legislative act.

171. In the interests of the defense of the republic the government has the right to command and mobilize all, or a part, of the citizens capable of carrying arms. The mobilization of all, or a part, of the citizens capable of bearing arms can be made only by legislative act.

172. The social insurance of citizens who are performing their military service, the manner of safeguarding their families, as well as the protection in society of citizens who have lost their aptitude for work while performing their military service, and of the families of those who have perished in defense of the republic, is established by law.

173. Every citizen while performing his military service preserves all civil rights and carries out his civil obligations the same as all other citizens of the republic.

PART VII.

Public Instruction.

174. The purpose of the republic is to give to all citizens and especially to the toiling masses thorough instruction.

175. The school is separated from the church. Religious teaching as well as religious worship is not permitted in state institutions or in public or private schools where other subjects are taught.

176. For all children of school age, the government makes instruction compulsory and free, supplying them with food and clothes.

177. The instruction shall be uniform and conducted for boys and girls together in all the schools of the republic.

178. Instruction and education in all the schools of the republic should present a single system uniform for the common purpose, consecutive in character and based on the principles of industrial education.

179. All the populations of the republic have the right to organize instruction in their national language.

PART VIII.

The Coat of Arms and Flag.

180. The coat of arms of the state is established; its description is as follows: Upon a red shield is a wreath of pine, at the bottom of which is designed the dawn with the sun starting to appear and above a five-pointed emblazoned star in silver. In the middle of the wreath across a sheaf of wheat is a crossed anchor and a pick of one blade with the point down. On the left side of the wreath of pine on a red background is the Russian letter D, on the right side the Russian letter V and below between the crossed branches of pine, the Russian letter R.

The National Flag.

181. The national flag is approved; its description is as follows: On a red field of which the length is one and a half times the width, in the upper corner half of the length and of the width is a blue square decorated with the letters "D. V. R." arranged in the form of a triangle.

PART IX.

Revision of the Constitution.

182. A proposal to revise or add to the present constitution, all or in part, can be brought up by the initiative of:

(1) One-third of all the members of the popular assembly who are present at its meetings.

(2) The provincial assembly of delegates.

(3) The government.

(4) The initiative of 10,000 citizens who have an electoral vote in the popular assembly.

183. Any change, addition or annulment, in whole or in part, of the present constitution can be made only according to law, accepted by the popular assembly with two-thirds of all the members present at the meeting and when there is a majority of not less than two-thirds of those participating voting for it.

PART X.

The First Popular Assembly and the Government.

184. The method and time of elections to the first popular assembly and the government are established by a special act of the constitutional assembly. (Signed):

President of the constitutional assembly, D. S. Shilov; chief assistant, V. A. Boradavkin; assistants, I. P. Klark, P. V. Lekhov, F. S. Manevetov, P. N. Dambikov, F. I. Fedotov; chief secretary, S. F. Sookhovy; assistants, M. I. Borodin, T. S. Iscenko, S. P. Nikiforov, S. S. Kirgizov, G. P. Baravinski.

FLOOD DISASTER IN SAN ANTONIO, TEX.

San Antonio, Tex., was visited by the worst flood in its history Sept. 10, 1921. A heavy rainstorm on the previous evening was attended by what amounted to a cloudburst which caused the San Antonio river and Alazan and San Pedro creeks suddenly to overflow their banks and inundate the adjacent residence districts as well as a large part of the city's business district. Houses were swept away before the sleeping occupants could make their escape, the height of the flood occurring at 2 o'clock in the morning. The loss of life was consequently heavy. Fifty bodies were recovered and it was feared that others had perished and been buried in the debris. The damage to property in the city was estimated at $3,000,000.

The flood extended beyond San Antonio and there was heavy loss of life and property in Williamson and Milman counties and elsewhere in Texas. Something like 10,000 square miles were inundated and the total damage was estimated at $10,000,000. The number of dead was not definitely ascertained, but was given as approximately 250.

CONSTITUTION OF THE CZECHO-SLOVAK REPUBLIC.

Adopted by the national assembly of that country on Feb. 29, 1920, and approved by President Thomas G. Masaryk on March 5, 1920.

[Translated by Anthony Czarnecki.]

Preamble: We, the Czecho-Slovak nation, in order to form a more perfect union of our nation, to establish justice and order in the republic, to insure peaceful development of our Czecho-Slovak homeland, to promote the general welfare of all the citizens of this state and to secure the blessings of liberty to coming generations, have adopted in our national assembly on this 29th day of February, A. D. 1920, the constitution of the Czecho-Slovak Republic, the text of which here follows. On this occasion we, the Czecho-Slovak nation, declare that we shall endeavor to have this constitution, together with all the laws of our land, carried out in the spirit of our history as well as in the spirit of those modern principles embodied in the doctrine of self-determination; for we desire to join the society of nations as an enlightened peace loving, democratic and progressive member.

Laws Adopted Feb. 29, 1920, Creating the Constitution of the Czecho-Slovak Republic—Enabling Provisions;

Article 1. Laws in conflict with the constitution, with the fundamental enactments which are a part thereof, and with the laws which may supplement or amend it are void. The constitution and the fundamental enactments which are a part thereof may be changed or supplemented only by laws designated as constitutional laws.

Art. 2. The constitutional court shall decide as to whether the laws of the Czecho-Slovak Republic and the laws of the diet of Carpathian Ruthenia (Russinia) conform with article 1.

Art. 3. The Constitutional court shall consist of seven members. The Supreme Court of Administration and the Supreme Court of Justice shall each designate two members. The remaining two members and the presiding judge shall be named by the president of the republic. Regulation of the manner in which the two above mentioned courts appoint members of the constitutional court, the tenure of office, its functions, its rules of procedure and the definition of its jurisdiction or the effects of its judgments shall be determined by law (by a specific enactment of law).

Art. 4. The present national assembly shall remain in session until the house of representatives and the senate are organized. Laws enacted by the present national assembly but not proclaimed by the day when the house of representatives and the senate are organized shall not go into effect if returned by the president of the republic to the national assembly. As to the term or period for the exercise of the right of the president of the republic fixed by the provisional constitution according to section 11 thereof and for the duty to proclaim the adopted law, the laws enacted by the existing national assembly shall be governed by the provisional constitution.

Art. 5. The present president remains in office until a new election has taken place. From the day upon which this constitution goes into effect he shall possess the right herein provided.

Art. 6. Until there is elected the full number of members of the house of representatives and the senate as provided for in the constitution the number of members actually elected shall be applied to determine the quorum of representatives and senators required by the constitution for the enactment of legislation.

Art. 7. Provisions of articles 1, 2, 3 (paragraph 1) and 6 form a part of the constitution as set forth and in accordance with section 33 of this instrument. The enabling provisions referred to in the constitution are not a part of this instrument except as expressly provided by this constitution.

Art. 8. The constitution hereto attached shall go into force and effect on the day of its proclamation. But article 20 does not apply to members of the present national assembly.

Art. 9. On the day designated in paragraph 1 of article 8 all laws, regulations and ordinances in conflict with the constitution and the republican form of government, as well as all former constitutional laws, even though some of their provisions are not in conflict with the fundamental laws of the Czecho-Slovak Republic, shall become void.

Art. 10. This law (enabling provisions) goes into effect simultaneously with the constitution and the government (cabinet of ministers) of the Czecho-Slovak Republic as hereby charged with carrying out this law and the constitution.

THE CONSTITUTION OF THE CZECHO-SLOVAK REPUBLIC.

Section 1—General Provisions.

Article 1. The people are the sole source of all state authority in the Czecho-Slovak Republic. The constitution determines through what organs the sovereign people express their will in laws, carry them out and find justice. The constitution also imposes the limitations beyond which these organs may not go, so that the rights of citizens guaranteed by the constitution may be protected and preserved.

Art. 2. The Czecho-Slovak state is a democratic republic, at the head of which is an elected president.

Art. 3. The territory of the Czecho-Slovak Republic forms a united and indivisible whole, the frontiers of which may be altered only by the constitutional or fundamental law. An inseparable part of this whole on the basis of voluntary union in accordance with the treaty between the allied and associated powers and the Czecho-Slovak Republic on Sept. 10, 1919, in Saint-Germain-en-Laye shall be and is the autonomous territory of Carpathian Ruthenia (Russinia), which shall receive the widest measure of self-government compatible with the unity of the Czecho-Slovak Republic. Carpathian Ruthenia (Russinia) shall have its own diet, which shall elect its own presiding and other officers. The diet of Carpathian Ruthenia (Russinia) shall legislate in the matter of language, education, religion, local administration and in such other matters as may be assigned to it by the laws of the Czecho-Slovak Republic. Laws enacted by the diet of Carpathian Ruthenia (Russinia) and signed by the president of the Czecho-Slovak Republic, shall be proclaimed in a separate series and shall also be signed by the governor of Carpathian Ruthenia (Russinia). Carpathian Ruthenia (Russinia) shall be represented in the national assembly of the Czecho-Slovak Republic by the proper number of representatives and senators in accordance with the election laws of the Czecho-Slovak Republic.

A governor appointed by the president of the Czecho-Slovak Republic on the recommendation by the government (cabinet) shall be at the head of Carpathian Ruthenia (Russinia) and he shall be responsible also to the diet of Carpathian Ruthenia (Russinia). Public officials or functionaries of Carpathian Ruthenia (Russinia) shall as far as possible be selected from its own citizenship. Details, especially as to the right of suffrage and the right or eligibility to be elected to the diet, shall be regulated by special enactments. The law of the national assembly determining the boundaries of Carpathian Ruthenia (Russinia) shall form a part of the constitution.

Art. 4. The citizenship of the Czecho-Slovak Republic is equal, uniform and single. Conditions governing the acquisition, duties, obligations and rights and the termination of citizenship of the Czecho-Slovak Republic are

determined by law. A citizen or subject of a foreign state cannot simultaneously be a citizen of the Czecho-Slovak Republic.

Art. 5. Prague is the capital of the Czecho-Slovak Republic. The colors of the republic are white, red and blue. State emblems and flags are prescribed by laws.

Sec. 2—Legislative Authority. Composition and Jurisdiction of the National Assembly and of Both Its Houses.

Art. 6. Legislative power of the whole Czecho-Slovak Republic shall be exercised by the national assembly, which shall consist of two houses—the house of representatives and the senate. Both houses shall meet in Prague. In cases of absolute urgent necessity they may be called to meet temporarily in some other place in the Czecho-Slovak Republic.

Art. 7. Legislative and administrative powers of the land diets which existed heretofore are hereby abolished. Unless a law adopted by the national assembly provides otherwise, it applies to the entire territory of the Czecho-Slovak Republic.

Art. 8. The house of representatives shall consist of 300 members, elected by a general, equal, uniform, direct and secret suffrage in accordance with the principle of proportionate representation. Elections shall be held on Sundays.

Art. 9. The right to vote for members of the house of representatives belongs to all citizens of the Czecho-Slovak Republic without distinction of sex who are above 21 years of age and who comply with all other requirements of the law governing elections to choose members of the house of representatives and electoral regulations.

Art. 10. All citizens of the Czecho-Slovak Republic, without distinction of sex, who have attained at least the age of 30 years and who comply with all other requirements and conditions of the law governing elections of members to the house of representatives and electoral regulations, are eligible for election as members of the house of representatives.

Art. 11. The term for which the house of representatives is elected shall be six years.

Art. 12. Details of the exercise of right to vote and election rules and regulations are contained and set forth in the law governing elections to the house of representatives.

Art. 13. The senate shall consist of 150 members elected by a general, equal, uniform, direct and secret suffrage in accordance with the principle of proportionate representation. Elections shall be held on Sundays.

Art. 14. The right to vote for members of the senate belongs to all citizens of the Czecho-Slovak Republic without distinction of sex, who are above 26 years of age and who comply with all other requirements of the law as to the composition and jurisdiction of the senate.

Art. 15. All citizens of the Czecho-Slovak Republic, without distinction of sex, who have attained the age of 45 years and who comply with all other requirements of the law as to the composition and jurisdiction of the senate, are eligible for election as members of the senate.

Art. 16. The term for which senators are elected is eight years.

Art. 17. Details of the exercise of the right to vote, the election rules and regulations and manner of conducting elections are contained and set forth in the law as to the composition and jurisdiction of the senate.

Art. 18. No person may be a member of both houses at the same time.

Art. 19. Contested validity of elections to the house of representatives and to the senate shall be passed upon and decided by the court of elections. Details shall be regulated and settled by law.

Art. 20. An employe of the state who is elected and qualifies as member of the national assembly shall automatically receive (or be granted) a leave of absence for the duration of his term as member of the assembly, shall be entitled to his regular salary, but without any local or active allowances, additions or supplements, and shall be entitled to retain his right to seniority promotions. University professors are entitled to leave of absence; if they make use of this right the same provisions apply to them as to other state servants or employes. All other public servants are entitled to leave of absence while they are members of the national assembly. Members of the national assembly may receive a salaried state position or appointment only after the expiration of one year from the time they cease to be members of the national assembly. This provision does not apply to ministers. The time limit of one year contained in the previous paragraph does not apply to representatives and senators who were in the service or employment of the state before and at their election to the national assembly if they remain in the same department of service or employment. County and district executives may not be members of the national assembly. Members of the constitutional court, associate members of the court of elections and members of county assemblies cannot at the same time be members of the national assembly.

Article 21. Members of either house may resign their mandates or membership at any time.

Art. 22. Members of the national assembly shall perform their duties and carry out their mandates in person. They may not receive or take orders from any one.

They shall not address to public authorities any requests or intervene in the personal interest of individuals or party interests. This prohibition does not apply to members of the national assembly in so far as the request or intervention with the public authorities is a part of their regular duties. In the first meeting of the house the members of the national assembly, whether of the senate or house of representatives, shall take the following pledge: "I promise that I will be faithful to the Czecho-Slovak Republic; that I will observe and uphold its laws, and that I will execute my trust and carry out my mandate to the best of my knowledge and conscience." Refusal of making this pledge or the making of any reservation thereto shall automatically carry with it loss of mandate.

Art. 23. Members of the national assembly cannot be molested or prosecuted for the exercise of their vote as members in the house or in committees thereof. For anything they may say in the exercise of their mandate as members they shall be amenable only to the disciplinary power and regulations of their respective house.

Art. 24. Before any member of the national assembly may be prosecuted or disciplined, civilly or criminally, for other acts or omissions, the consent of the respective house must be obtained. If the house refuses its consent, such prosecution shall be for all times null and void. These provisions do not apply to criminal liability which a member of the national assembly may incur as responsible editor.

Art. 25. If a member of either house is arrested in the commission of a criminal offense, the court or other authority having jurisdiction shall inform the president of the house at once of the arrest. Unless the house, or during adjournment of the national assembly the commission elected in accordance with article 54, signifies within fourteen days its consent to further imprisonment, such imprisonment ceases forthwith. Should the commission give its consent, the house itself shall decide the question of further imprisonment within fourteen days of its convening.

Art. 26. Members of both houses shall have the right to refuse to give testimony in reference to matters confided to them as members of the house even after they have ceased to be members. This does not apply to charges

of attempting to corrupt a member to abuse his trust.

Art. 27. Members of both houses shall receive compensation, the amount of which shall be provided by law.

Art. 28. The president of the republic shall summon both houses into two regular sessions annually in the spring and in the fall of each year, the spring session to commence in March and the fall session to commence in October. He may also call the houses into special or extraordinary sessions whenever necessary. If a majority of either house makes a demand for a special or extraordinary session upon the president of the government (cabinet), stating the nature of the special business, the president of the republic shall cause the houses to meet within fourteen days from the date of the demand. In case of his failure to act the houses shall convene simultaneously within the following fourteen days at the call of their presiding officers. If no less than four months have elapsed since the last regular session the president of the republic shall, upon demand of two-fifths of the membership of either house, call the houses to meet in session not later than fourteen days from the date of the demand. In case of his failure to do so the houses shall meet within an additional fourteen days upon the call of their presiding officers.

Art. 29. The sessions of both houses shall open and close at the same time.

Art. 30. The president of the republic shall declare the session of the national assembly closed. He may prorogue the houses for no longer than one month and not oftener than once a year.

Art. 31. The president shall have the right to dissolve both houses. He may not exercise this right within the last six months of his term of office. At the expiration of the term of either house or at the dissolution of either house new elections shall take place within sixty days. Dissolution of the senate does not stay criminal proceedings inaugurated and that may be pending before the senate in accordance with articles 67 and 79.

Article 32. The quorum of either house, except where otherwise provided for herein, is one-third of its entire membership; all acts to be valid must receive a majority vote of those present.

Art. 33. Declaration of war, amendment of the constitution and the fundamental laws which are a part thereof shall require an affirmative vote of three-fifths of all members of both houses.

Art. 34. To make a decision or indictment for the impeachment of the president of the republic, the president of the government (cabinet) and other members of the government (cabinet), a two-thirds majority in the presence of two-thirds of the full membership of the house of representatives by an affirmative vote shall be required. Proceedings before the senate sitting as a high criminal court shall be regulated by law.

Art. 35. Each house shall elect its own president, its officers and other functionaries.

Art. 36. Sessions of the house of representatives and of the senate shall be public. Executive sessions may be held only in cases provided for in the rules of procedure.

Art. 37. The fundamental or basic principles of the relations of both houses to each other, to the government (cabinet) and to the public and to all outside of them, shall be regulated by special law within the limits set by and conforming to the constitutional provisions. For the transaction of its business and for its internal order each house shall adopt and be regulated by its own rules. Until the house of representatives and the senate adopt their own rules the rules of the existing national assembly shall apply to and be binding upon them.

Art. 38. Whenever both houses meet as the national assembly in joint session the rules of the house or house of representatives shall apply and govern. (Articles 56, 59, 61 and 65.) Such a joint session is called by the president of the government (cabinet) and shall be presided over by the president of the house of representatives. The presiding officer or president of the senate shall be his alternate.

Art. 39. Ministers shall have the right to participate at any time in the meetings of either house and of all committees. They shall be given the floor whenever they desire to speak.

Art. 40. At the request of either house or its committee the minister shall attend and appear before such house or committee. Otherwise the minister may be represented by officials of his department authorized by him.

Art. 41. Bills or legislation may be submitted and originated either by the government (cabinet) or by either house of the national assembly. A bill or legislation submitted by members of either house shall be accompanied by a statement of expenses or financial issue involved therein and by recommendations as to how they shall be defrayed and met. Government (cabinet) proposals for financial budget and army bills must first be presented and laid before the house of representatives.

Art. 42. A constitutional law requires the concurrence of both houses to be valid. This applies also to other laws, except as otherwise provided in articles 43, 44 and 48.

Art. 43. The senate is obliged to act on a bill affecting a law proposed and passed by the house of representatives within six weeks; on financial, budget and army bills within one month. The house of representatives is obliged to act on a bill affecting a law adopted by the senate within three months. These periods or time limits are computed from the day when the printed act or bill of one house of the national assembly is delivered to the other house; by mutual consent of both houses these time limits may be altered, extended or shortened. The limit of one month within which the senate must take action in all cases of financial, budget and army bills cannot be extended. If during the time limit the term of the house which is to take action on the bill of the other house expires, or if the house is dissolved, prorogued or its session closed, the time limit begins to be reckoned or counted anew from its next meeting. If the second house of either body of the national assembly does not take action or give its decision within the above designated time limits, such failure shall be considered and have the effect equivalent to approval of the decision of the first house.

Art. 44. A measure passed by the house of representatives shall become law notwithstanding the dissent or adverse decision of the senate if the house of representatives by a vote of the majority of the entire membership of such house of representatives reaffirms its original or first decision or action. Should the senate reject a bill by a three-fourths majority of the entire membership of the senate which was passed by the house of representatives by a majority of all its members, the bill becomes law only if reaffirmed or passed again by the house of representatives by a majority of three-fifths of the entire membership of such house of representatives. Proposals of the senate shall be referred and submitted to the house of representatives. If the house of representatives should reject a senate proposal or bill, and if the senate re-enacts its bill or reaffirms its original vote by a majority vote of the senate's entire membership, such bill shall be resubmitted to the house of representatives. If the house of representatives should reject such senate bill or proposal for the second time by a majority vote of the entire membership of the house of representatives, the bill fails and shall not become law. Bills so rejected or thus failed in passage cannot be resubmitted to either house before the expiration of one full year. Amendment of a bill passed by one house when submitted in the other house of the national assembly shall be equivalent to a rejection of the bill.

Art. 45. If either house should have under consideration for the second time a bill which it once passed, or consider for the second time a bill passed by the other house (article 44, paragraph 2), and should the house be dissolved or its term expire before such a reconsideration or action has been taken, the action of the new house on the bill shall be considered as its second action in the meaning of and in accordance with article 44.

Art. 46. If the national assembly rejects a government (cabinet) bill the government (cabinet) may order or proclaim a referendum by all the citizens to be taken on the question whether the rejected government (cabinet) bill shall become a law. But such a decision and action on the part of the government (cabinet) must be unanimous. All who are entitled to vote for members of the house of representatives shall have the right and are qualified to vote at the referendum. Details and method of the referendum shall be determined and regulated by law. Referendum vote does not apply to governmental (cabinet) proposals for changing or amending the constitution and the fundamental laws which are a part of it.

Art. 47. The president of the republic shall have the right to return with his objections a law passed by the national assembly within one month from the day on which it was delivered or presented to the government (cabinet).

Art. 48. If both houses should by ballot taken with a roll call reaffirm their vote by a majority of their entire membership, the measure shall be promulgated a law. If such concurrent majority of both houses is not reached, the measure will nevertheless become law if in a new ballot in a roll call the house of representatives votes for it by three-fifths of its entire membership. If the measure in question is one which requires larger quorum and greater majority, then the returned measure must be adopted in the presence of such larger quorum by the required and specified greater majority. Provisions of article 45 are also applicable here.

Art. 49. No law goes into effect until it is proclaimed in the manner prescribed by law. Laws are proclaimed by this clause or preamble: "The national assembly of the Czecho-Slovak Republic adopted the following law." Laws shall be proclaimed within eight days, exclusive of Sundays, from the time limit fixed in article 47. If the president of the republic exercises his right therein referred to (in article 47), then the law shall be proclaimed within eight days, exclusive of Sundays, from the day when the re-enactment by the national assembly is communicated to the government (cabinet).

Art. 50. Every law must specify which member of the government (cabinet) is charged with its execution.

Art. 51. The law shall be signed by the president of the republic, by the president of the government (cabinet) and the minister charged with its execution. If the president of the republic is disabled, incapacitated or ill and there is no acting president, the president of the government (cabinet) signs in his behalf. The president of the government (cabinet) may be represented in the signing of laws in the manner provided for in article 71.

Art. 52. Each house shall have the right to interpellate or put questions to the president of the government (cabinet) and other members of the government (cabinet) on all matters within the scope of their jurisdiction, to inquire into administrative acts of the government (cabinet), to appoint committees to which the ministers shall submit and provide information and to adopt addresses and resolutions. The president of the government (cabinet) and the members of the government (cabinet) shall answer the interpellations or questions of the members of the houses put to them.

Art. 53. The manner in which state financial economy and administration and the state debt are controlled shall be regulated by law.

Art. 54. During the period between the dissolution of either house and its reassemblage, or between the expiration of its term and the next convening of both houses, and also during the time when the session of the two houses is prorogued or closed, a commission of twenty-four members may enact urgent measures which shall have the force of law and shall exercise supervision over the government (cabinet) and executive powers. The house of representatives shall choose sixteen members, with sixteen alternates, for this commission, and the senate shall choose eight members and eight alternates for it all for the term of one year. Each alternate takes the place of a definite member of the commission. First elections shall take place immediately after both houses are organized. Presidents and deputy or vice-presidents of both houses participate in voting. When a new house has been elected it shall choose new members of the commission even though the one-year term of the sitting members of the commission of twenty-four has not expired. The principle of proportionate representation shall be applied in these elections. Parties may combine. If all parties should agree on the candidates, the members of the commission may be selected from the body of the house. This may be done if objectors thereto do not exceed twenty representatives or ten senators. Members of the commission remain in office until their successors are elected. Alternates take the place of members who temporarily or permanently are unable to carry out their duties. If there is a vacancy of either member or alternate of the commission supplementary election shall be held to fill such post for the balance of the term. Such newly elected member or alternate must belong to the same group as the former member or alternate, unless the group in question should fail to nominate a candidate or should refuse to participate in the voting or election. A member of the government (cabinet) shall not be a member or alternate of the commission of twenty-four. As soon as the commission is elected it shall organize itself by choosing its president and second vice-president, from among its members of the house of representatives and the first vice-president from among its senate members. Articles 23 to 27 of the constitution shall be applicable and binding as to members of the commission of twenty-four. The commission shall act in all matters that come within the legislative and administrative jurisdiction and power of the national assembly, but it cannot

(a) Elect the president of the republic or the acting president thereof;

(b) Amend the constitution or fundamental laws (see article 1 of the enabling provisions) or change the jurisdiction of public officials or authorities, except that it may add new duties to existing authorities if it be a question of widening the scope of their activities;

(c) Impose by its measures upon citizens in the Czecho-Slovak state new and permanent or lasting financial obligations, increase the military obligation, burden permanently the state finances or dispose of or alienate state property;

(d) Give its consent to declaration of war.

A measure of the commission to have the effect of law or one which authorizes expenditures not provided for in the budget requires the approval by a majority of the entire membership of the commission. In all other cases the commission may act in the presence of one-half of its entire membership and by a majority vote of those present. The president of the commission shall vote only to cast the decisive vote to break the tie. Emergency measures which are in the nature of law may be adopted only on the recommendation of the government (cabinet) approved by the president of the republic. Acts of the commission referred to in the preceding paragraph shall have temporarily the

effect of law only if they are proclaimed with reference to articles of the constitution in the series of laws and ordinances, and if they are signed by the president of the republic, president of the government (cabinet) or his deputy and by at least one-half of the ministers. Acts which are not signed by the president of the republic may not be proclaimed.

The constitutional court shall have jurisdiction over measures of the commission which are in the nature of law; these shall be submitted to the court by the government (cabinet) simultaneously at the time of their proclamation in the series of laws and ordinances. The constitutional court decides whether measures submitted to it comply with above paragraph. President of the commission and its vice-presidents shall at the earliest of first sessions of the house of representatives and the senate submit to them reports of the actions of the commission, even though they may have ceased to be members of the national assembly.

Measures of the commission not approved by both houses within two months of their convening shall thereafter be null and void.

Sec. III.—Governmental and Executive Power.

Art. 55. Ordinances shall be issued only for the purpose of carrying out of a definite law and within its specific terms.

President of the Republic.

I.

Article 56. The president of the republic shall be elected by the national assembly. (Article 38). He shall be a citizen of the Czecho-Slovak republic, qualified and eligible to be a member of the house of representatives, and not less than 35 years of age. (Article 67.)

Art. 57. Election shall be valid only when held in the presence of the majority of the total membership of both houses of the national assembly and upon a vote of three-fifths of those present which are necessary. If two ballots should result in no choice the next or third balloting shall be limited to the two highest candidates at the previous balloting. The candidate who then obtains the largest number of votes or a plurality shall be elected. In case of a tie vote the decision shall be made by lot. Details shall be determined and governed by law.

Art. 58. The term of office shall begin on the day when the newly elected president takes his oath, according to article 65. The term of office of the president of the republic shall be seven years. Election shall be held during the last four weeks of an expiring term of office of the president. No one shall be elected for more than two successive terms. A person who has served as an elected president of the republic for two successive terms cannot be re-elected until after seven years shall have elapsed from the expiration of his last term of office. This provision, however, does not apply to the first president of the Czecho-Slovak Republic. The president of the Czecho-Slovak Republic continues in office until the new president is elected.

Art. 58. Should the president die or resign his position during his term of office, a new election shall be held in accordance with provisions of articles 56 and 57 and such election shall be for a term of seven years. The national assembly shall be convened for this purpose within fourteen days.

Art. 60. Until the new president is elected (article 59) or if the president is unable and prevented by ill health or other cause from performing his office, his authority shall be exercised by the government (cabinet), which may intrust definite functions to its own president of the government (cabinet).

Art. 61. If the president of the republic is ill or incapacitated so as to be unable to execute the duties of his office for more than six months (article 60) and if the government (cabinet) should so decide in the presence of three-quarters of its membership the national assembly will elect an acting president who will serve as president of the republic until the impediment is removed. When a person is not eligible or if he is disqualified to be president of the Czecho-Slovak Republic in accordance with article 58 he cannot during that period be acting president.

Art. 62. The election of acting president shall be governed by the same provisions which apply to the election of president of the republic.

Art. 63. The president of the republic shall not at the same time be a member of the national assembly. If a member of the national assembly is elected acting president he shall not during the time he is serving in the office of president execute his mandate as a member of the national assembly. The official residence of the president of the Czecho-Slovak Republic shall be in Prague.

Art. 64. The president of the republic—

II.

(1) Shall represent the state in its foreign relations; shall negotiate and ratify international treaties. Commercial treaties and treaties which entail or impose upon the state or upon the citizens financial or personal burdens, especially military burdens, and treaties which affect the boundaries of the state shall require the consent of the national assembly. In case of change of boundaries of the state the consent of the national assembly must take the form of a constitutional law (article 1 of enabling provisions);

(2) Shall receive and accredit diplomatic representatives;

(3) Shall proclaim the existence of a state of war; shall declare war after previously obtaining the consent of the national assembly and shall submit to the national assembly the negotiated treaty of peace for its approval;

(4) Shall convene, prorogue and dissolve the national assembly (articles 28 to 31) and shall declare the sessions of the houses closed;

(5) Shall have the right to and he may return bills or measures with his objections (article 47) which the national assembly enacted; shall sign laws enacted by national assembly (article 51), also those enacted by the diet of the Carpathian Ruthenia (Russinia (article 3), and also the ordinances of the commission of twenty-four (article 54).

(6) Shall give the national assembly oral or written information and reports of the state of the republic and shall recommend to its consideration such measures as may be deemed necessary, useful and expedient;

(7) Shall appoint and dismiss ministers and he shall determine their number;

(8) Shall appoint all professors of universities, and all judges, civil and military officials of the sixth class or grade and those higher;

(9) Shall grant donations, gifts and pensions in special cases upon motion of the government (cabinet);

(10) Shall be commander in chief of all armed forces of the republic;

(11) Shall grant pardons in accordance with article 103.

All governmental and executive power, in so far as the constitution and laws of the Czecho-Slovak Republic, adopted after Nov. 15, 1918, do not or shall not expressly reserve or intrust it to the president of the republic, shall be exercised and reserved by the government (cabinet) (article 70).

Art. 65. The president of the republic shall take a pledge before the national assembly (article 38) upon his honor and conscience that he will look after and care for the welfare of the republic and the people and that he shall abide by and observe the constitution and other laws.

Art. 66. The president of the republic shall not be answerable or responsible at law for the conduct of his office. For his official utterances as president the government (cabinet) shall be responsible and answerable.

Art. 67. He may be prosecuted only for high treason before the senate upon impeachment or indictment of him by the house of representatives (article 34). The punishment

shall be only the loss of his office and permanent disqualification to ever hold it again. Details shall be determined by law.

Art. 68. Every act of the president in the exercise of his governmental or executive powers is valid only when countersigned by the proper responsible member of the government (cabinet).

Art. 69. The same provisions which apply to the president of the republic shall also apply to the acting president (article 61).

The Government (Cabinet of Ministers).

Art. 70. The president of the government (cabinet) and members of the government (cabinet) of ministers are appointed and dismissed by the president of the republic. The official seat of the government (cabinet) shall be in Prague (article 6).

Art. 71. The government (cabinet) shall elect from its membership its deputy president, who may take its president's place. Should this deputy fail or be unable to act the oldest member of the government (cabinet) in years shall then act as its president.

Art. 72. The president of the republic shall determine over which department each member of government (cabinet) shall have charge.

Art. 73. Members of the government (cabinet) shall take a pledge before the president of the republic, upon their honor and conscience, that they will conscientiously and impartially perform their duties and abide by and observe the constitution and all other laws of the republic.

Art. 74. No member of the government (cabinet) shall be or sit as a member of the board of directors or act as a representative of a corporation, stock company or firm which is engaged in business for profit.

Art. 75. The government (cabinet) shall be responsible to the house of representatives, which may vote its lack of confidence in the government (cabinet). This shall be done and valid by a majority vote upon a roll call with the majority of the entire membership present.

Art. 76. Every motion for a vote to declare lack of confidence shall be signed by at least 100 deputies and shall be referred to a committee, which must submit its report within eight days.

Art. 77. The government (cabinet) may ask the house of representatives for a vote of confidence. Such motion or proposal shall be acted upon by the house of representatives without being referred to a committee.

Art. 78. If the house of representatives should declare and vote its lack of confidence in the government (cabinet), or if it should reject the motion of the government (cabinet) for a vote of confidence, the government (cabinet) shall hand in its resignation to the president of the republic, who shall then designate the persons who are to carry on the affairs of the government (cabinet) until a new government (cabinet) is formed. If the government (cabinet) should resign at a time when there is neither a president of the republic nor an acting president, the commission of twenty-four provided for in article 54 shall accept the resignation and shall take steps to have the affairs of the government (cabinet) carried on.

Art. 79. If the president of the government (cabinet) or any other member of the government (cabinet) should by their official acts either intentionally, knowingly, willfully or from gross negligence, violate the constitution or other laws they shall be responsible criminally. The right to prosecute or impeach shall be reserved to the house of representatives and the trial shall be held before the senate. Details are regulated by law.

Art. 80. The government (cabinet) acts as a college competent to make decisions only in the presence of the president of the government (cabinet), of the acting president of the government (cabinet), and a majority of all the ministers.

Art. 81. The government (cabinet) shall decide in session as a body or college, in particular—

(a) Government (cabinet) measures or bills for the national assembly; government (cabinet) ordinances (article 84) and recommendations or proposals to the president of the republic for the use of the power given him under article 47.

(b) All matters of a political nature.

(c) Appointments of judges, state officials and military officers of the eighth grade and of higher grades in so far as such appointments are under the jurisdiction of the central authorities; and nominations of officials or functionaries who are appointed by the president of the republic (article 64, paragraph 8).

Art. 82. The president of the republic shall have the right to and may attend and preside over the meetings of the government (cabinet); and he shall have the right to and may require of the government (cabinet) and its members written reports on any matter within their jurisdiction.

Art. 83. The president of the republic shall have the right to call the government (cabinet) or its members to conference.

Art. 84. Every government (cabinet) ordinance shall be signed by the president or acting president of the government (cabinet), or the acting president, and also by the minister charged with its execution. It must also be signed by at least half of the members of the government (cabinet).

Ministries and Subordinate Administrative Offices.

Art. 85. The jurisdiction of the ministries is regulated by law.

Art. 86. In the subordinate administrative state offices the citizen element shall as far as possible be represented and the widest protection of the rights and interests of the citizens shall be effectively provided and assured (administrative judicature).

Art. 87. No one may hold at the same time an elective membership of office of a subordinate administrative organ and also of an organ which is superior to or exercises jurisdiction over the former. Exceptions to this may be made by law.

Art. 88. Judicial protection against administrative organs shall be provided by the Supreme Administrative court, composed of independent judges, with jurisdiction over the territory of the entire republic. Details shall be regulated by law.

Art. 89. The nature and authority of the subordinate organs of state administration shall be defined in principle by law which may provide that details shall be determined by ordinances of the government (cabinet).

Art. 90. State offices or organs which are charged or intrusted with economic or financial functions only but without exercising the sovereign authority of the state shall be established and organized by government (cabinet) ordinances.

Art. 91. The nature, constitution and jurisdiction of local autonomous governing bodies or organs shall be regulated and fixed by special laws.

Art. 92. To what extent the state shall be responsible for unlawful execution of public authority shall be determined by law.

Art. 93. Public employes shall abide by and observe in all their official acts the constitution and other laws. This applies also to citizen members of administrative bodies.

Section IV.—Judicial Powers.

Art. 94. The judicial power shall be exercised by state courts; the law shall prescribe their organization, their jurisdiction and their procedure. No one shall be brought before any other judge or tribunal except the one who has jurisdiction by law. Only in criminal matters may extraordinary courts be introduced or established, and then in cases prescribed by law in advance and for a limited period.

Art. 95. Judicial power in civil cases shall belong to civil courts, either ordinary courts or extraordinary and arbitration courts. Judicial power in criminal matters shall belong to ordinary criminal courts, in so far as it is not reserved or assigned by special law to military criminal courts or in so far as such matters or cases may be dealt with in criminal proceedings by the police or the financial authorities in accordance with general regulations. For the entire territory of the Czecho-Slovak republic there shall be one Supreme court. The jurisdiction and functions of juries shall be determined by special laws. Trials by jury may be temporarily suspended in cases provided for by law. The jurisdiction of military courts may be extended to the civilian population in accordance with provisions of law only in times of war and for acts committed during the war.

Art. 96. Judicial power shall in all courts and instances be separated from administrative power. Conflicts or disputes of jurisdiction between courts and administrative authorities shall be regulated and determined by law.

Art. 97. Qualifications of judges shall be determined by law. The status of judges in the service of the state is regulated by special law.

Art. 98. All judges shall perform the duties of their office independent of all considerations except the law. Judges shall take an oath of office that they will observe and abide by the laws.

Art. 99. Professional judges shall be appointed permanently; they may not be transferred, demoted or pensioned against their will, except there be a new organization of courts, and then only during and for the period provided for by law or by virtue of proper and lawful disciplinary proceedings and finding; they may also be pensioned by a proper finding when they have reached the legal retirement age. Details shall be determined by law, which shall also prescribe the conditions under which judges may be suspended from office. Judicial senates in tribunals of the first and second instance shall be in session throughout the year, unless exception is made by law.

Art. 100. Professional judges shall not perform any other paid functions, permanent or temporary, except as otherwise provided by law.

Art. 101. Judgments shall be pronounced in the name of the republic. Proceedings of courts shall be conducted orally and in public; judgments in criminal cases shall be declared in public; the public may be excluded from court proceedings only in cases defined by law. In trials of criminal cases the principle of accusation shall apply.

Art. 102. Judges in passing upon a legal question shall have the right and may inquire into the validity of any governmental (cabinet) ordinances; as to a law, they may only inquire as to whether it was properly promulgated (article 51).

Art. 103. The president of the republic shall have the power to declare and grant amnesty; to grant pardons or commute and mitigate punishments and legal effects of sentences by criminal courts, in particular to restore the right to vote for the national assembly and other elected bodies; he shall also have the right to suspend all criminal prosecution with the exception of such criminal proceedings wherein a private individual is the complainant. These powers of the president shall not apply to members of the government, impeached, accused or sentenced in accordance with article 79.

Art. 104. Liability of the state and of judges for damages caused by illegal execution of official authority shall be defined by law.

Art. 105. In all cases in which an administrative organ in accordance with particular laws passes upon private property rights, the party affected after exhausting his remedies with higher authorities may demand relief through the courts. Details shall be regulated by law.

Section V.—Rights, Liberties and Duties of Citizens.

Art. 106. Equality—Privileges due to sex, birth or calling shall not be recognized. All inhabitants of the Czecho-Slovak Republic shall enjoy in its territory equally with the citizens of the Czecho-Slovak Republic full, complete and absolute security of life and liberty, without regard to origin, nationality, language, race or religion. Exceptions to this principle may be made only so far as is compatible with international law. Titles may only be conferred as designating an office or calling; this shall in no way affect or apply to academic degrees.

Freedom of Person and Property.

Art. 107. Personal freedom is guaranteed. Details shall be regulated by a law which is a part of this constitution. Personal freedom may be restricted or taken away only in conformity with law; likewise public authorities may compel a citizen to perform personal acts only in conformity with the law.

Art. 108. Every Czecho-Slovak citizen may take up his abode in any part of the Czecho-Slovak republic; may acquire real property there and may engage in a gainful occupation within the limits of general legal provisions. This right shall be restricted only by law in the public interest.

Art. 109. Private ownership may only be restricted by law. Expropriation may be accomplished only in compliance with law, and compensation shall be paid, except where the law specifically provides that compensation shall not be paid.

Art. 110. The right to emigrate may only be restricted by law.

Art. 111. Taxes and public burdens may be imposed only in conformity with law. Likewise warnings and the imposition of fines and punishments shall be provided and inflicted only in conformity with law.

Art. 112. Freedom of the Home—The rights of the home shall be inviolable. Details are regulated by a law which is a part of this constitution.

Art. 113. Freedom of the Press—The right of free assembly and association; freedom of the press as well as the right to assemble peacefully and without arms and to form associations is guaranteed. It is therefore not allowed as a matter of principle to subject the press to censorship before publication. The manner in which the right of free assembly and of association shall be exercised shall be determined by law. An association may be dissolved only when its activity violates the criminal law or public peace and order. The law may impose restrictions upon assemblies in places which serve as public thoroughfares; upon the establishment of associations for profit and upon the participation of foreigners in political associations. The law may also impose limitations upon the foregoing principles in time of war or of domestic disorders which may menace substantially the republican form of government, the constitution or public peace and order.

Art. 114. The right of association for the protecting and improvement of conditions of employment and economic interests is guaranteed. All acts of individuals or associations which seem to constitute an intentional violation of this right are prohibited.

Art. 115. The Right of Petition—The right of petition shall be enjoyed by and is inherent in every person; legal persons, corporations and societies shall enjoy this right only within the scope of their activity.

Art. 116. Postal Inviolability—Secrecy of the mails is guaranteed. Details shall be regulated by law.

Art. 117. Liberty of Instruction and of Conscience. Freedom of Expressing Opinion—Every person may, within the limits of the

law, express his or her opinion by word, writing, press, picture, etc. This applies to legal persons within their scope of action. No one shall suffer in the sphere of his or her work or employment for exercising this right.

Art. 118. Scientific investigation and publication of its results, as well as art, shall have full freedom as long as it does not violate the criminal law.

Art. 119. Public instruction shall be so conducted and given as not to be in conflict with the results of scientific investigation.

Art. 120. Establishment of private schools is permitted only within the limits of the law. The state administration shall have the supreme authority and control of all instruction and education.

Art. 121. Liberty of conscience and of profession (religion) is guaranteed.

Art. 122. All inhabitants of the Czecho-Slovak Republic have equally with the citizens of the Czecho-Slovak Republic the right to profess and to practice in public or in private any profession, religion or faith whatsoever, as long as the practice of the same is not in conflict with public law and order and good morals.

Art. 123. No one may be compelled either directly or indirectly to participate in any religious act, rite or ceremony whatsoever. This does not affect the rights and authority of parent or guardian.

Art. 124. All religious beliefs are equal before the law.

Art. 125. The performance of definite or specific religious acts or rites may be forbidden if they are in conflict with public order or public morality.

Art. 126. Marriage and Family—Wedlock, family and motherhood shall be under and have the special protection of the laws.

Art. 127. Military Service—Every able-bodied citizen of the Czecho-Slovak Republic shall submit to military training and shall obey the summons to defend the state. Details shall be regulated by law.

Section VI.—Protection of National, Religious and Racial Minorities.

Art. 128. All citizens of the Czecho-Slovak Republic are in all respects fully equal before the law and shall enjoy equal civil and political rights regardless of their race, their language or their religion. Difference of religion, faith, confession or language shall not be a bar to any citizen of the Czecho-Slovak republic within the limits of the general laws, particularly in regard to admission into public services, offices and honors, or to the pursuit of any trade or calling. Citizens of the Czecho-Slovak Republic may within the limits of the general laws freely use any language they choose in private or business relations, in matters pertaining to religion, in the press or any publications, or in public assemblies of the people. This, however, shall not affect rights which belong to the organs of the state in accordance with any present or future laws based on considerations of public order, safety of the state and efficient control.

Art. 129. The principles on which the rights as to the use of a definite language within the Czecho-Slovak Republic are founded shall be regulated and determined by a special law which shall form a part of this constitution.

Art. 130. In so far as citizens of the Czecho-Slovak Republic are entitled to and may in or under the general laws establish, direct and administer at their own expense charitable, religious or social institutions, schools and educational institutions, all citizens regardless of their nationality, language, religion and race shall be equal and may in such institutions freely use their own language and practice their own religion.

Art. 131. In towns, cities and districts in which there lives a considerable fraction of Czecho-Slovak citizens of other than the Czecho-Slovak language the children of such Czecho-Slovak citizens shall receive suitable opportunity to be taught in their own language in public schools within the limits of the general laws governing education and public instruction, but the teaching of the Czecho-Slovak language at the same time may be made a compulsory subject of instruction.

Art. 132. Wherever in cities, towns and districts in which there lives a considerable fraction of the Czecho-Slovak citizens belonging to some religious, national and language minorities, definite sums of money are to be expended from public funds on the basis of state, local (municipal) or other public budgets for education, religion or charity. Such minorities are hereby guaranteed within the limits of general laws and regulations applicable to public administration a proportionate share in the expenditure of such public funds.

Art. 133. Principles embodied in articles of section 130, 131 and 132, especially the definition of the term "considerable fraction," shall be determined and carried out by special laws.

Art. 134. Every form or manner of forcible denationalization is forbidden. Violation of this principle may be by law declared criminal and punishable.

Rights of Languages.

Act dated Feb. 29, 1920, pursuant to article 129 of the constitution, establishing the principles of the rights of languages in the Czecho-Slovak republic.

Article 1. The Czecho-Slovak language shall be the state, official language of the republic (Article 7 of the treaty between principal allied and associated powers and the Czecho-Slovak Republic, made and signed at St. Germain-en-Laye on Sept. 10, 1919).

The Czecho-Slovak language is therefore specifically the language:

(1) In which shall be conducted the work of all the courts, offices, institutions, undertakings and organs of the republic, in which they shall issue their proclamations, notices and decrees, as well as their inscriptions and designations. The exceptions to this provision are laid down in article 2 and article 5, as well as in article or section 6 relating to Carpathian Ruthenia (Russinia).

(2) In which the principal text on state moneys, obligations and other bank notes shall be printed.

(3) Which shall be used by the military forces of the country for the purpose of command and as the language of the service; however, in dealings with men and companies in such service who do not know the Czecho-Slovak language, their mother tongue may also be used.

Detailed regulations as to the duty of state officials and employes, as well as of officials and employes of state institutions and undertakings, to know the Czecho-Slovak language shall be issued.

Art. 2. The following rules shall apply with reference to national and language minorities (chapter 1, treaty of St. Germain) or with reference to national and language minorities (chapter 1, treaty of St. Germain):

It shall be the duty of courts, offices and organs of the republic whose authority relates to a jurisdictional district in which under the latest census it appears that at least 20 per cent of the citizens speak the same language, and that language not the Czecho-Slovak, but another language, to accept and receive (in all matters which they have to settle because of their authority applying in such districts) from any member of this minority any plaints in his or her language and to deal with plaints not only in the Czecho-Slovak language but also in the language in which the plaint itself is presented. Where in one community there are several district courts that whole community shall be considered as a single jurisdictional district. Laws and regulations shall prescribe as to what extent and for what courts and offices it will be possible to restrict to the language of the parties themselves the settlement of or dealing with cases. These courts

and offices are those whose jurisdiction is limited to one district—namely, a district with such national or language minority, as well as courts and offices immediately subordinate to them.

Under such conditions it is the duty of the public prosecutor to formulate and present the charges against an accused speaking another language also in such language of the accused or even in such language exclusively. The executive authority shall determine in such cases what language shall be used. If the party to any proceeding is not the initiator of the proceedings he or she shall (if other conditions of article or section 2 are fulfilled) be entitled on the same principles to have his or her case dealt with also in his or her own language, or in such language alone so far as that language is known, or otherwise at his or her request. In districts where there lives a national minority within the provisions of article or section 2 the language of the national minority shall be used concurrently with the Czecho-Slovak language in proclamations, notices and decrees issued by the state courts, offices and organs and for their inscriptions and designations.

Art. 3. It is the duty of autonomic (self-governing) offices, representative councils and all public corporations in the state whatsoever to accept and to deal with oral and written presentations made in the Czecho-Slovak language.

It shall always be allowable to make use of the Czecho-Slovak language in meetings and conferences; all proposals and suggestions put forward in this language must be considered. The state executive authority shall determine upon the language to be used for all public proclamations and notices and inscriptions and designations for which the autonomic (self-governing) offices are responsible. It is the duty of autonomic (self-governing) offices, representative councils and public corporations to receive and consider under provisions of article 2 all matters presented to them in a language other than Czecho-Slovak and to deal with the same, and also to permit the use of another language than the Czecho-Slovak in meetings and conferences.

Art. 4. The state offices, using the state official language, in their official acts and proceedings, when in those parts of the Czecho-Slovak Republic which prior to Oct. 28, 1918, belonged to the kingdoms and lands which were represented in the imperial (Austrian) parliament or to the kingdom of Prussia, shall use regularly the Czech language, while in Slovakia they shall use regularly the Slovak language. Matters presented or proceedings in the Czech language and officially dealt with in the Slovak language, or presented in the Slovak language and dealt with in the Czech language, shall be deemed and considered as having been dealt with in the language in which they were presented.

Art. 5. Instruction in all schools established for members of a national minority shall be given (furnished) in their language and likewise all educational and cultural institutions maintained for them shall be administered in their language. (Article 9. treaty of St. Germain.)

Art. 6. The diet which shall be brought into existence for Carpathian Ruthenia (Russinia) shall have the right reserved to it of settling the language question for the territory of Carpathian Ruthenia (Russinia) in a manner in harmony and compatible with the unity of the Czecho-Slovak state. (Article 10. treaty of St. Germain.) Until this settlement for the territory of Carpathian Ruthenia (Russinia) is made, this act (establishing the principles of the rights of languages in the Czecho-Slovak Republic) shall apply, due regard, however, being given to the special circumstances of that territory with respect to the language.

Art. 7. Disputes regarding the use of a language in the courts, offices, institutions, undertakings and organs of the state as well as in the autonomic (self-governing) offices and public corporations shall be settled by the competent (proper) organs or authorities of state control as if they were questions or matters of state administration separate and distinct from the causes out of which they arose.

Art. 8. Details of the carrying out of this law shall be fixed by the state executive authority which shall in the spirit of this act prescribe rules and ordinances regulating the use of languages for (autonomic) self-governing offices, representative bodies and public corporations as well as for those offices and public organs whose authority extends to districts which are less than jurisdictional districts, or organs which have no district of their own. These rules and ordinances shall also prescribe what measures shall be taken toward facilitating the dealings of officials with persons who do not speak the language in which the court, office or organ conducts its business (in the meaning of this law). Exceptions to the terms of this act which are necessary for conducting undisturbed administration may also be made by regulation or ordinance for a period of five years, commencing from the day on which this law comes into force and effect. Finally rules shall be prescribed which are necessary for securing the successful carrying out of this law.

Art. 9. This law shall come into force and effect on the day on which it is promulgated. It abrogates all rules and enactments relating to language which were in force prior to Oct. 28, 1918. All ministers are intrusted with the execution of this law.

CONSTITUTION OF THE SENATE.

Act of Feb. 29, 1920, governing the constitution and jurisdiction of the senate.

Section 1.

Article 1. The senate of the Czecho-Slovak republic shall consist of 150 elected members. No person may be a member of the house of representatives and of the senate at the same time. No person may be a candidate for both houses if the elections to one house follow within four weeks at the latest after the elections to the other house. Election of a candidate in disregard and defiance of this enactment or provision is invalid. In every other instance or case except as provded and described in the foregoing paragraph any person who being a member of the house of representatives is elected senator, or who being a senator is elected as a member of the house of representatives, shall be a member and take his seat in that house of the national assembly to which he has been last elected.

Art. 2. The rules of suffrage prescribed for election to the house of representatives shall also be applicable to elections for the senate except as otherwise provided in this act.

Art. 3. All citizens who have the right to vote at elections to the house of representatives are also entitled to vote at elections to the senate if they have attained the age of 26 years on the day of the publication of the standing lists of voters. (Law of Dec. 9, 1919. No. 663. Code of Laws and Regulations of the Czecho-Slovak Republic.)

Art. 4. All citizens of the Czecho-Slovak Republic without regard to sex may be elected to the senate if they have attained the age of 45 years on the day of election if they have been citizens of the Czecho-Slovak republic for a period of at least ten years and if they are not excluded or disqualified from the franchise of citizenship. The requirement of ten years' citizenship shall not be in effect for elections which shall take place to the senate up to the end of the year 1928.

Art. 5. The senate shall be elected for a period of eight years.

Art. 6. Whenever the elections to the senate are held within four weeks at latest of the day on which elections to the house of representatives took place, the polling committees of the constituencies or districts and the central or general polling committee which

had charge of the elections held to the house of representatives shall also take charge of the elections to the senate. Except in the case stated in the foregoing paragraph the polling committees of the constituencies or districts and the central or general polling committee must be constituted anew. Representatives of parties who have not put forward valid lists of candidates for the senate may not be members of these committees: on the contrary these committees shall be composed of representatives of those parties which failed to put forward candidates for the house of representatives but which presented valid lists of candidates for the senate. Article or section 9 and article 11 of the rules of suffrage for elections to the house of representatives shall be hereto applied.

Art. 7. In every constituency or district which elects members to the senate there shall be constituted a district polling committee. The rules of suffrage or franchise for elections to the house of representatives which relate to district polling committees apply also by analogy to the herein aforementioned district polling committee. A district polling committee for election to the senate has the same jurisdiction and authority in the matter of such senate elections that a district committee constituted in accordance with article 10 of the rules of suffrage for election to the house of representatives has in respect to such elections to the house of representatives.

Art. 8. Citizens who are not entitled to vote at the senate elections under conditions governed by the provision of the paragraph in article 6 of this act may be members of a committee which has charge of elections to the senate.

Art. 9. The constituencies electing senators shall be composed of constituencies which also elect members to the house of representatives.

(Here follows an enumeration of the various electoral districts. There are in all thirteen senatorial constituencies which elect respectively 23. 11. 15. 14. 15. 17. 16. 10. 7. 5. 9. 4 and 4 senators.)

Art. 10. The minister of the interior shall cause new elections to take place within sixty days whenever the senate is dissolved by the president of the republic or the term for which it was elected expires.

Art. 11. The minister of the interior shall issue a letter of credentials to every elected senator which shall entitle him to enter the floor of the senate and to take part in all its proceedings. This right shall terminate and become null and void should the election of the senater be declared invalid or void by the electoral court.

Art. 12. At the first assembly of the senate, which shall be opened by the president of the government (cabinet) and which shall be presided over by the senior senator, the senate shall from among its membership elect a president and two deputy presidents. The proceedings of the senate shall be governed and regulated by the provisions of the laws relating to rules of procedure and by regulations which the senate itself determines. Until the time that such regulations and rules are determined upon and adopted the rules of procedure passed heretofore by the present national assembly shall be in force and effect.

Art. 13. At the first assembly of the senate and before the same elects its president and deputy presidents the senators shall take the oath or vow in the presence of the president of the government (cabinet) as provided in article 22 of the constitution Refusal to take the pledge as required or the taking of it with reservation shall automatically result in the loss of his senate seat and mandate by the member (article 22 of the constitution). The same applies to senators who subsequently to the first assembly enter the senate; these shall take the pledge in the presence of the president of the senate.

Art. 14. Senators are entitled to compensation, the amount of which shall be fixed by law.

The Jurisdiction of the Senate.

Art. 15. The senate shall co-operate in the exercise of legislative authority in accordance with the provisions of the constitution.

Art. 16. The senate shall have the right to sit in and pass judgment upon charges or proceedings brought by the house of representatives—

(1) Against the president of the republic for high treason. (Article 67 of the constitution.)

(2) Against members of the government (cabinet) for violation of the constitution and other laws. (Article 79 of the constitution.)

Section 2.

The first elections to the senate of the Czecho-Slovak Republic shall take place to the exclusion of all of the 12th and 13th constituencies as well as to the exclusion of the district of Hlucin from the 7th constituency, the district of Vitoraz from the 5th constituency, the district of Valcice from the 6th constituency and to the exclusion of the territories of Spis and Orava, which are the subject of a plebiscite. Without regard to elections in these last mentioned districts the second and third authoritative examinations of poll lists and other requirements of the suffrage law shall take place. All the territories herein excluded from the first elections shall for the first period of the senate elect their senators later in a manner to be prescribed by regulation and law. The government shall take steps to secure for the Czecho-Slovak legionaries the exercise of their franchise rights and shall assign to them seats which may be found to be superfluous in some of the electoral districts.

Section 3.

This law shall be in force and effect simultaneously with the enabling provisions of the constitution. Its execution is intrusted to the minister of the interior.

NOTABLE ADDRESSES BY PRESIDENT HARDING.

AT HOBOKEN, N. J.

On the occasion of the return of 5,212 bodies of soldiers, sailors and marines who lost their lives in the great war President Harding made the following address at Hoboken, N. J., May 23, 1921:

"There grows on me the realization of the unusual character of this occasion. Our republic has been at war before; it has asked and received the supreme sacrifices of its sons and daughters, and faith in America has been justified. Many sons and daughters made the sublime offering and went to hallowed graves as the nation's defenders. But we never before sent so many to battle under the flag in foreign lands; never before was there the impressive spectacle of thousands of dead returned, to find eternal resting place in the beloved homeland. The incident is without any parallel in history that I know.

"These dead know nothing of our ceremony to-day. They sense nothing of the sentiment or the tenderness which brings their wasted bodies to the homeland for burial close to kin and friends and cherished associations. These poor bodies are but the clay tenements once possessed of souls which flamed in patriotic devotion, lighted new hopes on the battle grounds of civilization, and in their sacrifices sped on to accuse autocracy before the court of eternal justice.

"We are not met for them, though we love and honor and speak a grateful tribute. It would be futile to speak to those who do not hear or to sorrow for those who cannot sense it or to exalt those who can not know. But we can speak for country, we can reach those who sorrowed and sacrificed through their service, who suffered through their going, who glory with the republic through their heroic achievements, who rejoice in the civilization their heroism preserved. Every funeral, every memorial, every tribute is for the living—an offering in compensation of sorrow. When the light of life goes out there is a new radiance in eternity, and somehow the glow of it relieves the darkness which is left behind.

"Never a death but somewhere a new life; never a sacrifice but somewhere an atonement; never a service but somewhere and somehow an achievement. These had served, which is the supreme inspiration in living. They have earned everlasting gratitude, which is the supreme solace in dying.

"No one may measure the vast and varied affections and sorrows on this priceless cargo of bodies—once living, fighting for and finally dying for the republic. One's words fail, his understanding is halted, his emotions are stirred beyond control when contemplating these thousands of beloved dead. I find a hundred thousand sorrows touching my heart, and there is ringing in my ears, like an admonition eternal, an insistent call, 'It must not be again! It must not be again!' God grant that it will not be, and let a practical people join in co-operation with God to the end that it shall not be.

"I would not wish a nation for which men are not willing to fight and, if need be, to die, but I do wish for a nation where it is not necessary to ask that sacrifice. I do not pretend that millennial days have come, but I can believe in the possibility of a nation being so righteous as never to make a war of conquest and a nation so powerful in righteousness that none will dare invoke her wrath. I wish for us such an America. These heroes were sacrificed in the supreme conflict of all human history. They saw democracy challenged and defended it. They saw civilization threatened and rescued it. They saw America affronted and resented it. They saw our nation's rights imperiled and stamped those rights with a new sanctity and renewed security.

"They gave all which men and women can give. We shall give our most and best if we make certain that they did not die in vain. We shall not forget, no matter whether they lie amid the sweetness and the bloom of the homeland or sleep in the soil they crimsoned. Our mindfulness, our gratitude, our reverence shall be in the preserved republic and the maintained liberties and the supreme justice for which they died."

AT NEW YORK COMMERCIAL DINNER.

In an address at the dinner in celebration of the 125th anniversary of the New York Commercial at the Hotel Commodore, New York, N. Y., on the evening of May 23, 1921, President Harding said in part:

"Justice, like charity, must begin at home. We must be just to ourselves and to our own first of all. This is not selfish, for selfishness seeks more than a fair share; we seek only that which is rightfully our own and then to preserve that to ourselves and our posterity. The war sadly disjointed things in the world, and we are now seeking to restore the proper balance. In our efforts to do this, to achieve justice without selfishness, we will do well to cling to our firm foundations. I believe in the inspired beginning. There we will find that national greatness was founded on agriculture, that later we developed industry, and ultimately commerce, both domestic and foreign.

"We will do well to keep in mind at this time the fundamental importance of agriculture, and in every possible way insure justice to it. Surely we have done all that could be expected of us in carrying the burdens of others, and there is no regret, but our just concern now is for our America, because our own restoration is our first service to a world turning to us for aid and inspiration. The country has emerged from the hectic prosperity following the war, and is suffering from depression. We are confronted by the need to place our own house in order, and no more important feature of that effort can be visioned than to place our agricultural industry on a sound basis, and provide machinery and facilities for financing and distributing crops. If we do this we merely will be providing the farmer with facilities similar to those enjoyed by the business community generally. The farmer is entitled to all the help the government can give him without injustice to others, because it is of the utmost importance that the agricultural community be contented and prosperous. This must be accomplished not at the expense of any other section of the community but by processes which will insure real justice among all elements in the community. Agriculture has been laboring under several handicaps, and is entitled to have facilities placed at its disposal which will remove these.

"Turning to industry, our policy must be to give it every facility possible, but to keep government outside of participation in business on its own account. It is not necessary for the government to intrude itself in the business activities which are better conducted through private instrumentalities merely in order to demonstrate that the government is more powerful than anything else in this country. The time has passed when any man or group of men are likely to indulge the idea of being more powerful than the government.

There is no need for the government to engage in business in order to enforce justice and fair dealing in business. Nor is there need for the government to engage in business to deplete the treasury. The government's part in business should be no more than to insure adherence to the principles of common honesty and to establish regulations that will enable it to sail a safe course. There has been some tendency to regard business as dishonest until it should prove itself honest and to regard bigness in business as a crime. But almost all business to-day is conducted on a scale which, though we have come to regard it as commonplace, would have made our forefathers gasp; and I prefer to assume it is honest until proven dishonest. If they had attempted to limit business in size and scope they would have prevented even the little business of to-day being as great as it is. So I speak for the least possible measure of government interference with business, but for the largest co-operation with properly conducted business and the most effective measures to insure that, whether it be big or little, business shall be honest and fair.

"In our effort at establishing industrial justice we must see that the wage earner is placed in an economically sound position. His lowest wage must be enough for comfort, enough to make his house a home, enough to insure that the struggle for existence shall not crowd out the things truly worth existing for. There must be provision for education, for recreation and a margin for savings. There must be such freedom of action as will insure full play to the individual's abilities. On the other side, the wage earner must do justice to society. He must render services fully equal in value to the compensation he is paid. And finally, both employer and employe owe to the public such efficiency as will insure that cost of service or production shall not be higher than the public can fairly pay.

"Assuming that these things may be laid down as fundamental, it is for us all to get back to work. That is what made our country great; it is what will put the whole world back on the right track. We must have, the world must have, confidence that things will come out right. We have dealt with the greatest problem that humanity ever confronted in carrying on the war. We will have no problem hereafter greater or more difficult than that was. Therefore we are entitled to every confidence that we will cope successfully with the problems which yet lie ahead of us."

AT VALLEY FORGE.

Following are excerpts from an address made by President Harding at Valley Forge, Pa., June 6, 1921:

"It is good to come to this shrine of liberty, not alone to offer willing tribute to those who perished but to rededicate ourselves to the patriotism which suffered and sacrificed here in order that our new standards of freedom and democracy should abide.

"Valley Forge tested the heroic resolution of the new world contenders for liberty. In the crucible of suffering they blended the conflicting elements of the colonies and revealed the metal of the republic.

"They proved that lofty heroism is not always tragic, but develops its supreme offering in the dull prolonged suffering which glorifies abiding faith and unalterable resolution.

"We Americans have wrought so marvelously and so seemingly easily that it brings us to a new appreciation to stand amid the scenes of the dearly purchased republic. We need to know the making of an inheritance to measure our own responsibility in its preservation.

"Our supreme task is to preserve the fundamentals of our new world liberty and guard against the abuses and injustices which have sought to attach themselves to the established order since the world began. The rational work of every civilization is to cure without destroying and guard against the enemies of liberty which come to us cloaked in pretended helpfulness.

"Here is the chief difficulty of the world to-day. In the turbulence and upheaval of world war, when all humanity was distracted and distressed, the vandals who operate amid calamity have sought to loot suffering civilization. But an America dedicated to its standards at Valley Forge will hold fast and suffer if need be until our inherited institutions are justified and guaranteed anew to this generation and all posterity.

"If we could only bring all America to the shrine, if we could bring those who are the natural inheritors and those who come to share our inheritance, we should effect a realization which would strengthen the American resolution."

CONGRESSIONAL MEDALS FOR UNKNOWN DEAD WARRIORS.

FRENCH SOLDIER HONORED.

In Paris, France, Oct. 2, 1921, Gen. John J. Pershing decorated the grave of an unknown French soldier at the Arc de Triomphe with the congressional medal of honor and said in part:

"Unknown soldier, to you of whom thousands of mothers ask, 'Is it my son?'; to your tomb which is for France the altar of the country, I bring the love and affection of the American soldiers who fought beside you and the valiant soldiers of France."

The ceremonies were witnessed by 50,000 spectators. Ten thousand French troops were in line and the United States was represented by a fine battalion from the army of occupation in Coblenz. President Millerand, Marshal Foch, Gen. Pershing and United States Ambassador Myron T. Herrick reviewed the parade.

TRIBUTE TO BRITISH SOLDIER.

Similar ceremonies were carried out in Westminster abbey, London, on Oct. 17, 1921, when Gen. Pershing laid the congressional medal on the grave of an unknown dead British warrior. Outside the abbey were drawn up 500 American soldiers from the Rhine army and picked detachments from the British forces. Gen. Pershing was accompanied by the duke of Connaught, the king's uncle, and the two were received at the abbey by many high British officials, including the first lord of the admiralty and the secretaries for war and of the air. Inside every available seat was taken and thousands were gathered on the outside of the famous structure.

The main speech of presentation was made by the American ambassador, George Harvey.

"The congressional medal corresponds to the Victoria cross and can be awarded only to an American warrior who achieved distinction at the risk of life above and beyond the call of duty," Ambassador Harvey said. "A special act of congress was required to permit the placing of it upon the tomb of a British soldier.'

"The significance of this presentation, therefore, is twofold. It comprises, in addition to the highest military tribute, a message of fraternity direct from the American people through their chosen representatives in congress to the people of the British empire.

"The incentives of the American and British soldiers who fought side by side were identical. They were patriot warriors, sworn to the defense and preservation of the countries which they loved beyond their own lives. Each realized that the downfall of his own free land would presage the destruction of all liberty. Both were conscious of the blessings that had flowed from the English magna charta and the American constitution. Well they knew that the obliteration of either would involve the extinguishment of the other."

Gen. Pershing made a short address, stepped forward and reverently laid the medal on the grave and stood with silent bowed head for a few minutes. Dean Ryle of Westminster abbey followed with a speech of acceptance. Prime Minister Lloyd George also made a speech accepting the medal.

"It is my special privilege," he said, "on behalf of the government and of the people of this country to express their profound gratitude to the president and to the congress of the United States of America for this striking act of homage to our valiant dead.

"This empire to its remotest corners will not miss the deep significance of this deed and of this day. We feel we are taking part in no idle pageant. The warrior who rests in this sacred tomb is but the representative of nearly 1,000,000 British dead.

"The cause for which they fell America espoused in a critical hour and helped to carry to victory, so that the homage laid to-day on this grave will remain an emblem of common sacrifice for a common purpose. It will be a reminder not only to this generation but for all generations to come that the fundamental aims of these two democracies are the same and will be interpreted as a solemn pledge given to the valiant dead that these two mighty peoples who were comrades in the great war have resolved to remain comrades to guarantee a great peace."

At the conclusion of the speeches and the prayers recited by the dean, the whole congregation, led by the band of the Scots guard, joined in singing the "Battle Hymn of the Republic."

MESSAGE FROM KING GEORGE.

King George was not present at the abbey services, but marked the occasion by sending the following message to President Harding:

"I wish to express to you and to congress and the people of the United States the warm appreciation felt throughout this country at the tribute which you are paying to-day to our unknown warrior. The gift of your medal of honor to the British comrade in arms, whose tomb in Westminster abbey stands for all our best endeavor and hardest sacrifice in war, is a gesture of friendly sympathy and good will which we will not forget.

"On armistice day representatives of the British empire in Washington will join you in the ceremony to be held to honor the splendid record of your own troops. I greatly wish on that occasion to confer upon your unknown warrior our highest decoration for valor—the Victoria cross. It has never yet been bestowed upon the subject of another state, and I trust that you and the American people will accept the gift in order that the British empire may thus fitly pay its tribute to the tomb which symbolizes every deed of conscious valor performed by the men of your great fighting forces, whether by land or sea, upon the western front.

"I also send my heartfelt good wishes to the great international conference which opens by your initiative upon that day. My ministers will, I know, strive as wholeheartedly as yours to make the congress a sterling success. May they, in common with yours, do all that practical statesmanship can achieve to perpetuate the comradeship of war in the maintenance of peace. GEORGE R. I."

PRESIDENT HARDING'S REPLY.

In reply to King George President Harding on Oct. 18 sent the following message:

"On behalf of the congress and the people of the United States I wish to acknowledge with heartfelt thanks your generous message. It was with deep respect and appreciation of the superb valor and steadfastness of the British land and sea forces and the British nation in the war that Gen. Pershing made the gift of the congressional medal of honor to the unknown British warrior.

"I now hear with keenest emotion of your desire to confer upon the unknown American soldier your highest decoration for valor, the Victoria cross, that medal which for years has denoted recognition of the most self-sacrificing, patriotic service.

"I am sure that the American people will join with me in grateful acceptance of this bestowal, so fully expressing in this noble tribute the British appreciation of the high and courageous purpose of the young American who stood beside your valiant soldiers in the battle line on land and sea.

"I greatly prize this opportunity also to thank you for your good wishes for the suc-

cess of the conference on the limitation of armaments. I believe with you that the British and American representatives will cordially co-operate along with other nations to bring about such international understanding as will make possible and desirable a reduction of the burden of armaments through diminishing possible causes of war."

FEDERAL COMPENSATION FOR WORLD WAR VETERANS.

The subject of federal aid for veterans of the world war, popularly known as the soldiers' bonus plan, received much attention in the United States senate in the summer of 1921. A bill was reported by Senator Porter J. McCumber of North Dakota from the finance committee and was debated extensively in June and the early part of July. According to a statement made by Mr. McCumber the total cost if every veteran should accept the cash plan of the measure would be by the end of 1924 $1,560,166,330, and if every veteran should accept the certificate plan, $5,273,345,563 by the end of 1943. In view of the unsettled state of business and the economic crisis resulting from the war opposition to the bill developed, though there was a general feeling that the government should do something for all ex-service men as well as for those disabled in the great struggle by wounds, accidents or disease.

On July 12, 1921, President Harding went before the United States senate in person and urged it to defer the pending soldiers' bonus bill for an indefinite period. He said:

"Mr. President and Gentlemen of the Senate: There has come to my attention the pending unfinished business before the senate, and it is an imperative duty to convey to you the probable effect of the passage at this time of the proposed act, providing for adjusted compensation to our service men in the world war.

"If this measure could be made effective at the present time without disaster to the nation's finances and without hindrance to imperative readjustment of our taxes, it would present an entirely different question from that which is before you.

"In a personal as well as a public manner, which ought to be a plight of good faith, I have commended the policy of generous treatment of the nation's defenders, not as a part of any contract, not as the payment of a debt which is owing, but as a mark of the nation's gratitude.

"Every obligation is to the disabled and dependent. In such reference as has been made to general compensation there has been a reservation as to the earliest consistent time for such action if it is taken. Even without such reservation, however, a modified view would be wholly justifiable at the present moment, because the enactment of the compensation bill in the midst of the struggle for readjustment and restoration would hinder every effort and greatly imperil the financial stability of our country.

"More, this menacing effort to expend billions in gratuities will imperil our capacity to discharge our first obligation to those we must not fail to aid.

"I am addressing the senate directly because the problem is immediately yours, as your unfinished business, but the executive branch of the government owes it to both houses of congress and to the country frankly to state the difficulties we daily are called upon to meet, and the added peril this measure would bring.

"Our land has its share of the financial chaos and the industrial depression of the world. We little heeded the growth of indebtedness or the limits of expenditure during the war because we could not stop to count the cost. Our one thought then was the winning of the war and the survival of the nation.

"We borrowed and loaned—individuals to the nation and the government to other governments, and to those who served the nation—with little thought of settlement. It was relatively easy then, because national life was at stake.

"In the sober aftermath we face the order of reason, rather than act amid the passions of war, and our own land and the world are facing problems never solved before. There can be no solution unless we face the grim truths and seek to solve them in resolute devotion to duty.

"After a survey of more than four months, contemplating conditions which would stagger all of us were it not for our abiding faith in America, I am fully persuaded that three things are essential to the very beginning of the restored order of things.

"These are the revision, including reduction, of our internal taxation, the refunding of our war debt and the adjustment of our foreign loans. It is vitally necessary to settle these problems before adding to our treasury any such burden as is contemplated in the pending bill.

"It is unthinkable to expect business revival and the resumption of the normal ways of peace while maintaining the excessive taxes of war. It is quite as unthinkable to reduce our tax burdens while committing our treasury to an additional obligation which ranges from three to five billions of dollars. The precise figures no one can give.

"If it is conceivably true that only two hundred millions a year will be drawn annually from the treasury in the few years immediately before us, the bestowal is too inconsequential to be of real value to the nation's defenders; and, if the exercise of the option should call for cash running into billions, the depression in finance and industry would be so marked that vastly more harm than good would attend.

"Our government must undertake no obligation which it does not intend to meet. No government fiat will pay our bills. The exchanges of the world testify to-day to that erroneous theory.

"We may rely on the sacrifices of patriotism in war, but to-day we face markets and the effects of supply and demand and the inexorable laws of credits in time of peace.

"At the very moment we are obliged to pay 5¾ per cent interest for government short time loans to care for our floating indebtedness, a rate on government borrowing, in spite of tax exemption, which ought to prevail in private transactions for the normal interest charges in financing our industry and commerce.

"Definite obligations amounting to seven and a half billions in war savings certificates, Victory bonds and certificates covering floating indebtedness are to mature in the two years immediately following, and the overburdening of the treasury now means positive disaster in the years immediately before us. Merest prudence calls out in warning.

"Our greatest necessity is a return to the normal ways of peace activities. A modest offering to the millions of service men is a poor palliative to more millions who may be out of employment. Stabilized finance and well established confidence are both essential to restored industry and commerce.

"The slump which is now upon us is an inevitable part of war's aftermath. It has

followed in the wake of war since the world began. There was the unavoidable readjustment, the inevitable charge-off, the unfailing attendance of losses in the wake of high prices, the inexorable deflation which inflation had preceded.

"It has been wholly proper to seek to apply government relief to minimize the hardships, and the government has aided wherever possible and is aiding now; but all the special acts ever dreamed of, all the particular favors ever conceived, will not avoid all the distresses nor ward off all the losses.

"The proper mental state of our people will commit us resolutely and confidently to our tasks, and definite assurances as to taxation and expenditure will contribute to that helpful mental order. The only sure way to normalcy is over the paths nature has marked throughout all human experience.

"With the approval of congress the executive branch of government has been driving toward that decreased expenditure which is the most practical assurance of diminished taxation. With enthusiastic resolution your administrative agents are making not only conscientious effort to reduce the call for appropriations but to reduce the cost of government far below the appropriations you have already provided.

"It is easy to believe that the only way to diminish the burdens which the people must pay is to cut the outlay in which public moneys are expended. War is not wholly responsible for staggering costs; it has merely accentuated the menace which lies in mounting cost of government and excesses in expenditure which a successful private business would not tolerate.

"I can make you no definite promise in figures to-day, but I can pledge you a most conscientious drive to reduce government cost by many millions. It would be most discouraging to those who are bending their energies to save millions to have congress add billions to our burdens at the very beginning.

"Even were there not the threatened paralysis of our treasury, with its fatal reflexes on all our activities which concern our prosperity, would it not be better to await the settlement of our foreign loans? At such a time it would be a bestowal on the part of our government when it is able to bestow.

"The United States participates in none of the distributable awards of war, but the world owes us heavily, and will pay when restoration is wrought. If the restoration fails, world bankruptcy attends. I believe the world restoration is possible, but only with honest, diligent work in productivity on the one hand and honest and diligent opposition to needless public expenditure on the other.

"If the suggested recommitment of this measure bore the merest suggestion of neglect or a hint of national ingratitude, I would not urge it. It has been my privilege to speak to congress on our obligations to the disabled and dependent soldiers and the government's deep desire to prove its concern for their welfare.

"I should be ashamed of the republic if it failed in its duty to them. Neither armistice nor permanent peace puts an end to the obligations of the government to its defenders or the obligations of citizens to the government. Mindful of these things, the administrative branch of the government has not only spoken, it has acted and has accomplished.

"In view of some of the things which have been said, and very carelessly said, perhaps I ought to report officially some of the things which have been done. In the department of war risk insurance there have been filed up to July 7, 1921, compensation and insurance claims numbering 813,442. Of these 747,786 have been adjudicated at an expenditure of $471,946,762.

"There were 200,000 claims pending when the war risk department was reorganized late in April this year, and the number of pending claims has been reduced by 134,344. All work in this department will be current by the 21st of this July; that is to say, all action which the bureau may take on a given case will be current, though new claims are being filed at the rate of 700 per day.

"There have been requested 887,614 medical examinations, and less than 14,000 await medical action. Up to July 7 there have been 26,237 disabled soldiers hospitalized and in government controlled hospitals to-day there are 6,000 available beds without occupants.

"You are already aware of the progress made toward the construction of additional government hospitals, not because we are not meeting all demands, but to better meet them and the better to specialize in the treatment of those who come under our care.

"There has been paid out in allotment and allowances the sum of $578,465,658 and nearly $4,000,000,000 of government insurance is in force.

"In vocational training and rehabilitation of disabled soldiers there have been enrolled to date 107,824 men. To-day there are 75,812 men who are training with pay, at the maximum cost of $160 per month; 8,208 training without pay, but at a tuition and supply outlay of $35 per month.

"Four thousand disabled men have completed their training and have been returned to gainful employment. These earned an average of $1,051 per year before entering the army, and are earning to-day, in spite of their war disability and in spite of diminished wage or salary levels, an average of $1,550 per annum.

"With the increase of availability to training, as recently urged upon congress, the estimated additional expenditure will be $468,000,000 per annum, until the pledge of training is discharged.

"These figures suggest neither neglect nor ingratitude. It is more than the entire cost of federal government for many years following the civil war, and challenges every charge of failure to deal considerately with our nation's defenders.

"I do not recite the figures to suggest that it is all we may do, or ultimately ought to do. It is inevitable that our obligations will grow and grow enormously. We never have neglected and never will neglect the dependent soldier, and there is no way to avoid time's remorseless classifications.

"Contemplating the tremendous liability, which the government will never shirk, I would be remiss in my duty if I failed to ask congress to pause at this particular time, rather than break down our treasury, from which so much is later on to be expected.

"It is an interesting revelation and a fine achievement, attended by both abuses and triumphs. Congress has appropriated $65,000,000 for this noble work for the current year, but the estimated acceptance of training for the year before us contemplates an average of 95,000 disabled men, and the cost will be in excess of $163,000,000, or nearly $100,000,000 more than congress has provided. This additional sum must be made available.

"The defenders of the republic amid the perils of war would be the last of our citizenship to wish its stability menaced by an individual pittance of peace.

"I know the feelings of my own breast and those of yours and the grateful people of this

republic. But no thoughtful person, possessed with all the facts, is ready for added compensation for the healthy, self-reliant masses of our great armies at the cost of a treasury breakdown which will bring its hardships to all the citizens of the republic.

"Its enactment now in all probability would so add to our interest rates that the added interest charge on new and refunded indebtedness may alone exceed the sum it is proposed to bestow.

"When congress was called in extraordinary session I called your attention to the urgent measures which I thought demanded your consideration. You promptly provided the emergency tariff and good progress has been made toward the much needed and more deliberate revision of our tariff schedules.

"There is confessed disappointment that so little progress has been made in the readjustment and reduction of the war time taxes. I believe you share with me the earnest wish for early accomplishment.

"It is not expected that congress will sit and ignore other problems of legislation. There are often urgent problems which must enlist your attention. I have not come to speak of them, though the reorganization of the war risk and vocational training, now pending, would hasten the efficient discharge of our willing obligations to the disabled soldiers.

"But I want to emphasize the suggestion that the accomplishment of the major tasks for which you were asked to sit in extraordinary session will have a reassuring effect on the entire country and speed our resumption of normal activities and their rewards which tend to make a prosperous and happy people."

In accordance with the president's desire, the bill was indefinitely postponed on July 15 by a vote of forty-seven to twenty-nine. The senate by a unanimous vote on July 20 passed the Sweet bill creating a veterans' bureau. This measure, which became a law, will be found elsewhere in this volume.

THE CASE OF VICTOR L. BERGER AND OTHERS.

In Chicago on Feb. 2, 1918, a federal grand jury indicted Victor L. Berger of Milwaukee, Wis., and Adolph Germer, J. Louis Engdahl, William F. Kruse and Irwin St. John Tucker of Chicago, all leading members of the socialist party, for their opposition to the draft and other alleged efforts to defeat the government policies in connection with the war in Europe. The defendants were accused of disloyalty, obstruction of recruiting work and of interfering with the military plans of the United States. The indictments set forth twenty-six overt acts alleged to have been done in furtherance of a conspiracy against the United States.

The defendants were brought to trial in the United States Circuit court, Chicago, before Judge Kenesaw M. Landis Dec. 6, 1918. The testimony was concluded Jan. 4, 1919, and the case was given to jury on Jan. 9. On the same day the jurymen returned a verdict finding all the defendants guilty as charged. Pending the hearing of a motion for a new trial they were released under bonds. On Feb. 20 Judge Landis denied a writ for a supersedeas and sentenced each of the defendants to twenty years' imprisonment in the federal penitentiary at Leavenworth, Kas. After remaining a few hours in the custody of a United States marshal they were released on $25,000 bonds each by Judge Samuel Alschuler in the United States Circuit Court of Appeals, to which they had appealed on a writ of error. In that court it was claimed by counsel for Victor L. Berger that Judge Landis had no lawful right or power to preside at the trial for the reason that he was accused of bias and prejudice against the defendant. Affidavits to this effect had been filed by the defendants before they came to trial.

When the case was carried to the Seventh Circuit Court of Appeals that tribunal propounded these three questions to the United States Supreme court:

"1. Is the aforesaid affidavit of prejudice sufficient to invoke the operation of the act which provides for filing of an affidavit of prejudice of a judge?

"2. Did Landis have a right to pass upon the sufficiency of the said affidavit of his prejudice or upon any question arising out of the filing of said affidavit?

"3. Upon the filing of the said affidavit did the said judge have lawful right and power to preside as judge on the trial of plaintiffs in error on said indictment?"

The Supreme court on Jan. 31, 1921, responded to these questions in the following language:

"To the first question we answer yes; that is, that the affidavit of prejudice is sufficient to invoke the operation of the act.

"To the second we answer to the extent we have indicated that Judge Landis had a lawful right to pass upon the sufficiency of the affidavit.

"To the third we answer no; that is, that Judge Landis had no lawful right or power to preside as judge on the trial of defendants upon the indictment."

The majority opinion was rendered by Justice McKenna, with Chief Justice White and Justices Holmes, Van Devanter, Brandeis and Clarke concurring. The dissenting justices were McReynolds, Day and Pitney, who stoutly defended Judge Landis. In the majority opinion, which dealt almost exclusively with the legal technicalities involved, the court said:

"We are of opinion that an affidavit upon information and belief satisfies the section, and that upon its filing if it show the objectionable inclination or disposition of the judge, which we have said is an essential condition, it is his duty to 'proceed no further' in the case.

"And in this there is no serious detriment to the administration of justice nor inconvenience worthy of mention, for of what concern is it to a judge to preside in a particular case; of what concern to other parties to have him so preside, and any serious delay of trial is avoided by the requirement that the affidavit must be filed not less than ten days before the commencement of the term."

Justice McReynolds took issue with the majority.

"I am unable to follow the reasoning of the opinion approved by the majority or to feel fairly certain of its scope and consequence," he said.

"Of course, no judge should preside if he entertains actual personal prejudice toward any party. Intense dislike of a class does not render the judge incapable of administering complete justice to one of its members. A public officer who entertained no aversion toward disloyal German immigrants during the late war was simply unfit for his place. And, while 'an overspeaking judge is no well tuned cymbal,' neither is an amorphous dummy unspotted by human emotions a becoming receptacle for judicial power."

FEDERATION OF CENTRAL AMERICA.

Representatives of Guatemala, Salvador, Honduras and Costa Rica signed a treaty of federation at San Jose, Costa Rica, Jan. 19, 1921. To become effective the treaty required ratification by three of the four signatory republics and this occurred April 8 when the national legislative assembly of Guatemala formally gave its assent to the treaty. Honduras and Salvador had already ratified. Following is a digest of the treaty:

The republics of Guatemala, Salvador, Honduras and Costa Rica join in a perpetual and indissoluble union constituting a sovereign and independent nation to be named the Federation of Central America. The duty of the federal power is to maintain the union and internal order in the states. The four states will convene a constituent national assembly to frame a constitution which is to be accepted as the supreme law.

Each state will preserve its autonomy and independence in the handling and direction of its domestic affairs.

The constituent national assembly, in framing the federal constitution, will respect the following bases:

(a) There shall be a federal district under the direct rule of the federal government. The assembly will designate the territory to be included in the district and the town or place that is to be the capital of the federation.

(b) The government of the federation will be republican, popular, representative and responsible. Sovereignty will reside in the nation. There will be three powers—the executive, legislative and judiciary.

(c) The executive power shall be exercised by a federal council composed of delegates elected by the people. Each state will elect a principal and an alternate of 40 years or more and native citizens of the states which elect them. The council will elect from among the delegates a president and vice-president, whose terms of office will be one year. The president of the council will be regarded as the president of the federation, but will always act in the name and by resolution or direction of the federal council. The constitution will determine the form in which foreign relations are to be conducted.

(d) The legislative power will be vested in two houses—a senate and a chamber of deputies. The senate will consist of three senators from each state elected by the congress thereof. The senators shall be 40 years of age or more and citizens of any one of the states. Their terms shall be six years. The chamber of deputies will consist of representatives elected by the people, one deputy for every 100,000 inhabitants or fraction of more than 50,000. Senators and deputies may be re-elected indefinitely. To make a law valid requires a plurality vote in the chamber and a two-thirds vote in the senate.

(e) The judicial power shall be exercised by a supreme court of justice and by lower courts to be established by law. The members of the supreme court are to be elected by the senate.

(f) The federation guarantees to every inhabitant freedom of thought and conscience. There shall be no legislation on religious subjects.

(g) The federation recognizes the principle that human life is inviolable as to political and like offenses and guarantees all men equality before the law and the protection that the states must grant to destitute classes as also to the proletariat.

(h) The federation guarantees the freedom of teaching. Primary instruction is to be compulsory in free public schools.

(i) The federation guarantees in every state respect for individual rights, freedom of suffrage and rotation in power.

(j) The army is intended for national defense and the maintenance of peace and public order. It is to be exclusively under the orders of the federal council and the states may not maintain any armed forces except for police purposes.

(k) (Omitted from translation of treaty.)

(l) The federal government will administer the national public finances and will establish federal revenues and taxes by law.

(m) The states will continue the service of their present domestic and foreign debts, but henceforth no state shall contract for or issue foreign loans without being authorized to do so by federal law.

(n) The federation shall not contract for or issue foreign loans without being authorized to do so by law approved by two-thirds of the votes in the chamber and three-fourths of the vote in the senate.

(o) The constitution may fix a term after which ability to read and write may be set up as an essential requisite for the exercise of the right of suffrage in the election of federal authorities.

(p) The constitution will prescribe the method of its amendment, but if basic changes are made the legislatures of all the states must give their consent.

(q) The constitution will determine what are matters exclusively for federal legislation.

The constituent national assembly will consist of fifteen deputies from each state to be elected by their respective congresses. To be a deputy one must be 25 years old or more and a citizen of one of the states of Central America.

For carrying out the measures preliminary to the organization of the federation and of the national assembly and the promulgation of the constitution a provisional federal council is created consisting of one delegate from each state.

PEACE BETWEEN GERMANY AND THE UNITED STATES.

On the evening of Oct. 18, 1921, a treaty of peace between the United States and Germany was ratified by the senate in Washington, thus bringing legally as well as actually an end to the war begun April 6, 1917. The treaty of Versailles was laid before the senate by President Wilson July 10, 1919 but it met with strong opposition and was rejected on Nov. 19. It was brought before the senate again in 1920 with fifteen amendments or reservations, but was rejected on March 19 by a vote of 49 yeas to 35 nays, the affirmative vote of two-thirds of the senators present and voting being required to pass the resolution of ratification. The treaty of Versailles was thereupon sent back to the president.

On March 31, 1920, Representative Stephen G. Porter introduced a joint resolution in the house terminating the state of war with Germany. This was adopted by a vote of 242 yeas to 150 nays. In the senate the resolution was redrafted by Senator Philander C. Knox of Pennsylvania and in its amended form was passed by the senate by a vote of 43 to 38. This was what became known as the Knox peace resolution. It was concurred in by the house by a vote of 288 to 139 on May 21. It was vetoed by President Wilson on May 27. The house made an unsuccessful attempt to pass it over the veto on May 28. No action was taken by the senate.

On April 13, 1921, Senator Knox reintroduced his peace resolution and on April 30 it was adopted by the senate by a vote of 49 to 23. In the house the Porter resolution was adopted on June 13 by a vote of 305 to 61. Of the negative votes sixty were cast by democrats and one by a republican. In conference a compromise was reached and the report of the committee was adopted June 30 by the house by a vote of 263 to 59, 108 not voting; on July 1 it was adopted by the senate by a vote of 38 to 19.

President Harding signed the peace resolution at the home of Senator Frelinghuysen at Raritan, N. J., July 2. The text of the resolution as finally adopted and approved follows:

Joint resolution terminating the state of war between the imperial German government and the United States of America and between the imperial and royal Austro-Hungarian government and the United States of America.

Resolved by the senate and house of representatives of the United States of America, in congress assembled, that the state of war declared to exist between the imperial German government and the United States of America by the joint resolution of congress approved April 6, 1917, is hereby declared at an end.

Sec. 2. That in making this declaration, and as a part of it, there are expressly reserved to the United States of America and its nationals any and all rights, privileges, indemnities, reparations, or advantages, together with the right to enforce the same, to which it or they have become entitled under the terms of the armistice signed Nov 11, 1918, or any extensions or modifications thereof; or which were acquired by or are in the possession of the United States of America by reason of its participation in the war or to which its nationals have thereby become rightfully entitled; or which, under the treaty of Versailles, have been stipulated for its or their benefit; or to which it is entitled as one of the principal allied and associated powers; or to which it is entitled by virtue of any act or acts of congress, or otherwise.

Sec. 3. That the state of war declared to exist between the imperial and royal Austro-Hungarian government and the United States of America by the joint resolution of congress approved Dec. 7, 1917, is hereby declared at an end.

Sec. 4. That in making this declaration, and as a part of it, there are expressly reserved to the United States of America and its nationals any and all rights, privileges, indemnities, reparations, or advantages, together with the right to enforce the same, to which it or they have become entitled under the terms of the armistice signed Nov. 3, 1918, or any extensions or modifications thereof; or which were acquired by or are in the possession of the United States of America by reason of its participation in the war or to which its nationals have thereby become rightfully entitled; or which, under the treaty of Saint Germain-en-Laye or the treaty of Trianon, have been stipulated for its or their benefit; or to which it is entitled as one of the principal allied and associated powers; or to which it is entitled by virtue of any act or acts of congress, or otherwise.

Sec. 5. All property of the imperial German government, or its successor or successors, and of all German nationals which was, on April 6, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or of any of its officers, agents, or employes, from any source or by any agency whatsoever, and all property of the imperial and royal Austro-Hungarian government, or its successor or successors, and of all Austro-Hungarian nationals which was on Dec. 17, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or any of its officers, agents, or employes, from any source or by any agency whatsoever, shall be retained by the United States of America and no disposition thereof made, except as shall have been heretofore or specifically hereafter shall be provided by law until such time as the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively made suitable provision for the satisfaction of all claims against said governments, respectively, of all persons, whereso-ever domiciled, who owe permanent allegiance to the United States of America and who have suffered, through the acts of the imperial German government, or its agents, or the imperial and royal Austro-Hungarian government, or its agents, since July 31, 1914, loss, damage, or injury to their persons or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American, or other corporations, or in consequence of hostilities or of any operations of war, or otherwise, and also shall have granted to persons owing permanent allegiance to the United States of America most-favored-nation treatment, whether the same be national or otherwise, in all matters affecting residence, business, profession, trade, navigation, commerce and industrial property rights, and until the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively confirmed to the United States of America all fines, forfeitures, penalties and seizures imposed or made by the United States of America during the war, whether in respect to the property of the imperial German government or German nationals, or the imperial and royal Austro-Hungarian government or Austro-Hungarian

nationals, and shall have waived any and all pecuniary claims against the United States of America.

Sec. 6. Nothing herein contained shall be construed to repeal, modify or amend the provisions of the joint resolution "declaring that certain acts of congress, joint resolutions and proclamations shall be construed as if the war had ended and the present or existing emergency expired," approved March 3, 1921, or the passport control provisions of an act entitled "An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1922," approved March 2, 1921; nor to be effective to terminate the military status of any person now in desertion from the military or naval service of the United States, nor to terminate the liability to prosecution and punishment under the selective service law, approved May 18, 1917, of any person who failed to comply with the provisions of said act, or of acts amendatory thereof. (Approved July 2, 1921).

TREATY WITH GERMANY.

Negotiations for a treaty restoring the friendly relations between the United States and Germany were begun and resulted in the signing of such a convention in Berlin on Aug. 25, 1921, by Dr. Friedrich Rosen, German minister of foreign affairs, and Ellis Loring Dresel, commissioner of the United States to Germany. On Sept. 21 President Harding submitted the document to the senate for ratification. Following is the full text of the treaty as transmitted by the president and referred to the senate committee on foreign relations:

Considering that the United States, acting in conjunction with its cobelligerents, entered into an armistice with Germany on Nov. 11, 1918, in order that a treaty of peace might be concluded;

Considering that the treaty of Versailles was signed on June 28, 1919, and came into force according to the terms of its article 440, but has not been ratified by the United States;

Considering that the congress of the United States passed a joint resolution, approved by the president July 2, 1921, which reads, in part, as follows:

"Resolved by the senate and house of representatives of the United States of America in congress assembled, That the state of war declared to exist between the imperial German government and the United States of America by the joint resolution of congress approved April 6, 1917, is hereby declared at an end.

"Sec. 2. That in making this declaration, and as a part of it, there are expressly reserved to the United States of America and its nationals any and all rights, privileges, indemnities, reparations, or advantages, together with the right to enforce the same, to which it or they have become entitled under the terms of the armistice signed Nov. 11, 1918, or any extensions or modifications thereof; or which were acquired by or are in the possession of the United States of America by reason of its participation in the war or to which its nationals have thereby become rightfully entitled; or which, under the treaty of Versailles, have been stipulated for its or their benefit; or to which it is entitled as one of the principal allied and associated powers; or to which it is entitled by virtue of any act or acts of congress, or otherwise.

"Sec. 5. All property of the imperial German government, or its successor or successors, and of all German nationals, which was, on April 6, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or of any of its officers, agents, or employes, from any source or by any agency whatsoever, and all property of the imperial and royal Austro-Hungarian government, or its successor or successors, and of all Austro-Hungarian nationals which was on Dec. 7, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or any of its officers, agents, or employes, from any source or by any agency whatsoever, shall be retained by the United States of America and no disposition thereof made, except as shall have been heretofore or specifically hereafter shall be provided by law until such time as the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively made suitable provisions for the satisfaction of all claims against said governments, respectively, of all persons, wheresoever domiciled, who owe permanent allegiance to the United States of America and who have suffered, through the acts of the imperial German government or its agents or the imperial and royal Austro-Hungarian government or its agents, since July 31, 1914, loss, damage, or injury to their persons or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American, or other corporations, or in consequence of hostilities or of any operations of war, or otherwise, and also shall have granted to persons owing permanent allegiance to the United States of America most-favored-nation treatment, whether the same be national or otherwise, in all matters affecting residence, business, profession, trade, navigation, commerce and industrial property rights, and until the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have, respectively, confirmed to the United States of America all fines, forfeitures, penalties and seizures imposed or made by the United States of America during the war, whether in respect to the property of the imperial German government or German nationals or the imperial and royal Austro-Hungarian government or Austro-Hungarian nationals, and shall have waived any and all pecuniary claims against the United States of America."

Being desirous of restoring the friendly relations existing between the two nations prior to the outbreak of war,

Have for that purpose appointed their plenipotentiaries:

The president of the German empire,

Dr. Friedrich Rosen, minister for foreign affairs, and

The president of the United States of America,

Ellis Loring Dresel, commissioner of the United States of America to Germany,

Who, having communicated their full powers, found to be in good and due form, have agreed as follows:

Article 1.

Germany undertakes to accord to the United States, and the United States shall have and enjoy, all the rights, privileges, indemnities, reparations, or advantages specified in the aforesaid joint resolution of the congress of the United States of July 2, 1921, including all the rights and advantages stipulated for the benefit of the United States in the treaty of Versailles which the United States shall fully enjoy notwithstanding the fact that such treaty has not been ratified by the United States.

Article II.

With a view to defining more particularly the obligations of Germany under the foregoing article with respect to certain provisions in the treaty of Versailles, it is understood and agreed between the high contracting parties:

(1) That the rights and advantages stipulated in that treaty for the benefit of the United States, which it is intended the United States shall have and enjoy, are those defined in section 1, of part IV., and parts V., VI., VIII., IX., X., XI., XII., XIV. and XV.

The United States in availing itself of the rights and advantages stipulated in the provisions of that treaty mentioned in this paragraph will do so in a manner consistent with the rights accorded to Germany under such provisions.

(2) That the United States shall not be bound by the provisions of part I. of that treaty, nor by any provisions of that treaty including those mentioned in paragraph (1) of this article, which relate to the covenant of the league of nations, nor shall the United States be bound by any action taken by the league of nations or by the council or by the assembly thereof, unless the United States shall expressly give its assent to such action.

(3) That the United States assumes no obligations under or with respect to the provisions of part II., part III., sections 2 to 8 inclusive, of part IV. and part XIII. of that treaty.

(4) That, while the United States is privileged to participate in the reparation commission, according to the terms of part VIII. of that treaty, and in any other commission established under the treaty or under any agreement supplemental thereto, the United States is not bound to participate in any such commission unless it shall elect to do so.

(5) That the periods of time to which reference is made in article 440 of the treaty of Versailles shall run with respect to any act or election on the part of the United States from the date of the coming into force of the present treaty.

Article III.

The present treaty shall be ratified in accordance with the constitutional forms of the high contracting parties and shall take effect immediately on the exchange of ratifications, which shall take place as soon as possible at Berlin.

In witness whereof the respective plenipotentiaries have signed this treaty and have hereunto affixed their seals.

Done in duplicate in Berlin this 25th day of August, 1921.

RATIFIED WITH RESERVATIONS.

The committee on foreign relations reported the treaty to the senate on Sept. 23 with the following resolution of ratification and reservations:

"Resolved (two-thirds of the senators present concurring therein), That the senate advise and consent to the ratification of the treaty between the United States and Germany, signed at Berlin Aug. 25, 1921, to restore the friendly relations existing between the two nations prior to the outbreak of war, subject to the understanding, which is hereby made a part of this resolution of ratification, that the United States shall not be represented or participate in any body, agency or commission, nor shall any person represent the United States as a member of any body, agency or commission in which the United States is authorized to participate by this treaty, unless and until an act of the congress of the United States shall provide for such representation or participation; and subject to the further understanding, which is hereby made a part of this resolution of ratification, that the rights and advantages which the United States is entitled to have and enjoy under this treaty embrace the rights and advantages of nationals of the United States specified in the joint resolution or in the provisions of the treaty of Versailles, to which this treaty refers."

The committee at the same time reported treaties with Austria and Hungary with the same form of ratification and reservations except as to the name of the country concerned. The debate on the treaty was in open session and continued intermittently from Sept. 24 to Oct. 18, when the resolution of ratification of the three treaties was adopted by the following vote:

The treaty was ratified by the German reichstag Sept. 20. Only the communists voted against it.

TREATY WITH AUSTRIA.

Following is the full text of the treaty with Austria, which was signed in Vienna, Austria, Aug. 24, 1921, and ratified by the United States senate Oct. 18, 1921:

Considering that the United States, acting in conjunction with its cobelligerents, entered into an armistice with Austria-Hungary on Nov. 3, 1918, in order that a treaty of peace might be concluded;

Considering that the former Austro-Hungarian monarchy ceased to exist and was replaced in Austria by a republican government;

Considering that the treaty of St. Germain-en-Laye, to which Austria is a party, was signed on Sept. 10, 1919, and came into force

according to the terms of its article 381, but has not been ratified by the United States;

Considering that the congress of the United States passed a joint resolution approved by the president July 2, 1921, which reads in part as follows:

"Resolved by the senate and house of representatives of the United States of America in congress assembled,

"That the state of war declared to exist between the imperial and royal Austro-Hungarian government and the United States of America by the joint resolution of congress approved Dec. 7, 1917, is hereby declared at an end.

"Sec. 4. That in making this declaration and as a part of it there are expressly reserved to the United States of America and its nationals any and all rights, privileges, indemnities, reparations, or advantages, together with the right to enforce the same, to which it or they have become entitled under the terms of the armistice signed Nov. 3, 1918, or any extension or modifications thereof; or which were acquired by or are in the possession of the United States of America by reason of its participation in the war or to which its nationals have thereby become rightfully entitled; or which under the treaty of St. Germain-en-Laye or the treaty of Trianon have been stipulated for its or their benefit; or to which it is entitled as one of the principal allied and associated powers; or to which it is entitled by virtue of any act or acts of congress, or otherwise.

"Sec. 5. All property of the imperial German government, or its successor or successors, and of all German nationals which was on April 6, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or of any of its officers, agents, or employes, from any source or by any agency whatsoever, and all property of the imperial and royal Austro-Hungarian government, or its successor or successors, and of all Austro-Hungarian nationals which was on Dec. 7, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or any of its officers, agents, or employes, from any source or by any agency whatsoever, shall be retained by the United States of America and no disposition thereof made, except as shall have been heretofore or specifically hereafter shall be provided by law, until such time as the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively made suitable provision for the satisfaction of all claims against said governments, respectively, of all persons, wheresoever domiciled, who owe permanent allegiance to the United States of America and who have suffered, through the acts of the imperial German government or its agents, or the imperial and royal Austro-Hungarian government or its agents, since July 31, 1914, loss, damage or injury to their persons or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American or other corporations, or in consequence of hostilities or of any operations of war, or otherwise, and also shall have granted to persons owing permanent allegiance to the United States of America most-favored-nation treatment, whether the same be national or otherwise, in all matters affecting residence, business, profession, trade, navigation, commerce and industrial property rights and until the imperial German government and the imperial and royal Austro-Hungarian government or its successor or successors shall have respectively confirmed to the United States of America all fines, forfeitures, penalties and seizures imposed or made by the United States of America during the war, whether in respect to the property of the imperial German government or German nationals or the imperial and royal Austro-Hungarian government or Austro-Hungarian nationals, and shall have waived any and all pecuniary claims against the United States of America."

Being desirous of establishing securely friendly relations between the two nations;

Have for that purpose appointed their plenipotentiaries; the president of the United States of America, Arthur Hugh Frazier, and the federal president of the republic of Austria, Johann Schober, who, having communicated their full powers, found to be in good and due form, have agreed as follows:

Article I.

Austria undertakes to accord to the United States, and the United States shall have and enjoy, all the rights, privileges, indemnities, reparations or advantages specified in the aforesaid joint resolution of the congress of the United States of July 2, 1921, including all the rights and advantages stipulated for the benefit of the United States in the treaty of St. Germain-en-Laye, which the United States shall fully enjoy, notwithstanding the fact that such treaty has not been ratified by the United States. The United States, in availing itself of the rights and advantages stipulated in the provisions of that treaty, will do so in a manner consistent with the rights accorded to Austria under such provisions.

Article II.

With a view to defining more particularly the obligations of Austria under the foregoing article with respect to certain provisions in the treaty of St. Germain-en-Laye, it is understood and agreed between the high contracting parties:

(1) That the rights and advantages stipulated in that treaty for the benefit of the United States which it is intended the United States shall have and enjoy are those defined in parts, V., VI., VIII., IX., X., XI., XII. and XIV.

(2) That the United States shall not be bound by the provisions of part I of that treaty, nor by any provisions of that treaty, including those mentioned in paragraph (1) of this article, which relate to the covenant of the league of nations, nor shall the United States be bound by any action taken by the league of nations or by the council or by the assembly thereof, unless the United States shall expressly give its assent to such action.

(3) That the United States assumes no obligations under or with respect to the provisions of part II., part III., part IV. and part XIII. of that treaty.

(4) That while the United States is privileged to participate in the reparation commission, according to the terms of part VIII. of that treaty, and in any other commission established under the treaty or under any agreement supplemental thereto, the United States is not bound to participate in any such commission unless it shall elect to do so.

(5) That the periods of time to which reference is made in article 381 of the treaty of St. Germain-en-Laye shall run, with respect to any act or election on the part of the United States, from the date of the coming into force of the present treaty.

Article III.

The present treaty shall be ratified in accordance with the constitutional forms of the high contracting parties and shall take effect immediately on the exchange of ratifications.

which shall take place as soon as possible at Vienna.

In witness whereof the respective plenipotentiaries have signed this treaty and have hereunto affixed their seals.

TREATY WITH HUNGARY.

Following is the full text of the treaty with Hungary which was signed at Budapest, Hungary, Aug. 29, 1921, and ratified by the United States senate Oct. 18, 1921:

Considering that the United States, acting in conjunction with its cobelligerents, entered into an armistice with Austria-Hungary on Nov. 3, 1918, in order that a treaty of peace might be concluded;

Considering that the former Austro-Hungarian monarchy ceased to exist and was replaced in Hungary by a national Hungarian government;

Considering that the treaty of Trianon, to which Hungary is a party, was signed on June 4, 1920, and came into force according to the terms of its article 364, but has not been ratified by the United States;

Considering that the congress of the United States passed a joint resolution, approved by the president July 2, 1921, which reads in part as follows:

"Resolved by the senate and house of representatives of the United States of America in congress assembled, that the state of war declared to exist between the imperial and royal Austro-Hungarian government and the United States of America by the joint resolution of congress approved Dec. 7, 1917, is hereby declared at an end.

"Sec. 4. That in making this declaration, and as a part of it, there are expressly reserved to the United States of America and its nationals any and all rights, privileges, indemnities, reparations or advantages, together with the right to enforce the same, to which it or they have become entitled under the terms of the armistice signed Nov. 3, 1918, or any extensions or modifications thereof; or which were acquired by or are in the possession of the United States of America by reason of its participation in the war or to which its nationals have thereby become rightfully entitled; or which, under the treaty of St. Germain-en-Laye or the treaty of Trianon, have been stipulated for its or their benefit, or to which it is entitled as one of the principal allied and associated powers; or to which it is entitled by virtue of any act or acts of congress, or otherwise.

"Sec. 5. All property of the imperial German government, or its successor or successors, and of all German nationals which was on April 6, 1917, in or has since that date come into the possession or under control of, or has been the subject of a demand by the United States of America or of any of its officers, agents or employes, from any source or by any agency whatsoever, and all property of the imperial and royal Austro-Hungarian government, or its successor, or successors, and of all Austro-Hungarian nationals which was on Dec. 7, 1917, in or has since that date come into the possession or under the control of, or has been the subject of a demand by the United States of America, or any of its officers, agents or employes, from any source or by any agency whatsoever, shall be retained by the United States of America, Arthur Hugh Frazier, and the except as shall have been heretofore or specifically hereafter shall be provided by law, until such time as the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively made suitable provision for the satisfaction of all claims against said governments respectively, of all persons, wheresoever domiciled, who owe permanent allegiance to the United States of America and who have suffered, through the acts of the imperial German government or its agents, or the imperial and royal Austro-Hungarian government or its agents, since July 31, 1914, loss, damage or injury to their persons or property, directly or indirectly, whether through the ownership of shares of stock in German, Austro-Hungarian, American or other corporations, or in consequence of hostilities or of any operations of war, or otherwise, and also shall have granted to persons owing permanent allegiance to the United States of America most-favored-nation treatment, whether the same be national or otherwise, in all matters affecting residence, business, profession, trade, navigation, commerce and industrial property rights, and until the imperial German government and the imperial and royal Austro-Hungarian government, or their successor or successors, shall have respectively confirmed to the United States of America all fines, forfeitures, penalties and seizures imposed or made by the United States of America during the war, whether in respect to the property of the imperial German government or German nationals, or the imperial and royal Austro-Hungarian government or Austro-Hungarian nationals, and shall have waived any and all pecuniary claims against the United States of America."

Being desirous of restoring the friendly relations between the two nations;

Have for that purpose appointed their plenipotentiaries:

The president of the United States of America, U. Grant Smith, commissioner of the United States of America to Hungary; and Hungary, Count Nicholas Banffy, royal Hungarian minister for foreign affairs.

Who, having communicated their full powers, found to be in good and due form, have agreed as follows:

Article I.

Hungary undertakes to accord to the United States, and the United States shall have and enjoy all the rights, privileges, indemnities, reparations or advantages specified in the aforesaid joint resolution of the congress of the United States of July 2, 1921, including all the rights and advantage stipulated for the benefit of the United States in the treaty of Trianon, which the United States shall fully enjoy, notwithstanding the fact that such treaty has not been ratified by the United States. The United States, in availing itself of the rights and advantages stipulated in the provisions of that treaty, will do so in a manner consistent with the rights accorded to Hungary under such provisions.

Article II.

With a view to defining more particularly the obligations of Hungary under the foregoing article with respect to certain provisions in the treaty of Trianon, it is understood and agreed between the high contracting parties:

(1) That the rights and advantages stipulated in that treaty for the benefit of the United States, which it is intended the United States shall have and enjoy, are those defined in parts V., VI., VIII., IX., X., XI., XII. and XIV.

(2) That the United States shall not be bound by the provisions of part I. of that treaty, nor by any provisions of that treaty, including those mentioned in paragraph (1) of this article, which relate to the covenant

of the league of nations, nor shall the United States be bound by any action taken by the league of nations or by the council or by the assembly thereof, unless the United States shall expressly give its assent to such action.

(3) That the United States assumes no obligations under or with respect to the provisions of part II., part III., part IV. and part XIII. of that treaty.

(4) That while the United States is privileged to participate in the reparation commission, according to the terms of part VIII. of that treaty, and in any other commission established under the treaty or under any agreement supplemental thereto, the United States is not bound to participate in any such commission unless it shall elect to do so.

(5) That the periods of time to which reference is made in article 364 of the treaty of Trianon shall run, with respect to any act or election on the part of the United States, from the date of the coming into force of the present treaty.

Article III.

The present treaty shall be ratified in accordance with the constitutional forms of the high contracting parties and shall take effect immediately on the exchange of the ratifications, which shall take place as soon as possible at Budapest.

In witness whereof the respective plenipotentiaries have signed this treaty and hereunto affixed their seals.

THE EUGENE V. DEBS CASE.

Eugene V. Debs, five times socialist candidate for the presidency of the United States, was arrested in Cleveland, O., June 20, 1918, on a federal warrant in connection with Debs' speech at the socialist state convention in Canton, O., on June 16. He was brought to trial and on Sept. 12 was found guilty by a federal jury. Of the original ten counts of the indictment only four remained when the jury retired to consider the evidence. He was found guilty of attempting to incite insubordination, disloyalty, etc., in the military and naval forces; attempting to obstruct recruiting and uttering language tending to incite, provoke and encourage resistance to the United States, and to promote the cause of the enemy. The count on which he was adjudged innocent charged that he opposed the cause of the United States.

On Sept. 14 Debs was sentenced to ten years in the Moundsville (W. Va.) penitentiary on each of three counts of the indictment by Federal Judge D. C. Westenhaver. The sentences were to run concurrently. Motion for a new trial was overruled and an exception on behalf of the defendant was allowed. A motion for arrest of the sentence was also overruled. The court admitted Debs to $10,000 bail, with permission to leave the northern federal district of Ohio only to go to and remain at his home.

The case was carried to the United States Supreme court, which on March 10, 1919, sustained the conviction and sentence by the lower court. The constitutionality of the espionage act itself was not passed upon, but the members of the court were unanimous in holding the enlistment section valid and in declaring that the act did not interfere with the right of free speech.

Mr. Debs asked for a rehearing by the Supreme court on March 27, but his petition was denied March 31. Debs began serving his sentence in the West Virginia penitentiary at Moundsville April 13, 1919. He was later transferred to the penitentiary at Atlanta, Ga.

In 1920, while still in prison, he was again made the candidate of the socialist party for president of the United States and received nearly 900,000 votes. Early in 1921 his case was taken up by a special commission investigating all convictions under the espionage act and the recommendation was made to the department of justice that Debs' sentence be commuted on Feb. 12. The recommendation was favorably indorsed by the department, but President Wilson on Jan. 31 refused to commute the sentence on the ground that Debs had sought to handicap the selective service act and that the granting of clemency in this case might induce similar contempt for law in the event of another war.

VERDICT AGAINST COMMUNISTS CONFIRMED.

The verdict of the jury which on Aug. 2, 1920, sentenced William Bross Lloyd of Winnetka, Ill., and nineteen other communists to prison terms and fines for advocating the overthrow of the American government by force and violence, was upheld by Judge Oscar Hebel of the Cook county Criminal court Jan. 21, 1921, when he overruled the motion for a new trial. In his decision the judge held that it was unlawful for any person to do the acts of which the defendants were found guilty. He also declared unlawful the organizing, aiding or becoming a member of any society or association which has in view the purposes openly admitted to have been those of the communist labor party and condemned the use of the red flag or any similar emblem of the advocacy of force or anarchy. A motion in arrest of judgment was granted to allow the defendants to appeal to the Supreme court.

Fourth-class matter embraces that known as domestic parcel post mail and includes farm and factory products (and books) not now embraced by law in either the first or second class or (with the exception of books) in the third class, not exceeding seventy pounds in weight (when mailed for delivery within the first or second zones, nor exceeding seventy pounds in weight when mailed for delivery within any

of the other zones), nor greater in size than 84 inches in length and girth combined, nor in form or kind likely to injure the person of any postal employe or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

Rates of postage—to be fully prepaid—unsealed:

(a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(b) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(c) Parcels weighing more than 8 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the zone table, a fraction of a pound being considered a full pound.

Zones—Parcel Post Guide and Maps.

For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area in which some of the largest postoffices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster-general, Washington, D. C. Stamps are not accepted.

Insurance of Fourth-Class Mail.

Fees and conditions—Fourth-class or domestic parcel post mail (but no other) may not be registered but may be insured against loss in an amount equivalent to its actual value, but not to exceed $5 in any one case, on payment of a fee of 3 cents; not to exceed $25 on payment of a fee of 5 cents; not to exceed $50 on payment of a fee of 10 cents, or not to exceed $100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed.

Collect-on-Delivery Service.

Conditions and fee—Parcels of fourth-class or parcel post matter (but no other) may be sent C. O. D. from one domestic money order postoffice to another, including those in the Canal Zone, on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed $100. The remittance is made by postoffice money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to $50.

Postal Cards.

Postal cards are furnished at the postage value represented by the stamp impressed thereon; single postal cards for domestic and foreign correspondence at 1 cent and 2 cents each, respectively, and reply (double postal cards at 2 cents and 4 cents each, respectively.

Special Delivery Service.

Special delivery service is the prompt delivery of mail by messenger during prescribed hours to persons who reside within the carrier limits of city delivery offices, to patrons of rural service who reside more than one mile from postoffices but within one-half mile of rural routes, and to residents within one mile of any postoffice.

This service is obtained by placing on any letter or article of mail a special delivery stamp or 10 cents' worth of ordinary stamps in addition to the lawful postage. When ordinary stamps are used the words "Special Delivery" must be placed on the envelope or wrapper, directly under but never on the stamps; otherwise the letter or article will not be accorded special delivery service.

Registry System.

Any matter, properly addressed and bearing the name and address of the sender, admissible to the domestic mails (except fourth-class mail, which may be insured), or to the postal union mails (except foreign "parcel post" packages for Barbados, Curacao, Dutch Guiana, France, Great Britain, Guadeloupe, Martinique, the Netherlands and Uruguay), may be registered. Foreign "parcel post" mail must be taken to the postffice to be registered, but other mail may be registered at any postoffice or postoffice station by rural carriers, and, when sealed and not cumbersome, by city carriers in residential districts.

The registry fee for each separate article, foreign or domestic, is 10 cents in addition to the postage, both to be fully prepaid.

Indemnity for lost registered mail will be paid as follows:

Domestic mail, first class (sealed), up to $50, actual value; third class (unsealed), up to $25, actual value.

Foreign mail, amount claimed within limit of 50 francs ($9.65), for total loss (not partial loss of rifling) of a registered article exchanged between the United States and a postal union country, except foreign parcel post matter, and losses beyond control ("force majeure").

Application for a money order must be made on a form furnished for that purpose and be presented at the money order window of the postoffice or one of its stations. Money orders are issued for any desired amount from 1 cent to $100 and when a larger sum than $100 is to be sent any number of additional orders may be obtained. Applications may be made through rural carriers, who will furnish the necessary forms and give receipts for the amounts.

International money orders, payable in almost any part of the world, may be obtained at all of the larger postoffices and at many of the smaller ones.

Fees for money orders payable in the United States (which includes Hawaii, Porto Rico and the Virgin islands) and its possessions, comprising the Canal Zone, Guam, the Philippines and Tutuila, Samoa; also for orders payable in Bermuda, British Guiana, British Honduras, Canada, Cuba, Mexico, Newfoundland, at the United States postal agency at Shanghai (China), in the Bahama islands and in certain other islands in the West Indies:

For orders from $0.01 to $2.50	3 cents
For orders from 2.51 to 5.00	5 cents
For orders from 5.01 to 10.00	8 cents
For orders from 10.01 to 20.00	10 cents
For orders from 20.01 to 30.00	12 cents
For orders from 30.01 to 40.00	15 cents
For orders from 40.01 to 50.00	18 cents
For orders from 50.01 to 60.00	20 cents
For orders from 60.01 to 75.00	25 cents
For orders from 75.01 to 100.00	30 cents

The fees for foreign money orders payable in any country on which a money order may be drawn, other than those named above, may be ascertained upon inquiry at the postoffice.

HARDING BARS U. S. TROOPS IN IRISH PARADE.

On March 17, 1921, President Harding received a message from John F. Harrigan, president of the Massachusetts council of the American Association for the Recognition of the Irish Republic, demanding the revocation of orders from Gen. Ruckman and Admiral Dunn forbidding the appearance in the Evacuation day parade in Boston of federal troops, as it would constitute a serious breach of international amity. Considering the tone of the Harrigan telegram discourteous, the president directed his secretary, George B. Christian, Jr., to sign the following reply:

"Your telegram has been called to the attention of the president and he directs me to say in reply that army and navy commanders have authority to direct the forces under their command. The government raises no issues about the fitness of your celebration of Evacuation day and the spirit of St. Patrick's day is felt throughout our country; but the naval and military forces of the nation can have no part in any demonstration which may be construed as influencing the foreign relations of the republic."

PORTAL OF PEACE.

On Sept. 5, 1921, there was dedicated in Blaine, Wash., a massive concrete structure in the form of a gateway and called "Portal of Peace" in honor of the peace between the United States and Canada which had lasted for more than 100 years without a break. The structure, which cost $40,000, stands 100 yards from the international boundary where the 49th parallel meets Boundary bay. Across the plinth on the United States side is the inscription, "Children of a Common Mother," and on the Canadian side, "Brethren Dwelling Together in Unity." Ten thousand Canadians and Americans attended the dedication ceremonies.

I. W. W. CONVICTIONS UPHELD.

The convictions of William D. Haywood and ninety-three other members of the Industrial Workers of the World on charges of conspiracy to violate the selective service and espionage acts were affirmed in a decision handed down by the United States Circuit Court of Appeals in Chicago Oct. 5, 1920. The case was then taken to the United States Supreme court, which on April 11, 1921, refused to review the decision of the Circuit Court of Appeals and the convicted men were ordered back to prison. It was made public on April 21 that W. D. Haywood had secretly left the United States and had gone to Russia.

The defendants were arrested Sept. 2, 1917, when great quantities of documents, printed and written, were seized. These showed the kind of propaganda the I. W. W. organization was engaged in and had much to do with influencing the court and jury in the trial. The defendants were found guilty in the United States District court in Chicago, Aug. 17, 1918, and were sentenced by Judge Kenesaw M. Landis to serve various terms in the federal prison at Leavenworth, Kas., and to pay fines ranging from $5,000 to $10,000 each. Some of them completed their terms, while others, including Haywood, the secretary-treasurer of the I. W. W., were given their liberty on bail pending the result of the appeal.

THE CONTROVERSY OVER YAP.

When Japan, in May, 1919, was given a mandate over the former German islands in the Pacific ocean north of the equator it was understood by President Wilson that the little group of islets called Yap, which had been used by the Germans as a cable station, was reserved and therefore exempt from the same treatment as the other islands. He had asked that Yap should be internationalized so that the United States and other nations might use it in common as a cable station. In addition, Secretary of State Robert Lansing served formal notice on the Japanese peace delegates in Paris that the United States understood Yap to be specially reserved for disposition by the communications conference. On May 7, however, the supreme council allocated the islands to Japan without making any exception of Yap. On Dec. 17, 1920, the league of nations' council in Geneva perfected the mandate as it had been shaped by the supreme council.

FIRST NOTES EXCHANGED.

On Nov. 12, 1920, the United States charge d'affaires in Tokyo addressed the following note to the Japanese foreign office:

"During recent session of the communications conference some question has arisen in regard to the disposition of the island of Yap by the supreme council. It is contended that this island was included in the islands north of equator which were offered by action of the supreme council of May 7, 1919, under mandate to Japan. It was clear understanding of the government of the United States that, for reasons vitally affecting international communications, the supreme council at the previous request of President Wilson reserved for future consideration the final disposition of the island of Yap in the hope that some agreement might be reached by the allied and associated governments to place the island under international control and thus render it available as an international cable station. For this reason it is the understanding of the government of the United States that the island of Yap was not included in the action of the supreme council on May 7, 1919."

To this note the Japanese foreign office on Nov. 19, 1920, returned the following reply:

"According to the definite understanding of the Japanese government the supreme council of May 7, 1919, came to the final decision to place under mandate of Japan the whole of the German islands north of equator. The decision involved no reservation whatever in regard to the island of Yap. For above-mentioned reasons the department of foreign affairs begs to inform the United States embassy that the Japanese government would not be able to consent to any proposition which, reversing the decision of the supreme council, would exclude the island of Yap from the territory committed to their charge."

THE DAVIS NOTE TO JAPAN.

On Dec. 6, 1920, Norman H. Davis, the then acting secretary of state, sent the following reply to the Japanese government:

"There would appear to be no difference of opinion with regard to the reservation made by President Wilson and Mr. Lansing with respect to the island of Yap during various discussions of the supreme council and the council of foreign ministers at the peace conference. On April 21 President Wilson, in reporting his conversation of that morning with Baron Makino and Count Chinda, stated, among other things, that he had reminded the Japanese delegates that it had been understood that Japan was to have the mandate for the islands in the North Pacific, although he had made a reservation in the case of the island of Yap, which he considered should be international. At the meeting of foreign ministers held on April 30, 3 p. m., 1919, in a discussion relating to cables, Mr. Lansing stated that there was a relevant question which he would like, on future occasion, to discuss—namely, whether in the interests of cable communications it would not be desirable that the island of Yap be internationalized and administered by an international commission in control of cable lines. He suggested that it was not necessary to maintain that all the islands should have the same status, but that the island of Yap should be held to constitute a special case. Baron Makino took the position that the status of the island of Yap should be decided before the question of cables.

"At a meeting on May 1 President Wilson stated that as the cables' lines all alike passed through the island of Yap it thus became a general distributing center for lines of communication for the northern Pacific and that Yap should not pass into the hands of one power. In the meeting of May 6, in the discussion regarding the allotment of mandates in the Pacific, Mr. Lloyd George expressed his understanding that the Japanese should receive a mandate for certain islands north of the equator. According to the record, President Wilson consented in principle to this, with an explanatory statement that with respect to mandates the policy of the open door would have to be applied, and that there must be equal opportunity for the trade and commerce of other members of the league. The island of Yap, having been previously cited as a special case for particular further consideration, was not intended to be included among the 'certain islands' designated as available to Japan under mandate.

"There is attached, as an appendix to the minutes of the meeting of May 7, 4:15 p. m., a memorandum which obviously purports to be a codification of the agreement reached in the meeting of May 6 with reference to the North Pacific islands. Upon this, my government understands, is based the assertion that Yap was assigned under mandate to Japan. Even that, however, does not expressly include all the islands in this particular category, although the qualifying word 'certain' is omitted. According to the minutes of this meeting, there was no discussion whatever on May 7 in respect to mandates; the minutes quoted the memorandum with the statement merely that 'the following decisions were reached.'

"The erroneous publications of such a decision of which my government was not aware would not validate it. The president recollects no proposal offered in this meeting to change the decision of May 6, and it is certain he agreed to no variants of the original proposition. He understood it was generally agreed that the island of Yap has been previously excluded and reserved for future determination in connection with the consideration of cable communications.

"Furthermore, attention is called to the fact that the draft mandate covering ex-German islands north of the equator, submitted to the meeting of the heads of delegations on Dec. 24, 1919, contemplates that the question is a question as to what islands north of the equator should be allocated under mandate to Japan. Article 4 reads as follows:

"'If any dispute should arise as to whether particular island is or not covered by the above mandate, the matter shall be submitted to the council of the league of nations, whose decisions shall be final.'

"The draft was not accepted primarily on account of objections raised by the Japanese, which, however, did not relate to this particular provision. The point is cited merely as

indicating an understanding that the definite agreement had not yet been reached as to the final disposition of all the islands north of the equator.

"I am directed by the president to inform you that the government of the United States cannot agree that the island of Yap was included in the decision of May 7 or in any other agreement of the supreme council, and in addition that as the island of Yap must form an indispensable part of the international communications it is essential that its free and unhampered use for such purpose should not be limited or controlled by any one power.

"Even on the assumption that the island of Yap should be included among the islands held by mandate by Japan, it is not conceivable that other powers should not have free and unhampered access and use of the island for the landing and operation of cables. This is a right which the United States would be disposed to grant upon any of its unfortified islands which may be essential for such purposes."

JAPAN'S REPLY.

On Feb. 26, 1921, the secretary of state, Bainbridge Colby, received the following note from the Japanese minister of foreign affairs:

"I have the honor to acknowledge the receipt of your note of the 10th December last on the status of the island of Yap in reply to the memorandum of the imperial department of foreign affairs, dated the 12th November last, and to state candidly herewith the opinion of the imperial government on the views of the government of the United States propounded in this said note.

"In support of the argument advanced by the government of the United States the following points are enumerated in your note: First, that in the course of the various discussions in the supreme council and the council of foreign ministers at the peace conference (namely, at the meeting of the supreme council on April 21, 1919, and at the meeting of foreign ministers on April 30 and on May 1, 1919), the president and Mr. Lansing, the then secretary of state of the United States, respectively, gave utmost dispatch to a view that the island of Yap should be internationalized or that it should not pass into the hands of any one power; next, that at the meeting of the supreme council held on May 6, 1919, Mr. Lloyd-George employed the words 'certain islands' in giving expression to what he understood to be the territories to be committed to the charge of Japan; and lastly, that according to the minutes of the meeting of the supreme council of May 7, 1919, no discussion took place on that day in respect to mandates, and that although there exists a memorandum appended to the minutes of the meeting of May 7 which purports to be a codification of the agreement reached at the meeting of May 6 with reference to the North Pacific islands, such memorandum does not expressly include all the islands in the North Pacific.

"Of the meetings referred to it must be noted that the imperial delegates were not present at the meeting of the supreme council of April 21, May 6 and May 7, and in consequence the imperial government have no means of ascertaining what views were expressed by the American delegates at those meetings. Assuming, however, that President Wilson did in fact give utterance at those meetings to such views as are ascribed to him this cannot warrant the United States as against the imperial government in going beyond asserting as a fact that President Wilson or Mr. Lansing gave it as his opinion before the supreme council and the council of foreign ministers at some time previous to May 1, 1919, that the island of Yap should be internationalized or that it should not pass into the hands of any one power.

"In the opinion of the imperial government such a fact argues in no way in favor of the contention of the American government that the island of Yap stands outside the islands that it was decided should be held under the mandate by Japan unless they can establish at the same time the further fact that the representations of President Wilson and Mr. Lansing were accepted by the council and the latter decided to exclude Yap from the mandatory territories assigned to Japan. In order to maintain successfully therefore that the island of Yap is not included in the mandatory territories assigned to Japan the imperial government considers it necessary for the American government to prove not merely the fact that the particular line of views was stated at the meetings but also that the meeting decided in favor of those views.

"Further, in this same connection the imperial government would point out that views expressed by the delegates previous to arriving at a decision are not necessarily to be interpreted as reservations naturally attached to the decision. It follows that the question whether the island of Yap is excluded from the mandatory territories assigned to Japan must be judged from the decision of May 7, by which the mandatory powers and their mandatory territories were for the first time and at the same time finally decided upon, and it must be concluded that whatever utterances may have been made previous to that date were only preliminary conversations that took place before the decisions were reached and in themselves possess no such cogency as to qualify the meaning or limit the application of the decisions.

"This conclusion is the more irrefutable since the imperial delegation never expressed their agreement, whether at any meeting of the councils or elsewhere, with the above stated views of President Wilson or of Mr. Lansing. Furthermore, Viscount, then Baron, Makino announced distinctly his agreement with them at the meeting of foreign ministers held on April 30, 1919.

"2. A view is advanced further in the note under reply that if Yap was meant to be included among the islands assigned under the mandate to Japan then the decision of May 7, 1919, should have been drafted in more specific language than is the case. In the opinion of the imperial government, however, it is more in accordance with sound principles of interpretation to say that the fact should have been set down with especial clearness if exclusion were meant, as an exception always requires to be stated definitely. To assert that the fact of nonexclusion should have been specifically mentioned in a decision of this kind could only be regarded as an extraordinary and even an unreasonable contention with which no one is likely to concur.

"It must also be remembered that if a decision in favor of exclusion of the island of Yap—a question of grave concern to Japan and one on which the Japanese delegation invariably maintained a firm attitude—had really been made, as it is implied by the argument of the United States government, at the meeting of May 7, at which Japan was not represented, it could not but have been regarded as an act of entirely bad faith. It is therefore inconceivable to the imperial government that such a decision could have been reached at a meeting at which no Japanese delegation was present.

"Since the decision under consideration says on the one hand 'German islands' and on the other does not make any exception of Yap, the imperial government regard it as perfectly clear that the ex-German Pacific islands north

of the Aleutians, with no exception whatever, all belong to the mandatory territories allocated to Japan. Nor are the imperial government alone and unsupported in their interpretation of the decision, for they are in receipt of authentic information that the governments of Great Britain and France, being of the same opinion as the Japanese government on the matter, made statements to that effect in their replies to the American note in November last.

"If the decision incorporated in the memorandum appended to the minutes for May 7 be one which was really reached at the meeting of the supreme council held on May 6 as represented in the note under reply, then the inevitable conclusion will be that inasmuch as the meeting held on the latter date, that is, May 6, was that of the heads of delegations of the United States, Great Britain and France, the contention of the American government is tantamount to saying that President Wilson by himself arrived at an understanding which differed from that of all others present, a conclusion difficult to understand.

"Again, a reference is made to the use of words 'certain islands' by Mr. Lloyd George at the meeting of the supreme council held on May 6, 1919, tending to prove the exclusion of the island of Yap. Granting for the sake of argumeut that the words 'certain islands' occur in the minutes for May 6, the use of such phrase is perfectly natural and easy to understand without supposing it to refer to the exclusion of Yap. There are other islands in the South Pacific north of the equator which did not belong to Germany and it does not appear how better Mr. Lloyd George could succinctly describe the islands to be allotted to the Japanese mandate in that region than as 'certain islands.' 'Certain' is a word which is far from meaning 'all but one,' and had he had the exclusion of a single island such as Yap in mind he would have been almost sure to have explicitly mentioned it.

"Seeing that the British government adopts the interpretation that it was decided at that time that all the ex-German Pacific islands north of the equator were to be assigned under the mandate to Japan, it is obvious that in employing the words Mr. Lloyd George cannot have intended to signify the exclusion of the island of Yap.

"To sum up, since in a matter of such a grave nature as the establishment of mandatory territories only what appears on the face of the decisions should be accepted as authoritative, the imperial government cannot agree in giving an extraordinary and unusual interpretation to the decision on a vague ground that certain thoughts and intentions not expressed in the text thereof existed in the mind of the delegate of one power only.

"3. The decision of May 7, 1919, was made public on the following day, the 8th. If the published text of the decision differed in sense from what was understood by the government of the United States to be its meaning the latter should have and would naturally have been expected to have entered an immediate protest. No such step was taken, however, at the time and the imperial government fail to understand the reason why the American government should have allowed more than a year and a half to pass by before electing to question the decision.

"The note under reply refers to the fact that President Wilson's statement before the senate committee on foreign relations on Aug. 19, 1919, called forth no comment by any nations and points to this absence of contrary opinion as amounting to evidence to prove that no power found anything in the president's view to which it could take exception. The imperial government are quite unable to follow contentions of this kind. In the one case we must protest publication of an international agreement in which the American representative participated whereas the other was essentially a purely domestic affair.

"As to the former, in case the published text would be found to differ from what was understood by one party it was incumbent upon him forthwith to lodge a protest and have the errors, if any, rectified. In the latter case, however, no third power is called upon to make any refutation or correction and consequently the fact that there was no nation which took it upon itself to make any adverse comment has no bearing whatever on the matter under consideration.

"4. On the strength of article 3 of the mandate covering ex-German islands in the Pacific north of the equator submitted to the supreme council on Dec. 24, 1919, it is contended in the note under reply that no definite agreement had yet been reached as to the final disposition of all the ex-German islands in the Pacific north of the equator. The imperial government would point out that this article was intended solely to provide a means of settlement in view of any dispute that may arise as to boundaries or the assignment of lands. Such provisions were by no means confined to the particular draft in question, but there were also found similar provisions in all original draft mandates covering other territories which were simultaneously submitted to the same meeting. If the American contention in this connection is to be upheld it must needs follow that all the mandatory territories are liable to be honeycombed by exceptions or exclusions. But such a conclusion is wholly at variance with facts and cannot be thought by any one to be convincing. Consequently the reference made to it in the note under reply tends, in the opinion of the imperial government, in no way to strengthen the contentions of the United States government.

"5. In the concluding part of the note under reply it is observed that even on the assumption that the island of Yap should be included among the islands held under the mandate by Japan it is not conceivable that other powers should not have free and unhampered access to and use of the island for the landing and operation of cables. If this observation is put forth irrespective of the fact that the island is within the mandatory territory then the question seems to be one which should be freely settled by the nation which has the charge of the place—namely, Japan.

"If this meaning be, however, that owing to the nature of the mandate the island should have its doors kept open the imperial government would draw attention to the extract of the meeting of the commission on mandates held on July 8, 1919. Col. House opposed Viscount Chinda's claim that the same equal opportunities for commerce and trade should be guaranteed in territories belonging to the C class as in those belonging to the B class. In view of the position thus taken by the American delegate the imperial government feel obliged to state that in their opinion the American government cannot with justice contend for the open door in the class C territories, at least as against Japan, and to inform the United States government at the same time that they cannot consider themselves bound in any way to recognize the freedom of other nations in the manner insisted upon by the American government in regard to the landing and operation of cables even in places where the principle of the open door is to be guaranteed."

COLBY NOTES TO LEAGUE.

On Feb. 21, 1921, Bainbridge Colby, then secretary of state of the United States, addressed the following note to the president

and the members of the league of nations:

"I. The government of the United States has received information that the council of the league of nations, at its meeting which is to be held in Paris on this date, proposes to consider at length the subject of mandates, including their terms, provisions and allocation, and accordingly takes this opportunity to deliver to the council of the league of nations a copy of its note addressed, under date of Nov. 20, 1920, to his excellency Lord Curzon of Kedleston, the British secretary of state for foreign affairs, in which the views of the United States are fully set forth regarding the nature of the responsibilities of mandatory powers.

"The attention of the council of the league of nations is particularly invited to the request therein made on behalf of this government that the draft mandate forms intended to be submitted to the league of nations be communicated to this government for its consideration before submission to the council of the league, in order that the council might thus have before it an expression of the opinion of the government of the United States on the form of such mandates and a clear indication of the basis upon which the approval of this government, which is essential to the validity of any determinations which may be reached, might be anticipated and received.

"It was furthermore stated in said note that the establishment of the mandate principle, a new principle in international relations, and one in which the public opinion of the world is taking especial interest, would seem to require the frankest discussion from all pertinent points of view, and the opinion was expressed that suitable publicity should be given to the drafts of mandates which it is the intention to submit to the council in order that the fullest opportunity might be afforded to consider their terms in relation to the obligations assumed by the mandatory powers and the respective interests of all governments who deem themselves concerned or affected.

"A copy of this note was transmitted to the governments of France and Italy, requesting an interpretation by each government of the provisions of the agreement between Great Britain, Italy and France, signed at Sevres on Aug. 10, 1920, relating to the creation of spheres of special interests in Anatolia, in the light of this government's note to the British government of Nov. 20, 1920. A reply has thus far been received only from the French government, in which attention is directed to article 10 of the so-called Sevres treaty, which provides in favor of nationals of third powers for all economic purposes free access to the so-called zones of special interest.

MANDATE TO JAPAN.

"II. This government is also in receipt of information that the council of the league of nations, at its meeting at Geneva on Dec. 17 last, approved, among other mandates, a mandate to Japan embracing 'All the former German islands situated in the Pacific ocean and lying north of the equator.' The text of this mandate to Japan, which was received by this government and which, according to available information, was approved by the council, contains the following statement: 'Whereas the principal allied and associated powers agreed that, in accordance with article 22, part 1 (covenant of the league of nations) of the said treaty, a mandate should be conferred upon his majesty the emperor of Japan to administer the said islands, and have proposed that the mandate should be formulated in the following terms,' etc.

"The government of the United States takes this opportunity respectfully and in the most friendly spirit to submit to the president and members of the council of the league that the statement above quoted is incorrect and is not an accurate recital of the facts. On the contrary, the United States, which is distinctly included in the very definite and constantly used descriptive phrase, 'the principal allied and associated powers,' has not agreed to the terms or provisions of the mandate which is embodied in this text, nor has it agreed that a mandate should be conferred upon Japan covering all the former German islands situated in the Pacific ocean and lying north of the equator.

"The United States has never given its consent to the inclusion of the island of Yap in any proposed mandate to Japan, but, on the other hand, at the time of a discussion of a mandate covering the former German islands in the Pacific ocean north of the equator, and in the course of the said discussion, President Wilson, acting on behalf of the government, was particular to stipulate that the question of the disposition of the island of Yap should be reserved for future consideration. Subsequently this government was informed that certain of 'the principal allied and associated powers' were under the impression that the reported decision of the supreme council, sometimes described as the 'council of four,' taken at its meeting of May 7, 1919, included or inserted the island of Yap in the proposed mandate to Japan.

"This government, in notes addressed to the governments of Great Britain, France, Italy and Japan, has set forth at length its contention that Yap had in fact been excepted from this proposed mandate and was not to be included therein. Furthermore, by direction of President Wilson, the respective governments above mentioned were informed that the government of the United States could not concur in the reported decision of May 7, 1919, of the supreme council. The information was further conveyed that the reservations which had previously been made by this government regarding the island of Yap were based on the view that the island of Yap necessarily constitutes an indispensable part of any scheme or practicable arrangement of cable communication in the Pacific and that its free and unhampered use should not be limited or controlled by any one power.

UNITED STATES POSITION CLEAR.

"While this government has never assented to the inclusion of the island of Yap in the proposed mandate to Japan, it may be pointed out that even if one or more of the other principal allied and associated powers were under a misapprehension as to the inclusion of this island in the reported decision of May 7, 1919, nevertheless the notes above mentioned of the government of the United States make clear the position of this government in the matter.

"At the time when the several notes were addressed to the respective governments above mentioned, a final agreement had not been reached as to the terms and allocation of mandates covering the former German islands in the Pacific. Therefore the position taken in the matter by the president on behalf of this government, and clearly set forth in the notes referred to, necessarily had the result of effectively withdrawing any suggestion of implication of assent mistakenly imputed to this government long before Dec. 17, 1920, the date of the council's meeting at Geneva.

"As one of the principal allied and associated powers, the United States has an equal concern and an inseparable interest with the other principal allied and associated powers in the overseas possessions of Germany, and

concededly an equal voice in their disposition, which it is respectfully submitted cannot be undertaken or effected without its assent. The government of the United States therefore respectfully states that it cannot regard itself as bound by the terms and provisions of the said mandate, and desires to record its protest against the reported decision of Dec. 17 last of the council of the league of nations in relation thereto, and at the same time to request that the council, having obviously acted under a misapprehension of the facts, should reopen the question for the further consideration which the proper settlement of it clearly requires.

"BAINBRIDGE COLBY."

REPLY OF THE LEAGUE.

The council of the league of nations published its reply to the Colby note in Paris March 2. It refrained from treating the issue in a controversial way, preferring to "examine the subject from the broad basis of international co-operation and friendship, in the belief that this course would appeal to the spirit of justice of the government and people of the United States."

In regard to the American contention that the approval of the United States was "essential to the validity of any determination which may be reached" on mandates, the council said that the rights acquired by the United States by the part she played during the war and in the making of peace "are not likely to be challenged in any quarter," but the council's reply added: "The American government will itself recognize that the situation is complicated by the fact that the United States, for reasons which the council would be the last to question, has so far abstained from ratifying the peace treaty and has not taken her seat on the council of the league of nations."

The council invited the United States to come into the next discussions upon "A" and "B" mandates. It was explained that the council had already decided before the receipt of the American note to postpone the consideration of the "A" mandates (for the former Turkish possessions, including Mesopotamia), and that in deference to the views put forward by the United States government the further consideration of the "B" mandates (for the former central African colonies of Germany), which the council had expected to approve finally at the present session, would also be postponed until the next session, which should take place in May or June.

In inviting the United States to take part in these discussions on the "A" and "B" mandates the council remarked: "A problem so intricate and involved as that of mandates can hardly be handled by an interchange of formal notes. It can only be satisfactorily solved by personal contact and by direct exchange of opinion. Not only do such direct negotiations, which correspond to the true spirit of the league of nations, effect an increase of freedom, flexibility and speed, but they create a spirit of mutual good will and co-operation among people meeting around the same table."

In regard to the American protest about Yap, the council pointed out that the American complaint lay not against the council of the league but against the principal allied powers. However, in order once more to show its good will and to hasten matters, the council had already forwarded the American note to the French, British, Italian and Japanese governments. The note closed with an expression of hope that "reciprocal good will will find a solution in harmony with the generous spirit which inspired the principle of mandates."

SECRETARY HUGHES' ARGUMENT.

On March 4, 1921, Mr. Colby was succeeded by Charles Evans Hughes, who was appointed secretary of state by President Harding. Secretary Hughes took up the Yap issue and on April 6 made public the following identic note sent by him to Great Britain, France and Italy, with one of similar tenor to Japan:

"With respect to the mandate to Japan, purporting to have been confirmed and defined in its terms by the supreme council of the league of nations, of the German possessions in the Pacific ocean lying north of the equator, this government deems it appropriate to state the fundamental basis of its representations and the principles which, in its view, are determinative.

"It will not be questioned that the right to dispose of the overseas possessions of Germany was acquired only through victory of the allied and associated powers, and it is also believed that there is no disposition on the part of the British government to deny the participation of the United States in that victory.

"It would seem to follow necessarily that the right accruing to the allied and associated powers through the common victory is shared by the United States and that there could be no valid or effective disposition of the overseas possessions of Germany, now under consideration, without the assent of the United States.

"This government must, therefore, point out that as the United States has never vested either the supreme council or the league of nations with any authority to bind the United States or to act on its behalf, there has been no opportunity for any decision which could be deemed to affect the rights of the United States.

"It may also be observed that the right accruing to the United States, through the victory in which it has participated, could not be regarded as in any way ceded or surrendered to Japan, or to other nations, except by treaty, and that no such treaty has been made.

"The fact that the United States has not ratified the treaty of Versailles cannot detract from rights which the United States had already acquired, and it is hardly necessary to suggest that a treaty to which the United States is not a party could not affect these rights.

"But it should be noted that the treaty of Versailles did not purport to secure to Japan or to any other nations any right in the overseas possessions of Germany, save as an equal right therein should be secured to the United States. On the contrary, article 119 of the treaty of Versailles provides:

" 'Germany renounces in favor of the principal allied and associated powers all her rights and titles over her overseas possessions.'

"It will not be questioned that one of the 'principal allied and associated powers' in whose favor Germany renounces her rights and titles is the United States.

"Thus, not only could the position of the government of Japan derive no strength from the treaty of Versailles or from any discussions preliminary thereto, but the terms of that treaty confirm the position of the government of the United States.

"Further, the draft convention relating to the mandate for the German concessions in the Pacific ocean north of the equator, which was subsequently proposed, proceeded in the same view, purporting on behalf of the United States, as one of the grantors, to confer the mandate upon Japan, thus recognizing the right and interest of the United States and the fact that the proposed action could not be effective without the agreement of the United

States as one of the principal allied and associated powers.

"As the United States did not enter into this convention, or into any treaty relating to the subject, this government is unable to understand upon what grounds it was thereafter attempted to confer the mandate without the agreement of the United States.

"It is manifest that the league of nations was without any authority to bind the United States, and that the confirmation of the mandate in question and the definition of its terms by the council of the league of nations in December, 1920, cannot be regarded as having efficacy with respect to the United States.

"It should be noted that this mandate not only recites article 119 of the treaty of Versailles, to the effect that 'Germany renounced in favor of the principal allied and associated powers all her rights over her overseas possessions, including therein the groups of islands in the Pacific ocean lying north of the equator,' but also recites that 'the principal allied and associated powers agreed that in accordance with article 22, part 1 (covenant of the league of nations), of the said treaty, a mandate should be conferred upon his majesty the emperor of Japan to administer the said islands and have proposed that the mandate should be formulated,' as set forth.

"While this last quoted recital, as has already been pointed out in previous communications by this government, is inaccurate in its terms, inasmuch as the United States as one of the principal allied and associated powers had not so agreed and proposed, the recital again recognizes the necessity of the participation of the United States in order to make the proposed disposition effective.

"As, in the absence of any treaty with the United States relating to the matter, there was no decision on May 7, 1919, binding the United States, it is deemed to be unnecessary again to examine the brief minutes of the meeting of the supreme council on that date.

"It may, however, be proper to say that the minutes of this meeting, although obviously without any finality, could not properly be construed without due regard to the other proceedings of the supreme council and without taking account of the reservations which President Wilson had already made in the previous meetings of the supreme council on April 21, April 30 and May 1, 1919.

"The attitude of President Wilson is sufficiently shown by the following statement which he made to the department of state on March 3, 1921:

"'I beg to return the note received yesterday from the Japanese government, which I have read, in relation to the proposed mandate covering the island of Yap.

"'My first information of a contention that the so-called decision of May 7, 1919, by the council of four, assigned to Japan a mandate for the island of Yap was conveyed to me by Mr. Norman Davis in October last. I then informed him that I had never consented to the assignment of the island of Yap to Japan.

"'I had not previously given particular attention to the wording of the council's minutes of May 7, 1919, which were only recently called to my attention.

"'I had on several occasions prior to the date mentioned made specific reservations regarding the island of Yap and had taken the position that it should not be assigned under mandate to any one power, but should be internationalized for cable purposes.

"'I assumed that this position would be duly considered in connection with the settlement of the cable question and that it therefore was no longer a matter for consideration in connection with the peace negotiations.

"'I never abandoned or modified this position in respect to the island of Yap, and I did not agree on May 7, 1919, or at any other time, that the island of Yap should be included in the assignment of mandates to Japan.

"'As a matter of fact, all agreements arrived at regarding the assignment of mandates were conditional upon a subsequent agreement being reached as to the specific terms of the mandates, and, further, upon their acceptance by each of the principal allied and associated powers.

"'The consent of the United States is essential both as to assignments of mandates and the terms and provisions of the mandates, after agreement as to their assignment or allocation.

"'The consent of the United States, as you know, has never been given on either point as to the island of Yap.'

"Apart from the expressed purpose of President Wilson in relation to the island of Yap, inasmuch as the proceedings of the supreme council on May 7, 1919, did not, and, in the nature of things, could not, have finality, this government is unable to perceive any ground for the contention that it was the duty of this government to make immediate protest with respect to the so called decision of May 7, 1919, and certainly it cannot be said that an omission to do so operated as a cession of its rights.

"It may be added, however, that when the matter was brought to the attention of this government, in connection with the conference on communications in October last, this government informed the government of Japan and other governments (by notes of Nov. 9, 1920) that it was the understanding of this government that the island of Yap was not included in the action of May 7, 1919. Its position was subsequently stated at length.

"It is a cause of regret to this government that after and despite this protest there should have been any attempt to pass upon drafts of mandates purporting to deal with the Pacific islands, including Yap, and that a mandate should have been approved, or attempted to be put into effect, which, while purporting to be made in the name of the United States, was without the assent of the United States.

"This government trusts that this action, which it must assume was taken under a misapprehension, will be reconsidered.

"In particular, as no treaty has ever been concluded with the United States relating to the island of Yap, and as no one has ever been authorized to cede or surrender the right or interest of the United States in the island, this government must insist that it has not lost its right or interest as it existed prior to any action of the supreme council or of the league of nations, and cannot recognize the allocation of the island or the validity of the mandate to Japan.

"In this view this government deems it to be unnecessary at this time to consider the terms of the so called 'D' mandates or the discussion with respect thereto.

"This government, as has been clearly stated in previous communications, seeks no exclusive interest in the island of Yap and has no desire to secure any privileges without having similar privileges accorded to other powers, including, of course, Japan, and relying upon the sense of justice of the government of Japan and of the governments of the other allied and associated powers, this government looks with confidence to a disposition of the matter whereby the just interests of all may be properly conserved."

FRENCH VIEW GIVEN.

On April 7 M. Briand, the French premier, addressed a note to the American ambassador in Paris saying that as the American memorandum had been addressed to the governments of France, Great Britain, Italy and Japan a reply could be sent only after an agreement had been reached by those powers. "I may, however," the Briand note continued, "at once declare that when this question comes before the supreme council the representatives of France will enter upon its examination with the keenest desire to find a solution which will give the United States every satisfaction. The government of the republic has already done everything that depended upon it to lend the American government its aid in this affair.

"In a note of Feb. 18, after placing on record that the decision of May 7, 1919, involved no reduction as regarded the mandate attributed to Japan over the islands in the northern Pacific, my department stated to your ambassador that, according to President Wilson, Mr. Lansing had at a previous meeting formulated in the presence of the representative of Japan a categorical reservation in regard to the island of Yap, that Baron Makino had not refused to allow the question raised by the representatives of the United States to come under discussion, and that consequently the Japanese government was aware of the American reservations. The note drew the conclusion that there were here elements for a resumption of the conversations between the United States and Japan and that the government of the republic would be happy to see a satisfactory result achieved. This note was the same day communicated to the Japanese ambassador in Paris, and your excellency was so good as to express to the department your lively satisfaction at this communication, which you assured it would be particularly appreciated at Washington."

ITALY AGREES WITH UNITED STATES.

On April 29 the Italian ambassador in Washington addressed the following note to Secretary of State Hughes:

"Italy is fully convinced that the United States is not asking for any privilege in the island of Yap which is not equally granted to every other nation, including Japan. Italy is also convinced that the United States intends to protect its interests in the island of Yap with full consideration for the interests of other nations. Italy therefore has not hesitated to express herself in a way which completely agrees with the text of the American note of the 5th of April inst., concerning the equality of rights among mandatories in the exercise of their mandates.

"Italy wishes and trusts that the just rights of everybody concerned be recognized always and everywhere, in the island of Yap as well as in every other place and circumstance, with perfect equality and justice.

"Italy seconded the Anglo-French proposal which confided the study of the Yap question to the juridical committee and the conference of the ambassadors in Paris and she now expects that the conference will pronounce itself with equanimity in such a way as to eliminate every possibility of disagreement and to conciliate all conflicting interests.

"Italy is particularly glad whenever the moral policies of the two governments and the material interests of the two nations agree in such way as to put Italy and the United States in a position to co-operate toward the attainment of the common end, which consists in the realization of an era of serene peace and prosperity for the civilized world."

WHERE AND WHAT YAP IS.

Under the Spanish and German administrations Yap was the headquarters for the government of the western Carolines. It is about 500 miles from the Philippines and the center of the cable lines from Guam, Menado and Shanghai, connecting the north and south Pacific. It is only 250 miles from Palau islands, which are the new naval headquarters for Japan's mandatory in the south seas. Instead of being a single island, Yap is a cluster of four high volcanic islands, surrounded by a coral atoll extending fifteen miles northeast and southwest and four and one-half miles across its widest point. Epp, which is the native name for Yap, is the southern and largest, the others being Torei, Map and Rumond. The northern end of Epp has hills 1,050 feet high, while the lower or southern end is fertile and cultivated. Yap is the name of the village which is used as a port.

NEW YORK VS. CHICAGO FIREMEN.

Baseball teams representing the New York and Chicago fire departments played a series of three championship games in Chicago Aug. 10, 11 and 12, 1921. The New York team won the first two contests by 3 to 1 and 5 to 2, while the Chicago team took the third contest by a score of 6 to 4. The first and third games were played at the White Sox park and the second game at the Cub park. The proceeds went to a fund of $100,000 being raised by the Firemen's Mutual Aid society, Chicago.

THE AMERICA'S CUP.

Record of Races.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht Club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length. The race was won by the schooner yacht America, designed by George Steers for John C. Stevens of the New York Yacht club. The America was 94 feet over all, 88 feet on the water line, 22½ feet beam and 11½ feet draft. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the Brilliant, to the 47-ton cutter the Aurora, which came in second in the race. The time of the America was 10 hours and 34 minutes; that of the Aurora was 24 minutes slower. The cup after that became known as the America's cup and has ever since been successfully defended.

L. M. Y. A. REGATTA.

The Lake Michigan Yachting association's annual regatta took place over the course of the South Shore Yachting club at Milwaukee, Wis., July 4, 1921. The honors were taken by La Rita, a 30-foot sloop, owned by W. Johnson of Milwaukee, the boat covering the twelve-mile course in 1:21:18, or more than twenty minutes ahead of its closest competitor.

In a race on July 2-3, 1921, from Chicago to Milwaukee, a distance by the course taken of nearly ninety miles, the class Q boat Siren, owned by George H. Spies of Chicago, was the winner. The time was 11:42:38. C. Alling's Virginia was second.

INTERNATIONAL SIX-METER RACE.

In an international contest between British and American six-meter yachts at Cowes, Isle of Wight, and Ryde, July 29 and Aug. 1, 3, 5, 8 and 10, Britain won with a total score of 117 to 88 points. The American boats were the Grebe, Genie, Montauk and Sheila.

DEMPSEY VS. CARPENTIER.

Jack Dempsey and Georges Carpentier fought for the heavyweight championship of the world at Jersey City, N. J., July 2, 1921. Dempsey was the winner, knocking out his opponent in the fourth round of what was scheduled to be a twelve-round, no-decision contest. The affair attracted worldwide attention on account of its international aspect, Dempsey being the American champion and Carpentier the European champion. Approximately 90,000 persons paid admission fees running from $5.50 to $50 a seat. The receipts amounted to about $1,600,000, of which Dempsey received $300,000 and Carpentier $200,000. The promoter, George Lewis (Tex) Rickard, is said to have made a profit of $300,000 after the payment of all expenses and federal taxes. Other details of the contest follow:

Place—Rickard's arena, Jersey City, N. J.

Referee—J. Harry Ertle, Jersey City, N. J.

Timekeeper—Joe Bannon, New York, N. Y.

Dempsey's seconds—Manager Jack Kearns, Trainer Teddy Hayes and Bernard Dempsey.

Carpentier's seconds—Manager Francois Descamps, Trainer Gustave Wilson, Paul Journee and Charlie Ledoux.

Age—Dempsey, 26; Carpentier, 27.

Weight—Dempsey, 192 pounds; Carpentier, 170.

Height—Dempsey, 6 feet 1 inch; Carpentier, 5 feet 11½ inches.

Reach—Dempsey, 74 inches; Carpentier, 73.

DAVIS INTERNATIONAL CUP.

The Davis international tennis challenge cup was won from Australasia, the defending team, by the American challenging team in a series of games played at Auckland, N. Z., Dec. 30, 1920-Jan. 1, 1921. The Australian players were Gerald L. Patterson and Norman E. Brookes, and those representing the United States were William T. Tilden II. and William M. Johnston. The series consisted of four singles contests and one in doubles. On Dec. 30 Tilden defeated Brookes, 10-8, 6-4, 1-6 and 6-4, and Johnston defeated Patterson, 6-3, 6-1, 6-1. The doubles game, played on Dec. 31, was won by the Americans, 4-6, 6-4, 6-0, 6-4, this giving them the cup. On Jan. 1 Johnston defeated Brookes, 5-7, 7-5, 6-3, 6-3.

Another contest for the Davis international tennis challenge cup took place in the summer of 1921. In the team elimination series India defeated France in July in Paris, the Australians defeated Canada at Toronto and the British at Pittsburgh and the Danes at Cleveland in August. The Australians met the Japanese team at Lake Forest, Ill., Aug. 25-27, and after a hard struggle were defeated, 4 to 1. The Japanese had already disposed of the Indian team at the same place, 5 to 0. This gave the Japanese the right to meet the American team in the challenge round at Forest Hills, N. Y. The United States Lawn Tennis association chose William T. Tilden II., William M. Johnston, R. Norris Williams and Watson M. Washburn as members of the United States team. On Sept. 2 William M. Johnston defeated Ichiya Kumagae, 6-2, 6-4, 6-2, and William T. Tilden II. defeated Zenzo Shimidzu in a five-set match, 5-7, 4-6, 7-5, 6-2, 6-1. On Sept. 3 in the doubles match R. N. Williams II. and W. W. Washburn defeated Zenzo Shimidzu and Ichiya Kumagae, 6-2, 7-5, 4-6, 7-5. On Sept. 5 Tilden defeated Kumagae, 9-7, 6-4 and 6-1, while William M. Johnston defeated Shimidzu, 6-3, 5-7, 6-2, 6-4. This gave the American team the final victory by a score of 5 to 0, entitling it to retain the Davis cup for another year.

SPEEDWAY RACING IN 1921.

Following were the results of the principal speedway races in 1921:

Los Angeles, Cal., Feb. 27—50 mile race won by Ralph de Palma in 27:56.

San Antonio, Tex., April 17—10 mile race won by Ira Vail in 7:37; 20 mile race won by George Clark in 18:09, and 30 mile race won by George Clark in 23:34⅘.

Indianapolis, Ind., May 30—500 mile race won by Tommy Milton in 5:34:44.65.

Uniontown, Pa., June 18—225 mile race won by Roscoe Sarles in 2:18:20.

Le Mans, France, July 25—323½ mile race won by Jimmy Murphy in 4:07:10.

Santa Rosa, Cal., Aug. 14—150 mile race won by Eddie Hearne in 1:22:19⅘.

Uniontown, Pa., Sept. 5—225 mile race won by W. Fetterman in 2:16:16.

Cotati, Cal., Oct. 23—150 mile race won by Roscoe Sarles in 1:21:34⅘.

TWENTY-FOUR HOUR RECORD.

Joe Dawson in a Chalmers car made a world's record for twenty-four hours by running 1,900¼ miles on the Sheepshead Bay speedway Aug. 2, 1917. The best previous record was 1,819 miles by Ralph Mulford on the same track May 1-2, 1916.

ONE-HOUR RECORD.

Driving a Packard on the Sheepshead Bay speedway at New York Nov. 12, 1917, Ralph de Palma made 112.4 miles in one hour. The best previous record was 107 miles by Jean Chassagne on the Brooklands track, England, in 1910.

TRANSCONTINENTAL RECORDS.

The coast to coast records were established in 1916. In order of their occurrence the performances were as follows:

Robert Hammond in an Empire car drove from San Francisco to New York, a distance by the route taken of 3,384 miles, in 6 days 10 hours 59 minutes May 16-23. This lowered the record set the previous week by a Cadillac eight cylinder car, which made the trip from Los Angeles to New York in 7 days 11 hours 52 minutes.

Driving a Marmon 34, S. B. Stevens arrived in San Francisco at 5 p. m., July 29, just 5 days 18 hours 30 minutes out from New York city.

W. F. Sturm, driving a Hudson Super-Six, made the distance from San Francisco to New York in 5 days 3 hours 31 minutes Sept. 13-18 and then made the return trip in 5 days 17 hours 32 minutes, making the time for the round trip 10 days 21 hours 3 minutes. The distance traveled was 6,592 miles.

CHICAGO-NEW YORK RECORD.

"Cannonball" Baker made the distance between New York and Chicago, 1,045 miles by the route he took, in 26 hours 50 minutes. June 23-24, 1920. The run was made in a Templar car under the auspices of the American Automobile association and in the interests of the army recruiting service. The best previous record was 31 hours flat, made in 1916 by B. F. Durham and Al Walden.

DETROIT-CHICAGO RECORD.

Arthur Lee, driving a stock Essex touring car, covered the 300 miles between Chicago and Detroit in 8 hours 18 minutes, July 1, 1920. The previous record of 8 hours 40 minutes was held by Ralph de Palma.

BICYCLING.

SIX-DAY RACES IN CHICAGO.

In Coliseum.

Eddie Madden and Jake Magin of Newark, N. J., won a six-day bicycle team race at the Coliseum in Chicago, Jan. 16-22, 1921, with a total of 697½ points. The two won eight out of twenty-one sprints and finished in scoring position in the others. Second place and money were taken by Harry Horan of Newark, N. J., and Tom Fitzsimmons of Brooklyn, N. Y., by stealing a lap on the closing night, this giving them that much advantage over the others in distance and adding materially to their points. Final standing:

Team.	Miles.	Laps.	Points.
Madden and Magin	2,279	7	697½
Horan and Fitzsimmons	2,279	8	394
Eaton and Hill	2,279	7	390½

Stein and F. Drobach	2,258	7	....

In Dexter Park Pavilion.

Ten teams took part in another six-day bicycle race in Dexter park pavilion, Chicago, April 4-9, 1921. Madden and Magin again proved the winners, with 985 points to their credit. The final standing of the teams was as follows:

Team.	Miles.	Laps.	Points.
Magin and Madden	2,182	7	985
Kockler and Hill	2,182	7	807½
Lorenz and Weber	2,182	7	699½

Bello and Madonna	2,156	6	15
*Gaffney and Fitzsimmons	2,126	5	....

*Withdrew.

SIX-DAY RACE IN NEW YORK.

In a six-day team bicycle race in New York city ending March 12, 1921, Oscar Egg and his partner, Peter Van Kempen, were the winners with 2,316 points. They covered 2,236 miles and 2 laps. The same distance was made by Maurice Brocco and Willie Coburn, but this team had only 877 points. The German team, Walter Rutt and Willie Lorenz, had 1,081 points, but were lapped three times in the last hour and were therefore placed

behind Brocco and Coburn. The point score of the race follows:

Team.	Points.
Egg and Van Kempen	2,316
Brocco and Coburn	877
Rutt and Lorenz	1,081
Chapman and Lawrence	314
Smith and Taylor	235
McNamara and Thomas	220
Beyl and Lemay	26

AVIATION.

AIRPLANE RECORDS.

Highest Altitudes Reached.

The record for height attained by airplane is held by Lieut. John A. MacReady, who, at McCook field, Dayton, O., Sept. 23, 1921, rose to a height of 40,800 feet.

Following is a list of notable altitude flights since 1910:

Georges Legagneux, Pau, France, Dec. 9, 1910, 10,499 feet.

Arch Hoxsey, Los Angeles, Cal., Dec. 26, 1910, 11,474 feet (unofficial).

Capt. Felix, Etampes, France, Aug. 5, 1911, 11,330 feet.

Lincoln Beachey, Chicago, Ill., Aug. 20, 1911, 11,642 feet.

Roland G. Garros, Parame, France, Nov. 7, 1911, 13,943 feet.

Lieut. Blaschke, Vienna, June 29, 1912, 14,300 feet.

Roland G. Garros, Houlgate, Sept. 6, 1912, 16,076 feet.

Georges Legagneux, Villacoublay, Sept. 17, 1912, 17,881 feet.

Edmond Perreyon, Buc aerodrome, France, March 11, 1913, 19,650 feet.

Georges Legagneux, St. Raphael, France, Dec. 27, 1913, 19,300 feet.

Herr Linnekogel, Johannisthal, Germany, March 31, 1914, 20,564 feet.

Heinrich Oelreich, Leipzig, Germany, July 14, 1914, 24,606 feet.

De Lloyd Thompson, Kansas City, Mo., Aug. 6, 1914, 15,600 feet.

Capt. H. LeR. Muller, San Diego, Cal., Oct. 8, 1914, 17,441 feet.

H. G. Hawker, Hendon, England, June 5, 1915, 20,000 feet.

H. G. Hawker, Brooklands, England, April 26, 1916, 24,408 feet.

Capt. W. A. Robertson, Jr., San Diego, Cal., May 12, 1917, 16,400 feet.

Miss Ruth Law, Peoria, Ill., Sept. 27, 1917, 14,701 feet (record for women).

Caleb Bragg, Port Washington, N. Y., Sept. 7, 1917, 12,900 feet, in hydroairplane carrying two passengers.

Lieut. M. B. Kelleher, with one passenger, Chicago, Ill., Sept. 8, 1918, 23,500 feet.

Capt. A. R. Schroeder, Dayton, O., Sept. 18, 1918, 28,900 feet.

Sable Lecointe, Villacoublay, France, May 20, 1919, 28,871 feet.

Lieut. Casale, France, May 28, 1919, 31,000 feet.

Lieut. Casale, France, June 7, 1919, 31,168 feet.

Lieut. Casale, France, June 14, 1919, 33,136 feet 5 inches.

Roland Rohlfs, Mineola, N. Y., July 25, 1919, 31,100 feet.

Roland Rohlfs, Mineola, N. Y., Sept. 13, 1919, 34,000 feet.

Roland Rohlfs, Mineola, N. Y., Sept. 18, 1919, 34,610 feet.

Maj. R. W. Schroeder, Dayton, O., Feb. 28, 1920, 38,180 feet.

Lieut. Harry Weddington, Kelly field, Texas, May, 29, 1920, 19,856 feet with four passengers.

Lieut. Harry Weddington, Kelly field, Texas, Aug. 6, 1920, 19,070 feet with seven passengers.

Lieut. John A. MacReady, Dayton O., Sept. 23, 1921, 40,800 feet.

TRANSOCEANIC FLIGHTS.

Capt. John Alcock and Lieut. Arthur W. Brown, British aviators, crossed the Atlantic ocean June 14-15, 1919, from Newfoundland to Ireland, covering a distance estimated at 1,960 miles. The NC-4 of the American navy made a flight of 1,219 miles in crossing the Atlantic from Newfoundland to the Azores May 16-17, 1919. The British dirigible R-34, which crossed the Atlantic from east to west and west to east in July, 1919, holds the record for the longest nonstop flight by a craft of that type—more than 3,200 miles.

RECORD FOR SPEED.

While practicing for the Deutsch cup at the Ville Sauvage aerodrome, near Etampes, France, Sept. 26, 1921, Sadi Lecointe covered four kilometers at an average speed of 330.275 meters (205.726 miles) an hour. His previous record was 313 kilometers (194.491 miles). This was the seventh time that M. Lecointe had held the world's "record" since it was established by Bernard de Romanet in October, 1919. Since that date Casale gained it once and Romanet regained it twice. The machine in which M. Lecointe achieved this remarkable speed was a new model Nieuport monoplane, very slender in design and offering little resistance to air pressure. It was furnished with a 300-horse power Hispanole motor.

M. Lecointe left the ground at 6:45 in the evening, when a brisk breeze had died away. He passed the grand stand at a low altitude and at a speed not hitherto conceived possible. He covered the first kilometer (1,093.6 yards) in 11⅕ seconds, the second kilometer in 10⅘ seconds, the third kilometer in 10⅘ seconds, equivalent to 339.622 meters (211.327 miles) per hour, and the fourth kilometer in 11 seconds.

AIRPLANE RACING.

James Gordon Bennett Cup.

The contests for the James Gordon Bennett cup, beginning in 1909 but suspended from 1914 to 1919, on account of the war, were resumed in 1920 at Etampes, France. The event was won by Sadi Lecointe, a French aviator, who covered the course of 300 kilometers, or 186.3 miles, in 1 hour 6 minutes 17½ seconds, the fastest time made in any of the contests for the trophy. France having won the cup three consecutive times gained permanent possession of it. Winners of cup to date:

1909—Glenn H. Curtiss, America.
1910—Claude Grahame-White, England.
1911—Charles T. Weymann, America.
1912—Jules Vedrines, France.
1913—Maurice Prevost, France.
1914-1919—No racing.
1920—Sadi Lecointe, France.

CHICAGO AIR DERBY.

David L. Behnke won the first air Derby to be held in Chicago in ten years when on Sept. 5 he covered a fifty-mile course laid out from the Ashburn field in 44:35. Dan Kiser was second in 44:54 and Price Hollingsworth third in 45:04.

NOTABLE PERFORMANCES IN 1921.

From San Diego to the Panama Canal.

Thirteen seaplanes of the Pacific air squadron started from Point Loma, near San Diego, Cal., Dec. 30, 1920, on a flight to Balboa in the Panama Canal Zone, a distance of about 3,200 miles. The first stop was at San Bartolome bay, 400 miles south, the

distance being made in 5 hours 45 minutes. Fourteen planes were to have started, but the NC-5 had an accident and was left behind at San Diego. The NC-6 and twelve F 5-L planes completed the first leg of the journey. The second day's flight was to Magdalena bay, which was reached by twelve planes, one having been left in San Bartolome bay. On Jan. 1, 1921, the NC-5 seaplane flew from San Diego to Magdalena bay, Lower California, in 9 hours 15 minutes, or at an average speed of 72 miles an hour for the 702 miles. It was a new American record for a nonstop duration flight with pilot and five passengers by seaplane. On Jan. 5 eleven of the aviators reached Acapulco, in the state of Guerrero, Mexico. Stops were subsequently made at Santa Cruz, Fonseca bay, Punta Arenas and Honda bay. The twelve F 5-L planes arrived at Balboa at the Pacific entrance to the Panama canal on Saturday afternoon, Jan. 15. The trip, which was made in seventeen flying days, was attended by one fatality, Chief Radio Electrician Cain being killed by coming in contact with a propeller while the seaplanes were in Fonseca bay. The NC-5 was wrecked twenty-five miles off San Juan del Sur. The crew was saved by the destroyer Munford. The NC-6, which was flying with the NC-5, reached shore in safety. The jump of nearly 500 miles between Salina Cruz and Fonseca bay was made without a stop.

Eight of the seaplanes returned to San Diego on March 10, making the trip in 57 hours and 17 minutes. The average speed for the flight was approximately a mile a minute.

Fast Coast to Coast Mail Flight.

On Feb. 23, 1921, United States air flyers delivered mail at Hazelhurst field, Mineola, Long island, near New York city, 33 hours and 20 minutes after it had been dispatched at San Francisco, Cal. Seven pilots drove a De Haviland plane the entire distance of 3,191 miles over mountains and plains under weather conditions that were at times unfavorable. The most remarkable part of the performance was the flight of Pilot James H. Knight, who left North Platte, Neb., at 10:44 p. m. Tuesday and arrived in Chicago at 8:40 a. m. Wednesday, the distance covered being 769 miles, nearly all of it in the dark. Knight arrived at Omaha at 1:10 a. m., and after studying the route to Chicago, which he had never flown before, he proceeded at 1:59 a. m. He encountered snow flurries near Des Moines and lost ten minutes in locating the field at Iowa City, Iowa. The weather was bad until nearly 5 in the morning, when it became comparatively clear, and he had no further difficulty. The total distance flown at night on the trip was 839 miles, the section between Cheyenne and North Platte also being covered after dark.

Four mail airplanes were used in the test, two starting from the east and two from the west. Both the west-bound planes were forced to give up because of bad weather, and one of the east-bound machines, piloted by Capt. W. F. Lewis, crashed to the earth at Elko, Nev., Capt. Lewis losing his life in the accident.

California-Florida Flight.

Lieut. William D. Coney, an army pilot, left San Diego, Cal., on the evening of Feb. 21, 1921, in an attempt to fly to Jacksonville, Fla., within twenty-four hours. He was, however, forced to land at Bronte, Tex., by engine trouble, and the delay there and at Dallas for repairs prevented him from reaching his destination until the morning of the 24th. His actual flying time was 22 hours and 27 minutes for the total distance of 2,070 miles. His time between Dallas, Tex., and Jacksonville, Fla., was 8 hours 11 minutes.

In attempting a record return trip from Jacksonville, Fla., to San Diego, Cal., Lieut. Coney met with an accident which resulted in his death. He left Pablo Beach, Jacksonville, at 1:40 a. m., March 25, but when near Crowville, in northeastern Louisiana, at 7:30 a. m., the motor went wrong and the machine crashed into a tree. Lieut. Coney fell about seventy-five feet and was so severely injured that he died on March 30 in Natchez, Miss., to which place he had been taken for medical treatment. His home was in Brunswick, Ga.

Capt. Rickenbacker's Long Flight.

Capt. Eddie Rickenbacker, American "ace" flyer in the world war, left San Francisco, Cal., May 25, 1921, in an effort to beat the record for flying time from that point to Washington, D. C. He met with a number of mishaps and was delayed by a storm, but arrived at the capital at dusk on May 28. He claimed that his actual flying time was twenty-six hours, while the best previous record was thirty-three.

Flights Over High Mountains.

M. Durafour, a Swiss aviator, flew to the summit of Mont Blanc, Switzerland, July 30, 1921, after having failed in two previous attempts.

Mdlle. Adrienne Bolland, a French aviatrix, crossed the Andes in an airplane April 1, 1921. She left Mendoza, on the Argentine side, at 6:32 a. m., and landed at Santiago, Chile, at 10 a. m.

High Parachute Jumps.

Lieut. Arthur G. Hamilton jumped from a De Haviland airplane 24,400 feet above Chanute field at Rantoul, Ill., March 23, 1921, and landed safely after drifting some eight miles. Sergt. Enoch Chambers jumped 26,000 feet at Kansas City, Mo., Nov. 1, 1921.

Miss Phoebe J. Fairgrave, 18 years old, made a parachute jump of 15,200 feet at the Curtiss flying field near St. Paul, Minn., July 11, 1921.

AVIATION DISASTERS.

Destruction of the R-38.

The R-38, the world's largest airship, which had been built by the British government for the United States, was completely wrecked while flying over the Humber river at Hull, England, on the afternoon of Aug. 24, 1921, with the loss of forty-four lives. Flight Lieutenant A. H. Wann was in command of the dirigible, which had on board forty-eight other officers and crew, including seventeen American naval officers and ratings. The five men who were saved included Lieut. Wann, Air Craftsman E. W. Davies, Harry Bateman of Halifax and Rigger N. O. Walker. The last named was the sole American survivor. The American officers killed were:

Commander Louis I. Maxfield.
Lieutenant Commander Valentine N. Bieg.
Lieutenant Commander Emery Coil.
Lieut. Charles G. Little.
Lieut. Marcus H. Esterly.
Lieut. Henry W. Hoyt.
British officers killed were:
Air Commodore I. M. Maitland.
Flight Lieutenant G. M. Thomas.
Flight Lieutenant C. Little.
Flight Lieutenant R. S. Montague.
Flying Officer J. F. Mathewson.
Flight Lieutenant Jem Pritchard.

"I was in sole control of the vessel," said Flight Lieutenant Wann, "when the disaster occurred. I was in the fore car and we had

just passed over Hull when there was a violent crack. I felt the fore car falling. Then it rose at a high angle, and I pulled over the water ballast to level keel. Then there was a terrific explosion. I think many of the crew must have been killed by the explosion. We had been sailing beautifully and had slowed down from 60 to 50 knots.

"I think it probable that several of the girders snapped when we turned. Some of the men jumped overboard when the ship fired. I remained aboard and went down with the ship until close to the water, when I jumped and was caught in the wreckage and pinned down. I was there fifteen minutes. I don't know how I was rescued, as I was unconscious. We were going to Howden, as the weather at Pulham was bad."

The British air ministry issued an official statement giving the record of the R-38:

"The airship was built at the Royal aircraft works, Cardington, Bedfordshire, and after undergoing her airborne and engine trials in the shed she was considered ready for flight about June 20. The first flight took place on the night of June 23, the ship leaving Cardington at 9:25 p. m. and landing after a six and a half hours' flight over the home counties at 4:20 a. m. on June 24.

"It was anticipated that, owing to the airship being the first of a new class, modifications would probably be necessary, and as previously announced, while the result of this first trial was considered satisfactory, it was decided to make modifications of the control system. This was done, and a further flight of about six hours' duration over the same area took place on the night of June 28-29. Careful tests were carried out, as in the case of all new airships, and further modifications were determined upon.

"Following these alterations the third flight began about 7:30 p. m. on July 17, and the ship, after passing over many of the most important towns on the east coast, landed at Howden airship base after a flight of about nine hours. A speed of 50 knots was obtained without calling upon the full engine power. During the flight it was found that some of the girders amidships had weakened, but the flight was continued for some hours afterwards. The result of this trial was that re-enforcements were considered necessary to the girders specified. This work was carried out at Howden Airship station and was completed by July 30. Unfortunately, just before this date, the unusually fine spell of weather was displaced by extremely disturbed conditions, and sufficiently fine weather did not occur for further trials to take place until yesterday (Aug. 23)."

The R-38 was 695 feet long and 85 feet 4 inches in diameter. It had a capacity of 2,700,000 cubic feet, a disposal lift of 50 tons and engines with a total horse power of 2,100, the craft being equipped with six 350-horse power Sunbeam-Cossack motors. The estimated cruising radius was 9,000 miles. The cost was approximately $2,000,000. The loss was divided between the two governments, in accordance with the terms of the contract.

Funeral services over the dead British airmen were held in Hull, England, Sept. 2, and over the American victims at the Brooklyn navy yard Sept. 17. The bodies were brought to the United States by the British cruiser Dauntless.

Army Ambulance Airplane Disaster.

Four army officers, one noncommissioned officer and two civilians were killed near Morgantown, Md., forty miles south of Washington, D. C., on the evening of May 28, when a Curtiss-Eagle ambulance airplane crashed to the earth as the result of being caught in a violent electrical storm. Those who lost their lives were:

Lieut.-Col. Archie Miller, air service, general staff college, Washington.

Maurice Connolly, former member of congress from Iowa, major in the air service during the war, and later sales manager of the Curtiss company.

A. G. Batchelder, chairman of the executive board of the American Automobile association.

Second Lieutenant Stanley M. Ames, pilot of the plane.

Second Lieutenant John M. Pennefield of Langley field, Virginia.

Second Lieutenant Cleveland W. McDermott of Langley field, Virginia.

Sergt. Richard Blumenkrantz, army air service mechanic.

The airplane was on its return to Washington after taking part in a review of an airplane brigade at Langley field, where sixty-six airships of various types and 2,000 men of the air service were assembled. The ambulance plane had a wing spread of about sixty feet and outside of the passengers carried a weight of 4,200 pounds.

Brig.-Gen. William Mitchell, assistant chief of the army air service, had a narrow escape from death in the same storm, as the single seater pursuit plane in which he was riding was partly out of control several times and came near crashing to the ground.

Loss of the Martin Bomber No. 5.

Four army aviators were killed and one severely injured by the fall of the Martin bombing plane No. 5 near Poe, W. Va., Sept. 3. The airplane was one of a number engaged in military operations in connection with the miners' war in West Virginia. It was caught in a severe electrical storm and crashed to the ground in rough country. It was not until two days later that the wreck was located and the bodies of the dead found. Those killed were Lieut. Harry L. Speck, pilot; Lieut. W. S. Fitzpatrick, observer; Sergt. Arthur R. Brown and Private Walter B. Howard. The injured man was Corporal Alexander C. Hazleton.

Airplane Hits Grand Stand.

Sixteen persons were seriously injured at the state fair grounds, just west of the Milwaukee city limits, on May 29, 1921, when an airplane fell into a crowded box in the grand stand. An attempt was being made to jump from a speeding automobile to a rope ladder let down from an airplane. The rope caught in the exhaust pipe of the automobile, pulled the plane down and caused it to fall into the stand before the occupants of the box could escape.

Laura Bromwell Killed.

Laura Bromwell, a well-known woman pilot, was killed at Mitchell field, near Mineola, L. I., June 5, when her plane fell 1,000 feet. Miss Bromwell, who was only 23 years of age, made a loop the loop record on May 15, 1921, when she executed 199 loops in one hour and twenty minutes.

BALLOONING.

BENNETT CUP RECORD.

Year.	Winner.	Distance.
1906	America (American)	402 miles
1907	Pommern (German)	880 miles
1908	Helvetia (Swiss)	620 miles
1909	America II. (American)	695 miles
1910	America II. (American)	1,171 miles
1911	Berlin II. (German)	471 miles
1912	Picardie (French)	1,354 miles
1913	Goodyear (American)	400 miles
1914-1919	No contests.	
1920	Belgica (Belgian)	1,100 miles
1921	Zurich (Swiss)	469 miles

Seven nations were represented by fourteen balloons entered in the James Gordon Bennett balloon race in 1921. The United States had three entrants, Italy two, France three, Belgium two, Spain one, England two and Switzerland one. The start was made at Brussels, Belgium, Sept. 18. The winning craft, the Zurich, piloted by M. Arnbruster of Switzerland, landed on the island of Lambay on the east coast of Ireland after having made 469 miles.

The American elimination race for the Gordon Bennett trophy began at Birmingham, Ala., May 21, 1921, with nine balloons taking part. Bad weather compelled all of them to land before any new records for distance could be established. The winners were the City of Akron, City of St. Louis and the Belgica I.

RECORD FOR DISTANCE.

The record for distance traveled in a balloon in continuous flight in a race is held by Maurice Benaims of France, who made 1,354 miles in contesting for the James Gordon Bennett cup Oct 27-29, 1912. In 1900 Count de la Vaux made a journey of 1,193 miles and in 1910 Alan R. Hawley and Augustus Post covered 1,171 miles.

Hans Berliner with two passengers made a balloon flight Feb. 8-16, 1914, from Bitterfeld, Germany, to Kirgischansk, in the Ural mountains, Russia. The distance is approximately 1,800 miles.

RECORD FOR HEIGHT.

The record for height made in an ordinary gas balloon is 28,750 feet. It was made by Prof. Berson of Berlin Dec. 4, 1894. A record of nearly 33,000 feet was claimed for the French balloon Icare in 1913.

The world's dirigible balloon record for altitude is 9,514 feet. It was made by the French dirigible Clement-Bayard III. May 20, 1912. The balloon carried six passengers.

PERILOUS BALLOON TRIP.

Lieuts. Stephen A. Farrell and Walter Hinton, U. S. N., and Lieut. Louis A. Kloor, U. S. N. R. F., members of the naval air force, left the naval air station at Rockaway, Long island, N. Y., in the free balloon A-5598 Dec. 13, 1920. Lieut. Kloor was in command. The flight was an experimental one and it was not expected that it would extend beyond the northern part of New York state. They took with them for food only eight sandwiches and two bottles of coffee. They also had eight carrier pigeons and a few instruments, including an altimeter and a compass. After flying until evening a partial landing was made at Wells, N. Y., but on learning where they were the balloonists decided to go on. In the night they ran into a heavy storm and the balloon was driven before it until the following day. They were then over a heavily forested region, but, having used up all their ballast, they judged it safest to land as soon as possible. Hearing a dog bark, they inferred that human beings must be near and so came down in the woods.

They wandered about for three days and were then found by an Indian trapper, who took them to Moose Factory, twenty miles, at James bay, Ontario, Canada. They were nearly starved, having lived on two pigeons and some reindeer moss. Resting at the factory until the 28th, they started on a journey of 200 miles through the woods to Mattice, the nearest railway point. This place was reached Jan. 11, Indians with dog teams and sleds assisting them. It was a hard trip through blizzards and over poor trails, and when they arrived at Mattice they were pretty well used up. On learning that Lieut. Hinton had written a letter, which was made public, to the effect that Lieut. Farrell had collapsed while they were wandering about in the woods, Farrell lost his temper and struck Hinton. Much was made of the unpleasant incident, which afterward became the subject of an investigation by the navy department.

The party arrived back at Rockaway Jan. 14 and were given a hearty welcome by all the inhabitants of the place.

FIVE NAVAL BALLOONISTS DROWNED.

A naval balloon commanded by Pilot G. K. Wilkenson and carrying four student pilots left the air station at Pensacola, Fla., on March 22, 1921, on a practice trip. It was blown out on the gulf and all trace of it was lost until it was picked up by a fishing boat from Panama City, Fla., on April 8 and brought ashore the next day. The men aboard had disappeared and it was assumed that they had been drowned when the balloon came down on the waters of the gulf. The student pilots were R. E. Eland, Belleville, Ill.; E. L. Kershaw, Payne, Iowa; J. E. Elder, Lebanon, N. Y., and W. H. Trefry, Salem, Mass.

SPECIAL PROVISIONS.

Trade Agreements.

For the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the president of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: Provided, however, That said trade agreements before becoming operative shall be submitted to the congress of the United States for ratification or rejection.

Marking and Branding.

All articles of foreign manufacture or production which are capable of being marked, stamped, branded or labeled, without injury, shall be marked, stamped, branded or labeled in legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. All packages containing imported articles shall be marked, stamped, branded or labeled so as to indicate legibly and plainly in English words the country of origin and the quantity of their contents.

Discriminating Duties.

A discriminating duty of 10 per centum ad valorem, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States, or which, being the production or manufacture of any foreign country not contiguous to the United States, shall come into the United States from such contiguous country; but this discriminating duty shall not apply to goods, wares or merchandise which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or act of congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

No goods, wares or merchandise, unless in cases provided for by treaty, shall be import-

ed into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, shall be forfeited to the United States.

The preceding subsection shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

Discount for American Ships.

A discount of 5 per centum on all duties imposed by this act shall be allowed on such goods, wares and merchandise as shall be imported in vessels admitted to registration under the laws of the United States: Provided, That nothing in this subsection shall be so construed as to abrogate or in any manner impair or affect the provisions of any treaty concluded between the United States and any foreign nation.

GOV. LEN SMALL OF ILLINOIS INDICTED.

Len Small, governor, and Fred E. Sterling, lieutenant-governor, of Illinois, were indicted by the Sangamon county grand jury July 20, 1921, on charges of embezzling state funds and conspiracy to defraud the state when they held the office of state treasurer in 1917-1919 and 1919-1921, respectively. Vernon S. Curtis of Grant Park, Ill., one of the owners of the "Grant Park bank," was named jointly with the state officials mentioned in two of the four true bills returned. The indictments charged:

1. Gov. Small, Lieut.-Gov. Sterling and Vernon Curtis with conspiracy to defraud the state of $2,000,000.

2 Gov. Small, Lieut.-Gov. Sterling and Curtis with the embezzlement of $700,000.

3. Gov. Small with the embezzlement of $500,000.

4. Lieut.-Gov. Sterling with the embezzlement of $500,000.

Edward E. Miller, elected state treasurer in November, 1920, discovered what he considered to have been illegal practices in the handling of the public funds by his predecessors in office, and called the matter to the attention of Attorney-General Edward J. Brundage, who, after investigating, laid the case before State's Attorney C. F. Mortimer of Sangamon county for presentation to the grand jury.

REPORT OF GRAND JURY.

The story of what followed is told in the report of that body to the Circuit court. It follows:

"May it please the court: The undersigned, the regular grand jury of Sangamon county, who were instructed by this court to inquire into the handling of state moneys by former state treasurers, beg leave to report that we have devoted two weeks to that work, and in the course of our investigations have examined many witnesses.

"In making this inquiry we have endeavored to observe strictly the oath administered to us and to follow the instruction of this court. We have tried to conduct an impartial investigation of the facts without malice, fear or favor toward any individual.

"From the evidence submitted it appears that the treasury of the state of Illinois carries large daily balances and that during the administration of Fred E. Sterling these balances have ranged from $20,000,000 to $32,000,000. During the administrations of Len Small and Fred E. Sterling as treasurers of the state of Illinois the law then in force in this state required the state treasurer to deposit all moneys received by him on account of the state within five days after receiving same in such banks in the cities of the state as in the opinion of the treasurer were secure and which paid the highest rate of interest to the state for such deposits.

"We find that both the letter and spirit of that law were violated. Instead of loaning the state moneys to all secure banks of the state, without discrimination, and to such of them which paid the highest rate of interest, only a portion of that money was loaned in accordance with the provisions of the statute. For the purpose of circumventing those provisions an ingenious scheme was devised and closely adhered to.

"Beginning with the administration of Former Treasurer Small, the daily balances of the state treasury were carried on the books under two primary funds, one denominated as the 'vault fund' and the other as the 'safe fund.' The vault fund represented the aggregate loans made to legitimate banking institutions throughout the state and was uniformly less in amount than the safe fund.

"The so-called safe fund represented loans made to the so-called 'Grant Park bank,' which was formerly a private banking institution, but which absolutely ceased to function as a bank after 1908. Although this purported bank was purported to be owned by a single individual, and did not transact any banking business whatsoever and had no depositor other than the state of Illinois, yet it was given huge deposits of public moneys by two former state treasurers, Messrs. Small and Sterling.

"The average deposits of state moneys carried by this purported bank were $10,000,000. The evidence shows money was taken from the state treasury generally in lots of $500,000 and deposited in the so-called Grant Park bank, which thereupon issued and delivered to the state treasurer certificates of deposit for the amounts received, but without any collateral security. In other words, the only evidence of indebtedness and the only security held by the treasurer for loans aggregating $10,000,000 were paper obligations of a fictitious bank.

"The moneys he received were used in purchasing at a discount short time notes issued by Swift & Co. and Armour & Co., two large corporations engaged in the packing business in Chicago. These transactions netted the purchasers of the notes large profits. If any portion of the profits so realized was paid into the state treasury it was less than 2 per cent. The evidence shows that most of the banks receiving public moneys paid into the state treasury interest at the rate of 3 per cent per annum, but that the aggregate interest paid into the state treasury on all public funds during the administrations of Messrs. Small and Sterling was less than 2 per cent per annum.

"The records of treasurer's office for July 10, 1919, illustrate the manner in which the public funds have been handled. On that day the 'vault fund' is debited with $7,977,500, of which sum $4,977,000 was deposited in approximately 300 banks throughout the state and $3,000,000 in a private banking institution, while the 'safe fund' was debited with $18,000,000.

"The activities of the state government have grown tremendously during the past few years. Each legislature adds to the supervisory duties of the state, and as a result of these regulatory laws the annual income of the state is being constantly augmented. One or two laws alone have added millions of dollars to the receipts of the state.

"The legislature of this state has unlimited investigating powers. We, therefore, recommend that it institute an exhaustive investigation of the whole subject of the handling of public funds, for the twofold purpose of determining (1) official delinquency, if any, and (2) what legislation, if any, should be enacted to protect the interests of the state and to put an end forever to the traffic in public funds.

"We desire to record publicly our commendation of the attitude of the present state treasurer of Illinois, Edward E. Miller, who appeared before us with the records of his office in answer to a subpœna duces tecum. We were greatly impressed with the fact that his testimony was free from malice or bias toward any single individual. His testimony revealed not only an intimate knowledge of the affairs of his office but also a proper conception of his responsibilities and duties.

"We request the court to permit us to remain in session for the purpose of further investigation. Respectfully submitted.

"D. A. BRIAN, Foreman."

WARRANTS ISSUED.

Warrants for the arrest of the indicted men were issued. The bonds of Gov. Small and Lieut.-Gov. Sterling were fixed at $150,000 each and that of Mr. Curtis at $100,000. They were subsequently reduced to $50,000 in each case.

Each of the indictments contained six counts. The true bill charging Gov. Small specifically with the embezzlement of $500,000 set forth that the governor, then state treasurer, had in his possession on Jan. 1, 1919, that amount of money, in denominations unknown, and that "said Len Small, then and there as such treasurer, did then and there, wickedly, willfully, unlawfully and feloniously embezzle and fraudulently convert to his own use, steal, take and carry away the said money then and there belonging to and then and there being the property of the state of Illinois."

The second, third and fourth counts merely amplified the currency embezzlement charges. The fifth count charged the defendant with the embezzlement of "bonds, mortgages, coupons, bank bills, notes, warrants, orders, funds and securities."

The last count accused him of converting the above-mentioned securities to his own use. The joint embezzlement indictment against Small, Sterling and Curtis, and the separate indictment against Sterling, were drawn up in the same verbiage as that against the governor, with the exception that the amount named was $700,000.

The conspiracy indictment charged that on Feb. 10, 1920, all three defendants, in order "to obtain of and from the said state of Illinois the moneys, funds, goods and property of the said state of Illinois by false pretenses, did then and there unlawfully, knowingly, designedly, fraudulently and feloniously conspire, combine and agree together with the fraudulent and malicious intent willfully and wickedly to cheat and defraud said state," and that they endeavored "to obtain by false pretenses divers large sums of current money of great value, to wit, of the value of $2,000,000."

They were also charged with a confidence game and attempting to cheat and defraud the state by "malfeasance, partiality and oppression in the office of treasurer."

GOVERNOR CLAIMS IMMUNITY.

It was at first said that Gov. Small would demand an immediate trial, but on the advice of Joseph W. Fifer, George B. Gillespie and James M. Graham he put in a claim of immunity from arrest on account of his position as chief executive of the state. On July 22 he issued the following statement to the people of Illinois:

"Supplementing a statement issued to-day by my attorneys, the Hon. Joseph W. Fifer, former governor of Illinois; the Hon. James M. Graham, former member of congress, and the Hon. George B. Gillespie, I desire to advise you as follows:

"When Attorney-General Brundage succeeded in securing from the Sangamon county grand jury his indictment against me my first impulse, knowing that I am absolutely innocent, was to submit myself to the court and stand trial in the ordinary course of the administration of the criminal law. My counsel, however, advised me that such a course would amount to a practical surrender of the sovereignty of the state in violation of my oath of office.

"They declare, on the other hand, that it is my duty, under the constitution, to decline to waive the independence of the executive department; that it would be a violation of my oath of office so to do, and that such a course would necessarily result in embarrassment of the state government.

"They point out, and with unanswerable authority, that the exemption of a governor from arrest and trial upon criminal charges during his term of office is not a personal privilege, but an exemption in the interest of the public welfare and to perpetuate independence of the executive department.

"I accept these conclusions as irrevocable, by their very force pointing out to me the course I should pursue, and I shall, therefore, not attempt to waive the constitutional exemption."

The statement of the attorneys referred to by the governor was in the main merely an elaboration of that made by him. It contained among other things the following suppositions:

"Now, suppose the governor submits to arrest. Suppose he refuses to give bail. Suppose he is imprisoned, but although imprisoned he is in the state and still governor. While thus under duress he might very naturally refuse to act in his official capacity, he might decline to perform the functions of his office. The governor being in the state, the lieutenant-governor cannot act as governor, and so the executive function is suspended, the body is without a head. Chaos will reign.

"Again: Suppose the court orders the sheriff to arrest the governor, and that the sheriff tries to carry out the order of the court, but the constitution makes the governor a commander in chief of the military and naval forces of the state, and the officers and members of these forces are sworn to obey their commander in chief.

"Should the sheriff attempt to use force in arresting the governor and the military, obeying their commander in chief, resist the attempt, what is the result? One independent function of the government trying by physical force to overcome and reduce to subjection another equally independent branch. The house is divided against itself. Anarchy may follow.

"Again, suppose an accused executive submits to arrest and trial and is convicted. The constitution places in his hands the exclusive exercise of the pardoning power. Is it not quite absurd to suppose that the framers of the constitution intended that a governor of the state could possibly be placed in a position where he would be called upon to pardon himself?"

Messrs. Fifer, Graham and Gillespie appeared before Judge Smith as "friends of the court" on July 22 and argued along the lines already indicated that the governor was immune from arrest. Attorney Fifer made the point that there was only one way of dealing with a governor and that was by impeachment.

"Somewhere," he said, "there is authority for the statement in the constitution that where one method is pointed out the exclusion of all others is implied."

"Yes, I know that authority and I have considered it," said Judge Smith. "The question of the arrest of a governor was never before the constitutional convention, but it now appears to the court that the whole reference to impeachment proceedings dealt with him relative to misconduct in office.

"The action pending here, and which somewhat distresses the court, has no relation whatever to any official conduct. The offense charged is not an offense committed as an act of the governor, and the arguments presented support the contentions that the governor during his term of office may commit any crime he pleases and be answerable to no one. That is a dangerous assumption."

"If the law," Attorney Graham interrupted,

"provides no other course of procedure against a governor except impeachment there is a defect in the law, and the court has no power to correct that defect."

"Ah, but you are assuming there is a defect," replied the court. "An indictment is of no avail unless it can be prosecuted. Suppose these indictments are held in statu quo, and the governor at the end of this term should be re-elected?"

"That would constitute exoneration by the people themselves," Attorney Graham broke in.

"But the people are not the courts," the judge concluded. "You gentlemen, appearing as amici curiæ, have presented me with a very unpleasant matter, which the court believes could be adjusted very easily. The court will decide what shall be done. The matter goes over till Tuesday."

The warrants were returned by Sheriff Henry Mester to the custody of Circuit Court Clerk Charles L. Koehn, who held them pending further orders from Judge Smith.

Gov. Small went to Chicago, where he conferred with his political friends and also addressed a republican picnic at Riverview park July 23, at which he reiterated his statement that he was innocent of the charges brought against him in the indictment. He returned to Springfield on the following day and there was much talk by his friends of the use of military force to prevent his arrest.

JUDGE SMITH'S DECISION.

On July 26 Judge Smith delivered his decision, holding that the governor was not immune from prosecution under the indictment and that he should submit to arrest. The court's opinion, which was addressed to Messrs. Fifer, Graham and Gillespie, was in part as follows:

"On July 22 you three distinguished gentlemen appeared in court as amici curiæ and asked leave to advise the court as to its duties. A request from such a source could not be ignored and your contentions and suggestions merit most serious and careful consideration. Hearing was had on July 22.

"Len Small became governor of the state of Illinois in January, 1921, beginning a term of four years, and is now governor of the state.

"On the 20th day of July, 1921, the grand jury of Sangamon county returned into this court three indictments against Len Small, charging him with criminal offenses.

"The statute makes it the duty of the court, when an indictment is returned, to fix bail if the offense charged is bailable, and makes it the duty of the clerk of the court to immediately issue process of capias, directed to the sheriff, for service.

"Appearing as amici curiæ to give the court friendly advice as to its duties and the course it should pursue, you advise that the court, on its own motion, should issue a restraining order enjoining the clerk of this court from issuing process of capias for the apprehension of the defendant until after the expiration of his term of office and that the court should suspend prosecution during said term.

"In support of this advice it is urged that because of the high official position of the accused and the great disaster that would otherwise befall the state, and in pursuance of public policy, the defendant is immune from arrest and that prosecution should be suspended. To sustain this contention the monarchical maxim 'The king can do no wrong' is quoted.

"'The king can do no wrong' is an ancient doctrine, but in this republic it never has reached the application that an elected official can do no wrong. We have been extremely fortunate in the character and conduct of elected officials, but there has never been an intimation or suspicion that they were not capable of committing crime before, during and after the terms of office.

"Our governors are not born 'kings.' They are not surrounded by a halo by birth that gives them immunity from the temptations and frailties to which other humans are subject. * * * The maxim applies wholly and solely to the manner in which official acts of the king are to be considered and construed when applied. The maxim has no application in Illinois and no application to the case at bar. We have in Illinois no such thing as 'the divine right of kings.' The 'king' has no counterpart in Illinois. It may be his edicts cannot be gainsaid.

"In Illinois the legislature makes the laws and not the king, but the deliberate acts or edicts of the legislature in Illinois are often held for naught, and all know that the executive department has no powers beyond those conferred by and consistent with law.

"It is argued that the constitution provides for the impeachment of the governor and that because it so provides there can be no other punishment; that specifying this procedure precludes all others.

"The constitution has exempted senators and representatives from arrest during a session. It exempts members of the militia from arrest at certain times except for certain offenses named. No similar provision is made for the governor. Apply the rule. The converse is that a governor shall not be exempt.

"The constitution provides for impeachment, but that is for misfeasance or malfeasance in office and for removal from office. The constitution further provides: 'The party, whether convicted or acquitted, shall, nevertheless, be liable to prosecution, trial, judgment and punishment according to law.'

"Mr. Medill, whom Mr. Fifer so justly eulogized, said in the convention which framed our constitution of 1870, impeachment is not a criminal procedure; 'it is simply an effort to remove from office,' and it was so considered by the convention and is so considered now, and, referring to the impeachment paragraph and to the paragraph concerning prosecutions, he said: 'How can we mix these two things together?'

"Impeachment is only to remove from office and has no relation to an offense committed entirely outside the office and is not to cause or prevent prosecution. * * *

"The court is also advised that it should not require or permit the sheriff to undertake an impossible thing or engage in a futile undertaking. It is suggested that the governor is commander in chief of the military and naval forces of the state, and that in case of an attempt by the sheriff to make an arrest the governor could call out the militia to resist the sheriff in the execution of the law by service of the process of capias as directed by the law.

"This does not impress the court as of very great force. The accused is surrounded with all the presumptions of innocence, and this court must assume he is innocent and is a law-abiding citizen and will obey the laws of the state.

"The constitution provides: 'The governor may call out the militia to execute the laws, suppress insurrection and repel invasion.' Under the rule, 'inclusio unius, exclusio alterius,' this denies him the right to call the militia to oppose the execution of the laws or for his personal protection or pleasure. * * *

"This question hardly merits discussion, because it is almost beyond the pale of possibilities that any but a tyrant would really and seriously think of calling out the military power of the state, or of attempting to do so, to prevent the execution of a mandate of the

statute or of an order of court which is subject to review by a higher court.

"Much has been said of the three departments of government. That rule is a fundamental part or policy of our state and national governments, and the rule that one department shall not infringe on the rights of another department is inviolable.

"No attempt is made here by the judicial or legislative department to usurp or in any manner interfere with the executive department. This provision of the constitution relates wholly to the department of government and not to the individuals who may be engaged in performing the duties or exercising the powers of the department, unless the interference be to affect in some manner the exercise of the powers or the performance of the duties of the department.

"The statute authorizes the grand jury to inquire into offenses charged and to make such presentments as in its judgment the inquisition warrants. This has been done without the interference of any other departments. The statute makes it the duty of the clerk of the court in which the indictment is found to immediately issue process of capias for the apprehension of each person indicted. It [the statute] requires the sheriff to arrest the accused named in the warrant and bring him into court or take bail.

"The duties as above stated are declared by the legislature, and there is no contention the directions have not been followed. There is no interference by one department with another. The indictment is returned, as required by law. Bail is fixed as required by law; process of capias may be issued as required by law and the duty is on the sheriff to serve it as required by law.

"This shows no interference by one department with another. If the arrest is deemed an interference, that is not one department interfering with another. The sheriff and the accused belong to the same department, but more than that, the proceeding is not to direct or restrain any official act of the chief executive, nor is it to inquire into the propriety of any official act as governor already done. The requirement is that each department shall perform in good faith its full duty under the law.

"Court decisions are cited to establish that the governor cannot be prosecuted; nevertheless, the constitution says he may be prosecuted. The decisions cited relate to the performance of or interference with alleged official duties or powers, and the soundness of all such decisions is conceded, but they and the reasons therefor do not control the case at bar.

"When the governor was elected and he qualified and accepted the office, he surrendered and the state accepted his time, intelligence, discretion and service to the use of the state, and no individual or official has the right to substitute his intelligence or discretion for that of the governor, or take from the state by subpœna or otherwise the time and service of the governor, but nowhere is found authority for holding that the governor cannot be prosecuted for crime.

"You advise the court that to prosecute this case while the governor is in office is contrary to public policy.

"You have urged, and the court insists, that under our policy of government there are three departments, the legislative, executive and judicial, each independent of the other and none having any right to infringe upon the rights, duties or acts of the other. The acts of the legislative department determine the public policy of the government. The court may declare the public policy as indicated by legislative pronouncements and not otherwise. This public policy must be in harmony with valid legislative enactments.

"If the court should declare a different public policy the judicial department would infringe upon the functions of the legislative department. The court is of the opinion that the provisions of the constitution and of the statute do not indicate nor justify any holding by the court that it is the public policy of the state that no prosecution should be had under the circumstances of this case. If the court, of its own action, should hold otherwise it would trespass on the jurisdiction of the legislative department.

"What would be the effect of the order you advise?

"The indictment in this case is no proof of the guilt of the defendant and is not to be considered as such proof. It does, however, give the people of the state a right to the trial of the case to determine whether or not the accused is guilty as charged.

"The statute of limitations is three years; the governor's term has three years and more yet to run. A prosecution means an effort on the part of the state to bring the accused to trial. The accused is not in court. He has not been officially notified any suit is pending. He is not asking the court to do anything with respect to the case.

"There can be no doubt that if the court of its own motion should order a stay of prosecution over a period of three years and over the many terms of court that will be held during that time the statute of limitations would be held to have run and there could not be a trial for offenses charged which have no connection with the office of governor and which the people have a right to have tried.

"The people have rights as well as the accused and the people would thereby be deprived of their right by a voluntary order of the court and not by any provision of the law.

"The court appreciates the presentations that have been so ably and forcibly made and welcomes the suggestions, but the court alone must decide and the court alone is responsible for the error of its decision.

"Before the presiding judge can consent to enter an order nullifying the specific and direct command of the legislative department, and that upon his own motion and without any request from any party to the suit, his mind and conscience must be satisfied that such enactment is invalid and that the proposed action is within the lawful power of the court consonant with law and justice.

"They are not so satisfied. The court can reach no other conclusion in this matter than that it is not the duty of the court to order the warrant in this case to be withheld from the sheriff, and that it is the duty of the clerk to issue the process of capias and deliver the same to the sheriff, and that it is the duty of the sheriff to serve the same when received.

"I am quite willing, however, and I have no doubt the other officials of the court are willing, the respondent shall be permitted voluntarily to enter his appearance and submit himself to the jurisdiction of the court without the formality of an arrest if he desires to do so.

"If such desire is expressed by counsel, who seem from the public press to be attorneys for defendant, and a reasonable time suggested, the court will accommodate itself to their wishes, so that there may be as little inconvenience as possible, consistent with the due administration of the law."

GOVERNOR AND SHERIFF DISAGREE.

Though Gov. Small was in Springfield at the time the decision was announced an unsuccessful effort was made by Sheriff Henry Mester of Sangamon county to get in touch with him. The governor again went to Chicago to consult his counsel, Albert Fink. The latter just

before midnight on July 26 sent the following telegram to Sheriff Mester:

"To the Sheriff of Sangamon County, Springfield, Ill.: This is to advise you that Gov. Len Small is ready to submit to you or any of your deputies or to the sheriff of Cook county, according to your directions, or to any person designated as agent, at any time Wednesday, July 27, 1921, at my office, 1183 Continental and Commercial Bank building, Chicago, Ill., in submission to the capias which I understand Judge Smith has directed you to execute on the governor. In order to conserve all parties' rights please advise me when you will come to Chicago.

ALBERT FINK,
"Counsel for Gov. Len Small."

To this message Sheriff Mester replied by wire on July 27 as follows:

"Replying to your telegram of last night, will say that it is unnecessary for Gov. Small to go to the inconvenience or trouble of submitting himself to arrest in Chicago. He can advise me on his return this week and process can be served here. Please wire day Gov. Small will be in Springfield for this purpose."

The information asked for was not given, Gov. Small remaining for a time in Chicago in consultation with his attorneys and making trips to his home near Kankakee and elsewhere in the state. It was not until Aug. 8 that the governor returned to the state capital to make a number of appointments and attend to other state business. Sheriff Mester called on him at the capitol, but without the warrants, not intending to make the arrest at that time. The governor at that meeting handed the sheriff the following document:

"I am here performing the duties of governor of the state. I have been commissioned by the people of the state to exercise their executive functions during my term of office.

"My legal advisers, ex-Gov. Joseph W. Fifer, the Hon. James M. Graham and Messrs. George B. Gillespie and Charles C. Leforgee, tell me and have convinced me that it is my duty under the constitution and my oath of office to decline to submit myself to the jurisdiction of the judicial department during my term as governor; that the public welfare as well as the constitution and the law demand that the man who is governor of the state shall be entirely free from interference with his personal liberty while he is governor.

"To submit myself to the courts would mean to make the executive department of the government subject to the judicial department, which would be a direct violation of the constitution. My first duty under my oath of office is to uphold the constitution, and I have no right to permit interference with that duty, whatever my personal preference might be.

"I must, therefore, in obedience to my oath of office, decline to submit myself to the jurisdiction of the judicial branch of the state government during my term as governor."

The governor declared that he would sue Sheriff Mester and his bondsmen if he served the warrants. On the 9th, after the governor had apparently sought to be arrested in the capitol while engaged in state business, he permitted the sheriff to serve the warrants at the executive mansion. At the courthouse a little later he gave $50,000 bonds for his appearance in court.

CHANGE OF VENUE DISCUSSED.

On the evening of the same day C. Fred Mortimer, state's attorney of Sangamon county, issued a statement in which he recounted all the steps leading up to the arrest of the governor and agreed to discuss with his attorneys the matter of a change of venue to another county. In the course of his statement Mr. Mortimer said:

"It was urged, and with much force by the 'friends of the court' in their argument, that the business of the state should not be interfered with by an arrest of the governor, because of the confusion and chaos resulting therefrom.

"I undertake to make the statement that the chaos and confusion existing in the minds of the citizens of this state produced by the conduct of this defendant is far more disastrous in its consequence than his submission to arrest and a demand for an immediate trial on the charges made. It is my further opinion that the public mind will continue in a state of uncertainty until these cases are tried to determine the question involved—that is, the guilt or innocence of the defendant in these indictments."

On the afternoon of Aug. 10 Gov. Small issued a public statement in which he reiterated his charges that he was being persecuted by "commercialized newspapers," Attorney-General Edward J. Brundage, United States Senator Medill McCormick and a "lawless ring composed of the most vicious elements in Springfield."

"Notwithstanding pretensions of decency," the statement continued, "my enemies maliciously staged a spectacular arrest under circumstances intended to humiliate me and disgrace the people of our state. Even though the sheriff stated he had no thought that I would evade arrest, nevertheless the capitol of the state was besieged and surrounded by an army of deputies drawn from the slums of the city of Springfield, and when I was finally arrested in the executive mansion the sheriff peremptorily refused to examine or accept a bond with ample surety which I presented and forcibly took me from the executive mansion and paraded me through a mob which had been assembled to jeer at and insult the governor."

SENT TO LAKE COUNTY.

Formal application for a change of venue from the court of Judge Elbert S. Smith and from Sangamon county was filed in the Circuit court in Springfield Aug. 16, on behalf of Gov. Small. Delays of various kinds occurred in the proceedings. State's Attorney Mortimer and lawyers representing the governor finally agreed that the case should be tried in Lake county and it was sent there Oct. 11 by Judge Frank W. Burton of Carlinville, sitting in Springfield. The change of venue applied only to the Small and Curtis cases. Lieut.-Gov. Sterling did not ask for a change.

NATIONAL LOANS TO BELGIUM.

On Feb. 22, 1921, President Wilson sent the following message to congress:

"To the Senate and House of Representatives:

"I herewith call your attention to an agreement with Belgium made by the British and French premiers and myself, which is embodied in the following letter:

"'June 16, 1919.

"'M. Hyman, Ministre des Affaires Etrangeres, Hotel Lotti, Paris.

"'Sir: The reparation clauses of the draft treaty of peace with Germany obligate Germany to make reimbursement of all sums which Belgium has borrowed from the allied and associated governments up to Nov. 11, 1918, on account of the violation by Germany of the treaty of 1839. As evidence of such an obligation Germany is to make a special issue of bonds to be delivered to the reparations commission.

"'Each of the undersigned will recommend to the appropriate governmental agency of his government that upon the delivery to the reparations commission of such bonds his government accept an amount thereof corresponding to the sums which Belgium has borrowed from his government since the war and up to Nov. 11, 1918, together with interest at 5 per cent unless already included in such sums, in satisfaction of Belgium's obligation on account of such loans, which obligation of Belgium's shall thereupon be canceled.

"'We are, dear Mr. Minister,

"'Very truly yours,

"'G. CLEMENCEAU.

"'WOODROW WILSON.

"'D. LLOYD GEORGE.'

"In recommending to you that congress take appropriate action with regard to this agreement, certain facts should be brought to your attention.

"The neutrality of Belgium was guaranteed by the treaty of London of 1839. In considering the reparation to be made by Germany it was agreed that the action of Germany in grossly violating this treaty by an attack on Belgium obligated the German government under international law to repay to Belgium the costs of war. On this principle the treaty of Versailles (art. 232) provided that in accordance with Germany's pledges already given as to the complete restoration for Belgium, Germany should undertake, in addition to the compensation for material damage, to make reimbursement of all sums which Belgium had borrowed from the allied and associated governments up to Nov. 11, 1918, together with interest at 5 per cent per annum on such sums. This obligation was to be discharged by a special issue of bearer bonds to an equivalent amount payable in gold marks on May 1, 1926, or at the option of the German government on the 1st of May in any year up to 1926.

"For various reasons the undertaking defined in the above letter was not embodied in the treaty. Belgium's obligations to the United States for advances made up to the date of the armistice amounted to approximately $171,000,000, and to England and France they amounted, I am informed, to about £164,700,000. In view of the special circumstances in which Belgium became involved in the war and the attitude of this country toward Belgium, it was felt that the United States might well agree to make the same agreement respecting prearmistice loans to Belgium as England and France offered to do.

"Advances made by the treasury to the Belgian government from the beginning of the war to the armistice amounted to $171,780,000. This principal sum, however, includes advances of $499,400 made to enable the Belgians to pay the interest due Nov. 15, 1917, and $1,571,468.42 to enable the payment of the interest due May 15, 1918. The interest on the advances has been paid up to April 15, 1919, the interest due from May 15, 1918, to that date having been paid out of the treasury loans for which the United States holds Belgian obligations, which, however, were made after Nov. 11, 1918, the date of the armistice. This latter advance would not come within the terms of the agreement above mentioned. If, therefore, the United States accepts payment of Belgian obligations given before the armistice by receiving a corresponding amount of German obligations, it would seem that it should receive German obligations amounting to $171,780,000 with interest from April 15, 1919.

"Although it is understood that England and France will take their share of the German bonds when received by Belgium, I am informed that the reparations commission has not as yet finally determined the details of the issuance of the necessary bonds by the German government. A recommendation at this time that suitable legislative action should be taken may appear somewhat premature, but in view of the approaching termination of my administration I have brought this matter to your attention, hoping that suitable action may be taken at the appropriate time. WOODROW WILSON."

GERMAN REPARATIONS FIXED.

ALLIED CONFERENCE IN PARIS.

The allied supreme council held a conference in Paris, France, Jan. 24-29, 1921, at which the German disarmament and reparations questions were discussed and apparently settled. Great Britain was represented by Premier Lloyd George, France by Premier Briand and Italy by Count Carlo Sforza, minister of foreign affairs. Belgium and Japan were also represented. In addition there were a number of experts from these powers and one, Charles Bergmann, from Germany who, however, merely received the formal decision of the conference at its close. Reports were read on the progress of disarmament in Germany and also on Germany's probable ability to meet the indemnity demands of the allies. An agreement was reached on Jan. 29 and was signed by the members of the supreme council. It was delivered to Herr Bergmann, undersecretary of state for the German treasury, on the following day. The letter of transmittal was as follows:

"Sir: The allied conference which met in Paris from the 24th to the 29th of January, 1921, has taken the following decisions:

"1. As regards the disarmament of Germany the allied governments have approved the conclusions formulated in the note attached hereto.

"2. As regards the question of the reparations, the allied governments have unanimously approved the proposals formulated in that document, also attached hereto.

"The allied governments have on former occasions and again to-day, in consenting to fresh delays in the matter of disarmament, had due regard to the difficulties that surround the German government in the execution of the obligations which have resulted from the treaty of Versailles.

"They have formed the hope that the German government will not place the allies, who confirm their previous decisions, under the necessity of envisaging the grave situation which will be created if Germany persists in failing to meet her obligations.

"Qualified delegates of the German government will be invited to a meeting in London at the end of February with delegates of the allied governments."

Reparations Note.

The reparations note bore the title: "An agreement between the allied powers for the settlement of certain questions relating to execution of the treaty of Versailles." The note read:

"Article 1. For the purpose of satisfying the obligations imposed upon her by articles 231 and 232 of the treaty of Versailles, Germany shall, irrespective of the restitution she is to make under article 238 and of any other obligation under the treaty, pay:

"1. Fixed annuities payable half yearly in equal parts as follows: (a) Two annuities of 2,000,000,000 gold marks from May 1, 1921, to May 1, 1923; (b) three annuities of 3,000,000,000 gold marks from May 1, 1923, to May 1, 1926; (c) three annuities of 4,000,000,000 gold marks from May 1, 1926, to May 1, 1929; (d) three annuities of 5,000,000,000 gold marks from May 1, 1929, to May 1, 1932; (e) thirty-one annuities of 6,000,000,000 gold marks from May 1, 1932, to May 1, 1963. [The total of the fixed annuities was thus 226,000,000,000 gold marks or approximately $53,788,000,000.]

"2. Forty-one annuities running from May 1, 1921, equal in amount to 12 per cent ad valorem of German exports, payable in gold two months after the close of each half year.

"In order to secure complete fulfillment of paragraph 2 above, Germany will give to the reparations commission every facility for verifying the amount of the German exports and for the establishment of the supervision necessary for the purpose.

"Art. 2. The German government will transmit forthwith to the reparations commission notes to bearer payable at the dates specified in article 1, paragraph 1, of the present arrangement. The amount of these notes shall be equivalent to each of the half-yearly sums payable under said paragraph.

"Instructions shall be given to the reparations commission with a view to facilitating realization by the powers which so demand the share to be attributed to them in accordance with the agreements in force between them.

"Art. 3. Germany shall be at liberty at any time to make payments in advance on account of the fixed portion of the sum owing.

"Advance payments shall be applied in the reduction of the fixed annuities provided for in the first paragraph of article 1. For this purpose annuities shall be discounted at the rate of 8 per cent until May 1, 1923; 6 per cent from May 1, 1923, to May 1, 1925; 5 per cent from May 1, 1925.

"Art. 4. Germany shall not directly embark on any credit operation outside her own territory without the approval of the reparations commission. This provision applies to the government of the German empire, to the governments of German states, to the German provincial and municipal authorities and to any companies or undertakings under control of said governments or authorities.

"Art. 5. In pursuance of article 248 of the treaty of Versailles all the assets and revenues of the empire and of the German states shall be applicable to insure complete execution by Germany of the provisions of the present arrangement.

"The proceeds of the German maritime and land customs, including in particular the proceeds of all import and export duties and of any tax subsidiary thereto, shall constitute special security for the execution of the present agreement.

"No modification which might diminish the proceeds of the customs shall be made in the German customs laws or regulations without approval of the reparations commission. All German customs receipts must be encashed on behalf of the German government by a receiver-general of German customs appointed by the German government with the approval of the reparations commission.

"In case Germany shall make default in any payment provided for in the present arrangement—

"1. All or part of the proceeds of the German customs in the hands of the receiver-general of German customs may be attached by the reparations commission and applied in meeting the obligations in respect of which Germany has defaulted. In such case, the reparations commission may, if it thinks necessary, itself undertake the administration and receipt of the customs duties.

"2. The reparations commission also may formally invite the German government to proceed to such increases of duties or to take such steps for the purpose of increasing its resources as the commission may think necessary."

Disarmament.

The report of the military committee on the disarmament of Germany was approved by the supreme council. It provided for the complete disbandment by July 1, 1921, of the einwohenwehr and other so called civic guard organizations not permitted under the treaty of Versailles.

No conclusions were reached in regard to the Austrian financial or the near east questions. The council decided to call a conference of allied representatives with representatives of Greece and Turkey in London beginning Feb. 1 to consider possible modifications of the treaty of Sevres. The Austrian matter was referred to a commission.

The Paris reparations agreement was ratified by the French chamber of deputies on Feb. 9 by a vote of 395 to 83.

ALLIED CONFERENCE IN LONDON.

To permit Germany to accept the Paris reparations decisions or to make new offers a conference was held in London beginning March 1. The allies were represented chiefly by Prime Minister Lloyd George of Great Britain and Premier Briand of France. Germany was represented by Foreign Minister Walter Simons, Carl Bergmann, an expert on financial affairs, and Dr. Goeppert, head of the judicial section of the foreign office in Berlin. Marshal Foch of France, Field Marshal Wilson of Britain and Gen. Maglinse, chief of the Belgian general staff, also had a consultation about the same time in London on the military plans to be followed in case further penalties had to be imposed on Germany.

Foreign Minister Simons presented the new German proposals at the first meeting of the allied and German delegates in Lancaster house. Germany's offer in brief was that she would pay the allies as war reparations approximately 30,000,000,000 gold marks (about $7,140,000,000) provided Germany were accorded free commercial privileges throughout the world and that Upper Silesia should remain German. This offer caused amazement among the allied delegates, whose opinion was expressed by Prime Minister Lloyd George when he said to Dr. Simons:

"The German government appears to have a complete misunderstanding of the realities of its position. The allies have agreed that the counterproposals already made cannot be examined or even discussed as alternative to the Paris proposals."

On March 3 the delegates were again in session and, the Germans not having receded from their position, the British prime minister announced the decision of the allies in a speech in the course of which he said:

"We must act upon the assumption that the German government is deliberately in default, and unless we hear by Monday that Germany is either prepared to accept the Paris decision or submit proposals which will in other ways equally satisfactorily discharge her obligations under the treaty of Versailles—subject to the concessions made in Paris proposals—we shall from that date take the following course under the treaty of Versailles:

"First, occupation by the allied troops of Duisburg, Dusseldorf and Ruhrort.

"Second, legislation by the respective parliaments requiring their nationals to pay a certain proportion of all moneys due Germany on German goods to their several governments, such proportion to be retained on account of reparations. This is in respect to goods purchased either in this country or any allied country from Germany.

"Third, amount of duties collected by German custom houses on the external frontiers of the occupied territories to be paid to the reparations commission; these duties to continue to be levied in accordance with the German tariff; a line of custom houses to be established temporarily on the Rhine and at boundary bridgeheads occupied by allied troops, the tariff to be levied on this line, both on the entry and export of goods, to be determined by the allied high commissioner in the Rhine territory in conformity with instructions of the allied governments."

NEW GERMAN PROPOSALS.

On Monday, March 7, Dr. Simons publicly submitted a new set of proposals on behalf of Germany at another session of the conference, after having given them to the allied premiers on the previous day. In brief, he offered to accept the Paris proposals for five years, leaving the subsequent period open to future discussion on the basis of the prosperity of Germany at that time. This proposal, Dr. Simons said, was conditional upon Germany's retention of Upper Silesia. The allied conferees had already decided to reject the offer and again Prime Minister Lloyd George made the announcement.

"We all deeply deplore," he said, "having to come to this decision in the interest of the peace of the world, and, despite the fact that our action is liable to a good deal of misapprehension in our own countries, we have made an effort to secure a better understanding, and it is not for lack of effort and discussion that I have now to announce on behalf of the allies this failure to come to anything like an approximate understanding with Germany."

Explaining why the latest proposals of Dr. Simons were inadequate, Mr. Lloyd George said it was essential in the interest of the peace of the world that there should be a definite settlement of outstanding questions between the allies and Germany—Germany, the allies and neutrals urged it.

"That is an appeal to common sense," he continued. "It is perfectly true that the experts, failing to come to an agreement, made some suggestions about trying to agree for five years, but that was not a plan which was adopted by any conference of statesmen. We wanted each of us to know where we stood.

"The German proposals are perfectly vague. There is nothing the allies, especially those who want to raise money for repairing their ravaged country, could raise one paper franc upon, let alone a gold mark.

"The proposal that Germany should pay annuities for five years, not out of revenue, but by means of a loan, is disquieting. She is thereby mortgaging her income for the years that come after, in order to pay the annuities of the first five.

"There are certain significant sentences used by Dr. Simons which show that Germany has not yet faced her problem."

THREE RHINE CITIES OCCUPIED.

Carrying out the "sanctions" or penalties announced by the allied chiefs, French, British and Belgian troops under the command of Gen. Degoutte took possession of the cities of Duesseldorf, Duisburg and Ruhrort on the morning of March 8. No resistance was encountered anywhere, the inhabitants having been warned by their own officials not to cause any sort of disturbance. President Ebert also issued a proclamation to the German people to be patient and not to commit any ill-advised acts.

Dr. Simons was hailed by the people as a hero on his return to Berlin, though he was severely criticized by nationalists, monarchists and Prussian officers' organizations. Hugo Stinnes, the industrial magnate, was especially violent in his denunciation of the minister of foreign affairs.

On March 16 the allied reparations commission in Berlin sent a note to the German government demanding the fulfillment of article 235 of the treaty of Versailles by the payment of 1,000,000,000 gold marks ($238,000,000) by March 23 as the first installment of the 20,000,000,000 gold marks ($4,760,000,000) due on May 1.

"Before fixing the dates and methods of payment of further amounts," the announcement continued, "the commission will consent

to consider any proposals submitted before April 1, 1921, by the German government for substituting merchandise deliveries or the transference of German or foreign securities instead of payments in gold or foreign exchange. Within the same delay the German government has been authorized to submit to the commission proposals for the issuance of a foreign loan whose proceeds shall be paid to the commission."

The German charge d'affaires in Paris handed to the reparations commission on the evening of March 22 a note stating that Germany was not able to pay the 1,000,000,000 gold marks due on the following day and suggesting a conference of experts to discuss the matter. To this note the reparations commission on March 24 made the following reply:

"Replying to your letter, the reparations commission has the honor to inform you:

"First, according to the treaty of Versailles, the reparations commission alone has the right to place a valuation upon the deliveries made by Germany.

"Secondly, the reparations commission by the same treaty is authorized to decide which among the deliveries made up to date may be deducted from the 20,000,000,000 gold marks referred to in article 235.

"Thirdly, neither paragraphs 9 nor 10, annex 2, part 8, concern an eventual hearing of the German government concerning Germany's capacity for payment.

"There is nothing in the treaty of Versailles which obliges the commission to hear the German government upon the conditions under which deliveries to make up the 20,000,000,000 marks mentioned in article 235 should be made or appraised.

"The commission has waited as long as possible, thinking the German government would take the necessary measures faithfully to fulfill its obligations under article 235. It is now persuaded such is not the case. The commission demanded payment of 1,000,000,000 gold marks because of the certainty that Germany possessed sufficient funds to make immediate payment.

"Anxious to execute the treaty in a spirit of fairness, the commission did not fail to add that after the 1,000,000,000 gold marks had been paid, it would be ready to discuss any further propositions which might be presented by the German government before April 1 with the view of partly substituting for gold and foreign securities goods, merchandise, or the proceeds of a foreign loan.

"We cannot agree with the German government that in the event of the 20,000,000,000 marks remaining unpaid on May 1 the balance may be settled by the delivery of the German bonds provided for in paragraph 12. The 20,000,000,000 gold marks in article 235 in no way can be confused with the 20,000,000,000 gold marks representing the amount of the first issue of bonds referred to in paragraph 12 of annex 2. The 20,000,000,000 marks in bonds of annex 2 are simply an acknowledgment of debt to be deducted from the reparations general account."

This note was without effect, Germany not carrying out the obligations imposed upon her by the treaty and pointed out by the allied reparations commission. The occupation of the three Rhine cities and the establishment of new interior customs frontiers running through these places apparently had little influence upon the Berlin authorities, who now seemed to have placed their last hope in American intervention or arbitration.

AMERICAN AID SOUGHT.

Informal exchanges between the German and American governments were made public in Washington, D. C., April 4. The first of the documents was a memorandum transmitted by Dr. Walter Simons, the German minister of foreign affairs, to the American state department through Ellis Loring Dresel, United States commissioner in Berlin. As translated at the state department it read as follows:

"It is the earnest desire of the government of Germany to reach an accord with the governments of the allied and associated powers, and it is sincere in its purpose to meet their requirements as far as possible. That an agreement was not reached at the conference of London on the question of reparations is a matter of extreme regret to the government of Germany. In their efforts to reach an agreement the delegates from Germany went far beyond the limit considered possible for Germany in the judgment of an overwhelming majority of her economic experts.

"It has been asserted that Germany is reluctant to recognize her obligation to make reparations. This is not correct.

"It is entirely clear not only to the government of Germany but to the German people also that Germany must make reparation to the limit of her ability to pay. This realization on the part of Germany will not be altered in any way by any changes which may take place in the internal politics of the country. All responsible groups, particularly the workmen of Germany, are imbued with the determination to do all that lies in their power to help in reconstructing the regions which have been devastated. Fundamental to this determination is the sober conviction on the part of responsible circles in Germany that an early removal of all traces of the devastation caused in France is to the best interest of Germany. It is the consensus of opinion also that the proposals made by Germany in regard to reparation must consider fully the financial necessities of the allied and associated governments and particularly of France.

"In view of the foregoing, two considerations in regard to reparations present themselves, both of which are of importance. These considerations are, first, the matter of the rehabilitation of the devastated regions, and, second, the immediate establishment by Germany of an actual sum of cash money, in foreign exchange, of important proportions.

"In addressing ourselves to the first particular—namely, the rehabilitation of the devastated regions—certain facts are at once apparent. For four years ten of the eighty-six departments of France served as the theater of the war and sustained the severest blows of the conflict. In these ten departments a number of cities, towns and villages are either partly or entirely destroyed and wide stretches of fertile farming lands were laid waste. Only a little has been accomplished toward the rebuilding of homes, the reoccupation and the recultivation of the land in the two years that have elapsed since the ending of the war. For the immediate rehabilitation of these devastated regions Germany has repeatedly proffered labor, technical advice, and material assistance. These offers have not been accepted nor have they even reached the point of diplomatic exchange. The reason is not far to seek.

"Peculiar though it may seem, there exists in France only a limited degree of concern for the rehabilitation of the devastated regions. Advanced indemnities have been given to the former occupants of the soil, and these occupants have removed to other parts of the country and taken up their abode there. The salvaging of the abandoned war materials and the cleaning up of the war areas has been undertaken by influential groups of promoters, who are making no effort to expedite the performance of their contracts. The fact

that influential opinion in France sees in the devastated region a remarkable opportunity for a political agitation which will always make a deep impression on the minds of the people of France and on foreigners has an important bearing on the issue.

"The German government does not desire to see hate perpetuated between nations. In accordance with this purpose it intends to submit fresh proposals on this subject to the government of France, the details of which are now under consideration and the subject of discussion with the laborers of Germany. Should the government of France entertain objections to the employment of numbers of German laborers in the areas undergoing reconstruction the government of Germany stands ready to offer to France good offices and resources in whatever form is acceptable.

"In respect to the second consideration, namely, the immediate establishment by Germany of an actual sum of cash money, in foreign exchange, of important proportions, it is obvious that Germany can fulfill this obligation only through large increases in the volume of her exports. The memorandum prepared by the economic experts of Germany for use at the conference in London demonstrated how huge this increase in Germany's exports necessarily would be if great sums of money were thereby to be obtained, and the menace this great increase would imply to the economic life of other countries. Conceding even this, it further remains that the sums in cash required could not be immediately realized.

"Other considerations have been advanced at various times, among them the proposal that our former opponents in the great war should participate in the returns from German industry, either through taking shares of the capital stock of German companies or by other forms of the sharing of profits. Such a proposal would produce only proceeds in paper marks, valueless to foreign creditors. Indeed, the allied and associated governments themselves negatived these proposals, in the treaty of Versailles, by taking for themselves a first mortgage on the total wealth and all sources of income of the German commonwealth and states. In addition to this, the allied and associated governments, in their deliberations at Paris, reserved for themselves the decision as to what opportunity, if any, Germany may in any instance be given to obtain credit abroad because England and France are themselves in debt beyond their limit, and the granting of a credit to Germany by a neutral power is blocked by the general mortgage.

"An international loan, in favor of which the allied and associated governments would waive their general mortgage, constitutes the only solution of the problem. The government of Germany is prepared to offer the necessary securities for the safety of such a loan. It is the opinion of the German government that if the loan were properly organized and offered and if those who have evaded taxation be granted a general amnesty, the large sums of German capital which have secretly withdrawn from Germany could again be drawn in for the loan and thereby become available for the reparations.

"It has been reiterated by the allied and associated governments that the situation of Germany is better than that of many of the allied and associated countries, due to the fact that Germany has no foreign debts. Germany would not be unwilling to assume the obligation of the interest and the amortization of the foreign debts of the allied and associated powers, within the limit of her capacity, should this measure be entertained.

"Germany stands ready to meet any proposal which appears feasible for the solution of the economic and financial problems of Europe, and would invite the examination by unbiased experts of its own ability to make payments. It is the opinion of Germany that the heavy weight of debt now borne by all the states which were participants in the world war, and the damages which were wrought in the course of that war, cannot be laid upon the shoulders of a single people. Germany believes also that a policy of duress and coercion would not bring about the reconstruction of international economic life and that only by way of peaceful discussion and understanding can such reconstruction be obtained. The German government considers it important to give, with solemn emphasis, the assurance that for its part it is honestly willing to follow the path which it has suggested."

AMERICAN STATEMENT.

Following is the text of the American "statement" in reply to the memorandum:

"The American government is pleased to note in the informal memorandum of Dr. Simons the unequivocal expression on the part of the German government of its desire to afford reparation up to the limit of German ability to pay. The government stands with the governments of the allies in holding Germany responsible for the war and, therefore, morally bound to make reparation, so far as may be possible.

"The recognition of this obligation, implied in the memorandum of Dr. Simons, seems to the government of the United States the only sound basis on which can be built a firm and just peace under which the various nations of Europe can achieve once more economic independence and stability. This government believes that it recognizes in the memorandum of Dr. Simons a sincere desire on the part of the German government to reopen negotiations with the allies on a new basis, and hopes that such negotiations, once resumed, may lead to a prompt settlement which will at the same time satisfy the just claims of the allies and permit Germany hopefully to renew its productive activities."

ANOTHER GERMAN APPEAL.

Foreign Minister Simons and Chancellor Fehrenbach sent another appeal for American help in the reparations question on April 21. It was transmitted through Commissioner Dresel and read as follows:

"In the name of the German government and the German people the undersigned, notwithstanding the still existing technical state of war, respectfully petition the president of the United States to mediate in the reparations question and to fix the sum to be paid by Germany to the allied powers, and earnestly urge him to secure the consent of the allied powers to such mediation.

"They solemnly declare that the German government is ready and willing to agree, without qualification or reservation, to pay to the allied powers as reparation such sum as the president after examination and investigation may find just and right. They formally pledge themselves to fulfill in letter and spirit all the provisions of any award that may be made by him.

"With abiding faith in the righteousness of this request and with undeniable sincerity of purpose the German people through their constituted government submit their appeal to the president of the United States with the confident hope that it be granted, to the end that a final award may be made in accordance with right and justice to meet the heartfelt wishes of all civilized nations, to avoid the immeasurable consequences of imminent coercive measures and to promote the peace of the world."

DECLINES TO ACT AS UMPIRE.

Secretary Hughes cabled the following reply to the German note on the same day it was received:

"This government could not agree to mediate the question of reparations with a view to acting as umpire in its settlement. Impressed, however, with the seriousness of the issues involved as they affect the whole world, the government of the United States feels itself to be deeply concerned with the question of obtaining an early and just solution.

"This government strongly desires that there should be an immediate resumption of negotiations and reiterates its earnest hope that the German government will promptly formulate such proposals as would present a proper basis for discussion.

"Should the German government take this course this government will consider bringing the matter to the attention of the allied governments in a manner acceptable to them in order that negotiations may speedily be resumed."

NEW PROPOSALS REJECTED.

The German government submitted new proposals to the allied governments and these were received by Secretary Hughes on April 26. He consulted the diplomatic representatives of the allies in Washington and made it clear to them that he would transmit the new proposals only if they were acceptable to the entente powers. They were not acceptable and on May 2 Mr. Hughes sent the following note to the German government:

"The government of the United States has received the memorandum left by Dr. Simons with the commissioner of the United States under date of April 24, relating to reparations.

"In reply this government states that it finds itself unable to reach the conclusion that the proposals afford a basis for discussion acceptable to the allied governments and that these proposals cannot be entertained.

"This government, therefore, again expressing its earnest desire for a prompt settlement of this vital question, strongly urges the German government at once to make directly to the allied governments clear, definite and adequate proposals which would in all respects meet its just obligations."

TEXT OF GERMAN OFFER.

The full text of the German note as made public in Washington, D. C., April 26, follows:

"The American government has by its memorandum made it possible once more to solve the reparations problem by negotiations before measures of constraint render this problem insoluble.

"The German government appreciates the full importance of this action by the American government. It has endeavored in the following proposals to put forward the maximum of what can be offered by Germany even in the most favorable situation.

"These proposals are as follows:

"1. Germany declares herself ready to undertake for the purpose of reparations a total engagement of 50,000,000,000 marks gold at their present value. Germany is also ready to pay the value of this sum in annuities suited to her capacity of production up to the ultimate total of 200,000,000,000 marks gold. Germany will carry out her engagement of payment in the following form:

"2. Germany will immediately issue an international loan, whose amount, rate, interest, and amortization are to be settled. Germany will take part in this loan and will give it extensive advantages. She will fix it on such a base that an extremely high figure of subscription can be expected. The proceeds of this loan will be put at disposal of the allies.

"3. Germany will pay to the extent of her capacity for payment interests and amortizations of total sums to be paid which are not covered by the international loan. Germany considers possible annual interest of 4 per cent only.

"4. Germany is disposed to permit the allied powers to share in any improvement of her financial and economic situation. Amortization of the sum remaining must, therefore, take variable forms. In the case of improvement the amortization scheme would be raised. In case the situation became worse, this amortization would be lowered in corresponding proportion.

"5. To get clear as soon as possible of the remainder, Germany wishes to collaborate with all her force in reconstruction of the devastated regions. She considers reconstruction as the most urgent basis of reparation and as capable of wiping out in the most direct manner war sufferings and hatred between the peoples. Germany offers to undertake herself reconstruction of towns, villages, and hamlets designated, or else to collaborate in reconstruction by means of her labor, materials and resources, or in any other manner agreeable to the allies.

"6. For the same purpose Germany is prepared to furnish payments in kind to states that suffered from the war, and this in addition to reconstruction.

"7. To give undeniable proof of good will, Germany is ready to put immediately at the disposal of the reparations commission the sum of 1,000,000,000 marks gold in the following form: A—150,000,000 marks gold in the form of gold and silver coins; B—850,000,000 marks gold in the form of bills on the treasury, to be paid at latest within three months in coin and in foreign currency.

"8. In case the United States and the allies should wish it, Germany will be disposed to take over to the limit of her capacity payment of allied obligations to the United States with regard to their debts to the latter.

"9. Germany proposes to negotiate in participation with experts on the subject of the manner in which German payments for reparations will be taken on to account on the total of Germany's debt, and in particular on the manner in which the price and value shall be fixed.

"10. Germany will be disposed to give to lenders of all kinds of credits guarantees necessary in a manner to be settled with more detail, guarantees being based on state property and public revenues.

"11. Execution of the above proposals would wipe out all other obligations of Germany in respect to reparations. Private property of Germans abroad also would be freed.

"Germany only considers these proposals as capable of acceptance if the regime of sanctions stops immediately, if the actual basis of German production is not further restricted and if Germany is admitted to world traffic and is relieved from unproductiive expenses.

"Germany pledges herself to recognize as binding upon her the decision of the international committee of experts as to her capacities of payment.

"The German government would receive all proposals of the American government in the same spirit. The German government is too deeply convinced that the peace and welfare of the world depend upon rapid, equitable and moderate solution of the reparations question not to do all she can in order that the United States be in position to draw attention of the allied governments to this matter."

Prior to sending out this note Germany in a note to the British government, made public April 22, made an offer to reconstruct and restore the devastated areas in France and

Belgium at German expense and with German labor.

The British and French prime ministers held a conference at Lympne, near Hythe, England, beginning April 23, and with the assistance of Marshal Foch and Gen. Weygand discussed details of the prospective occupation of the Ruhr region.

In the reichstag on April 27 it was voted to postpone a discussion of Dr. Simons' note to the United States. The debate preceding this decision was bitter and many epithets were exchanged. A feature was a speech by the leader of the independent socialist party, Rudolph Breitscheid, in the course of which he said:

"What would have been the German peace terms had Kaiser Wilhelm, the catastrophe whom the nationalist party still loves and worships, won? As a member of the foreign affairs committee I have seen the kaiser's peace terms. The kaiser would have demanded $30,000,000,000 from America, $40,000,000,000 from France and $30,000,000,000 from England. That is $100,000,000,000, eight times what Germany offers to the entente."

On the evening of April 27 the allied reparations commission in Paris issued the following official communique:

"The reparations commission, in pursuance of stipulations of article 233 of the treaty of Versailles, has decided unanimously to fix at 132,000,000,000 gold marks the amount of damages for which reparations is due by Germany in terms of article 232, second paragraph, and of annex 1 of part 8 of said treaty.

"In fixing this amount the reparations commission had effected the necessary deductions from the amount of damages in order to make allowance for restitutions effected or to be effected in execution of article 238, and in consequence no credit will be allowed to Germany in respect to such restitutions.

"The commission has not included in the above amount the sum in respect to further obligations incumbent on Germany in virtue of the third paragraph of article 232 to 'make reimbursement of all sums which Belgium has borrowed from allied and associated governments up to Nov. 11, 1918, together with interest at the rate of 5 per cent on such sums.'"

The 132,000,000,000 gold marks (normal value $31,416,000,000) mentioned in the communique referred to the principal only and not to the total sum of principal and interest for forty-two years. This was placed by the allies earlier in the year at 225,000,000,000 gold marks or $55,188,000,000.

SUPREME COUNCIL ACTS.

The allied supreme council met in London on April 30, with Prime Minister Lloyd George, Premier Briand, Count Sforza of Italy, Baron Hayashi of Japan and M. Jasper of Belgium and other delegates present. M. Briand's views prevailed and the plans for the occupation of the Ruhr region and the terms for reparations payments were approved. The council, however, decided to grant Germany a few days grace and not to enforce the penalties on May 1 as had been proposed. After long consideration by members of the council and study by experts the following ultimatum was adopted and on May 5 sent to Germany:

I.—Ultimatum.

"The allied powers, taking note of the fact that, in spite of the successive concessions made by the allies since the signature of the treaty of Versailles, and in spite of the warnings and sanctions agreed upon at Spa and at Paris, as well as of the sanctions announced in London and since applied, the German government is still in default in the fulfillment of the obligations incumbent upon it under the terms of the treaty of Versailles as regards (1) disarmament; (2) the payment due on May 1, 1921, under article 235 of the treaty, which the reparations commission has already called upon it to make at this date; (3) the trial of the war criminals as further provided for by the allied notes of Feb. 13 and May 7, 1920; and (4) certain other important respects, notably those which arise under articles 264 to 267, 269, 273, 321 322, and 327 of the treaty, decide:

"(a) To proceed forthwith with such preliminary measures as may be required for the occupation of the Ruhr valley by the allied forces on the Rhine in the contingency provided for in paragraph (d) of this note:

"(b) In accordance with article 233 of the treaty to invite the reparations commission to prescribe to the German government without delay the time and manner for securing and discharging the entire obligation incumbent upon that government, and to announce their decision on this point to the German government at latest on May 6:

"(c) To call upon the German government categorically to declare within a period of six days from the receipt of the above decision its resolve (1) to carry out without reserve or condition their obligations as defined by the reparations commission; (2) to accept without reserve or condition the guarantees in respect of those obligations prescribed by the reparations commission; (3) to carry out without reserve or delay the measures of military, naval, and aerial disarmament notified to the German government by the allied powers in their note of Jan. 29, 1921, those overdue being completed at once, and the remainder by the prescribed dates; (4) to carry out without reserve or delay the trial of the war criminals and the other unfulfilled portions of the treaty referred to in the first paragraph of this note:

"(d) Failing fulfillment by the German government of the above conditions by May 12, to proceed to the occupation of the valley of the Ruhr and to take all other military and naval measures that may be required. Such occupation will continue so long as Germany fails to comply with the conditions summarized in paragraph (c).

II.—Reparation.

"(Schedule of payments prescribing the time and manner for securing and discharging the entire obligation of Germany for reparation under articles 231, 232 and 233 of the treaty of Versailles.)

"The reparations commission has, in accordance with article 233 of the treaty of Versailles, fixed the time and manner for securing and discharging the entire obligation of Germany for reparation under articles 231, 232 and 233 of the treaty, as follows:

"This determination is without prejudice to the duty of Germany to make restitution under article 238, or to other obligations under the treaty.

"1. Germany will perform in the manner laid down in this schedule her obligations to pay the total fixed in accordance with articles 231, 232 and 233 of the treaty of Versailles by the commission—viz., 132 milliards (132,000,000,000) of gold marks ($31,416,000,000) less (a) the amount already paid on account of reparations; (b) sums which may from time to time be credited to Germany in respect of state properties in ceded territory, etc., and

(c) any sums received from other enemy or ex-enemy powers in respect of which the commission may decide that credits should be given to Germany, plus the amount of the Belgian debt to the allies, the amounts of these deductions and additions to be determined later by the commission.

"2. Germany shall create and deliver to the commission in substitution for bonds already delivered or deliverable under paragraph 12 (c) of annex 2 of part 8 (reparation) of the treaty of Versailles the bonds hereafter described.

"(a) Bonds for an amount of 12 milliards (12,000,000,000) gold marks ($2,656,000,000). These bonds shall be created and delivered at latest on July 1, 1921. There shall be an annual payment from funds to be provided by Germany as prescribed in this agreement, in each year from May 1, 1921, equal in amount to 6 per cent of the nominal value of the issued bonds, out of which there shall be paid interest at 5 per cent per annum, payable half yearly on the bonds outstanding at any time, and the balance to sinking fund for the redemption of the bonds by annual drawings at par. These bonds are hereinafter referred to as bonds of series (a).

"(b) Bonds for a further amount of 38 milliards (38,000,000,000) gold marks ($9,044,000,000). These bonds shall be created and delivered at the latest on Nov. 1, 1921. There shall be an annual payment from funds to be provided by Germany as prescribed in this agreement in each year from Nov. 1, 1921, equal in amount to 6 per cent of the nominal value of the issued bonds, out of which there shall be paid interest at 5 per cent per annum, payable half-yearly on the bonds outstanding at any time, and the balance to sinking fund for the redemption of the bonds by annual drawings at par. These bonds are hereinafter referred to as bonds of series (b).

"(c) Bonds for 82 milliards (82,000,000,000) of gold marks ($19,516,000,000), subject to such subsequent adjustment by creation or cancellation of bonds as may be required under paragraph (1). These bonds shall be created and delivered to the reparations commission, without coupons attached, at latest on Nov. 1, 1921. They shall be issued by the commission as and when it is satisfied that the payments which Germany undertakes to make in pursuance of the agreement are sufficient to provide for the payment of interest and sinking fund on such bonds. There shall be an annual payment from funds to be provided by Germany as prescribed in this agreement in each year from the date of issue by the reparations commission equal in amount to 6 per cent of the nominal value of the issued bonds, out of which shall be paid interest at 5 per cent per annum, payable half-yearly on the bonds outstanding at any time, and the balance to sinking fund for the redemption of the bonds by annual drawings at par. The German government shall supply to the commission coupons for such bonds as and when issued by the commission. These bonds are hereinafter referred to as bonds of series (c).

"3. The bonds provided for in article 2 shall be signed German government bearer bonds, in such form and in such denominations as the reparations commission shall prescribe for the purpose of making them marketable, and shall be free of all German taxes and charges of every description, present or future.

"Subject to the provisions of articles 248 and 251 of the treaty of Versailles these bonds shall be secured on the whole of the assets and revenues of the German empire and the German states, and in particular on the specific assets and revenues specified in article 7 of the agreement. The service of the bonds of series (a), (b) and (c) shall be a first, second and third charge, respectively, on the said assets and revenues and shall be met by the payments to be made by Germany under this schedule.

"4. Germany shall pay in each year until the redemption of the bonds provided for in article 2 by means of the sinking funds attached thereto:

"(1) A sum of two milliards (2,000,000,000) gold marks ($476,000,000).

"(2) A sum equivalent to 25 per cent of the value of her exports in each period of twelve months starting from May 1, 1921, as determined by the commission; or (b) alternatively an equivalent amount as fixed in accordance with any other index proposed by Germany and accepted by the commission.

"(3) A further sum equivalent to 1 per cent of the value of her exports as above defined or alternatively an equivalent amount fixed as provided in (b) above.

"Provided always that when Germany shall have discharged all her obligations under this schedule, other than her liability in respect of outstanding bonds, the amount to be paid in each year under this paragraph shall be reduced to the amount required in that year to meet the interest and sinking fund on the bonds then outstanding.

"Subject to the provisions of article 5, the payments to be made in respect of paragraph (1) above shall be made quarterly before the end of each quarter; i. e., before Jan. 15, April 15, July 15 and Oct. 15 each year, and the payments in respect of paragraphs (2) and (3) above shall be made quarterly—Nov. 15, Feb. 15, May 15, Aug. 15—and calculated on the basis of the exports in the last quarter but one preceding that quarter, the first payment to be made Nov. 15, 1921.

"5. Germany will pay within twenty-five days from this notification one milliard (1,000,000,000) gold marks ($238,000,000) in gold or approved foreign bills or in drafts at three months on the German treasury, indorsed by approved German banks and payable in London, Paris, New York, or any other place designated by the reparations commission. These payments will be treated as the first two quarterly installments of the payments provided for in compliance with article 4 (1).

"6. The commission will within twenty-five days from this notification, in accordance with paragraph 12 (d), annex 2, of the treaty as amended, establish the special subcommission, to be called the committee of guarantees. The committee of guarantees will consist of representatives of the allied powers now represented on the reparations commission, including a representative of the United States of America, in the event of that government desiring to make the appointment.

"The committee shall co-opt not more than three representatives of nationals of other powers whenever it shall appear to the commission that a sufficient portion of the bonds to be issued under this agreement is held by nationals of such powers to justify their representation on the committee of guarantees.

"7. The committee of guarantees is charged with the duty of securing the application of articles 241 and 248 of the treaty of Versailles.

"It shall supervise the application to the service of the bonds provided for in article 2 of the funds assigned as security for the payments to be made by Germany under paragraph 4. The funds to be so assigned shall be:

"(a) The proceeds of all German maritime and land customs and duties, and in particular the proceeds of all import and export duties.

"(b) The proceeds of the levy of 25 per cent on the value of all exports from Germany, except those exports upon which a levy of not

less than 25 per cent is applied under the legislation referred to in article 9.

"(c) The proceeds of such direct or indirect taxes or any other funds as may be proposed by the German government and accepted by the committee of guarantees in addition to or in substitution for the funds specified in (a) or (b) above.

"The assigned funds shall be paid to accounts to be opened in the name of the committee and supervised by it, in gold or in foreign currency approved by the committee. The equivalent of the 25 per cent levy referred to in paragraph (b) shall be paid in German currency by the German government to the exporter.

"The German government shall notify to the committee of guarantees any proposed action which may tend to diminish the proceeds of any of the assigned funds, and shall, if the committee demand it, substitute some other approved funds.

"The committee of guarantees shall be charged further with the duty of conducting on behalf of the commission the examination provided for in paragraph 12 (b) of annex 2 to part 8 of the treaty of Versailles, and of verifying on behalf of the said commission, and if necessary of correcting, the amount declared by the German government as the value of German exports for the purpose of the calculation of the sum payable in each year under article 4 (2) and the amounts of the funds assigned under this article to the service of the bonds. The committee shall be entitled to take such measures as it may deem necessary for the proper discharge of its duties.

"The committee of guarantees is not authorized to interfere in German administration.

"8. Germany shall on demand, subject to the prior approval of the commission, provide such material and labor as any of the allied powers may require toward the restoration of the devastated areas of that power, or to enable any allied power to proceed with the restoration or development of its industrial or economic life. The value of such material and labor shall be determined by a valuer appointed by Germany and a valuer appointed by the power concerned, and, in default of agreement, by a referee nominated by the commission. This provision as to valuation does not apply to deliveries under annexes 3, 4, 5 and 6 to part 8 of the treaty.

"9. Germany shall take every necessary measure of legislative and administrative action to facilitate the operation of the German reparation (recovery) act, 1921, in force in the united kingdom, and of any similar legislation enacted by any allied power, so long as such legislation remains in force. Payments effected by the operation of such legislation shall be credited to Germany on account of the payment to be made by her under article 4 (2). The equivalent in German currency shall be paid by the German government to the exporter.

"10. Payment for all services rendered, all deliveries in kind, and all receipts under article 9 shall be made to the reparations commission by the allied power receiving the same in cash or current coupons within one month of the receipt thereof, and shall be credited to Germany on account of the payments to be made by her under article 4.

"11. The sum payable under article 4 (3) and the surplus receipts by the commission under article 4 (1) and (2) in each year, not required for the payment of interest and sinking fund on bonds outstanding in that year, shall be accumulated and applied so far as they will extend, at such times as the commission may think fit, by the commission in paying simple interest not exceeding 2½ per cent per annum from May 1, 1921, to May 1, 1926, and thereafter at a rate not exceeding 5 per cent on the balance of the debt not covered by the bonds then issued. No interest thereon shall be payable otherwise.

"12. The present schedule does not modify the provisions securing the execution of the treaty of Versailles, which are applicable to the stipulations of the present schedule.

"May 5, 1921."

ANNEX TO TREATY AMENDED.

In annex 2 to part 8 (reparation) of the treaty of Versailles the powers and duties of the reparations commission are set forth and the lines of its operations are sketched. But, subject to the provisions of the treaty, the annex itself may be amended (paragraph 22) by the unanimous decision of the governments represented from time to time upon the reparations commission. Such amendment has now been made in order to give effect to the proposals of the reparations commission which have been presented to Germany. The agreement of the allied powers making effective the amendment is as follows:

"The undersigned, duly authorized to that effect, have agreed as follows:

"'The governments of Belgium, France, Great Britain, Italy and Japan, being governments represented on the reparations commission, unanimously decided, in application of paragraph 22 of annex 2 to part 8 of the treaty of Versailles, to amend as follows the paragraphs of the said annex hereafter mentioned:

"'This decision shall be notified to the powers signatory of the said treaty and to the reparations commission.

Modifications Made in Annex 2 to Part 8 of the Peace Treaty.

"'Paragraph 12 (a).

"'(a) Notwithstanding the stipulations of subparagraph (c) of paragraph 12 of annex 2 to part 8, the reparations commission shall have power to increase the rate of interest from 2½ per cent to 5 per cent for the period from May 1, 1921, to May 1, 1926, on bonds issued or to be issued under subparagraphs (1) and (2) of paragraph 12 (c), and to provide for the commencement of the sinking fund payments on such bonds as from May 1, 1921, provided that any additional sums required for such increase of interest and payment of sinking fund shall be compensated by the reduction below 5 per cent of the rate of interest to be debited under paragraph 16 of annex 2 to Germany as from May 1, 1921, in respect of debt not covered by bonds.'"

Here follow a number of paragraphs conferring upon the reparations commission the necessary powers for the carrying out of the demands for reparation made by the allies upon Germany, the scope and character of which are indicated in the protocol handed to the German representatives.

The agreement was signed by Henri Jaspar, M. A. Briand, D. Lloyd George, Count C. Sforza, and Baron Hayashi.

U. S. TAKES SEAT WITH ALLIES.

American representation at the conferences of the allies was resumed May 9, when Ambassador Hugh Wallace took his seat at the session of the council of ambassadors in Paris. Roland W. Boyden, who formerly sat with the reparations commission in Paris, received instructions from the state department to resume his seat with that body.

NEW CABINET IN GERMANY.

Owing chiefly to its failure in the American negotiations, the German cabinet, headed by Chancellor Konstantin Fehrenbach and Foreign Minister Walter Simons, sent in its

resignation May 4. President Ebert found difficulty in finding any person of sufficient influence to form a new coalition ministry, but he finally succeeded, and on May 10 Dr. Julius Wirth, a centrist leader, accepted the post of chancellor and minister of foreign affairs. The other members of the cabinet belonged to the majority socialists, centrists and democrats.

GERMANY YIELDS TO ULTIMATUM.

Chancellor Wirth, in a speech before the reichstag on the day of his appointment, said in part:

"Our task in this grave hour is to obtain the decision of the reichstag with regard to the ultimatum of the allied governments. In view of the termination of the time limit, I must ask you to express your opinion by an immediate decision. There is no possibility for us other than acceptance or rejection. The victors have so decided.

"Acceptance means that we declare our readiness to bear in voluntary labor the heavy financial burdens demanded year by year. Refusal would, however, mean surrendering the basis of our entire industrial activities, and, as a consequence, dismemberment of our economic body, already so greatly weakened, and the shackling of our entire industrial life. But the effect might be even more terrible for our political existence and our realm.

"For these reasons the government accepts the ultimatum. We know that acceptance, by reason of the place Germany will occupy in the economy of the world, will entail the gravest consequences. The responsibility for this falls on the allies.

"But there is one point concerning which there must be no obscurity. It would be useless to say 'yes' without the resolution to do our utmost to meet the obligations imposed upon us. By acceptance we believe we will remove the imminent threats of occupation of the Ruhr. The fear often expressed that occupation will take place whether we sign or not is not supported by any passage in the ultimatum.

"The treaty, which casts a heavy burden upon us, entails for the allied governments sacred duties, as the British premier himself expressly acknowledged recently.

"Ladies and gentlemen, the new government, after reflection, advises you in all confidence to accept the ultimatum."

REICHSTAG YIELDS.

Early on the morning of May 11 the reichstag, after a long and stormy session, decided by a vote of 221 to 175 to accept the new chancellor's advice and to yield to the allied ultimatum of May 5. The formal acceptance by Germany of the allies' reparations terms was delivered to Prime Minister Lloyd George in London on May 11 by Dr. Sthamer, the German envoy, as follows:

"Mr. Prime Minister: In accordance with instructions just received, I am commanded by my government, in accordance with the decision of the reichstag and with reference to the resolutions of the allied powers of May 5, 1921, in the name of the new German government, to declare the following:

"The German government is fully resolved, first, to carry out without reserve or condition its obligations as defined by the reparations commission.

"Second, to accept and carry out without reserve or condition the guarantees in respect of those obligations prescribed by the reparations commission.

"Third, to carry out without reserve or delay the measures of military, naval and aerial disarmament notified to the German government by the allied powers in their note of Jan. 29, 1921, those overdue to be completed at once and the remainder by the prescribed date.

"Fourth, to carry out without reserve or delay the trial of war criminals and to execute the other unfulfilled portions of the treaty referred to in the first paragraph of the note of the allied governments of May 5.

"I ask the allied powers to take note immediately of this declaration. STHAMER."

Prime Minister Lloyd George sent the following message to the American government on May 5:

"As president of the allied conference, which is just completing its sittings in London, I am authorized with the unanimous concurrence of all the powers here represented to express to the United States government our feeling that the settlement of the international difficulties in which the world is still involved would be materially assisted by the co-operation of the United States; and I am, therefore, to inquire whether that government is disposed to be represented in the future, as it was at an earlier date, at allied conferences, wherever they may meet, at the ambassadors' conference, which sits at Paris, and on the reparations commission?

"We are united in feeling that American cognizance of our proceedings, and, where possible, American participation in them, will be best facilitated by this."

INVITATION IS ACCEPTED.

To this message Secretary Hughes sent the following reply:

"The government of the United States has received through the British ambassador the courteous communication in which you state that, with the unanimous concurrence of the powers represented at the allied conference in London, you are to inquire whether this government is disposed to be represented in the future, as it was in the past, at allied conferences, at the conference of ambassadors in Paris and on the reparations commission.

"The government of the United States, while maintaining the traditional policy of abstention from participation in matters of distinctly European concern, is deeply interested in the proper economic adjustments and in the just settlement of the matters of worldwide importance which are under discussion in these conferences, and desires helpfully to co-operate in the deliberations upon these questions.

"Mr. George Harvey, appointed ambassador to Great Britain, will be instructed on his arrival in England to take part as the representative of the president of the United States in the deliberations of the supreme council.

"The American ambassador to France will be instructed to resume his place as unofficial observer on the conference of ambassadors, and Mr. Roland W. Boyden will be instructed to sit again in an unofficial capacity on the reparations commission.

"The government of the United States notes with pleasure your expression of the belief of the representatives of the allied governments assembled in London that American co-operation in the settlement of the great international questions growing out of the world war will be of material assistance."

FIRST PAYMENT MADE.

On May 28 the German government sent to the reparations commission in Paris twenty treasury bonds of about $10,000,000 each, representing 850,000,000 gold marks ($202,300,000), completing the initial payment of 1,000,000,000 gold marks ($238,000,000). The bonds were indorsed by the Reichsbank, the Dosconto Gesellschaft and the Dresdener bank. The money was sent by a special

courier, carefully guarded all the way from Berlin to Paris, and was formally turned over to the commission on May 30.

Additional payments were made in July and August and later in the year. The payments were supplemented by others in ships, live stock and other material things. It was claimed by Germany early in 1921 that she had even then paid to the allies $5,000,000,000 in property, but the correctness of the figure was disputed.

On Sept. 22 the reparations commission in Paris announced that the value of the ships surrendered by Germany had been fixed at $149,000,000.

Through an arrangement made by Walter Rathenau, minister of reconstruction in the German cabinet, and M. L. Loucheur, minister of the liberated regions in the French cabinet, Germany agreed to assist in the restoration of the devastated areas in France by supplying material and labor.

REVISION OF THE TREATY OF SEVRES.

Representatives of Great Britain, France, Italy, Japan, Greece and Turkey met in London Feb. 21, 1921, to consider the affairs of the near east, with the treaty of Sevres as the basis of discussion. The conference was summoned by the British government for the purpose of agreeing upon such modifications of the treaty in question as would serve to facilitate the conclusion of peace with Turkey and the adjustment of points of difference in the claims of Greece, France and other allied nations in the near and middle east. In view of the German reparations conference to begin a week later the French in particular wished to get rid of the expenses connected with the military occupation of Cilicia, while the British were no less anxious for a more economical administration in Mesopotamia. The whole situation in Asia Minor had been unsatisfactory for many months and had been made worse by the military and political alliance of the nationalist Turks with the Russian bolsheviki which had resulted in the overthrow by the reds of the democratic republics of Armenia, Georgia and Azerbaidjan.

The principal delegates at the London conference were:

Great Britain—Prime Minister Lloyd George and Lord Curzon, secretary of state for foreign affairs.

France—Premier Aristide Briand and M. Berthelot.

Italy—Count Carlo Sforza, minister for foreign affairs, and Sig. Meda, secretary of the treasury.

Japan—Baron Gonsuke Hayashi, ambassador to Great Britain.

Greece—Prime Minister Kalogeropoulos.

Turkey—Grand Vizier Tewfik Pasha, Reshid Pasha and Nizami Pasha, representing the Constantinople government; Bekir Sami Bey, representing the Angora assembly of Turkish nationalists.

The formal sessions of the conference were held in the picture gallery of St. James' palace. The Turks were first invited to make a statement as to the changes they desired in the treaty of Sevres. Both the Turkish delegations presented practically the same demands, which in brief were:

1. That all countries inhabited by Turks, excluding those inhabited by Arab majorities, should remain part of Turkey, and that within those areas the Turkish nation should exercise full sovereign rights.

2. That the Turks were willing to concede to minorities the same rights as are provided for in the minority clauses of other treaties, subject to Turks' being given similar rights in other countries where they are in the minority.

3. That the Turks were prepared to concede freedom of navigation to all nations through the straits, provided that the sovereignty of Turkey was unaffected.

TURKISH DEMANDS.

This statement was regarded as too general and the Turkish delegates were asked to formulate in a more concrete form their views as to the points which in their opinion required modification. This they did and on Feb. 24, through Bekir Sami Bey, presented the following statement:

From a territorial and political point of view the Turkish delegation asked for the following:

In Europe, the frontiers of 1913.

In Asia Minor, frontier on the south to be fixed by a line traced in agreement with the interested parties separating the territories inhabited by an Arab majority. On the east the frontier to be the line between Turkey and Persia before the war, and the frontier between Turkey and Armenia as fixed by the latest treaty between the authorities of Angora and the government of Erivan.

The evacuation by the Greeks of the Smyrna territory, which should return under the full and complete sovereignty of Turkey.

Freedom of navigation of the straits without compromising the security of Constantinople and respecting the full sovereignty of Turkey as well as the demilitarization of the straits.

An international commission for the straits on which Turkey should be represented.

Protection of minorities. Respect for the sovereignty of Turkey in judicial matters and the constitution of a commission composed of foreign and Turkish jurists to draw up a scheme of judicial reform on modern principles.

Military and naval forces sufficient to insure internal order and to defend the coasts and frontiers.

Reorganization of the gendarmerie for the whole of Turkey, with the assistance of foreign officers.

Turkey counted on the withdrawal of foreign troops from Constantinople and from her territory after the ratification of the treaty.

On the financial and economic side the Turkish proposals included complete financial and economic independence for Turkey and valuation of damages and mutual reparation.

Conflicting statistics were presented by the Turks and Greeks as to the preponderance of their nationals in Smyrna and Thrace.

PROPOSITION OF THE ALLIES.

On Feb. 25 the allied delegates made the following proposition:

"Viewing the difference of opinion that has arisen concerning the populations of eastern Thrace and Smyrna in the areas assigned to the Greeks by the treaty of Sevres the powers are willing to refer the question of the populations of those two areas to an international commission to be appointed by themselves, with instructions to examine into the figures both before and since the war and to proceed with its investigations on the spot without delay, on the clear understanding, which shall be accepted by both parties—namely, by Turkey and by Greece:

"(a) That they will accept the results of such an arbitration.

"(b) That the remaining clauses of the treaty of Sevres shall remain unaltered and shall be loyally accepted both by Turkey and Greece."

The Turkish delegation accepted the pro-

posal of the conference subject to the following observations:

An expression of satisfaction with the application to the Turkish claims of the principle of nationality.

An international administration to be substituted for that of Greece during the inquiry, it was hoped that former officials might be reinstated. The demand for the abandonment of the Turkish claims in regard to the clauses of the treaty of Sevres other than those relating to Thrace and Smyrna had been unexpected.

In the event of the claims' being admitted they would agree to a cessation of hostilities between Turkey and Greece and an exchange of prisoners between all concerned.

Greece to send no new forces and not to move the troops now in Thrace and Smyrna.

The Turks to give guaranties as regards minorities, provided the same condition is exacted from the Greeks.

The commission to conclude its investigation within two months.

The commission to take into account the numbers of Turks compelled to emigrate since the Greek occupation.

The president and his colleagues then pressed the Turkish delegates to say definitely whether, in accepting the proposal in regard to Smyrna and Thrace, they would also undertake to raise no point in the treaty of Sevres other than the questions of Armenia and Kurdistan.

Bekir Sami Bey said that the Turkish delegation had not sufficient power to accept some parts of the treaty of Sevres, which affected the economic life of the country, without communicating with Angora. He undertook to do this with the utmost expediency.

The conference acceded to this delay.

M. Kalogeropoulos declared that Greece was animated by pacific sentiments and desired to take part in any settlement which would lead to a general peace. He then asked for and received an assurance that the proposal did not involve the disarmament or withdrawal of the Greek armies from Thrace or Smyrna while the question was under consideration. He explained that he had come to London with definite instructions from the Greek national assembly to base himself on the treaty of Sevres and consequently he could not give a definite reply until after he had received an answer to a message he had already sent to his government in Athens.

The war between Greece and the Turkish nationalists, which was waged with varying fortunes throughout the greater part of the year, prevented any action from being taken in the proposed modification of the treaty of Sevres.

RUSSIA UNDER COMMUNIST RULE.

In a "white paper" issued by the British government in May, 1921, the report of a committee appointed on May 17, 1920, to collect information on Russia was given. The work of the committee was fair and thorough and the facts set forth in its report were recognized as accurate. The final conclusions reached by the committee were as follows:

(1) That the complete renunciation by the soviet government, by the Russian communist party and by the third or communist internationale of propaganda directed toward the destruction of the political and economic order existing in other countries is the fundamental premise, without the acceptance of which there can be no question of capitalist aid in the economic reconstruction of Russia.

(2) That the possibility of extending credit to Russia on a scale in any way commensurate with her minimum needs will be dependent on the faithful observation of the above condition.

(3) That the co-operation of the peasantry is indispensable to the economic reconstruction of Russia.

(4) That the settlement of the agrarian question on a basis which will provide inducements for agricultural production, now lacking, is essential to the provision of adequate supplies of food for the industrial workers in the towns.

(5) That the restoration of rail and river transport is necessary if such food supplies are to be conveyed with speed and regularity to the industrial areas of Russia.

(6) That the state of administrative incompetence into which the departments of the soviet government have fallen militates against the proper distribution of available supplies among the population, and must be remedied if the Russian worker is to be restored to the standard of health and strength necessary to re-establish the diminished productivity of his labor.

(7) That, if the extraordinary commissions continue to exercise their present irresponsible powers, foreigners, whose services in Russia may be necessary to execute contracts between the soviet government and foreign capitalists, will be deprived of those guaranties of freedom and protection which are accorded to foreigners in other civilized countries, and this will destroy the possibility of any benefits accruing to the soviet government from such agreements.

RISE OF BOLSHEVISM.

The report of the committee gave a terse but complete summary of the different steps leading to the formation of the communistically controlled soviet government in Russia. It was as follows:

(A)—The Effects of the European War.

The evidence produced before us shows that—

(1) The economic reorganization of Russia was already, from 1915 onwards, partially dislocated as a result of the war.

(2) The organization of the Russian army became seriously impaired and its discipline undermined in the course of the war.

(3) A food crisis in Petrograd in February, 1917, led to bread riots among the workmen of the city.

(4) The revolt of the Petrograd garrison, who joined the workmen, was a decisive factor in the overthrow of the imperial government and was a result of the revolutionary events of February, 1917.

(B)—The Effects of the Revolution of February, 1917.

(1) The establishment of soviets of workmen in the factories adversely affected industrial administration and was largely responsible for a rapid fall of production in the manufacturing industries.

(2) The establishment of soviets among the troops, who were war-weary and desired peace, contributed further to destroy the Russian army as a fighting machine. Wholesale desertion began and the army became a powerful factor in the process of disintegration throughout Russia after the February revolution, 1917.

(3) The peasants, from the moment of the revolution, 1917, began to seize the estates of the landowners, and were encouraged in this course by the bolsheviki during the summer of 1917.

(4) The area of land under cultivation be-

gan to decrease as a result of the disturbed state of the countryside.

(5) The peasants ceased bringing their grain to the towns as a result of the fall in production and the great rise in the prices of manufactured goods. Such food as the peasants did bring to the towns was commandeered by the government at fixed prices, but the price given was such that it did not enable them to purchase the articles of common necessity which they needed.

(6) The disturbance of the balance of exchange between town and country was a general result of the events accompanying and following the February revolution.

(C)—The Bolshevist Revolution and Its Results Up to the End of 1919.

(1) The soviet government proceeded to inaugurate a policy of nationalization of industry and to institute an organization for the state collection and distribution of food.

(2) The soviet government established the collegiate system of administration in industry, with a view to controlling the hitherto unrestrained actions of the factory soviets.

(3) The soviet government, in a situation calling for the exercise of the utmost discrimination and care, carried out the policy of nationalization in haste, without taking account of the disorder already prevailing in Russia, of the complex structure of modern industry, of the absence of expert technical assistance and of the disabilities resulting from the lack of knowledge and experience under which they themselves labored.

(4) As a result of nationalization, carried out in the above conditions, production continued to fall, and with ever-increasing rapidity.

(5) In the summer of 1918 the outbreak of civil war, accompanied by a foreign intervention, caused the soviet government to divert to military purposes all its energy and the residue of Russia's industrial capacity. In these circumstances the collapse of all other than war industry became complete.

(6) The uninterrupted fall of production in the towns was accompanied by a further decline in the supplies of food received by the towns from the villages, which were able to obtain less and less in exchange for their produce. The disorganization of transport also made it impossible to move with speed and regularity to the towns with supplies available in the country districts.

(7) The reluctance of the peasants to supply the towns with food placed the soviet government under the necessity of requisitioning agricultural produce. This requisitioning in many cases evoked peasant revolts, which the soviet government endeavored to suppress by sending punitive expeditions to quell them.

(8) The shortage of food in the towns, owing to the cessation of exchange between town and country, was further accentuated by incompetence and corruption on the part of the soviet food administration.

(9) The industrial worker was paid partly in paper money, which fell in purchasing power with each succeeding month, and partly in a food ration upon which it was impossible to support life, and partly in small and irregular issues of other commodities.

(10) The worker was thus compelled to devote much of his working time trying to supplement by illegal purchase the insufficient rations which he and those dependent upon him received and to which by law he was limited. Government shops nominally existed where the worker might make supplementary purchases at moderate prices; but little or nothing could be purchased at these shops, partly owing to the meager supplies available in them and partly to the fact that such commodities as might be available were mostly reserved for favored clients.

(11) An organized system of speculation, which the bolshevist authorities endeavored unsuccessfully to suppress, and in which they ultimately came to participate, grew up side by side with the soviet administration and made it possible for those who possessed the means of purchase and exchange to keep body and soul together.

(12) Since the revolution of October, 1917, disease has been widespread, particularly among the poorer classes, owing to malnutrition and neglected sanitation. The annual mortality of Russia is said to be 6 per cent of the population at the present time.

(13) From the summer of 1918 the strength and directing energy of the bolshevist leaders were concentrated on the successful campaign against Yudenich, Denikin and Kolchak, and the needs of the civil population were of necessity sacrificed to those of the army. The successes of the campaign are to be attributed to the fact that unity of aim and method and the enthusiasm of a new ideal were to be found on the side of the bolshevists, while on the other side there was every kind of disorganization and lack of unity, with a growing disinclination for strenuous fighting.

ECONOMIC COLLAPSE.

Such was the position at the end of 1919. The success of the bolshevists in the civil war brought them face to face with the seriousness of the economic collapse which had taken place, and it is clear from the speeches of Lenin and Trotzky and from innumerable articles in the bolshevist press that the soviet government from that time onward fully realized the gravity of the situation. They proceeded:

(1) To establish a system of individual control in industry in place of the collegiate system, which had proved a failure.

(2) To inaugurate a special campaign for the repair of locomotives and rolling stock as an essential preliminary step to the restoration of transport.

(3) To introduce a policy of conscription and the militarization of labor as the only means of carrying on the industry of the country—an industry practically ruined owing to the demoralization prevailing among the industrial proletariat as a result of malnutrition and the absence of many of the primary necessaries of life.

(4) To conduct an energetic propaganda against bureaucracy and red tape which have threatened to paralyze the soviet administration.

(5) To contemplate the possibility of receiving economic assistance from abroad on a resumption of trade relations with western countries.

With regard to these measures:

(1) We have seen no figures which would allow us to judge as to how far the restoration of the system of individual control in industry has contributed to increase production.

(2) The measures taken to restore transport have resulted in a considerable increase in the number of locomotives repaired and in the improvement of railway services in the central provinces of Russia, but the majority of the locomotives available for running purposes are so worn out that after repairs have been completed upon them they often return to the workshops in a few weeks to undergo further repairs. We are, therefore, of opinion that the soviet government will experience increasing difficulty in maintaining the railway services at the higher level to which they have been raised in the course of 1920,

and we are convinced that only the importation of locomotives and of the spare parts of locomotives from abroad will enable the soviet government to maintain transport at its present level and to achieve any further improvement. In this connection attention may be drawn to Trotzky's statement in his speech before the eighth all-Russian congress of soviets, that it was hoped 1,000 locomotives would be imported into Russia by the end of 1921.

(3) Also we have not been able to obtain such information as would allow us to judge how far the policy of labor conscription and militarization of labor has been successful, or otherwise, in solving the problem of the shortage of labor, and to what extent conscribed labor has been utilized in industry, and how far—where used—it has been productive.

(4) The question of bureaucracy and red tape in the soviet administration was discussed at the eighth all-Russian congress, but there are no indications as to practical measures which the soviet government proposes to take against it.

MODIFICATION OF POLICY.

If it be assumed that the first stage has been completed, the policy of the soviet government at the beginning of the second stage differs widely from the policy which was adopted by the bolsheviki on their advent to power. The collegiate system which was established to control the soviet system in industry has given place in the majority of cases to individual control, a return to principles of industrial administration which have received their fullest development under capitalism.

At the same time the power of officialdom in Russia has developed on a scale to which there is no parallel, and represents an attempt to control completely the conditions of work and leisure, of food and drink, of education and amusement, of travel and even of the home life of every individual in a nation whose population even now exceeds 120,000,000. According to recent evidence the tendency towards state control is increasing rather than diminishing, and this at a time when many communists are of opinion that the withering away of the state—accepted by all believers as the second stage on the road to a communistic utopia—has already been reached.

There is reason to believe that the difficulties confronting the soviet government will be enhanced in the work of economic reconstruction owing to the increasingly divided counsels in the Russian communist party and to the failure of the harvest, the results of which may be reflected upon the harvests of succeeding years.

TRADE POSSIBILITIES.

With regard to the resumption of trade between Russia and other countries, we have formed the following conclusions:

(1) We are convinced that for the economic equilibrium of the world exports from Russia are a most important factor to the European market.

(2) We do not, however, consider that Russia will be in a position to make its contribution towards the relief of Europe for a considerable time to come.

(3) There can be no question of the export of cereals in the immediate future, owing to—

(a) The primary necessity of restoring to the Russian people a sufficiency of food to maintain health and strength.

(b) The lack of agricultural machinery and fertilizers.

(c) The diminution in the area of the land under cultivation, which is given as 40 per cent.

(d) The necessity for restoring to the peasant an adequate incentive if the land which has fallen out of cultivation is to be reclaimed.

(e) The impossibility of restoring to the peasant an adequate incentive to agricultural production until industrial production has been restored and the peasant is in a position to receive from the town the manufactured goods and articles of common necessity which he needs.

It is our conviction that there is no possibility of the economic regeneration of Russia in the near future without the assistance of capitalist countries. Our conclusions with regard to the rendering of such assistance are guided by the following considerations:

(1) That the destruction of capitalism by violence, not only in Russia but in other countries, is the deliberate aim and purpose of the Russian communist party, which forms the government of soviet Russia at the present time.

(2) That, to this end, the third or communist internationale has been established at Moscow, and we believe this has been done under the auspices of the soviet government and with its financial and material support.

(3) That the Russian communist party and the third internationale are actively endeavoring to compass the destruction by violence of capitalism in countries to which the soviet government has addressed overtures for trade.

(4) That the soviet government in destroying capitalism in Russia has assisted to bring about a complete collapse of industry in that country.

(5) That, in face of this collapse, the soviet government invites capitalists to help to restore Russian industry.

(6) That the soviet government has carried on, up to the present time, an active and widespread international propaganda, and that, had that propaganda achieved its object, international capital, to which the soviet government now turns for aid in restoring economic prosperity to Russia, would have disappeared.

(7) That the credit and capital required for Russia's urgent needs are large, that no government can give this credit and capital on the scale required, and that such aid can be furnished only by individual capitalists or financial groups who are willing to provide the necessary supplies in money or goods.

(8) That it is inconceivable that the credit and capital required in Russia should be provided by foreign capitalists as long as the destruction of capitalism and the violent overthrow of so-called bourgeois governments remain the main object of the Russian government, or of the political forces by which it is controlled.

(9) That if the soviet government renounce and abstain from propaganda directed to the destruction of capitalism and the established order in other countries, it still remains to be seen how far in the near future they will be able to arrest the process of economic disintegration and to lay a foundation upon which it will be possible for Russian industry and agriculture once more to develop and expand.

U. S. REJECTS TRADE OVERTURE.

In March, 1921, soon after the inauguration of President Harding overtures were made by the soviet authorities in Moscow for the resumption of trade relations between the United States and Russia. The matter was made the subject of discussion at a cabinet meeting and the conclusion was reached that the request

must be denied for reasons which were set forth in a note sent on March 25 to Maxim Litvinov, soviet trade envoy, in Reval, Esthonia. The note read:

"The government of the United States views with deep sympathy and grave concern the plight of the people of Russia and desires to aid by every appropriate means in promoting proper opportunities through which commerce can be established upon a sound basis.

"It is manifest to this government that in existing circumstances there is no assurance for the development of trade, as the supplies which Russia might now be able to obtain would be wholly inadequate to meet her needs and no lasting good can result so long as the present causes of progressive impoverishment continue to operate.

"It is only in the productivity of Russia that there is any hope for the Russian people and it is idle to expect resumption of trade until the economic bases of production are securely established.

"Production is conditioned upon the safety of life, the recognition by firm guaranties of private property, the sanctity of contract and the rights of free labor.

"If fundamental changes are contemplated, involving due regard for the protection of persons and property and the establishment of conditions essential to the maintenance of commerce, this government will be glad to have convincing evidence of the consummation of such changes, and until this evidence is supplied this government is unable to perceive that there is any proper basis for considering trade relations."

STATEMENT BY SECRETARY HOOVER.

The cabinet decision confirmed the views expressed by Herbert C. Hoover, secretary of commerce, in the following statement issued March 22:

"The question of trade with Russia is far more a political question than an economic one so long as Russia is in control of the bolsheviki. Under their economic system, no matter how much they moderate it in name, there can be no real return to production in Russia, and, therefore, Russia will have no considerable commodities to export and consequently no great ability to obtain imports.

"There are no export commodities in Russia to-day worth consideration except gold, platinum and jewelry in the hands of the bolshevist government. The people are starving, cold, underclad. If they had any consumable commodities they would have used them long since.

"No better indication of the destruction of production under the bolshevist system exists than in the case of flax. Prewar Russia produced 500,000 tons of flax per annum and the country consumed 120,000 tons. The production in 1920 was about 40,000 tons—with mills and hands at least capable of spinning 120,000 tons and the population underclad. In any event, no consequential export flax is available, nor ever will be available, under this economic system.

"Nor can trade with Russia under a government that repudiates private property be based on credit. Thus the whole question from a trade point of view develops into furnishing commodities equal to the gold, platinum and jewelry, variously estimated from $60,000,000 to $200,000,000, in the hands of the bolshevist government, and after that has been expended there can be little expectation of continued trade. There has been no prohibition on trade for a long time so far as exchange of commodities is concerned. Trade is open through the Baltic states, and Italy has been trading in the south. The real blockade has been the failure of the Russian to produce anything except gold and platinum to trade with.

"There has been but little trade for gold because its title has been called into question by the French government and by threats of private actions in the courts on the ground that it is stolen or subject to foreign liens. It is apparently the intention under the British trade agreement to allow this matter to be thrashed out, so far as England is concerned, in the British courts. The terms of the German agreement in this particular are unknown. If any one European nation accepts the gold, no doubt all of them will.

"Europe cannot recover its economic stability until Russia returns to production. Trading for this parcel of gold would not effect this remedy—nor would the goods obtained by the bolsheviki in return for it restore their production. That requires the abandonment of their present economic system."

TRADE ON A SMALL SCALE.

Trade on a restricted basis was done between soviet Russia, Sweden, England, France and Germany, but payments were made in gold or goods were simply exchanged. The Russian paper currency had no value outside the country and but little on the inside. It seemed to be the policy of the bolsheviki to do away with the monetary system entirely and to make the currency so valueless as to cause the people to reject it. Russia had little in the way of raw material to trade with and no real money to buy with except the gold accumulated by the czarist regime. The Russo-British trade agreement was signed by Leonid Krassin and Sir Robert Horne in London March 16.

AMBASSADOR MARTENS LEAVES.

Ludwig C. A. K. Martens, who had established himself in New York as "ambassador" of soviet Russia to the United States, was forced to return to his own country on Jan. 22, 1921. The authorities in Washington refused to recognize him or his government.

KRONSTADT REVOLT.

While the communists retained power in Russia through their control of the army they did not maintain their position without opposition. There were hunger and misery everywhere and in some places the general dissatisfaction was so great that it resulted in attempts at revolt. In Petrograd there were demands for greater freedom for labor, cessation of food requisitions and modification of trade restrictions. Strikes occurred in Moscow and other large cities and order had to be preserved by the use of troops. In February reports of an uprising in Petrograd were circulated, but it developed later that the revolt was not of a serious nature. Early in March it became known that the sailors and revolutionists in the fortress and seaport of Kronstadt had taken possession of that stronghold and had defied the soviet authorities. They attempted to seize Petrograd also, and after bombarding the city marched to take it by storm. Gen. Kozlovski led the rebels and made some progress until Leon Trotzky assembled enough soviet troops to save Petrograd from capture and to besiege Kronstadt. There was considerable fighting at long range and some loss of life, but the rebels were without supplies of food and ammunition and finally on March 17 gave up the struggle. Most of them fled with their families to Finland. Gen. Kozlovski, who was among the refugees, on his arrival at Terioki, Finland, gave an account of the unsuccessful rising.

On March 2, he declared, the Kronstadt government informed the Petrograd authorities it did not recognize the soviet government. The soviet commissars and leaders of the fleet were arrested and a committee of sailors and workmen elected. Former officers offered their services, and on March 3 a Kronstadt soviet

was formed. The military members proposed an attack on Oranianbaum, on the Gulf of Finland, opposite Kronstadt, but the provisional committee refused and the garrison began the defense of the fortress. The hostile attacks became fiercer and fiercer daily, Gen. Kozlovski said, and on March 17 the garrison, unable to repulse them longer, was forced to retire.

THE GREAT FAMINE.

In the summer and fall of 1921 Russia was visited by one of the worst famines in its history. The area mainly affected was the lower Volga basin and the districts along the lower courses of the Dnieper and Bug rivers. Thousands of persons starved to death in Astrakhan, Samara, Saratov, Kazan, Ufa, Kuban, Kherson and other places. About 15,000,000 people were in dire distress and thousands attempted to emigrate to other districts where the crops had not been an entire failure. The people of the world knew that starvation existed in parts of Russia, but they did not realize the gravity of the situation until appeals from Tikhon, the Greek church patriarch of Moscow and All-Russia, and Maxim Gorky were published. On July 11 the patriarch addressed the following letter to Bishop Manning of New York:

"Moscow, July 11, 1921.—To His Eminence the Rt.-Rev. Bishop of New York—Right Reverend Sir: Through you I appeal to the North American nation. There is famine in Russia. A great part of her population is doomed to a hunger death. The corn of many provinces, formerly the country's granary, is now burned by drought. The famine breeds epidemics. Most generous aid is needed immediately. All other considerations must be cast aside. The people are dying, the future is dying, because the population is deserting home, lands, fields, farms and is fleeing eastward, crying for bread. Delay spells an unprecedented calamity. Send immediately bread and medicine. I am sending a similar appeal to the English people through the archbishop of Canterbury.

"Pray may God avert his wrath. TIKHON."

MAXIM GORKY'S APPEAL.

Maxim Gorky addressed the following appeal to the American people:

"Moscow, July 13.—To All Honest People: The corn-growing steppes are smitten by crop failure, caused by the drought. The calamity threatens starvation to millions of Russian people. Think of the Russian people's exhaustion by the war and revolution, which considerably reduced its resistance to disease and its physical endurance.

"Gloomy days have come for the country of Tolstoy, Dostoyevsky, Meneleyev, Pavlov, Mussergsky, Glinka and other world prized men, and I venture to trust that the cultured European and American people, understanding the tragedy of the Russian people, will immediately succor with bread and medicines.

"If humanitarian ideas and feelings—faith in whose social import was so shaken by the damnable war and its victors' unmercifulness toward the vanquished—if faith in the creative force of these ideas and feelings, I say, must and can be restored, Russia's misfortune offers humanitarians a splendid opportunity to demonstrate the vitality of humanitarianism.

"I think particularly warm sympathy in succoring the Russian people must be shown by those who, during the ignominious war, so passionately preached fratricidal hatred, thereby withering the educational efficacy of ideas evolved by mankind in the most arduous labors and so lightly killed by stupidity and cupidity.

"People who understand the words of agonizing pain will forgive the involuntary bitterness of my words.

"I ask all honest European and American people for prompt aid to the Russian people. Give bread and medicine. MAXIM GORKY."

AMERICA'S REPLY.

The response of the United States to these appeals was prompt. Herbert C. Hoover, secretary of commerce, whose work as head of the American relief administration during the war won him world fame, replied to Gorky, declaring that the United States would help the starving people of Russia, provided the relief administration's agents were allowed to work freely and without molestation, and also provided Americans detained in Russian prisons were given their liberty. Secretary of State Hughes at the same time sent the following note to Maxim Litvinov, the chief of soviet legations abroad:

"The American government is advised that, despite the repeated efforts of Dr. Nansen on its behalf to secure the release of the American prisoners in Russia, they are still held in a most serious plight. In the name of humanity the American government demands of the soviet authorities that these prisoners be at once released. It is manifestly impossible for the American authorities to countenance measures for relief of the distress in Russia while our citizens are detained."

Representatives of the American relief adminstration and of the soviet authorities met in Riga and on Aug. 19 a full agreement was reached. On the following day a contract was signed, giving the relief agents all the privileges for which they had contended. Earlier in the month the Americans held as prisoners in Moscow and elsewhere were released. Among them were Capt. Emmett Kilpatrick, Dr. H. J. LeMarc, Dr. W. B. Estes, X. M. Kalamantiano, Mrs. Marguerite E. Harrison and William Flick.

Most of the preliminary arrangements for the relief of the starving Russians were made by Walter L. Brown of the American relief administration, and later the supervision of the work was placed in charge of Col. William N. Haskell of Albany, N. Y., who had done similar work in the near east. Ships were loaded with grain and other supplies and transported, not without difficulty, to the famine districts of Russia. The starving children were first provided for as far as possible. The aid, though not great in comparison with the need, was given promptly and was much appreciated by those benefiting from it. The soviet authorities themselves helped in the relief work, though it was the general belief that their policy of food requisitions was in part responsible for the famine in many places.

CHANGE OF POLICY.

In the fall of 1921 the communistic ideas of Nikolai Lenin, Leon Trotzky and some of the other leaders appeared to change. They apparently had come to the conclusion that the proletariat could not do entirely without help from the capitalistic classes. Private ownership in small industries was permitted, though the control of the greater industries remained with the state. It was also said that the powers of the "cheka," or extraordinary commission, had been curtailed to some extent. However, as late as Aug. 24 it was reported that sixty-one persons were ordered shot by the commission on the charge of plotting against the soviet authorities in Petrograd. The central soviet officials were bent on getting some sort of official recognition from the outside world, even going so far as to offer to pay the old debts of Russia in return for recognition.

APPEAL FOR WORLD PEACE.

On Oct. 28 Foreign Minister Tchitcherin issued the following appeal:

"To the governments of Breat Britain,

France, Italy, Japan and the United States of America:

"According to information of the western press, the conference of the powers at Brussels made as a condition to its offer of credits to Russia for aid of the famine sufferers recognition on the part of the Russian government of the debts of the preceding governments.

"Up to the present the Russian government has not been advised of the decision of the conference. Nevertheless, the Russian government, owing to the mass of the starving people, has decided not to be bound by the fine points of diplomatic etiquette and has decided its absolute duty to be to state its points of view on the Brussels decision.

"The English prime minister during a speech on Aug. 16 to the British parliament termed the proposal of profiting by famine in order to compel Russia to recognize czarist debts a diabolical plan. This, however, did not prevent the Brussels conference, although fully informed that the size of the famine does not permit the soviet government to save by its own unaided means the fated population, from putting the recognition of former debts by the soviet government as a condition to the opening of credits without which all essential aid to the starving is impossible.

"In drawing the attention of the laboring masses of all countries and the attention of all citizens to whom the interests of humanity are dear to this course of the conference at Brussels, the Russian government declares at the same time that the proposition of recognizing the old debts under certain conditions only anticipates their own intentions.

"From the origin of its existence the soviet government has held that as one of the chief aims of its politics and economic collaboration with other powers. It always declared its intention of furnishing sufficient reward to foreign capitalists who would aid it to develop the natural riches of Russia and to re-establish its economic machine.

"Actually in the official statement both of the president of the United States and of the English minister this idea frequently was repeated—namely, that three years after the end of the world war there is still no real peace; that the misery of the mass of peoples has become more and more acute; that the public debts are growing, and that ruin approaches.

"It is clearly evident it is impossible to think of the re-establishment of complete peace without Russia and her 130,000,000 inhabitants. It is impossible to avoid disaster unless Russia is assisted, and that the question of the relations of Russia to other countries, being a world problem of the first importance, cannot be decided upon without an agreement with the soviet government.

"From the point of view of the lasting interests and constant needs of all states and all peoples, economic restoration of Russia is absolutely necessary not only for Russia herself but also for the others. Moreover, the absence of economic relations with other countries makes economic revival of Russia an extremely difficult task, and a task the accomplishment of which would demand a much longer period for government workers and peasants in a better position than any other to execute this task. Selfish interests of separate groups of capitalists do not prevent it from working to restore national prosperity. It is the interests of the mass of people, which is in the last analysis that of society itself, which always guides the workers and peasants' government.

"In proposing as its aim the good of all the working people of Russia, the workers and peasants' government, which has emerged victorious from unbelievable tests of civil war and from intervention, now opens to private enterprise and capital in collaboration with the workers' government the road to development of the natural resources of Russia.

"The soviet government has re-established private trading rights and private property in small enterprises, and the right of concessions and leasing on big properties. The soviet government assures foreign capital of legal guarantees and a sufficient part of the profit to satisfy these interests and induce them to take part in the economic work of Russia. With this end in view the soviet government desires an economic accord with all the powers, for which in the last analysis it is absolutely essential that a definite peace be concluded between Russia and the other powers.

"In pursuing this end the soviet government is brought face to face with a demand made by the powers that the czarist debts be recognized. The soviet government declares, according to its firm conviction, that no people is obliged to pay the price of the chains which have been imposed on it for many centuries, but in its unalterable decision to reach a full accord with the other powers the Russian government is inclined in this matter to make many essential concessions of first importance.

"In this it anticipates the desires of innumerable small bondholders of Russian loans, particularly in France, for whom recognition of czaristic debts is of primal importance. For these reasons the Russian government declares itself ready to recognize the obligations as regards other states and their citizens resulting from government loans made by the czaristic government before 1914, with the express reservation that special conditions be granted to the Russian government enabling it to carry out its obligations.

"It goes without saying that an absolute condition of this recognition of debts is to end without qualification the menacing of the security of the soviet republics and their friend, the Far Eastern Republic, and to recognize their sovereign rights and inviolability of their frontiers, and scrupulously to observe the principle of their full sovereignty and territorial integrity.

WANTS WORLD CONFERENCE.

"In other words, the soviet republic can take up the agreement in question only if the great powers conclude a general definite peace with it and if its government is recognized by the other powers.

"To this end the Russian government proposes, as an expediency, the calling of an international conference to weigh the questions herein mentioned, to investigate the claims of the powers against Russia, as well as those of the Russian government against the powers, and to draw up a treaty of peace between them. Only after a conference of this nature can general peace be the outcome.

"On the fourth anniversary of its existence it must be universally admitted that the efforts of the many enemies of the Russian government, both within and without, have only served to strengthen the workers and peasants' government as the real defender and representative of the interests of the laboring masses of all Russia, and as the defender of the independence of the country.

"A new intervention in a project against soviet Russia, the possibilities of which are demonstrated in the statements of leading organs of the press in entente countries, will only tighten the more unbreakable bond which unites the laboring masses of Russia with the workers and peasants' government, which represents their will. But attempts to realize

these plans will endanger a prolongation of the suffering of the laboring masses and further delay a complete re-establishment of Russia, thus delivering a blow at the interest of all other peoples.

"The proposition which the Russian government makes is the best proof of its unshakable desire for peace with all states and the establishment of undisturbed economic relations with them in realization that these proposals will respond to the interests of all governments and all peoples. The Russian government expresses its strong hope that this proposal in the near future will be followed by a definite arrangement for economical and political relations between Russia and the other countries.

"TCHITCHERIN."

NEW POSTAL AGREEMENT.

The following agreement was made and signed Nov. 11, 1920, by delegates representing Spain, the Spanish colonies, the United States, the Philippine islands, Argentina, Bolivia, Brazil, Colombia, Costa Rica, Cuba, Chile, Dominican republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay and Venezuela, who were in attendance on the seventh congress of the universal postal union, which held its sessions in Madrid, Spain, in October and November, 1920:

"The undersigned, assembled in Madrid, duly authorized by their respective governments and in accordance with paragraph 2 of article 21 of the principal convention of the universal postal union, by mutual agreement, subject to ratification, have agreed on the following articles for the regulation and betterment of their postal relations:

ARTICLE I.

"1. All the countries signing this convention will form one single postal territory.

"2. Prepayment of postage is declared obligatory on all classes of correspondence transmitted from any one to another of the countries constituting this union, except in case of letters, to which alone shall be accorded a tolerance limit for insufficient postage.

"3. Each one of the signatory countries agrees to transmit freely and gratuitously through its territory, by means of the services established or used for its own mail, the mail received from any of the said countries destined to any other. However, the expenses of transportation by land or sea shall be at the charge of the country of origin whenever there is transit through a country not a party to this convention.

"4. It is set forth as a fundamental principle that in the postal relations between the countries parties thereto, the tariff which each country has established for its own domestic service shall govern.

"5. The provisions of this convention apply to letters, post cards, of plain and return postage, and to printed matter of all kinds, business documents and samples.

ARTICLE II.

"1. Letters—(a) Every letter which does not bear the proper stamps for first-class mail matter shall be considered as not mailable and will not be forwarded by the office of origin.

"(b) The office of origin alone is authorized to impose the rate for insufficiently stamped letters, which shall be doubled by weight for the insufficiency. The office of destination shall collect the insufficiency of postage imposed by the office of origin and credit the same to its own use.

"2. Post cards—For postal cards, both plain and return postage, the domestic tariff of each country shall govern.

"3. Books, periodicals, printed matter and business documents—The weight of packages containing books, periodicals, printed matter and business documents shall not exceed four kilos, except in the case of works printed in a single volume, when a maximum of five kilos is allowed. The size of packages shall not exceed forty-five centimeters in any dimension.

"Parcels presented in the form of rolls will go through the mail provided the size does not exceed one meter in length by fifteen centimeters in diameter.

"Business documents shall carry the minimum rate as fixed by the tariff of the country of origin.

"4. Samples—Samples will be freely transmitted by mail if they have no commercial sale value and if their size does not exceed thirty centimeters in length, twenty centimeters in breadth and ten centimeters in depth or thickness. If the packages are in the form of rolls the maximum dimensions shall be thirty centimeters in length by fifteen in diameter.

"Samples shall not carry postage less than that provided for by the tariff of the country of origin.

ARTICLE III.

"1. Responsibility for loss of registered mail—In case of the loss of registered mail matter the sender shall have the right to an indemnity as determined for a like case by the domestic legislation of the country of origin, but which may not exceed 50 francs in gold.

"2. The payment of the indemnity by the sending office shall be made within a period of twelve months, counting from the day following that on which the claim is filed. The postal service responsible for the loss shall reimburse the country of origin without delay and within the period set out the amount of the indemnity which may have been paid the sender. This payment will be made in the money of the creditor country or the equivalent in the money of any other country, as may be agreed upon by the national services interested.

ARTICLE IV.

"In all cases not in conflict with the provisions of this convention the rules of the universal postal union shall govern.

ARTICLE V.

"The present convention shall take effect on the 1st day of January, 1921, for the countries which at that date may have ratified the same, and for those that have not at that time done so, on the date when they notify the other signatory countries of the ratification hereof.

"This convention is of indeterminate duration, but any of the parties may withdraw therefrom upon prior notice one year in advance to the other signatories.

"Done at Madrid the 11th day of November, 1920."

EXPLANATION OF CONVENTION.

The division of foreign mails of the United States issued the following explanation of the application of the foregoing agreement:

"The convention provides for the application of the domestic rate to letters mailed in one country addressed for delivery in another country of those signing and ratifying the above convention. Thus the rate on letters originating in the United States will be 2 cents an ounce or fraction of an ounce instead of 5 cents for the first ounce and 3 cents for each additional ounce, the rate under the convention of the universal postal union.

"The convention applies the domestic rate to postal cards. In the United States this rate is 1 cent for each single card and 2 cents for each double card (or card with paid reply) instead of 2 cents and 4 cents, respectively, the international rates.

"It extends the domestic rate of each country of origin to printed matter, commercial papers and samples of merchandise mailed in such country, resulting in a reduction in the rates on such matter in all cases where the domestic rate of the country of origin is lower than the international rate, the international rate being maintained wherever the domestic rate is higher. In view of the classifications in force in the domestic service of the United States, the concession granted by this provision to American exporters and others mailing this class of articles for delivery in any part of the countries concerned consists in the reduction in the rate on second-class matter from 1 cent for each two ounces, the international rate, to 1 cent for each four ounces.

"This convention raises the maximum weight limit for printed matter and commercial papers from two kilograms (four pounds six ounces), the international weight limit, to four kilograms (eight pounds twelve ounces), and likewise provides for a maximum weight limit of five kilograms (eleven pounds) for single volumes of printed books, no such special provision being made in the convention of the universal postal union. It also increases the dimensions for these articles in the form of a roll to a maximum of one meter in length and fifteen centimeters in diameter; that is, about forty inches and six inches, respectively.

"The new convention of the universal postal union, signed at Madrid Nov. 30, 1920, increases the maximum weight limit for samples of merchandise from twelve ounces to sixteen ounces, and it is understood that this provision will be carried into effect immediately when this special convention becomes operative.

"When the above convention becomes operative each country will communicate to the other countries in the restricted union the reduced rates applicable in such country under the new agreement, but until such information is received it cannot be stated what the new rates will be in each of the other countries. However, the maximum weight limit and dimensions above referred to will be uniform.

"The new convention provides also that all articles of mail matter, except letters, must be fully prepaid by the senders, and that letters must be prepaid at least one rate (or 2 cents in the United States). This is an excellent provision because of the frequent failure of senders to properly and fully prepay their correspondence for foreign countries, and because of the circumstance that doubtless the domestic rates of the various countries forming this union are not uniform, and, consequently, the rates in different countries on mail matter covered by this treaty will vary considerably. As a large majority of letters sent to foreign countries do not weigh in excess of one ounce, and in view of the necessity for a more expeditious handling of letters and of a possible slight variation at times in the scales in use, the provision concerning the part prepayment of letters is deemed better than a requirement of absolute or full prepayment.

"Under the convention of the universal postal union the country of origin is required to compensate an intermediary country for the land and sea transit of its mails at uniform rates for each country, based on the statistics taken periodically. Under this special treaty such service is gratuitous when performed by one country of the restricted union for another country of said union. As this character of service performed by the United States for the other countries of the union (that is, Spain, the countries of Central and South America, Mexico and Cuba) is very much greater than the similar service performed by said countries for the United States, the advantages administratively to the other countries are greater accordingly than the advantages secured to the postal administration of the United States. The sentiment for free transit throughout the entire universal postal union was quite general and persistent in the universal postal congress of Madrid, and it is believed will be presented even more emphatically and with stronger support at the congress to be held in Stockholm in 1924."

MEXICO AND THE UNITED STATES.

On June 7, 1921, Secretary of State Hughes made public the following statement giving the administration's policy with respect to the conditions upon which the Obregon regime in Mexico would be recognized by the United States:

"The fundamental question which confronts the government of the United States in considering its relations with Mexico is the safeguarding of property rights against confiscation. Mexico is free to adopt any policy which she pleases with respect to her public lands, but she is not free to destroy without compensation valid titles which have been obtained by American citizens under Mexican laws.

"A confiscatory policy strikes not only at the interest of particular individuals but at the foundations of international intercourse, for it is only on the basis of the security of property validly possessed under the laws existing at the time of its acquisition that commercial transactions between the peoples of two countries and the conduct of activities in helpful co-operation are possible.

"This question should not be confused with any matter of personalities or of the recognition of any particular administration. Whenever Mexico is ready to give assurance that she will perform her fundamental obligations in the protection both of persons and of rights of property validly acquired there will be no obstacles to the most advantageous relations between the two peoples.

"This question is vital because of the provisions inserted in the Mexican constitution promulgated in 1917. If these provisions are to be put into effect retroactively, the properties of American citizens will be confiscated on a great scale. This would constitute an international wrong of the gravest character, and this government could not submit to its accomplishment. If it be said that this wrong is not intended and that the constitution of Mexico of 1917 will not be construed to permit or enforced so as to effect confiscation, then it is important that this should be made clear by guaranties in proper form. The provisions of the constitution and the executive decrees which have been formulated with confiscatory purposes make it obviously necessary that the purposes of Mexico should be definitely set forth.

"Accordingly, this government has proposed a treaty of amity and commerce with Mexico, in which Mexico will agree to safeguard the rights of property which attached before the constitution of 1917 was promulgated. The question is not one of a particular administration, but of the agreement of the nation in proper form which has become necessary as an international matter because of the provisions of its domestic legislation. If Mexico

does not contemplate a confiscatory policy, the government of the United States can conceive of no possible objection to the treaty.

"The proposed treaty also contains the conventional stipulations as to commerce and reciprocal rights in both countries. It also provides for the conclusion of a convention for the settlement of claims for losses of life and property, which, of course, means the prompt establishment of a suitable claims commission in which both countries would be represented, in order to effect a just settlement. There is also a provision for a just settlement of boundary matters.

"The question of recognition is a subordinate one, but there will be no difficulty as to this, for if Gen. Obregon is ready to negotiate a proper treaty, it is drawn so as to be negotiated with him, and the making of the treaty in proper form will accomplish the recognition of the government that makes it.

"In short, when it appears that there is a government in Mexico willing to bind itself to the discharge of primary international obligations, concurrently with that act its recognition will take place. This government desires immediate and cordial relations of mutual helpfulness, and simply wishes that the basis of international intercourse should be properly maintained.

"Accordingly, on the 27th of May last, Mr. Summerlin, American charge d'affaires at Mexico City, presented to Gen. Obregon a proposed treaty covering the matters to which reference has been made. The matter is now in the course of negotiations and it is to be hoped that when the nature of the precise question is fully appreciated the obstacles which have stood in the way of a satisfactory settlement will disappear."

OIL QUESTION SETTLED.

Up to the end of October, 1921, the treaty referred to had not been negotiated, though progress toward a settlement had been made. The most important step taken was an agreement made on Sept. 3, between representatives of the American oil companies operating in Mexico and the Mexican government, regarding the oil taxes. The Mexican Supreme court had already decided that article 27 of the Mexican treaty could not be given a retroactive effect. In a message to the Mexican congress on Sept. 2 President Obregon said:

"Inasmuch as the retroactivity of article 27 of the constitution with regard to privately owned petroleum properties has been recently defined by decisions of the Supreme court of the nation, the spirit of which is found to be in full accord with various declarations and statements of the executive and some of the members and groups of this congress, constituting a majority, which plainly guarantees the future regulations and application of article 27 in full subordination to the principles of nonretroactivity; therefore, three questions which principally affect the foreigners' right in Mexico, to wit, the resumption of the payment of the public debt, the equitable reparation for damages incurred during the revolution as a result of impartial findings of mixed commissions and the nonretroactive interpretation of article 27, may be considered already solved by the simple and voluntary execution of the program of the government of Mexico."

PRESIDENTS OF MEXICO SINCE JUNE 26, 1910.

Alvaro Obregon—Dec. 1, 1920.

TURKISH NATIONALISTS AND GREECE AT WAR.

King Constantine of Greece was determined to push the military operations against the Turkish nationalists headed by Mustapha Kemal Pasha and declined to enter into any negotiations looking toward peace. On March 30, 1921, a royal decree called the classes of 1913, 1914 and 1915 to the colors. Preparations were also made to begin a great offensive in Asia Minor. On March 24 Greek troops numbering 120,000 began an advance and for a time drove the Turks before them on the Brusa and Smyrna fronts. On March 29 it was announced that the Greeks had occupied Eskishehr and Afiun-Karahissar, capturing many of the enemy and much war materiel. The Greeks then began an advance in the direction of Angora, the nationalist capital, but were at once stopped by the Turks, who administered a severe defeat upon the invaders after a battle lasting nine days. The Greeks, it was reported, lost 10,000 men and 300 officers and were forced to return to the Brusa line.

Here they remained until June 30, when they began another advance. As before, they drove the Turks before them at the start until the latter were about forty miles east of Eskishehr. The operations continued throughout July and the greater part of August, King Constantine being present at the Greek headquarters to encourage his men. They were again hopeful of reaching Angora, but their right wing was defeated on the west bank of the Sakharia river and again they had to retreat to their starting point. Both sides were badly used up from the results of the two campaigns and all hostile operations ceased for the time being. King Constantine returned to Athens.

DEATH OF SENATOR PHILANDER C. KNOX.

Philander Chase Knox, United States senator from Pennsylvania, died suddenly at his residence in Washington, D. C., on the evening of Oct. 12, 1921. He was born in Brownsville, Pa., May 6, 1853; was graduated from Mount Union college, Ohio, in 1872, receiving the degree of A. M., and later the degree of LL. D., and also from Yale, Pennsylvania, and Pittsburgh Universities and from Washington and Jefferson and Villa Nova colleges and the University of Guatemala; practiced law in Pittsburgh from 1875 to 1901; appointed attorney-general in President McKinley's cabinet April 5, 1901; in President Roosevelt's cabinet as attorney-general from the death of President McKinley until July 1, 1904; appointed to fill vacancy caused by death of Hon. M. S. Quay in senate July 1, 1904; subsequently elected to fill Senator Quay's unexpired term, then to the full term of six years; resigned from the senate to accept the position of secretary of state in President Taft's cabinet March 4, 1909; was secretary of state to March 5, 1913; elected to the senate Nov. 6, 1916, to succeed George T. Oliver. His term of service would have expired March 3, 1923.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5.000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5.000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign

nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

WAGES ON AMERICAN AND FOREIGN SHIPS.

COST OF LIVING IN THE UNITED STATES.

PRICE OF FOODSTUFFS IN CHICAGO.

The following table is taken from a report made by Arthur Young & Co., certified public accountants, showing the cost of foodstuffs in Chicago from 1905 to 1921, both inclusive. The quantities given are on a yearly basis for a family of five as set forth in The Daily News Cook Book, while the prices are on a monthly basis. The prices prevailing in January of each year were applied to most of the 214 articles of food named, but in many instances, such as those of fresh fruits and vegetables, the prices ruling in the months when these products were in season were used. Only the figures for the years 1905, 1910, 1914 (the year when the world war began) and 1921 are given in detail here, but a summary for all the years is appended. This shows the total cost of all the meals for each year, the actual increase or decrease in such cost, the percentage of increase or decrease from year to year and the percentage of increase over 1905. The prices applied to the various articles are retail and were obtained from advertisements in The Daily News and other newspapers, catalogues of stores in the "loop district" of the city and from other available sources.

ANNALIST COMPUTATION.

The New York Annalist's "Curve in the Cost of Living," or index number, which shows the fluctuations in the average wholesale price of twenty-five food commodities selected and arranged to represent a theoretical family's food budget, indicated that prices fell from June, 1920, to February, 1921; rose in March and gradually declined until the beginning of July, when they again rose. In August and September they fluctuated only slightly, but began falling in the early part of October.

The index number published Oct. 17, 1921, showed:

THE GENERAL EDUCATION BOARD.

The General Education Board was organized in New York Feb. 27, 1902, and incorporated by an act of congress signed Jan. 12, 1903. The purposes of the board are to promote education in the United States, without distinction as to race, sex or creed, and especially to promote, systematize and make effective various forms of educational beneficence. On June 30, 1920, according to the report filed with the secretary of the interior, the principal funds belonging without restriction to the board amounted to $107,601,887.06, invested in stocks and bonds. Of this sum $21,272,286 was appropriated during the year, but on June 30, 1920, no payments had yet been made thereon. The income from the above funds, together with the income from undisbursed income, amounted during the year to $4,741,223.66. The balance of income from previous year as of June 30, 1919, amounting to $10,018,625.85, increased the total to $14,759,849.51.

Disbursements from income in the fiscal year 1920 were as follows:

The following are officers of the board: Wallace Buttrick, president; Abraham Flexner, secretary; E. C. Sage, assistant secretary; L. G. Myers, treasurer; L. M. Dashiell, assistant treasurer.

THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

The Carnegie Foundation for the Advancement of Teaching was founded by Andrew Carnegie in 1905 and incorporated by the congress of the United States in 1906 for the purpose of providing retiring allowances for teachers and officers of universities, colleges and technical schools in the United States, Canada and Newfoundland, and, in general, of advancing the profession of the teacher and the cause of higher education.

In the administration of its endowment, which now amounts to $15,000,000, the foundation has restricted its allowances to professors and officers in institutions selected for their educational standing and has published a series of widely influential reports and bulletins concerning educational conditions. The president of the foundation is Henry S. Pritchett; its trustees are presidents of universities and colleges and financiers. Further information may be had by addressing the secretary, Clyde Furst, 576 5th avenue, New York.

STATE APPROPRIATIONS FOR LIBRARY PURPOSES.

[Data furnished by American Library association.]

Following is a comparative statement of appropriations, so far as reports have been received. Unless otherwise indicated the state library commission is meant, though it should be remembered that commissions are abolished in Illinois, Maine, Michigan and Ohio. S. L. means state library. State libraries are included only where they are the agency for the general library work of the state.

In only two is there a decrease. Three remain stationary and all the others show increases, most of them ordinary, but several are marked, and two, those of North Carolina and Wyoming, are more than doubled.

HONORS FOR MME. CURIE.

Mme. Marie Curie, who with her husband discovered radium, visited the United States in the spring of 1921 and was the recipient of many honors. On May 20 at the white house in Washington President Harding handed over to her a gram of radium valued at $100,000 purchased for her by American women in the interest of humanitarian research. The presentation took place in the presence of a distinguished assemblage of diplomatic officials, scientists and philanthropists. In New York city on May 18 she was presented with the Ellen Richards memorial prize of $2,000 by Ellen F. Pendleton, president of Wellesley college. Mme. Curie, accompanied by her two daughters, visited a few of the principal cities in the east and middle west and also made a trip to the Grand canyon of the Colorado.

ASSASSINATION OF MATHIAS ERZBERGER.

Mathias Erzberger, former vice-premier and minister of finance in Germany, was shot and killed while he was walking in the Black forest near Offenburg, Baden, Aug. 26, 1921. The murder was committed by two young men, supposed to have been hired by Erzberger's political foes. The pan-German reactionaries were especially bitter against him. A previous attempt to kill him was made on Jan. 26, 1920, when he was shot as he was leaving the Criminal court building in Berlin. Erzberger was born Sept. 20, 1875, the son of a tailor. He became prominent in German politics during and after the world war.

The American Legion was organized at a convention held in St. Louis, Mo., May 8-10, 1919, when temporary officers were chosen and the main principles of the association were adopted. Henry D. Lindsley of Dallas, Tex., was chosen as the temporary commander, and it was decided to hold the first regular convention in Minneapolis, Minn. It took place there Nov. 10-12, 1919, when national officers were chosen and the organization perfected. All persons who were in the military or naval and marine service of the United States between April 6, 1917, and Nov. 11, 1918, are eligible for membership. The object of the association is to uphold and defend the constitution of the United States; to maintain law and order; to foster and perpetuate a 100 per cent Americanism; to combat autocracy whether of the classes or the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity principles of justice, freedom and democracy and to sanctify the comradeship of the war by mutual helpfulness.

The American Legion is a nonpolitical organization. It was incorporated by an act of congress approved Sept. 16, 1919.

The Military Training Camps association was organized in 1916 by the men who attended the students' and business and professional men's camps of 1913, 1914 and 1915. At the request of the war department it recruited for the first and second series of officers' training camps in 1917 and helped also in the later camps, furnishing 100,000 commissioned officers for the national army. It enrolled nearly 250,000 men for different specialist branches, enlisting, for example, in Chicago within three weeks approximately 7,000 skilled mechanics for the ordnance and in the central department by a single drive nearly 12,000 recruits for the navy, as well as candidates for the tank corps, the air service, the engineer corps, the chemical warfare service and the quartermaster corps. In 1920 the association proposed a series of citizens' military training camps as part of the permanent military policy of the country and at the request of the war department helped to secure over 40,000 applications for the summer camps held under its auspices in 1921. The Military Training Camps association consistently supports a conservative policy of national defense; membership in it is open to all patriotic citizens.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names as well as the services of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain or shall serve in future campaigns recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

CHRISTIAN SCIENCE CHURCH.

The Church of Christ, scientist, was founded at Boston in 1879 by Mary Baker Eddy, the discoverer of Christian Science and author of its textbook, "Science and Health with Key to the Scriptures." As she then said, the church was "designed to commemorate the word and works of our Master," and to "reinstate primitive Christianity and its lost element of healing" (Church manual, p. 17). Its proper name is The First Church of Christ, Scientist, in Boston, Mass. It is also known as the Mother Church. Its present officers are: Directors, Adam H. Dickey, James A. Neal, Edward A. Merrit, William R. Rathvon, Annie M. Knott; president, Rev. Irving C. Tomlinson; clerk, Charles E. Jarvis; treasurer, Edward L. Ripley.

Regularly organized local congregations of Christian scientists, throughout the world, are branches of the Mother Church. In Chicago there are sixteen of such churches, named and located as follows: First Church of Christ, Scientist, 4017 Drexel boulevard; Second Church, Wrightwood and Pine Grove avenues; Third, 2151 Washington boulevard; Fourth, Harvard avenue and West Marquette road; Fifth, 4840 Dorchester avenue; Sixth, 11321 Prairie avenue; Seventh, 5318 Kenmore avenue; Eighth, Michigan avenue and 44th street; Ninth, 6154 Woodlawn avenue; Tenth, 5640 Blackstone avenue; Eleventh, 2840 Logan boulevard; Twelfth, Lemoyne School auditorium, Waveland avenue and Rokeby street; Thirteenth, 10317 Longwood drive; Fourteenth, 4446 North Paulina street; Fifteenth, Masonic Temple, Fulton street and Central avenue; Sixteenth, 1716 Lunt avenue.

Each of the Chicago churches maintains a Christian Science reading room, and all of them maintain joint reading rooms at 11 South LaSalle street and 104 South Michigan boulevard. These rooms are free and public. Services to which the public are invited are held by each of these churches on Sundays at 10:45 a. m. and 7:45 p. m. and on Wednesdays at 8 p. m. From time to time, also, they provide free public lectures on Christian Science by members of the board of lectureship of the Mother Church.

CHURCHES AND CHURCH PROPERTY.

According to the census of 1916 the total number of church edifices in the United States was 203,432 as against 192,705 in 1906. Only a building owned and used by a denomination

for church purposes is included in the term church edifice. The Methodist Episcopal church had 28,406 such buildings in 1916 and ranked first in this respect. The Methodist denomination as a whole had 61,467 churches.

Following is a table showing the number of churches owned by the leading denominations in 1916, with the value of the church property of each:

APPORTIONMENT OF REPRESENTATIVES.

[From census bureau report.]

The apportionment of representatives in congress, under the first six censuses—1790 to 1840, inclusive—was made by congress, each by a separate act. The law for taking the census of 1850, which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the house at 233, and directed the secretary of the interior thereafter to make the apportionment. The apportionment of 1860 was also made under this law, but congress, on March 4, 1862, fixed the total number of representatives at 241, and the secretary of the interior apportioned the new quotas to the states. The apportionments from and after the census of 1870 were made by congress, each by a separate act; hence it may be assumed that the power conferred on the secretary of the interior by the act of May 23, 1850, was repealed by implication. The following shows the dates of the apportionment acts and the ratio of population to each representative:

Census.	Date.	Ratio.
1920—	(Not fixed up to November, 1921.)	
1910—	Aug. 8, 1911	211,877
1900—	Jan. 16, 1901	194,182

RECALL ELECTION IN NORTH DAKOTA.

Under the provisions of an amendment to the North Dakota state constitution adopted in 1919 some 80,000 voters in 1921 petitioned for the recall of Gov. Lynn J. Frazier, Attorney-General William Lemke and J. H. Hagan, commissioner of agriculture and labor. The election took place Oct. 28, 1921, and resulted in the recall of the three officials named. In their place the voters elected R. A. Nestos governor, Sveinbjorn Johnson attorney-general and Joseph A. Kitchen commissioner of agriculture and labor. The ousted officials were supported by the Nonpartisan league and opposed by the Independent Voters' association. [For a list of the North Dakota state officers not recalled see page 262 this volume.]

ORGANIZATION OF THE ARMY.

The following memorandum from the secretary of war to the chief of staff was published by the war department July 18, 1921:

The army reorganization act of June 4, 1920, marks an epoch in our military legislation. This law provides for an army of the United States which shall include the regular army, the national guard when in the service of the United States, and the organized reserves, composed of the officers' reserve corps and the enlisted reserve corps. It directs that the army of the United States as a whole shall always

be formed into a sufficient number of divisions and other units to constitute the framework for a complete and immediate mobilization in the event of serious national emergency. It prescribes the maintenance in the regular army of certain specified numbers of officers and enlisted men—the number of the latter being restricted by the act of June 30, 1921. It authorizes sufficient officers and enlisted men of the national guard to maintain that force properly organized at the strength authorized by law. It establishes decentralized control and administration of the military establishment through the formation of corps areas and based upon the distribution of military population. The law further provides such numbers of reserve officers as may qualify by appointment in the officers' reserve corps and such number of enlisted reservists as may qualify for enlistment in the enlisted reserve corps. It contemplates the organization of reserve officers and enlisted men into localized units of the organized reserves. It provides for the voluntary incorporation of veteran officers and enlisted men of the world war into either the national guard or the organized reserves.

An essential part of the system is the reserve officers' training corps and the citizens' training camps for voluntary military training through which the great organizations of citizen officers and noncommissioned officers developed during the recent war may be perpetuated and kept ready for possible future emergencies. Available officers and enlisted men of the regular army may be assigned appropriate duties in connection with the national guard, the organized reserves, the reserve officers' training corps and the training camps. Citizen officers are to join with regular officers on the general staff in the preparation of policies relating to the organization and training of the national guard and the organized reserves. An important feature of this new law is that while congress prescribes the general plan of the army of the United States, and provides the personnel deemed necessary for its formation, the details of military organization are left to the executive. It is therefore incumbent upon me as secretary of war to acquaint you with the president's interpretation of the general intent of the law, and to make certain decisions as to the executive policy to be followed in organizing our military forces.

An examination of the statute shows that the new law is based on the idea that in the future, as in the past, great wars are to be fought in the main by armies composed of citizen soldiers temporarily drawn into active military service. We still have the conception of a small regular army in time of peace, reenforced upon the outbreak of war by such additional citizen forces as the particular emergency may require. This is our traditional mode of military expansion and this method is clearly contemplated in the act of congress. But whereas in the past the necessary citizen forces have been completely extemporized or materially reorganized upon the occurrence of an emergency, the new law provides that they shall be allocated territorially, that their officers and men shall be assigned to local units, and that as funds become available provision shall be made for the training of these officers and men. In other words, the war force required for immediate mobilization in the event of emergency is to be constituted in time of peace and filled as far as practicable through the enrollment or enlistment of qualified volunteers. Under such a system it is reasonable to expect that the units of the national guard will be maintained at sufficient strength to be effective as a first re-enforcement for the regular army and that the units of the organized reserves will at least include a corps of officers, noncommissioned officers and specialists, organized and trained to receive and train the recruits required in an emergency demanding large forces.

It is with the requirements of this larger war establishment in view that the peace organization of the regular army must be determined. The law provides a limited number of regular enlisted men and a number of regular officers in excess of the number required for service with the regular army proper. This provision shows clearly the intent of congress that a portion of the officers authorized are to be employed in the organization, administration and development of the national guard, the organized reserves, the reserve officers' training corps and the citizens' training camps. It is the president's desire that the regular army shall be so organized as to carry out this intent of congress to the fullest extent. The regular army should, therefore, be formed in a limited number of organizations, each at effective military strength, with the view of releasing the maximum number of selected officers and enlisted men for service with these other branches of the army of the United States.

As the regular army now contains more regiments and other units than can be maintained at effective strength with the authorized enlisted personnel, you are directed to retain a suitable number of units at an enlisted strength effective for immediate military service and to place the units thus rendered surplus "out of commission" until such time as congress shall authorize an increase in the enlisted strength of the regular army. You will assign to the organization retained "in commission" a sufficient number of officers to make them effective for immediate military service, leaving officers not required for service with regular organizations or otherwise, to be employed, under your direction, in the development of the national guard, the organized reserves and the reserve officers' training corps. As the law provides for a military expansion by re-enforcement of the regular army from the organized citizen forces, the president directs that these forces shall be developed to the fullest extent, and that the maximum practicable number of carefully selected officers of the regular army be employed for that purpose. The retention in the regular army of skeletonized military units ineffective for immediate military service is not deemed advisable.

The organization of the regular army into a limited number of effective military units will not only release a greater proportion of officers for duty with other portions of the army of the United States, but will facilitate great economies in the maintenance of the peace establishment. So far as practicable it is my desire that the regular army should be quartered in permanent military posts where suitable shelter for officers and men is now provided. This will reduce the number of occupied wartime cantonments to a minimum and will avoid the necessity of expending large sums for their maintenance or renewal. As I interpret the intent of congress in providing for the division of the country into corps areas, their primary object is to form a decentralized organization for the promotion and development of the national guard, the organized reserves and the reserve officers' training corps. It is my desire therefore that this function should be especially emphasized by the war department. The corps area commanders should be liberally supplied with competent officers to assist them in the performance of their duties and should be held responsible for the development of the national military resources within their several areas as prescribed by law.

JOHN W. WEEKS, Secretary of War.

By order of the secretary of war:
JOHN J. PERSHING, General of the Armies,
Chief of Staff.

ORGANIZATION OF THE NATIONAL GUARD.

Plans for the organization of the national guard were announced by the war department Oct. 10, 1921. The ultimate peace strength of the guard is to be 450,000 men organized into eighteen infantry divisions distributed among the states according to population. The designations of the national guard infantry divisions and the states which will furnish troops to form these divisions follow:

Division and state—
26—Massachusetts.
27—New York.
28—Pennsylvania.
29—Maryland, District of Columbia, Virginia.
30—Georgia, Tennessee, South Carolina, North Carolina.
32—Michigan, Wisconsin.
33—Illinois.
34—Minnesota, North Dakota, South Dakota.
35—Nebraska, Missouri, Kansas.
36—Texas.
37—Ohio.
38—Indiana, West Virginia, Kentucky.
39—Alabama, Florida, Mississippi, Louisiana.
40—California, Utah, Nevada.
41—Idaho, Montana, Wyoming, Oregon, Washington.
43—Maine, New Hampshire, Vermont, Connecticut, Rhode Island.
44—New York, New Jersey, Delaware.
45—Colorado, Oklahoma, New Mexico, Arizona.

"The war department," said Secretary Weeks, in explaining the plan, "during the fifteen months since the passage of the reorganization act of June 4, 1920, has authorized eighteen infantry guard divisions in the nine corps areas. In addition to the eighteen infantry divisions thus allotted there also have been authorized a large number of corps, army and general headquarters troops. Certain cavalry units are also in course of organization, which when completed will be sufficient to form approximately four cavalry divisions.

"Under the law the strength of this force in 1924 is computed on a basis of 800 national guardsmen to each senator and representative—a force of about 450,000 men—the largest guard contingent which the United States has ever undertaken to support in time of peace. To date a force of 126,000 officers and men is now enrolled out of 215,397 allotted for organization on or about June 30, 1922."

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. When any cadet has completed the course of three years satisfactorily he is eligible for promotion and commission as a second lieutenant in any arm or corps in the army in which there may be a vacancy, the duties of which he may have been judged competent to perform.

Appointments—Each congressional district and territory, including Porto Rico, Alaska and Hawaii, is entitled to have two cadets at the academy. The District of Columbia has two. Each state is also entitled to have four cadets from the state at large and eighty-two are allowed from the United States at large, two of whom are appointed upon the recommendation of the vice-president and twenty from among honor graduates of "honor schools." The president is also authorized to appoint not to exceed 180 men from the regular army and national guard who have served for one year. The total number in the academy in September, 1921, was 917. The appointments from a congressional district are made upon the recommendation of the representative in congress from that district and those from the state at large upon the recommendations of the senators of the state. The appointments for the United States at large are made by the president upon his own selection. The appointments from the District of Columbia are made on the recommendation of the district commissioners and those from Porto Rico on the recommendation of the resident commissioner. As far as practicable appointments are made one year in advance of admission. For each candidate appointed two alternates should be nominated. Four cadets from the Philippines are admitted.

Examinations—On the third Tuesday in February of each year the candidate selected for appointment must appear for mental and physical examination before boards of army officers at such places as the war department may designate. Candidates who pass will be admitted to the academy on June 14 following.

Mental Requirements—Each candidate must show that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, and general and United States history. Under certain conditions fully explained in the war department circular of information relative to the appointment and admission of cadets, a copy of which may be obtained upon application to the adjutant of the academy, candidates may, upon presentation of satisfactory high school or college certificates, be excused from the mental examination.

Physical Requirements—No candidate will be admitted who is under 17 or over 22 years of age, or less than five feet four inches in height at the age of 17, or five feet five inches at the age of 18 and upward, or who is deformed or afflicted with any disease or infirmity which would render him unfit for military service. Candidates must be unmarried.

Pay—The pay of a cadet is $780 a year and one ration a day or commutation therefor at 68 cents a day. The total is $1,028.20, to begin with his admission to the academy. No cadet is allowed to receive money or other supplies from his parents or from any other person without the sanction of the superintendent.

Enlistment—Before receiving his warrant of appointment a candidate for admission is required to sign an agreement to serve in the army of the United States eight years from the time of his admission to the academy.

REGULAR ARMIES OF THE WORLD.

The following official tabulation of the populations and approximate strengths of the regular armies of the nations named was published in the Congressional Record June 8, 1921. NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

Established by act of congress March 21, 1866.

Names and Location of Branches—Central, Dayton, O.; Northwestern, Milwaukee, Wis.; Southern, Hampton, Va.; Eastern, Togus, Me.; Western, Leavenworth, Kas.; Marion, Marion, Ind.; Pacific, Santa Monica, Cal.; Danville, Danville, Ill.; Mountain, Johnson City, Tenn.; Battle Mountain Sanitarium, Hot Springs, S. D.

Board of Managers—The president of the United States, the chief justice of the Supreme court, the secretary of war ex officiis, Washington, D. C.; president, Gen. George H. Wood, Dayton, O.; first vice-president, Capt. John C. Nelson, Logansport, Ind.; secretary, James S. Catherwood, Hoopeston, Ill.; Maj. James W. Wadsworth, Geneseo, N. Y.; Col. H. H. Markham, Pasadena, Cal.; Menander Dennett, Lewiston, Me.

General Treasurer—Col. C. W. Wadsworth.

Inspector-General and Chief Surgeon—Col. James A. Mattison.

Requirements for Admission.

1. Honorable discharge from the United States service.

2. Disability which prevents the applicant from earning a living by labor.

3. Applicants for admission will be required to abide by all the rules and regulations made by the board of managers, perform all the duties required of them and obey all the lawful orders of the officers of the home.

4. A soldier or sailor to be admitted must forward with his application his discharge paper, his pension certificate if he is a pensioner and his discharge from a state home if he has been an inmate of such home. These papers are retained at the branch to which he is admitted to prevent their loss or fraud, but are returned to him when he is discharged. Soldiers or sailors whose pensions exceed $16 a month are not admitted to the home except for special reasons.

The National Home for Disabled Volunteer Soldiers is supported by the United States.

STATE SOLDIERS' HOMES.

There are a number of state homes for disabled volunteer soldiers who, for various reasons, are unable to obtain admission to the national homes. The federal government contributes toward the support of the state homes the sum of $100 for each soldier, based upon the average attendance for the year; the remainder of the expenses is paid by the states themselves. Some of these homes are on the cottage plan. Following is a list of the state homes:

California—Yountville.

HOME FOR REGULAR ARMY SOLDIERS.

The United States maintains a home for disabled and discharged soldiers of the regular army at Washington, D. C. All soldiers who have served twenty years in the army and all soldiers who have incurred such disability, by wounds, disease or injuries in the line of duty while in the regular army, as unfits them for further service are entitled to admission to the home. The home is in charge of a board of commissioners, consisting of the governor of the home, the adjutant-general of the army, the judge advocate, the commissary-general, the quartermaster-general, the chief of engineers and the surgeon-general. The present governor is Maj.-Gen. Tasker H. Bliss (retired).

CONFEDERATE SOLDIERS' HOMES.

Confederate veterans of the civil war have a home at Beauvoir, near Biloxi, Miss. The residence there of Jefferson Davis in his last years was secured in 1902 as a refuge for helpless old southern soldiers by the United Sons of Confederate Veterans. It is supported by that society and the United Daughters of the Confederacy. Another home for confederate veterans was opened in Washington, D. C., May 24, 1912, by the women of the Southern Relief association.

UNITED STATES NAVAL ACADEMY.

Annapolis, Md.

The United States naval academy is a school for the practical and theoretical training of young men for the naval service of the United States. The students are styled midshipmen.

The course of study is four years. Midshipmen who graduate are appointed to fill vacancies in the lower grade of the line of the navy, and occasionally to fill vacancies in the marine corps and in certain of the staff corps of the navy.

Appointments — Five midshipmen are allowed for each senator, representative and delegate in congress, five for the District of Columbia, fifteen each year from the United States at large and 100 from enlisted men of the navy. The appointments from the District of Columbia and from the United States at large are made by the president. Enlisted men of the navy are appointed by the secretary of the navy after competitive examination. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the president on the recommendation of the governor of Porto Rico. Candidates must be actual residents of the districts from which they are nominated.

Examinations—Two examinations for the admission of midshipmen are held each year. The first is held on the third Wednesday in February and the other on the third Wednesday in April under the supervision of the civil service commission at certain specified points in each state and territory. All those qualifying mentally, who are entitled to appointment in order of nomination, will be notified by the bureau of navigation, navy department, Washington, D. C., when to report at the academy for physical examination, and if physically qualified will be appointed. Alternates are given the privilege of reporting for mental examination at the same time as the principals. Examination papers are all prepared at the academy and the examinations of candidates are finally passed upon by the academic board. Certificates from colleges and high schools will not be accepted in lieu of the entrance examinations at the naval academy.

Mental Requirements—Candidates will be examined in punctuation, spelling, arithmetic, geography, English grammar, United States history, world's history, algebra through quadratic equations and plane geometry (five books of Chauvenet's geometry or an equivalent).

Physical Requirements—All candidates are required to be citizens of the United States and must be not less than 16 years of age nor more than 20 years of age on April 1 of the calendar year in which they enter the naval academy. A candidate is eligible for appointment the day he becomes 16 and is ineligible on the day he becomes 20 years of age. Candidates are required to be of good moral character, physically sound, well formed and of robust constitution. The height of candidates for admission must not be less than five feet two inches between the ages of 16 and 18 years, and not less than five feet four inches between the ages of 18 and 20 years. The minimum weight at 16 years is 105 pounds, with an increase of five pounds for each additional year or fraction of a year over one-half. Candidates must be unmarried.

Pay—The pay of a midshipman is $750 a year, beginning at the date of his admission. Midshipmen must supply themselves with clothing, books, etc., the total expense of which amounts to $350. Traveling expenses to the academy are paid by the government.

Enlistment—Each midshipman on admission is required to sign articles by which he binds himself to serve in the United States navy during the pleasure of the president of the United States.

PREMIER HARA OF JAPAN ASSASSINATED.

Premier Takashi Hara of Japan was stabbed to death in a railway station in Tokyo on the evening of Nov. 4, 1921, by a young man named Ryihi Nakoka. The premier and a number of other leaders of the seiyu-kai party had come to the station to take a train for Kyoto, where a meeting was to be held. As Mr. Hara passed through the gate leading to the station platform Nakoka leaped from his hiding place and plunged a short sword into M. Hara's left breast, at the same time exclaiming: "The country's enemy!" First aid was adminstered to the stricken premier in the station master's room and he was then taken to his home, where he died within a short time. The assassin insisted that he had no accomplices, but police were of the opinion that his act was the result of a conspiracy.

NAVY PAY TABLE.

COMMISSIONED OFFICERS.

All commissioned officers of the active list of the navy receive the same pay and allowances according to rank and length of service. Officers of the medical, pay and construction corps, chaplains, civil engineers and professors of mathematics have the relative ranks of the various grades of the line, the annual base pay of each grade being as follows:

Admiral (in command of fleet)	$10,000
Vice-admiral (second in command of fleet)	9,000
Rear-admiral, upper half	8,000
Rear-admiral, lower half	6,000
Commodore	6,000
Captain	4,600
Commander	4,100
Lieutenant-commander	3,840
Lieutenant	3,120
Lieutenant (junior grade)	2,600
Ensign	2,120

To each commissioned officer below the rank of rear-admiral is allowed 10 per cent of his yearly base pay for each five years of service in the army, navy and marine corps, but not exceeding in all 40 per cent. Additional provision is made by law that the pay of a captain shall not exceed $5,000, a commander $4,500, and a lieutenant-commander $4,000 per annum.

THE ENLISTED PERSONNEL.

The enlisted personnel of the navy is of various classifications, depending upon their duties. Entry into the service is usually made in the lower ratings and the men are advanced upon the establishment of qualifications for the higher ratings. The following tables show the classifications and the base monthly pay of each rating during the present war as provided by the act of June 17, 1920:

Fleet Naval Reserve.

Up to sixteen years' active service, two months' base pay per year.

After sixteen years' service, transferred, one-third of base pay and all permanent additions.

After twenty years' service, transferred, one-half of base pay and all permanent additions.

Student aviators or student airmen, 50 per cent increase in pay and allowances of rating.

Base Pay Not All.

It is important to note that the foregoing rates of pay are of base pay, that is, they are of the pay not counting allowances or additions which will be discussed hereafter.

Free Clothing Outfit.

A man upon first enlisting in the navy receives free a clothing outfit to the value of $100.

Rations Free.

Enlisted men in the navy receive rations free, that is, they receive their food free. Under certain conditions they receive cash instead of the ration. This in 1920 was 68 cents a day, but is subject to change.

When an enlisted man is on a certain class of duty ashore he may receive subsistence varying from $2.50 to $4.00 a day, which replaces the ration he otherwise would have received.

Allowances for Special Duty.

Coxswains of boats propelled by machinery, coxswains to commanders in chief, seamen in charge of holds, men regularly detailed as

crew messmen, men assigned to duty as jacks-of-the-dust, and as lamplighters, all receive $5.00 a month in addition to their other pay.

Apprentice seamen who are detailed as apprentice petty officers in connection with the instruction of apprentice seamen at naval training stations receive additional pay while so detailed, as follows: Apprentice chief petty officers, $2.50; apprentice petty officers, first class, $2; second class, $1.50; third class, $1 each per month. The complement of apprentice petty officers is four (one in each rating) for each seventy-five apprentice seamen under training.

Chief petty officers detailed as instructors of apprentice seamen at training stations receive $10 a month extra for this special duty.

Enlisted men regularly detailed by the commanding officer as gun captains, excepting for secondary battery guns, shall receive in addition to their pay $5 a month.

Men regularly detailed as signalmen shall receive extra compensation per month as follows: Signalmen, first class, $3; second class, $2; third class, $1.

Enlisted men who are detailed for aviation duty, as student aviators or student airmen, receive 50 per cent increase in pay and allowances of their rating.

Five dollars a month is allowed each man serving on board a submarine vessel, in addition to his regular pay. He is besides allowed $1 additional for each day the submarine is submerged while under way, provided it does not amount to more than $15 in any one month.

A man employed in submarine diving, and not under instruction, or diving for practice, receives extra pay at the rate of $1.20 an hour for the actual time so employed under water.

Enlisted men who qualify as gun pointers and who are regularly detailed by the commanding officer receive the following additional monthly pay:

Heavy gun pointers (for guns of 8 inch caliber or larger):
First class $10
Second class 6

Intermediate gun pointers (for 4 inch to 7 inch guns):
First class $8
Second class 4

Secondary gun pointers (for guns from 1 pounder to 3 inch):
First class $4
Second class 2

Gunnery prizes are awarded to the members of meritorious gun and torpedo crews in three classes, viz: First class, $20; second class, $10, and third class, $5 per man. The members of the winning turret, gun and torpedo crews are also awarded the right to wear the navy "E," signifying "excellent."

An enlisted man detailed as "ship's tailor" on board a vessel having a complement of 600 men or more, exclusive of marines, shall receive $20 per month in addition to the monthly pay of his rating; on a vessel having a complement of 300 to 600 men, $15 per month additional; on a vessel having a complement of less than 300 men, $10 per month additional. An enlisted man detailed as a "tailor's helper" on a vessel having a complement of 600 men or more receives $10 per month in addition to his monthly pay; provided, that the total pay of "ship's tailor" shall not exceed $50 per month and of "tailor's helper" $40 per month.

BUILDING PROGRAMS OF THREE POWERS.

In January, 1921, Josephus Daniels, then secretary of the navy, issued a statement which is given herewith in part:

"As far as we are able to determine from reliable sources of information it is found that when the building programs as authorized and projected are completed the following general situation will exist:

"First. In reference to the British navy, in major ships and in great gun power the United States will be superior. In total tonnage and effective fighting ships the United States will be approximately equal to Great Britain. The United States navy, however, will be considerably weaker than the British navy in light cruisers and the other ships used for protecting the main body of the fleet and in conducting blockading operations.

"We will be slightly inferior in submarines and will have no modern air-craft carriers suitable for operating with the fleet. The lack of fleet aviation forces will place us at a disadvantage in comparison with Great Britain.

"Second. In comparison with the Japanese navy. The United States will be superior to the Japanese in total tonnage of effective ships in the ratio of 2½ to 1. If Japan should build her program projected, but not yet authorized, the ratio would be 1.4 to 1 in favor of the United States. We will be superior in total ships, destroyers and submarines, but inferior in battle cruisers and light cruisers."

Secretary Daniels gave the following as the building program of the three powers:

Great Britain.	Tons.
Battle ships	.....
Destroyers (11)	14,390

EX-EMPEROR CHARLES EXILED.

On pages 292-293 of this volume will be found a brief account of the attempt of ex-Emperor Charles of Austria-Hungary to regain the throne of Hungary. This was in March, 1921. In October of the same year he made a second effort to regain royal power, but this resulted not only in failure to attain his object but in his legal dethronement by the Hungarian parliament and his exile to the island of Madeira. With Zita, the former empress, he flew from Switzerland in an airplane on Oct. 21 and landed in Oedenburg, west Hungary, where he was met by some of his adherents, with whom he proceeded to the vicinity of Budapest. The regent, Admiral von Horthy, assembled a strong government force and resisted the return of the former ruler, knowing that it was opposed by both the little and big ententes. Charles had a comparatively small force of troops commanded by monarchists and he was easily defeated, on Oct. 24, in an engagement at Tota Tovaros.

Charles and his wife were arrested and held prisoners at Komorn, forty miles from Budapest, until an agreement was reached with the allied powers and the little entente that the former king should be dethroned and that he and his family should be exiled and kept under guard. Czecho-Slovakia, Jugo Slavia and Roumania had already mobilized a large number of troops and were prepared to invade Hungary if Charles had been replaced on the throne. Great Britain, France and Italy also notified Hungary that the restoration of Charles would be regarded as a hostile act. On Nov. 6 the Hungarian national assembly passed to its final reading a bill dethroning Charles as king and ousting the Hapsburg dynasty.

With permission of Portugal ex-King Charles and his family were taken by a British warship to Funchal, Madeira, where they were given a residence in a sanitarium.

NATIONAL ENCAMPMENT OF THE AMERICAN LEGION.

The national encampment of the American Legion in Kansas City, Mo., Oct. 31-Nov. 2, 1921, was made notable by the presence of Marshal Ferdinand Foch, commander in chief of the allied armies in the world war; Admiral Sir David Beatty, commander of the British fleet in the battle of Jutland; Gen. Armando Diaz, commander in chief of the Italian armies; Lieut-Gen. Baron Jacques of Belgium; Gen. John J. Pershing, commander in chief of the American armies in France; Maj.-Gen. John A. Lejeune, commander of the marine corps, and other distinguished soldiers and sailors from both sides of the Atlantic. The welcome given each of these by the great assemblage of American soldiers in the convention hall and also on the occasion of the legion parade was one long to be remembered.

The legion elected Hanford MacNider of Mason City, Iowa, as national commander, while it honored Maj.-Gen. Milton J. Foreman with the title of past commander. The daisy was adopted as the official flower of the legion. The next national encampment will be held in New Orleans, La.

TREATY BETWEEN THE UNITED STATES AND COLOMBIA.

On March 9, 1921, President Harding sent the following confidential message to the senate:

"I very respectfully invite the attention of the senate to the pending treaty which has been negotiated between the United States and the republic of Colombia, which is in the hands of your honorable body, with full information relating to its negotiation and its later modification and revision.

"The early and favorable consideration of this treaty would be very helpful at the present time in promoting our friendly relationships. There have been many and long delays in dealing with this treaty until we have been made to seem unmindful, when in truth we have had no thought but to deal with this sister republic in a most cordial consideration. I believe the revised treaty to be a fair expression of our just and friendly relationship with the republic of Colombia and I would rejoice to have our example in dealing with the republic of Colombia to be made an assurance of that promptness and firmness and justice which shall invite added confidence in our government and a new regard for our own republic. WARREN G. HARDING."

The senate committee on foreign relations reported the treaty with certain amendments and on April 12 it was taken up and considered in open executive session. On April 20 the treaty as amended by the committee was ratified by a vote of 69 yeas to 19 nays. Those voting in the negative were:

Borah.	LaFollette.	Poindexter.
Capper.	Lenroot.	Reed.
Dial.	McNary.	Simmons.
Johnson.	Nelson.	Townsend.
Jones (Wash.).	Norbeck.	Wadsworth.
Kellogg.	Norris.	Watson (Ga.).
Kenyon.		

The text of the treaty as amended follows:

"The United States of America and the republic of Colombia, being desirous to remove all the misunderstandings growing out of the political events in Panama in November, 1903; to restore the cordial friendship that formerly characterized the relations between the two countries, and also to define and regulate their rights and interests in respect of the interoceanic canal which the government of the United States has constructed across the Isthmus of Panama, have resolved for this purpose to conclude a treaty and have accordingly appointed as their plenipotentiaries:

* * *

"Who, after communicating to each other their respective full powers, which were found to be in due and proper form, have agreed upon the following:

Article I.

"The republic of Colombia shall enjoy the following rights in respect to the interoceanic canal and the Panama railways, the title to which is now vested entirely and absolutely in the United States of America, without any encumbrances or indemnities whatever:

"1. The republic of Colombia shall be at liberty at all times to transport through the interoceanic canal its troops, materials of war and ships of war without paying any charges to the United States.

"2. The products of the soil and industry of Colombia passing through the canal, as well as the Colombian mails, shall be exempt from any charge or duty other than those to which the products and mails of the United States may be subject. The products of the soil and industry of Colombia, such as cattle, salt and provisions, shall be admitted to entry in the Canal Zone, and likewise in the islands and mainland occupied by the United States as auxiliary and accessory thereto without paying other duties or charges than those payable by similar products of the United States.

"3. Colombian citizens crossing the Canal Zone shall, upon production of proper proof of their nationality, be exempt from every toll, tax or duty to which citizens of the United States are not subject.

"4. Whenever traffic by the canal is interrupted, or whenever it shall be necessary for any other reason to use the railway, the troops, materials of war, products and mails of the republic of Colombia, as above mentioned, shall be transported on the railway between Ancon and Cristobal, or on any other railway substituted therefor, paying only the same charges and duties as are imposed upon the troops, materials of war, products and mails of the United States. The officers, agents and employes of the government of Colombia shall, upon production of proper proof of their official character or their employment, also be entitled to passage on the said railway on the same terms as officers, agents and employes of the government of the United States.

"5. Coal, petroleum and sea salt, being the products of Colombia, for Colombian consumption, passing from the Atlantic coast of Colombia to any Colombian port on the Pacific coast, and vice versa, shall, whenever traffic by the canal is interrupted, be transported over the aforesaid railway free of any charge except the actual cost of handling and transportation, which shall not in any case exceed one-half of the ordinary freight charges levied upon similar products of the United States passing over the railway and in transit from one port to another of the United States.

Article II.

"The government of the United States of America agrees to pay at the city of Washington to the republic of Colombia the sum of $25,000,000, gold, United States money, as follows: The sum of $5,000,000 shall be paid within six months after the exchange of ratifications of the present treaty and, reckoning from the date of that payment, the remaining $20,000,000 shall be paid in four annual installments of $5,000,000 each.

Article III.

"The republic of Colombia recognizes Panama as an independent nation and taking as a basis the Colombian law of June 9, 1855, agrees that the boundary shall be the following: From Cape Tiburon to the headwaters of the Rio de la Miel and following the mountain chain by the ridge of Gandi to the Sierra de Chugargun and that of Mali going down by the ridges of Nigue to the heights of Aspave and from thence to a point on the Pacific halfway between Cocalito and La Arvita.

"In consideration of this recognition the government of the United States will, immediately after the exchange of the ratifications of the present treaty, take the necessary steps in order to obtain from the government of Panama the dispatch of a duly accredited agent to negotiate and conclude with the government of Colombia a treaty of peace and friendship, with a view to bring about both the establishment of regular diplomatic relations between Colombia and Panama and the adjustment of all questions of pecuniary liability as between the two countries, in accordance with recognized principles of law and precedents.

Article IV.

"The present treaty shall be approved and ratified by the high contracting parties in conformity with their respective laws and the

ratifications thereof shall be exchanged in the city of Bogota as soon as may be possible.

"In faith whereof the said plenipotentiaries have signed the present treaty in duplicate and have hereunto affixed their respective seals."

AMERICA'S UNKNOWN WARRIOR BURIED.

Following the example of France, Britain and Italy, the United States on Armistice day, Nov. 11, 1921, paid tribute to those of her sons who died in the world war by burying with striking ceremonies an unknown dead warrior in Arlington cemetery at the national capital. The ceremonies began at Chalons-sur-Marne, France, on Oct. 23, with the selection of the dead hero to whom the supreme mark of honor was to be awarded. From the four American cemeteries of Romagne, Triaucourt, Bois Belleau and Bony the bodies of four unidentified American soldiers were brought to Chalons-sur-Marne and placed in the city hall with guards of honor both outside and within the building. On the morning of the 24th the choice from among the four bodies was made by Sergt. Edward Younger, a fine type of young American, who was selected from among six pallbearers sent from the Rhine on account of his fine war record. Sergt. Younger walked slowly round the four coffins, and then indicated his choice by placing upon one of them a bunch of roses. Next the body was transferred to an ebony coffin, and left to lie in state just within the main door of the town hall. Presently the townspeople and the peasants from the country, who knew the Americans well in war days, began to defile past, and soon the coffin was buried under piled masses of flowers. The wide square in front of the town hall was filled with troops, and all around and all along the half-mile route to the station there were people—men and women and children—who had seen the war at very close hand.

At 5 o'clock the crowd saw Maj.-Gen. Henry T. Allen, Maj.-Gen. Harry L. Rogers and the French Gen. Duchesne and a number of other officers and officials emerge on to the steps of the hotel de ville. Then, to the crash of presented rifles and the blare of saluting bugles, the "unknown American soldier, who gave his life during the world war," was borne out in the pale sunshine by six of his comrades.

Past the silent crowds between two lines of troops the unknown hero was borne to the station, and after a short wait there the journey to Paris and Havre was begun. In Paris the car in which the body had been placed was saluted by a company of French infantry and by M. Maginot, the French minister of pensions, who accompanied the remains to Havre as the representative of the French government. At Havre the coffin was placed on a gun carriage and taken to the cruiser Olympia—Dewey's flagship in the battle of Manila bay. Business was suspended in the city during the afternoon and school children threw flowers on the coffin as it passed. The cortege stopped beside the Olympia, and there Pension Minister Maginot pinned the French Legion of Honor decoration on the United States flag draping the coffin. Three French destroyers fired a salute of 101 guns as the Olympia sailed out of the harbor.

The Olympia arrived in Chesapeake bay on the evening of Nov. 8, and on the next afternoon it arrived at the Washington navy yard, where the coffin was taken ashore, put in a hearse and, escorted by a squadron of cavalry, brought to the capitol, in the rotunda of which it was placed on the catafalque on which had rested the bodies of Lincoln, Garfield and McKinley. There soon after President and Mrs. Harding, Chief Justice Taft, Vice-President Coolidge, the secretaries of war and the navy, Gen. Pershing and many others placed wreaths of flowers on and around the catafalque.

On the following day the body lay in state in the capitol rotunda as thousands of people passed the catafalque. A guard of honor representing each branch of the army and navy was on duty until the final services took place on Armistice day, Nov. 11. The funeral procession, which moved up Pennsylvania avenue to the white house and thence to the Arlington national cemetery on the west bank of the Potomac, was a most impressive one. The men who carried the coffin to the waiting gun carriage were led by Sergt. Samuel Woodfill, first mentioned in Gen. Pershing's list of war heroes, and with him were Sergt. Harry Taylor of the cavalry; Sergt. Thomas D. Saunders of the engineers; Sergt. Louis Razga of the coast artillery; Sergt. James W. Dell of the field guns, and, for the navy, Chief Torpedo Man James Delaney and Chief Water Tender Charles Lee O'Connor, and Sergt. Ernest A. Janson of the marines.

THE FUNERAL PROCESSION.

It was originally intended that Gen. Pershing was to have been the grand marshal of the military ceremony, but he preferred a less conspicuous part and marched on foot all the way to the cemetery. His place was taken by Maj.-Gen. Bandholtz. Following Gen. Bandholtz and his staff came an army band playing a dirge. Next moved the first of the soldier and sailor escort, a platoon of infantry with fixed bayonets and behind it the carts of horse-drawn machine guns. Behind these, in blocks, came sailors, white hatted and with long streamers of crepe drooping from their colors.

Then came the clergy headed by Bishop Brent, former senior chaplain of the A. E. F. With

him were Chaplain Lazaron of the reserve and Chaplains Frazier of the navy and Axton of the army.

Immediately behind them came the flag-draped coffin borne on the caisson, with the honorary pallbearers marching on the outside of the column beside it and the eight distinguished living heroes, selected as body bearers, walking on the inside of the column. Six black horses drew the funeral car. On the gunlimber the simple, flag-wrapped casket rode high with only a handful of the flowers and tokens that had been lavished to deck it. Among them lay the withered cluster of French blossoms that had come with the unknown hero all the journey home.

Then immediately following the unknown hero's body walked President Harding and Gen. Pershing side by side, with their aids at a short distance. Admiral Coontz, Vice-President Coolidge, Admiral Jones, commanding the Atlantic fleet, and Chief Justice Taft came next. Former President Wilson was to have come next in line, according to program, but having arrived late at the start, he took a place farther back.

The Supreme court followed and then Lieut.-Gens. Young and Miles, former commanders of the army. Then came the cabinet, marching in two lines, governors of some states followed, and then Maj.-Gen. Lejeune, commander of the marine corps. Then came members of the senate, marching in columns of eights. Speaker Gillett and members of the house of representatives came next. Holders of the medal of honor also marched, eight abreast; then came 132 representatives of all who served in the world war, not more than three from a state. War veteran societies followed.

It was 9:15 a. m. when the head of the procession reached the white house. When the caisson had passed President Harding turned out of his place in the line and after passing through the executive offices went to the front of the white house grounds to review the remainder of the line as it passed on its way to Arlington. The president later took a motor car for the amphitheater.

While the president was reviewing the procession there came a moment's delay and he stepped into the street and shook hands with the medal of honor men. When Former President Wilson passed in his carriage Mr. Harding saluted him by taking off his hat and the former president returned the salute. After passing the white house Mr. Wilson's carriage turned out of the procession and drove him home.

While the remainder of the procession was winding its way to Arlington the great amphitheater was filling with the guests invited to the ceremony. The body arrived there at 11:15 a. m. At the top of the hill at the other end of the Potomac bridge the line swung on across the old parade toward the Arlington gate. There the artillery and cavalry turned aside to stand at attention while the services in the cemetery were in progress. One battery of guns alone moved into the inclosure of the dead, lining up on the ridge crest for the last salute. At the gate the marine band was waiting for the foot troops and the casket and marched in ahead.

Swinging around to the west entrance to the amphitheater, the escort moved into line and, with rifles at present, stood as the casket was carried by the body bearers in through the high pillared colonnade to the right and around to the apse at the front, where President Harding and members of the cabinet, Bishop Brent and many dignitaries awaited it.

PRESIDENT HARDING'S TRIBUTE.

After some preliminary services President Harding made the following address:

Mr. Secretary of War, Ladies and Gentlemen: We are met to-day to pay the impersonal tribute. The name of him whose body lies before us took flight with his imperishable soul. We know not whence he came, but only that his death marks him with the everlasting glory of an American dying for his country.

He might have come from any one of millions of American homes. Some mother gave him in her love and tenderness and her most cherished hopes. Hundreds of mothers are wondering to-day, finding a touch of solace in the possibility that the nation bows in grief over the body of one she bore to live and die, if need be, for the republic.

If we give rein to fancy, a score of sympathetic chords are touched, for in this body there once glowed the soul of an American with the aspirations and ambitions of a citizen who cherished life and its opportunities. He may have been a native or an adopted son; that matters little, because they glorified the same loyalty, they sacrificed alike.

We do not know his station in life, because from every station came the patriotic response of the 5,000,000. I recall the days of creating armies and the departing of caravans which braved the murderous seas to reach the battle lines for maintained nationalism and preserved civilization.

The service flag marked mansion and cottage alike, and riches were common to all homes in the consciousness of service to country.

We do not know the eminence of his birth, but we do know the glory of his death. He died for his country, and greater devotion hath no man than this. He died unquestioning, uncomplaining, with faith in his heart and hope on his lips, that his country should triumph and its civilization survive. As a typical soldier of this representative democracy he fought and died, believing in the indisputable justice of his country's cause. Conscious of the world's upheaval, appraising the magnitude of a war the like of which had never horrified humanity before, perhaps he believed his to be a service destined to change the tide of human affairs.

In the death gloom of gas, the bursting of shells and the rain of bullets men face more intimately the great God over all, their souls are aflame, and consciousness expands and hearts are searched.

With the din of battle, the glow of conflict and the supreme trial of courage come involuntarily the hurried appraisal of life and the contemplation of death's great mystery. On the threshold of eternity many a soldier, I can well believe, wondered how his ebbing blood would color the stream of human life flowing on after his sacrifice. His patriotism was none less if he craved more than triumph of country; rather it was greater if he hoped for a victory for all humankind.

Indeed, I revere that citizen whose confidence in the righteousness of his country inspired belief that its triumph is the victory of humanity.

This American soldier went forth to battle with no hatred for any people in the world, but hating war and hating the purpose of every war for conquest. He cherished our national rights and abhorred the threat of armed domination; and in the maelstrom of destruction and suffering and death he fired his shot for liberation of the captive conscience of the world. In advancing toward his objective was somewhere a thought of a world awakened; and we are here to testify

undying gratitude and reverence for that thought of a wider freedom.

On such an occasion as this, amid such a scene, our thoughts alternate between defenders living and defenders dead. A grateful republic will be worthy of them both. Our part is to atone for the losses of heroic dead by making a better republic for the living.

Sleeping in these hallowed grounds are thousands of Americans who have given their blood for the baptism of freedom and its maintenance; armed exponents of the nation's conscience. It is better and nobler for their deeds. Burial here is rather more than a sign of the government's favor; it is a suggestion of a tomb in the heart of the nation sorrowing for its noble dead

To-day's ceremonies proclaim that the hero unknown is not unhonored. We gather him to the nation's breast, within the shadow of the capitol, of the towering shaft that honors Washington, the great father, and of the exquisite monument of Lincoln, the martyred savior. Here the inspirations of yesterday and the conscience of to-day forever unite to make the republic worthy of his death for flag and country.

Ours are lofty resolutions to-day, as with tribute to the dead we consecrate ourselves to a better order for the living. With all my heart I wish we might say to the defenders who survive, to mothers who sorrow, to widows and children who mourn, that no such sacrifice shall be asked again.

It was my fortune recently to see a demonstration of modern warfare. It is no longer a conflict in chivalry, no more a test of militant manhood. It is only cruel, deliberate, scientific destruction. There was no contending enemy; only the theoretic defense of a hypothetic objective. But the attack was made with all the relentless methods of modern destruction.

There was the rain of ruin from the aircraft, the thunder of artillery followed by the unspeakable devastation wrought by bursting shells; there were mortars belching their bombs of desolation; machine guns concentrating their leaden storms; there was the infantry, advancing, firing and falling—like men with souls sacrificing for the decision. The flying missiles were revealed by illuminating tracers, so that we could note their flight and appraise their deadliness. The air was streaked with tiny flames marking the flight of massed destruction, while the effectiveness of the theoretical defense was impressed by the simulation of dead and wounded among those going forward, undaunted and unheeding.

As this panorama of unutterable destruction visualized the horrors of modern conflict there grew on me the sense of the failure of a civilization which can leave its problems to such cruel arbitrament. Surely, no one in authority, with human attributes and full appraisal of the patriotic loyalty of his countrymen, could ask the manhood of kingdom, empire or republic to make such sacrifice until all reason had failed, until appeal to justice through understanding had been denied, until every effort of love and consideration for fellow men had been exhausted, until freedom itself and inviolate honor had been brutally threatened.

I speak not as a pacifist fearing war but as one who loves justice and hates war. I speak as one who believes the highest function of government is to give its citizens the security of peace, the opportunity to achieve and the pursuit of happiness.

The loftiest tribute we can bestow to-day—the heroically earned tribute—fashioned in deliberate conviction, out of unclouded thought, neither shadowed by remorse nor made vain by fancies—is the commitment of this republic to an advancement never made before.

If American achievement is a cherished pride at home, if our unselfishness among nations is all we wish it to be, and ours is a helpful example in the world, then let us give of our influence and strength, yea, of our aspirations and convictions, to put mankind on a little higher plane, exulting and exalting with war's distressing and depressing tragedies barred from the stage of righteous civilization.

There have been a thousand defenses justly and patriotically made; a thousand offenses which reason and righteousness ought to have stayed. Let us beseech all men to join us in seeking the rule under which reason and righteousness shall prevail.

Standing to-day on hallowed ground, conscious that all America has halted to share in the tribute of heart and mind and soul to this fellow American, and knowing that the world is noting this expression of the republic's mindfulness, it is fitting to say that his sacrifice, and that of the millions dead, shall not be in vain. There must be, there shall be, the commanding voice of a conscious civilization against armed warfare.

As we return this poor clay to its mother soil, garlanded by love and covered with the decorations that only nations can bestow, I can sense the prayers of our people, of all peoples, that this Armistice day shall mark the beginning of a new and lasting era of peace on earth, good will among men. Let us join in that prayer—

Our Father who art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done on earth as it is in heaven. Give us this day our daily bread and forgive us our trespasses as we forgive those who trespass against us, and lead us not into temptation, but deliver us from evil, for Thine is the kingdom and the power and the glory forever. Amen.

At the close of his address President Harding placed the medal of honor and distinguished service cross on the casket. Lord Beatty, admiral of the British fleet, then bestowed the Victoria cross on the unknown dead. It was the first time it had been given any one not a British subject. Marshal Foch followed with the military medal and war cross of France. Similar honors were paid by Prince Lubomirski of Poland, Gen. Diaz of Italy, Prince Bibeco of Roumania, Dr. Stepanek of Czecho-Slovakia and Gen. Jacques of Belgium. The last named tore from his own tunic the medal of valor, pinned there by the king of Belgium, and laid it on the casket.

Religious services, including the singing of "O God, Our Help in Ages Past," "I Know That My Redeemer Liveth" and "Rock of Ages," followed, after which the hero bearers lifted the flag-draped coffin from the stage and carried it to the stone crypt, in which a little of the soil of France had been placed. The words of the burial service were said by Bishop Brent and flowers from the war mothers of America and England were laid in place. Those from across the ocean were brought by Mrs. Amelia Emma McCudden, who lost three sons in the war, one a well-known aviator. An Indian chief laid upon the coffin his wand of office and feathered war bonnet. Then the body of the unidentified American warrior was lowered into its last resting place, a salute was fired, and with the sounding of "taps" by a bugle the ceremonies came to an end.

ITALY HONORS UNKNOWN DEAD SOLDIER.

Italy paid tribute to her dead in the world war by placing with striking ceremonies the body of an unidentified soldier in the monument to Victor Emmanuel II., on the Piazza Venezia, in Rome. The remains were brought from Aquileia Nov. 2 and, escorted by thousands

of troops, carried in procession to the Church of Santa Maria degli Angeli. There the dead warrior lay in state until the 4th, when, on the third anniversary of the armistice between Italy and Austria, he was taken to the Victor Emmanuel monument and placed in a tomb constructed for him on one of the terraces of the memorial. The burial took place in the presence of the king and a distinguished gathering of diplomats, legislators, soldiers and others. No words were spoken, all action being taken in silence except for the low beating of drums and the tolling of all the church bells in Rome.

WHERE THE UNIDENTIFIED DEAD HEROES REST.

France—At the Arc de Triomphe.
Britain—In Westminster abbey.
Italy—In Victor Emmanuel monument on the Piazza Venezia.
United States—In Arlington national cemetery.

OBSERVANCE OF ARMISTICE DAY IN 1921.

Armistice day, Nov. 11, was generally observed throughout the United States and the allied countries in Europe with special exercises of various kinds. At 11 a. m., the hour when the armistice went into effect in 1918, all traffic stopped for two minutes while people stood, facing toward France and saying silent prayers. In the United States business was suspended to some extent, the day having been declared a general holiday. An unusual feature was the planting of memorial trees in honor of the American soldiers and sailors who fell in the war.

Armistic day was made a legal holiday by the Illinois legislature in 1921.

SETTLEMENT OF UPPER SILESIAN DISPUTE.

Germans and Poles struggled for the mastery in Upper Silesia in 1921, with the result that much blood was shed and considerable property destroyed. Under the terms of the treaty of Versailles the disputed territory was occupied by detachments of allied troops under command of Gen. Lerond of the French army, pending the taking of a plebiscite to determine the location of new boundaries. The general direction of affairs was in the hands of an interallied commission. The terms of the plebiscite were somewhat vague and caused many conflicting views to be held both in Poland and Germany and also among the allies themselves. The plebiscite took place March 20, and several days later it was announced that the vote had been 716,408 for Germany and 471,406 for Poland. However, it was contended by the Poles that the question of boundaries should not be decided by the total vote for the whole of Upper Silesia but by the votes in the various districts. The dispute was accentuated and not settled by the plebiscite, and disorders increased until they culminated in an uprising by Polish residents, who refused to be brought under the German flag under any condition. There was much fighting between irregular bodies of troops in May and June and the casualties were reported to number between 6,000 and 7,000. The leaders of the Polish insurgents were Adelbert Korfanty and Count Mathias Mielczynski. The chief of the German forces was Gen. Hoefer. The allied forces in the disturbed district were increased, and finally in the last week in June the opposing generals were induced to withdraw from the areas in dispute pending a decision of the whole matter by the allied powers.

In May Poland, through Prince Lubomirski, Polish minister to the United States, sent a note to the United States protesting that an unfavorable decision in the matter of Upper Silesia would return "more than 1,000,000 people back to German bondage." "This is not a purely European matter," the note concluded. "On the just solution of the matter of Upper Silesia depends the pacification of this province and the stimulation of its productivity, which has a great importance in the re-establishment of the economic stability of the whole world."

In a reply made public June 18 Secretary of State Hughes said:

"I have the honor to acknowledge the receipt of your note of May 11, in which you recite the reasons why, in your opinion, certain districts of Upper Silesia should be assigned to Poland and urge that the representatives of the government of the United States on the supreme council, the council of ambassadors and the reparations commission be instructed to exert their influence in favor of a settlement of the matter strictly in accord with the treaty of Versailles and the result of the recent plebiscite.

"In reply, I have the honor to inform you that in my opinion the settlement of such boundary disputes as arise in the matter under consideration is a matter of European concern in which, in accord with the traditional policy of the United States, this government should not become involved.

"The attitude of the government in this matter is clearly understood by its representatives in Europe, which will, therefore, so far as at present may be seen, take no part in the discussions concerning Upper Silesia, and will express no opinion as to the settlement."

LEAGUE COUNCIL ACTS.

The question of the delimitation of the frontier in Upper Silesia, which had been referred to the league of nations by the principal allied and associated powers, was discussed during the month of September. Following the first extraordinary session of the council, held in Geneva on Aug. 29, under the presidency of Viscount Ishii (Japan), when the terms of reference and the main facts of the dispute were brought before the council, a second extraordinary session was held on Sept. 1. Viscount Ishii, who had agreed to act as rapporteur, read a detailed proposal, which is here given in full:

"1. With a view of enabling the council to arrive in complete independence at an opinion on the question which has been submitted to it, its members are unanimous in thinking it desirable to intrust the preliminary examination of the question to the representatives of Belgium, Brazil, China and Spain, states which have so far taken no part in the preliminary investigations nor in the discussions to which these investigations have given rise.

"2. It will be the duty of the representatives of these powers to study the various aspects of the problem, with the help of the documents forwarded by the supreme council and of any other means of information.

"3. They will have the right to seek such information as they may think useful and to obtain such expert advice as may be necessary. It is desirable that the experts who will be appointed should have taken no part in the previous investigations and discussions, and that they should be chosen, as far as possible, from among such persons as have already collaborated in the work of the technical organizations of the league. With a view to supplying local information which may be of use, inhabitants (both German and Polish)

of the territory of Upper Silesia may be heard.

"4. The services of the secretariat will be at their disposal for all assistance that may be required.

"5. They will carry on their work in complete freedom and without any procedure being established. They will report to the council, who will continue to keep in touch with the matter, and who will, at any moment, be able to meet so as to examine the results of the investigations which are taking place."

The four members of the council accepted the task and began their study of the great mass of data submitted to them. It was agreed that their report and the decision of the council should be regarded as final.

SYNOPSIS OF DECISION.

Following is a synopsis of the decision of the council of the league of nations with regard to Upper Silesia as announced Oct. 20, 1921:

The report falls into four main parts. In annex 1 the council sets out the circumstances in which it undertook its task and the general principles by which it was guided in arriving at its decision. In annex 2 the council traces the suggested line of demarcation in detail. In annex 3 the council enumerates the important provisions designed to secure continuity in the life of Upper Silesia after the partition and to reduce to a minimum the difficulties of the period of adaptation. Finally, in annex 4 the council sets out its decisions on the rights of nationality and domicile and protection of minorities in Upper Silesia.

Describing in annex 1 how it accepted on Aug. 29 the invitation to settle the Upper Silesian problem, which was referred to it on Aug. 12 by M. Briand on behalf of the supreme council of the principal allied powers, the council insists that it has endeavored to interpret faithfully and in an equitable spirit the provisions of the treaty of Versailles with regard to Upper Silesia. The council being convinced that its duty was above all to endeavor to find a solution in conformity with the wishes of the inhabitants, as expressed by the plebiscite, while taking into account the geographical and economic situation of the various districts, has been led to the conclusion that it is necessary to divide the industrial region of Upper Silesia. Owing to the geographical distribution of the population and the mixture of the racial elements, any division of this district must inevitably result in leaving relatively large minorities on both sides of the line and in separating important interests.

In these circumstances the council considered that it would be desirable to take measures to guarantee during a provisional period of readjustment the continuity of the economic life of this region, which, owing to the density of its population, the number of its industrial undertakings, the closely woven network of its means of communication, possesses the character of a vast agglomeration. It was also of the opinion that it would be desirable to provide for the protection of minorities.

The council carefully examined various solutions for giving accurate and faithful expression to the results of the plebiscite.

It recognized that solutions based on calculations of the proportion of votes would give results which would constitute an injustice for one side or the other, and it endeavored to find a system which, when applied, would assign to each state a number of electors, not differing appreciably from the total number of votes given in its favor, and which would, at the same time, as far as possible, equalize and reduce the minorities.

Guided by these considerations, as well as by the geographical and economic consideration referred to in the treaty, the council came to the conclusion that the most equitable solution would be obtained by the frontier line described in annex 2, and the adoption of which it unanimously decided to recommend.

After explaining the measures considered necessary in order to insure the continuity of the economic and social existence of Upper Silesia, the council argues that the solution of these problems should be achieved by means of arrangements effected under the form of a general convention between Germany and Poland, and expresses the opinion that the conclusion of a general convention, which will place Upper Silesia under a special regime during the transitional period, seems to correspond to the intentions already expressed by the states concerned. Both Germany and Poland have, indeed, already considered the establishment of special institutions for this region.

The council further considers that it is necessary to set up a commission composed of an equal number of Germans and Poles from Upper Silesia, and of a president of another nationality, who might be designated by the council of the league of nations. This commission might be called the "Upper Silesian mixed commission." It would be essentially an advisory organ.

Further, it would also be expedient to constitute an arbitral tribunal to settle any private disputes which might be occasioned by the application of the temporary measures.

All disputes in connection with the carrying out and the interpretation of the general convention should be settled in conformity with the provisions of this convention, and, where necessary, with the covenant of the league of nations.

A certain time will elapse before the temporary regime referred to above can be definitely put in force. It will be for the principal allied and associated powers to take all measures necessitated by this preliminary period. Meantime it is important that the mixed commission referred to above should be appointed without delay in order that it may give its assistance to the interallied commission, which will take measures for preparing the transition from the present situation to the provisional regime.

In annex 2 the council traces in necessarily minute detail the proposed frontier line.

Annex 3 contains the important transitional measures of an economic nature, as follows:

RAILWAYS.

The administration of railway and tramway systems which belong to private concerns or municipalities shall continue to be governed by the terms of their concessions, as regards rights and obligations. For the German state railways a joint system of operation shall be put into force in the plebiscite area for a period of fifteen years. The amount of rolling stock allotted to the plebiscite area shall be determined in accordance with article 371 of the treaty of Versailles. Railway rates shall be uniform. The benefit of any special rate in force in the plebiscite area shall extend to goods of the same kind coming from or going to Poland, Germany or any other country.

The administration of the state insurance and social insurance of employes of the Silesian railway system shall be undertaken by that system. A single accounts office shall be set up for the whole system. Expenses of new construction shall be charged to a separate account and shall be borne by the state on whose territory they are carried out. The working capital necessary for operation shall be lent by the German state; the interest on this capital will be charged to the account of the system. The profits or deficit shall be divided between the two countries, in proportion to the length of the line belonging to each and the amount of traffic.

MAP OF UPPER SILESIAN FRONTIERS AS FIXED BY THE COUNCIL OF THE LEAGUE OF NATIONS.

In so far as the territory which comprises the existing water supply systems has not been entirely allotted to one of the two countries, in default of a special agreement between the parties, the existing systems shall be maintained. For this purpose a system of reciprocal obligation shall be established.

GERMAN CURRENCY.

During a period which shall not exceed fifteen years the German mark shall remain the only legal unit of currency in the plebiscite area and the Polish government shall recognize in the territory assigned to Poland the rights and privileges of the German reichsbank, which shall be permitted to maintain its branches in such territory.

The two governments may decide by common agreement to modify this system before the expiration of this period. Failing agreement between the two governments and in the case when a modification of the monetary system should become necessary, a date would be fixed as from which the German mark would cease to be the only legal unit of currency.

During the period in which the German monetary system is maintained in the Polish zone the postal, telegraph and telephone charges shall be fixed in German currency.

CUSTOMS FRONTIER.

The customs frontier will be made conterminous with the new political frontier as soon as the latter has been fixed.

The German and Polish customs law and customs tariffs shall be applied, with the following exceptions:

1. During a period of six months goods coming from other countries destined for the plebiscite area and on which the customs duties levied at the German or Polish frontier have been paid before the date of the partition of Upper Silesia shall cross the frontier without duty.

2. During a period of fifteen years the natural products which originate in and come from one of the two zones of the plebiscite area, and are destined for consumption or use in the other zone, shall cross the frontier free of duty.

3. (a) During a period of six months raw, half-manufactured and unfinished products of the industrial establishments of one of the two zones of the plebiscite area, destined to be used or finished in the industrial establishments of the other zone, shall cross the frontier free of duty. The permits issued for the entry of those products shall mention the names of the consignors and consignees.

(b) During a period of fifteen years raw, half-manufactured and unfinished products originating in or coming from the industrial establishments of one of the two zones of the plebiscite area, and which are to be finished in the industrial establishments of the other zone, shall cross the frontier free of duty when these are intended for free importation into the country of origin. The permits issued for the entry of these products shall mention the names of the consignors and the consignees.

4. In conformity with article 268 of the treaty of Versailles natural or manufactured products which originate in and come from the Polish zone of the plebiscite area shall on importation into German customs territory be exempt from all customs duty during a period of three years. The period of three years should be reckoned from the notification of the delimitation of the frontier to Germany and to Poland.

With regard to the export regulations, the two countries shall undertake to facilitate during a period of fifteen years the export from their respective territories of such products as are indispensable for the industry of either zone of the plebiscite area, it being understood that the entrance duties shall be paid by these goods upon their importation into German or Polish territory, apart from the exceptions detailed in the foregoing paragraphs.

Any arrangement with regard to the customs regime on the new Polish-German frontier in Upper Silesia which is not an application of the principles stated above shall be considered as an ordinary commercial agreement between Poland and Germany.

PRODUCTS OF THE MINES.

In conformity with article 90 of the treaty of Versailles Poland shall permit for a period of fifteen years the exportation to Germany of the products of the mines in the Polish zone of the plebiscite area. As regards coal, account shall be taken of the provisions of the different treaties of peace and of the international decisions and agreements between Germany, Poland and the countries directly or indirectly concerned in the importation of coal from Upper Silesia, which impose obligations on Germany and Poland in respect of coal.

Germany shall permit for a period of fifteen years the exportation to the Polish zone of the plebiscite area of the products of the mines in its territory, under the conditions laid down in article 90. The quantities shall be calculated on the basis of the average exchange of these products in the years 1911 to 1913.

The German and Polish governments shall recognize for a period of fifteen years those unions of employers and workers whose activities take place within the plebiscite area. These unions may enter into collective contracts throughout the whole plebiscite area.

The transfer of the funds of German social and state insurances to Poland, in so far as concerns the portion of Upper Silesia assigned to her, should take place in conformity with article 312 of the treaty of Versailles.

The Polish government shall establish as soon as possible for the Polish zone the special insurance societies and the special jurisdiction for administrative matters and for the hearing of causes.

The local benefit societies, whether in the Polish zone or in the whole of the plebiscite area, shall be maintained for a period of fifteen years, unless the two governments shall agree to divide them at an earlier date.

During a period of fifteen years any inhabitant regularly domiciled in the plebiscite area, or having a regular or professional occupation therein, shall receive a circulation permit free of payment, which will permit him to cross the frontier without other formalities.

GENERAL PROVISIONS.

The provisions in force in the plebiscite area, especially with regard to mining, industrial or commercial undertakings, and the existing labor legislation—including the system of inspection—shall remain in force in the portion of the plebiscite area assigned to Poland until such time as Poland shall have passed legislation on these matters applicable to the whole of its territory, which may be substituted for the above. Nevertheless, it is understood that Poland shall have the right to introduce in the Polish Silesian zone any modifications which Germany sees fit to adopt in her territory.

The two countries shall recognize and respect, in the territory which shall be allotted to them, rights of all kinds, in particular concessions and privileges acquired at the date of the partition by individuals, companies or other legal entities.

Poland shall renounce for a period of fifteen years the powers granted by article 92 as regards the expropriation of industrial undertakings, mines, or deposits, save where such powers are indispensable to insure continued operation.

Any dispute between the German and Polish governments which may occur within a period of fifteen years in respect of any legislative measure adopted by either of the two countries for the control of companies, or industrial or commercial enterprises, and limiting in a manner contrary to justice the freedom of these companies or enterprises, from the point of view of the nationality of their personnel, of their directors or of their capital, may be referred by the government concerned to the council of the league of nations, whose decision both governments undertake to accept.

RIGHTS OF NATIONALITY.

Discussing in annex 4 the rights of nationality and domicile and protection of minorities, the report lays down that questions relating to the nationality of persons domiciled, at the date of the definitive allocation of the territory of Upper Silesia, in the portion allotted to Poland will be decided in accordance with article 91 of the treaty of peace of Versailles and articles 3, 4, 5 and 6 of the treaty of June 28, 1919, between the United States of America, the British empire, France, Italy, and Japan of the one part, and Poland of the other part.

Due provision is also made for the right of option, and the report concludes with the recommendation that any petition addressed by one or more of the inhabitants of Upper Silesia to the council of the league of nations with regard to these provisions or to the execution of the provisions of the treaty of June 28, 1919, in so far as these provisions affect persons belonging to racial, religious, or linguistic minorities, should be sent to the government in whose territory the pe-

titioners are domiciled. This government shall be bound to forward them, with or without observations, to the council of the league of nations for consideration.

—

The decision was looked upon in Germany as in the nature of a national disaster and caused a cabinet crisis. However, it was apparently accepted as inevitable and steps were taken to carry out the provisions of the finding. Poland also took similar steps.

PROGRESS IN PALESTINE.

The following statements are taken from a report covering the year ending June 30, 1921, made by Sir Herbert Samuel, the British high commissioner of the mandatory districts of Palestine and Trans-Jordania. This report was to serve as a basis for the British government's statement to the permanent mandates commission of the league of nations. The high commissioner points out that the country, if properly developed, ought to experience a future far more prosperous than it had during the time before the war. Its geographical position may once more render it an important center to the commercial traffic of the larger surrounding territories. "Within the limits of the province," the high commissioner says, "it offers the varieties of soil and climate of a continent." He describes the sixty-four Jewish agricultural settlements made since the inception of the Zionist movement and draws a drastic comparison between their prosperity and the condition of the rest of the country with its hopelessly primitive agricultural methods.

The entire population, according to the report, is a little short of 700,000, or less than the province of Galilee alone in the time of Christ. Four-fifths of the population are Moslems. It leaves a small percentage of genuine Bedouin Arabs, while the rest, although they speak Arabic and are termed Arabs, are largely of mixed race. There are 77,000 Christians, the majority of whom belong to the Orthodox church and speak Arabic. Half a century ago there was only a handful of Jews in the country and the overwhelming majority of the Jewish population has entered it during the last forty years. The total number of members of that race in Palestine is now 76,000.

The immigration of 10,000 Jews since 1918 has proved far too rapid for the country to take care of, and for this reason as much as for any other the anti-Jewish outbreaks around Jaffa in May, 1921, were made an excuse for closing the ports to additional immigrants. Conditions later became practically normal and the ports were opened to persons who could prove themselves belonging to one of the following categories:

(1) Persons of independent means who intend to take up permanent residence in Palestine; (2) members of professions who intend to follow their calling; (3) wives and children and other persons wholly dependent on residents in Palestine; (4) persons who have a definite prospect of employment with specified employer or enterprise; (5) persons of religious occupation, including the class of Jews who have come to Palestine in recent years from religious motives and who can show that they have means of maintenance there; (6) travelers who do not propose to remain in Palestine longer than three months; (7) returned residents.

In regard to the future policy of the administration, the high commissioner says that it is the duty of the mandatory power to promote the well-being of the Arab population as if there were no Zionist question. In such a policy he finds nothing incompatible with reasonable Zionist aspirations, and he says that if the present Arab majority were in any way wronged or harmed the moral influence of Zionism would be greatly impaired as a result of it. Almost from the time of taking office the high commissioner has been steadily working toward the establishment of some form of self-government for the district. In October 1920, he instituted an advisory council with twenty members. Ten members of this represented the administration, and of the other ten, all of whom are nominated by the high commissioner, four are Moslems, three Christians and three Jews. So far the co-operation between the council and the administration has been pleasant and fruitful, and no measure proposed by the council has been rejected by the high commissioner. "Steps are now being taken," says the report, "to form a constitution for the country, which will include the elective element, and the leaders of the various sections of the population are being consulted as to its terms."

Many of the exhausting taxes imposed by the former Turkish administration have been repealed and a reasonable and modern taxation system introduced. It is expected that in the future in every district a very considerable part of the income of the district will be derived from the tobacco industry, which has been growing rapidly since the end of the war. The cultivation of tobacco, previously prohibited, has begun in several districts, while a number of factories have been or are being opened for the manufacture of cigarettes from imported tobacco.

Splendid work has been done by the department of public health. Under the old Turkish regime there were no hospitals or dispensaries of any kind for the civil population. Now the government maintains fifteen hospitals, twenty-one dispensaries, eight clinics and five epidemic posts. The fight is particularly directed against malaria and eye diseases which are the two curses of the country, while other epidemic diseases are absent to a remarkable extent. In the case of the campaign against malaria more than 15,000 wells have been registered and are regularly being dealt with, while 67,000 villages have been treated every month. The report shows equally promising results in the field of education, which previously lay as fallow as some of the waste lands that mar large portions of Palestine. Any town or village needing a school can now obtain it simply by providing a suitable building and keeping it in repair, while the government out of the general taxes defrays the salaries of the teachers and other costs of maintenance. It is believed that a satisfactory school system will be established in this manner for the entire country within four years.

AALAND ISLANDS AGREEMENT.

On Oct. 20, 1921, at the headquarters of the league of nations in Geneva, Switzerland, a convention for the neutralization of the Aaland islands was signed. This document, which was drawn up by a special conference of delegates from ten interested European powers, represented the final solution of a most vexatious international problem and the first case of absolutely successful intercession on the part of the league in a purely political controversy.

The adoption of this convention by Germany, Denmark, Esthonia, Finland, France, Great Britain, Italy, Latvia, Poland and Sweden did more than dispose of the war cloud that so long hung over the two nations most closely concerned—namely, Finland and Sweden. One

of the most menacing phases of this dispute had been the attitude of Russia and the refusal of the soviet government to approve any change of status in the islands not negotiated in the presence of its own representatives. By declaring that it complements without in any way impairing the previous neutralization convention signed by Russia on March 30, 1856, the new convention did away with any possible excuse for future interference on the part of Russia.

Under the terms of the convention concluded at Geneva on Oct. 20, it becomes impossible for Finland to create or maintain any military, naval or aerial establishments within the neutralized zone. Nor can that power install within the zone any other establishments that may be used for purposes of war. It cannot dispatch military, naval or aerial forces to the islands except in so far as the convention specifically provides for the purposes of maintaining order in the islands. The manufacture, importation, transportation or re-exportation of arms or war materiel are absolutely prohibited as far as the zone is concerned. In a case of a threatened violation of the neutrality of the islands by another power, Finland is entitled to take necessary steps for their protection, but only until the rest of the powers signing the convention have time to intervene in such manner as they may deem required.

In order to maintain the convention and to prevent its violation, the contracting parties undertake, singly or jointly, to report to the council of the league of nations, with which body rests the duty of deciding what measures are to be taken to provide against or to punish such violations. In taking action of this kind, the council is entitled to exclude the offending power from the vote without violating the established requirements for unanimity in all action.

CONSTITUTION OF THE POLISH REPUBLIC.

Adopted by the national constitutional assembly of Poland at Warsaw on March 17, 1921, and now in full force and effect.

[Translation by Anthony Czarnecki.]

Preamble: In the name of Almighty God, we, the Polish nation, thanking Providence for delivering us from bondage of a century and a half, with gratitude recalling the courage and perseverance of the sacrificial struggle of generations which unceasingly devoted their best efforts to the cause of independence, binding unto the glorious traditions of the immortal constitution of May 3, 1791—looking to the welfare of the whole, united and independent mother country and desiring to establish firmly her independent existence, power, security as well as her social order upon the eternal principles of right and liberty, desiring further to assure the development of all her moral and material forces for the good of the whole regenerating humanity, equality to all citizens of the republic, and to insure respect, due rights and special care for labor—do ordain and establish this constitution in the constitutional assembly (sejm) of the Polish republic.

SECTION 1—THE REPUBLIC.

Article 1. The Polish state is a republic.

Art. 2. The supreme authority in the Polish republic belongs to the nation. The organs of the nation in the department of legislation are the assembly (sejm) and the senate, in the department of executive authority the president of the republic together with responsible ministers, and in the department of administration of justice independent courts.

SECTION 2—LEGISLATIVE AUTHORITY.

Art. 3. The legislative department of the state embraces the establishing of all public and private laws and the manner of their enforcement. There can be no legal enactment (statute) without the sanction of the assembly (sejm) expressed in a manner established by regulations. A law enacted by the assembly (sejm) receives its force and effect at the time specified with the provisions of such enactment (statute). The Polish republic, basing its system of government upon the principle of broad territorial self-government (home rule), shall convey or delegate to the representative bodies of such self-government the proper department of legislation, especially in the administrative, cultural and economic fields, which will be more thoroughly prescribed by legal enactments (statutes) of the Polish state. Orders of authority, from which result rights or duties of citizens, shall have binding force only when they have been issued by virtue of an authorization of legal enactment (statute) and by specifically referring to such legal enactment (statute).

Art. 4. Legal enactment (statute) of the state shall annually provide a budget of the state for the ensuing year.

Art. 5. Establishing the numerical status of the army and permitting an annual conscription of recruits may take place only through and by virtue of legislative action.

Art. 6. Contracting of a state loan, disposal, exchange and incumbrance of immovable property of the state, the levy of taxes and public fees, the establishment of customs and monopolies, the fixing of a monetary system as well as the assuming of financial guaranties by the state can only take place by virtue of legal enactment (statute).

Art. 7. The closing of the accounts of the state shall annually by the government be presented for parliamentary approval.

Art. 8. The manner of exercising parliamentary control over state debts shall be prescribed by a separate legal enactment (statute).

Art. 9. For the control of the entire administration of the state with reference to finances, for the scrutiny of the closings of the accounts of the state, and for submitting every year to the assembly (sejm) of the motion regarding the granting or the refusing of an "absolutorium" (absolviture) there shall be convoked and formed the supreme chamber of control, based upon the collegiate principle and judicial independence of the members of its college, removable only by decision of the assembly (sejm) by a majority of three-fifths of those voting. The organization of the supreme chamber of control and the manner of its functioning shall be prescribed in detail by a special legal enactment (statute). The president of the supreme chamber of control occupies a position or standing equal to that of a minister; however, he is not included in the membership of the council of ministers and for the conduct of his office and for officials subordinate to him he is directly responsible to the assembly (sejm).

Art. 10. The right of originating legislation is vested in the government and the assembly (sejm). All motions and proposals of legal enactment (statutes) which entail expenditures from the state treasury must specify the manner of using such expenditures and how to meet them.

Art. 11. The assembly (sejm) shall consist of representatives (members) elected for five years, counting from the day of the open-

ing of the assembly (sejm), by a general, secret, direct, equal and proportional voting.

Art. 12. Every Polish citizen without distinction of sex has the right of suffrage (voting) who on the day of proclaiming of the elections has completed 21 years of age, who enjoys full civil rights and who lives in the election district at least from the day preceding the proclaiming of the elections in the "Journal of Laws." The right of suffrage (to vote) can only be exercised in person. Military persons while in active service do not have the right to vote.

Art. 13. Every Polish citizen has the right to be voted for (elected) who has the right to vote for representatives of the assembly (sejm), not excluding even the military while in active service, independent of place of residence, if such citizen has completed 25 years of age.

Art. 14. Citizens convicted of offenses which the laws of election shall prescribe as punishable with a temporary or permanent loss of right of suffrage, of the right to be voted for and also of holding the mandat or commission of a representative of the assembly (sejm) cannot enjoy the rights of suffrage.

Art. 15. Administrative, treasury and judicial officials of the state cannot be elected in those districts or circuits in which they perform their service. This provision does not pertain to those officials who perform their service under the central authorities.

Art. 16. State employes and those of self-government bodies from the moment of being elected as representatives of the assembly (sejm) shall for the period of the duration of their mandats or commissions as such chosen representatives be granted a leave of absence. This provision does not pertain to ministers, undersecretaries of state and professors of higher institutions of learning. The years devoted in the performance of the mandat or commission (or in the serving) as a representative of the assembly (sejm) shall be added as years of service in the state of self-government body employment.

Art. 17. A representative appointed to the service of the state with compensation forfeits his mandat or commission as a member of the assembly (sejm); this provision is not applicable to the appointing of representatives as ministers, undersecretaries of state or professors of higher institutions of learning.

Art. 18. The laws of election will prescribe the manner of electing a representative of the assembly (sejm).

Art. 19. The assembly (sejm) shall verify the validity of uncontested elections. The validity of contested elections shall be determined by the Supreme court.

Art. 20. The representatives are agents of the entire nation and are not bound by any instructions of voters. Representatives in the presence of the assembly shall make to the speaker (marshal) the following solemn promise: "I solemnly promise as a representative to the assembly of the republic of Poland according to the best of my understanding and consistent with my conscience honestly to work solely for the good of the Polish state as a whole."

Art. 21. Members of the assembly cannot be amenable for their activities in the assembly (sejm) or outside of the same which come within the purview of the exercise of their mandat or commission as representatives, neither during the life of the mandat or commission nor after its expiration. For all speeches and utterances and also for demonstrations in the assembly (sejm) the representative shall be answerable only to the assembly (sejm). For violating the rights of a third person representatives may be amenable in court in so far only as the judicial authority obtains for it the consent of the assembly (sejm). Penal-judicial, penal-administrative or disciplinary proceedings instituted against a representative before said representative obtains his mandat or commission as member of the assembly shall be held in suspension until the expiration of the mandat or commission. The operation and force of prescription or legal limitation regarding time of instituting and carrying on proceedings against a representative in penal (criminal) actions is subject to interruption for the period of the duration of the representative's mandat or commission. Throughout the entire duration of the mandat or commission of representatives they cannot be amenable in penal-judicial, penal-administrative and disciplinary proceedings nor be deprived of their freedom without the permission of the assembly (sejm). In case a member of the assembly (a representative) is caught in the act of committing a common crime, if the holding of such representative is indispensable to insure the administration of justice or (relatively) for the counteracting or averting the harmful effects of the offense, the judicial authority is duty bound immediately to notify the speaker (marshal) of the assembly (sejm) regarding it in order to secure permission of the assembly (sejm) for such representative's arrest and further penal (criminal) proceedings in the premises. Upon the demand of the speaker (marshal) of the assembly the apprehended representative must immediately be released.

Art. 22. Neither in one's own name nor in some one else's name is a member of the assembly permitted to buy or secure the rental of any real property of the state or to take up the furnishing of public supplies or government works, nor is a member of the assembly permitted to receive from the government any concessions or other personal benefits. Likewise a representative is not permitted to receive from the government any decorations except military.

Art. 23. A representative or member of the assembly is not permitted to be a responsible editor. [Note.—Responsible editor in European countries is the person who serves as defendant in criminal prosecutions instituted for articles contained in the publication of such editor.]

Art. 24. Members of the assembly shall receive compensation, the amount of which shall be prescribed by regulations, and they are entitled to have the benefit without cost of the use of the means of communication of the state for traveling in the entire area of the republic.

Art. 25. The president of the republic shall convoke, open, adjourn and close the assembly (sejm) and the senate. The assembly (sejm) should be convoked for the first session on the third Tuesday after the day of elections, and every year at the latest in October for regular or ordinary sessions for the purpose of adopting the budget, the numerical strength and conscription for the army and also other current affairs. The president of the republic may convoke the assembly (sejm) into special (extraordinary) session at any time according to his own judgment and is obliged to do so upon the demand of one-third of the entire membership of the assembly within two weeks of such demand. Other circumstances of convening of the assembly (sejm) for special (extraordinary) sessions shall be prescribed by the constitution. An adjournment, if it is to be repeated during the same regular session or if the recess is to continue for a longer period than thirty days, shall require the approval of the assembly (sejm). The assembly (sejm), convoked in October for its regular or ordinary session, cannot be closed before the adoption of the budget.

Art. 26. The assembly may dissolve itself by virtue of its own enactment adopted by a majority of two-thirds votes in the presence of one-half of the entire membership thereof. The president of the republic may dissolve the assembly (sejm), with the approval of two-fifths of the membership of the senate. Under this law in both cases the senate is dissolved at the same time. Elections shall take place within ninety days from the day of dissolution; the period thereof shall be prescribed either in an enactment of the assembly (sejm) or in the proclamation of the president regarding the dissolution of the assembly (sejm).

Art. 27. Representatives shall exercise their rights and duties in person.

Art. 28. The assembly (sejm) shall choose from its own membership a speaker (marshal) and his alternates, secretaries and committees. The mandats or commissions of the speaker (marshal) and his alternates shall continue in force after the dissolution of the assembly (sejm) and until the organizing of the new assembly (sejm).

Art. 29. The manner and order of conducting the proceedings of the assembly, the character and number of committees, the number of alternate speakers (alternate marshals) and secretaries and the rights and duties of the speaker (marshal) shall be prescribed by rules and regulations (by-laws) of the assembly (sejm). The speaker (marshal) shall appoint the officials and employes of the assembly, and for their conduct and doings he is answerable to the assembly (sejm).

Art. 30. The sessions of the assembly shall be open and public. Upon motion of the speaker (marshal) of the assembly, or of an agent of the government, or that of thirty representatives, the assembly (sejm) may decide upon the session being executive (secret).

Art. 31. No one can be held accountable to the authorities for a report of open and public sessions of the assembly (sejm) or of a committee of the same which conforms to the truth.

Art. 32. For validity of legal enactments an ordinary majority of votes of representatives in the presence of at least one-third of the statutory membership of the assembly (sejm) is requisite, in so far as provisions of the constitution do not contain other requirements.

Art. 33. The representatives shall have the right to address interpellations (interrogatories) to the government or to the individual ministers in a manner prescribed by the rules and regulations. The minister is duty bound to give answer either orally or in writing within a period of not longer than six weeks or in a declaration embodying detailed and sufficient reasons to justify the absence of a reply upon the subject matter. Upon demand of those interpellating the reply shall be communicated to the assembly (sejm). The assembly may make the reply of the government the subject of discussion and of enactments.

Art. 34. The assembly may create and name for the investigation and consideration of various matters special committees, with the right and power to hear the interested parties and also to call witnesses and experts. The scope of the activity and the powers and rights of such committees shall be determined by the assembly (sejm).

Art. 35. Every proposal of a law which has been enacted by the assembly shall be submitted to the senate for consideration. If the senate within thirty days from the time of submitting to it by the assembly of the enacted proposal of a law does not urge any objections against it the president of the republic shall proceed to direct the promulgation of the legal enactment (statute). On motion of the senate the president of the republic may proceed to direct the promulgation of the legal enactment before the expiration of the thirty days. If the senate decides to change or reject a proposal of law which is enacted by the assembly (sejm) the senate shall give notice of such decision to the assembly (sejm) within the aforesaid thirty days and at latest within the additional thirty days the senate shall return it to the assembly (sejm) with the proposed changes. If the assembly shall by the usual majority adopt the changes proposed by the senate, or if it shall reject them by a majority of eleven-twentieths of the voting members of the assembly the president of the republic shall direct the promulgation of the law with the text thereof being that determined by the second enactment of the assembly (sejm).

Art. 36. The senate shall consist of members elected by the separate districts (called wojewodztwa) in a general, secret, direct, equal and proportional voting. Every district shall comprise one election circuit, in which the number of mandats or commissions to the senate shall be one-fourth as compared to the number of mandats or commissions for the assembly in proportion to the number of inhabitants in such district. Every elector for members of the assembly (sejm) who on the day of proclaiming of the elections had completed thirty years of age and on such day shall have resided in the election circuit at least a year shall have the right to vote for senators; however, the newly settled colonists who have left their former place of residence while availing themselves of the laws instituting land reforms (which refer to ownership, distribution and popularization of land) shall not lose their right to vote; also workingmen who have changed their place of residence on account of change in their employment or work and state officials and employes who are transferred in connection with their service shall not lose their rights as electors. Every citizen having the right to vote for senators, not excluding the military in active service, shall have the right to be elected to the senate, provided, however, that said citizen has finished 40 years of age by or on the day of the proclaiming the election. The term of the senate shall begin and shall end with the term of the assembly (sejm). No one can be simultaneously a member of the assembly and of the senate.

Art. 37. Provisions of articles 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 27, 28, 29, 30, 31, 32 and 33 are also applicable and proper to the senate and relatively to its members.

Art. 38. No legal enactment (statute) shall be in conflict with this constitution nor violate any of its provisions.

SECTION 3—EXECUTIVE AUTHORITY.

Art. 39. The president of the republic shall be elected for a term of seven years by an absolute majority of the votes of the assembly (sejm) and of the senate united in a national congress. The national congress shall be called by the president of the republic during the last quarter of the seventh year of his term of office. If the calling (convening) of the national congress does not take place within thirty days prior to the expiration of the seven-year term then the assembly (sejm) and the senate shall themselves as a matter of law join in a national congress upon the invitation of the speaker (marshal) of the assembly (sejm) and under his chairmanship.

Art. 40. If the president of the republic cannot perform the duties of his office or in case of vacancy in the office of president of the republic on account of death, resignation or some other causes, the speaker (marshal) of the assembly (sejm) shall act in his place.

Art. 41. In the event of a vacancy in the

office of president of the republic the assembly (sejm) and the senate immediately upon the invitation of the speaker (marshal) of the assembly (sejm) and under his chairmanship as a matter of law shall unite in a national congress for the purpose of electing the president of the republic. If the assembly (sejm) should be dissolved at the time when the office of president of the republic becomes vacant the speaker (marshal) of the assembly (sejm) shall without delay arrange new elections for the assembly (sejm) and the senate.

Art. 42. If for three months the president of the republic does not perform the duties of his office the speaker (marshal) shall without delay call the assembly (sejm) and submit to its decision whether the office of the president of the republic shall be declared vacant. In the presence of at least one-half of the entire statutory membership, that is, the number of members of the assembly (sejm) which is fixed by the elections laws, a decision declaring the office of president of the republic to be vacant becomes adopted by a majority of three-fifths vote.

Art. 43. The president of the republic shall exercise the executive authority through ministers who are responsible to the assembly (sejm) and to officials subordinate to them. Every official or employe of the republic must be subordinate to a minister who for the doings of such official or employe shall be responsible to the assembly (sejm). Nominations of officials (employes) for the civil chancery of the president of the republic shall be countersigned by the president of the council of ministers and such president of the council of ministers shall be responsible to the assembly for the doings of such officials.

Art. 44. The president of the republic shall sign enacted laws together with the proper ministers and he shall direct their publication in the journal of the laws of the republic. For the purpose of enforcing the laws and by referring specifically to the lawful authorization the president of the republic shall have the right and authority to issue executive regulations, directions, orders, commands and interdicts and to insure their execution by use of compulsory means. The ministers and the authorities subordinate to them within the scope of their jurisdiction or activities shall also have such right and authority. To be valid and binding every official act of the president of the republic requires the signature of the president of the council of ministers and of the proper particular minister, who assume the responsibility therefor by such signing of the act.

Art. 45. The president of the republic shall appoint and recall the president of the council of ministers and upon the latter's motion he shall appoint and recall ministers, and upon motion of the council of ministers shall appoint to the civil and military offices, which are provided in legal enactments (statutes).

Art. 46. The president of the republic is also the supreme commander of the armed forces of the state, but he cannot exercise the supreme command in time of war. In case of war the supreme commander of the armed forces of the state shall be appointed by the president of the republic on motion of the council of ministers submitted by the minister on military affairs, who for acts connected with the command in time of war, as well as for all other matters of military direction, shall be responsible to the assembly (sejm).

Art. 47. The right and authority to pardon or mitigate punishments, and also to remit in specific separate instances the results of a criminal court conviction, is vested in the president of the republic. The president cannot exercise this right and authority in the case of ministers convicted upon impeachment proceedings before the assembly (sejm). Amnesty can be granted only by means of legislative enactment (statute).

Art. 48. The president of the republic shall represent the state abroad, shall receive the diplomatic representatives of foreign states and shall send diplomatic representatives of the Polish state to foreign states.

Art. 49. The president of the republic shall make treaties with foreign states and shall submit them to the attention of the assembly (sejm). Commercial and customs treaties and also treaties which permanently in a financial way burden the state, or those which contain legal provisions which are binding upon the citizens, or those which bring about a change in the boundaries of the state and also alliances, require the concurrence of the assembly (sejm).

Art. 50. The president of the republic may declare war and conclude peace only after the previously given consent of the assembly.

Art. 51. For his official acts the president of the republic shall be responsible neither in a parliamentary nor in a civil way. For betrayal of the country, for violating the constitution or for criminal offenses the president of the republic may be brought to justice only by the assembly (sejm) upon a decision taken by a three-fifths vote in the presence of at least one-half of the legal (statutory) membership of the assembly (sejm). The case shall be considered and the verdict rendered by the tribunal of the state in accordance with provisions of a separate legal enactment (statute). From the moment of being accused (impeached) before the tribunal of the state the president of the republic shall be suspended in the conduct of his office.

Art. 52. The president of the republic shall receive compensation in accordance with a provision of a special legal enactment (statute).

Art. 53. The president shall not hold any other office nor be of the membership of the assembly or of the senate.

Art. 54. Before assuming office the president of the republic shall take an oath in the national congress the text of which is as follows: "I swear to Almighty God, one and indivisible in the Holy Trinity, and I vow to thee, Polish nation, that in the office of president of the republic which I am assuming I will sacredly observe and defend the laws of the republic and, above all, the provisions of its constitution; I will faithfully serve with all my might the general welfare of the nation; I will vigilantly avert from the state all evil and danger; I will unswervingly guard the dignity of the Polish name; I will cherish justice toward all citizens without discrimination as the foremost virtue; I will undividedly consecrate myself to the duties and responsibilities of the office and service. So help me God and the sacred passion (suffering) of His Son. Amen."

Art. 55. The ministers constitute the council of ministers under the chairmanship of the president of the council of ministers.

Art. 56. The council of ministers shall bear jointly the constitutional and parliamentary responsibility for the general directions of the activities of the government. Beyond that the ministers individually shall bear the responsibility each in his own department for the activities in the office, and this responsibility is the same as to the conformity of such activities with the constitution and with other laws of the state, as to the activities of subordinate administrative organs and also as to the direction of its own policies.

Art. 57. In the same bounds and extent shall the joint and individual responsibility extend upon the ministers for the official acts of the president of the republic.

Art. 58. The assembly (sejm) shall by the ordinary majority bring ministers to parliamentary accounting. The council of ministers as a whole and every individual minister separately shall resign upon the demand of the assembly (sejm).

Art. 59. The constitutional responsibility of the ministers and the manner of bringing it about shall be prescribed by a separate legal enactment (statute). A decision to impeach a minister must be made in the presence of at least one-half of the legal membership of the assembly and by a majority of three-fifths of the votes cast. The consideration of the cases and the rendering of the verdict shall be by the tribunal of the state. A minister cannot escape constitutional responsibility by resigning the office. From the moment of being impeached the minister shall be suspended in his official duties.

Art. 60. Ministers and officials delegated by them shall have the right to participate in the sessions of the assembly (sejm) and to speak thereat out of the order of speakers scheduled to be heard; in voting they shall take part only in case they are members of the assembly.

Art. 61. Ministers cannot hold any other office and cannot participate in the managing body and be a part of the controlling authority of societies and institutions established for profit.

Art. 62. If the office of a minister is exercised by a temporary director of the ministry all provisions regarding the office of such minister are applicable to the temporary director. In case of necessity, the president of the council shall designate to act as his alternate one of the ministers.

Art. 63. The number, the scope of activity and the mutual relationship of the ministers, as well as the qualifications, characteristics and realm (competence) of the council of ministers, shall be prescribed by a special legal enactment (statute).

Art. 64. The tribunal of the state shall be composed of the first president (chief justice) of the Supreme court as chairman and also of twelve members who shall be chosen, eight by the assembly (sejm) and four by the senate from outside of their own members. As members of the tribunal of the state shall be chosen persons who hold no state position and who are in the enjoyment of full rights of citizenship.

The assembly (sejm) and the senate immediately after organizing themselves shall elect members of the tribunal of the state for the entire term of the duration of the assembly (sejm).

Art. 65. For administrative purposes the Polish state shall be divided by legislative enactments (statutes) in districts (called wojewedztwa), counties and municipal communities, which shall at the same time be the units of territorial (local) self-government. The units of self-government may join into alliances (unions) for carrying through undertakings which come within the sphere of the self-government. Such alliances (unions) shall have a public-legal character only by virtue of separate legislative enactment (statute).

Art. 66. Throughout the organization of the state administration there shall be borne out and adhered to the principle of decentralization with the possible merging of the state administrative organs in the various territorial units into one department under one superior, and also the principle of participation of citizens, chosen by way of elections, in the performance of the duties of these offices within the limits prescribed by legal enactments or statutes.

Art. 67. The right of determining in affairs (cases) belonging within the scope of the functions of self-government shall be vested in elected councils. The executive functions of a district or county self-government shall be vested in organs organized upon the principle of the colleges (bodies) elected by representative bodies uniting with the representatives of state administrative authorities and under their chairmanship.

Art. 68. In addition to the territorial (local) self-government a separate legal enactment (statute) shall create an economic self-government for the various branches of economic life; namely, chambers of agriculture, of commerce, of industry, of trades and crafts, of hired labor and others, united in one supreme economic chamber of the republic, whose joint functioning or collaboration with the state authorities in directing the economic life and in the sphere of legislative proposals shall be determined by legal enactments (statutes).

Art. 69. The sources of revenue of the state and those of the self-government units shall be strictly demarcated by legal enactments (statutes).

Art. 70. The state shall exercise supervision over activities of self-governments through departments of self-government of a higher degree (grade); legal enactments (statutes), however, may transfer this supervision partially to the administrative judiciary. Instances in which enactments of organs of self-governments shall require, exceptionally, confirmation by organs of self-government of a higher grade or by ministries shall be prescribed by legal enactments (statutes).

Art. 71. The appeal of the decisions of the state government organs, as well as those of the self-governments, shall be allowed only to one higher jurisdiction in so far as the legal enactments (statutes) do not in this particular provide exceptions.

Art. 72. Legal enactments (statutes) shall establish and put into effect the principle that from criminal decisions of administrative authorities rendered in the first instance there shall be available the right of appeal to the proper court.

Art. 73. To determine regarding the legality of administrative acts within the sphere of administration in the state government, as well as in the self-government, there shall be created, by a separate legal enactment (statute), an administrative judiciary, based in its organization upon the co-operation of the citizens and of the judicial elements, with the supreme administrative tribunal at its head.

SECTION 4—THE JUDICIARY.

Art. 74. The courts dispense justice in the name of the republic of Poland.

Art. 75. The organization, jurisdiction and the mode of procedure of all courts shall be prescribed by means of legislation.

Art. 76. The president of the republic shall appoint the judges in so far as the legal enactment (statute) contains no different provision; however, justices of the peace as a rule shall be elected by the people. Only a person fulfilling and complying with the conditions required by law can assume the judicial office.

Art. 77. Judges in the performance of their judicial office are independent and are subject only to legal enactments (statutes). Court decisions cannot be changed by either the legislative authority or by the executive authority.

Art. 78. A judge may be removed from office, suspended from officiating, transferred to a different place of officiating, or into the state of retirement, against his own will only by virtue of a court decision, and only in cases provided by legal enactment (statute). This provision, however, does not apply in the case where the transfer of a judge to another place or into a state of retirement is called forth by

a change in the organization of courts, decided upon under a legal enactment (statute).

Art. 79. Judges cannot be prosecuted criminally nor be deprived of their freedom without the previous consent of the proper court designated by legal enactment (statute), in so far as they are not caught in the act of committing a crime, but even in such a case the court may demand the immediate freeing of the arrested judge.

Art. 80. The separate and distinct position of judges, their rights and duties, and also their compensation, shall be prescribed by a separate legal enactment (statute).

Art. 81. The courts shall have no right to question the validity of legal enactments (statutes) which are duly promulgated.

Art. 82. Proceedings before a determining court in civil as well as criminal cases shall be public in so far as legal enactment (statutes) in this particular do not provide any exceptions.

Art. 83. Jury trials shall be called upon to determine as to crimes entailing more severe penalties and as to political crimes. The acts which are subject to trials by juries, the organization of such courts and their mode of procedure shall be prescribed by special legal enactments (statutes).

Art. 84. For all court cases, both civil and criminal, there is hereby established a Supreme court.

Art. 85. The organization of military courts, their jurisdiction, the manner of procedure, also the rights and duties of members of such courts, shall be prescribed by separate legal enactments (statutes).

Art. 86. By virtue of a legal enactment (statute) a separate jurisdictional tribunal (tribunal of competency) shall be created to decide controversies regarding jurisdiction between administrative authorities and the courts.

SECTION 5—GENERAL DUTIES AND RIGHTS OF CITIZENSHIP.

Art. 87. A citizen of Poland cannot at the same time be a citizen of another country or state.

Art. 88. Polish citizenship is acquired:

(a) By being born of parents having Polish citizenship.

(b) By naturalization or the granting of citizenship on the part of the delegated state authority. Other provisions regarding Polish citizenship, its acquisition, also its loss, shall be prescribed in separate legal enactments (statutes).

Art. 89. The first duty of a citizen is faithfulness to the republic of Poland.

Art. 90. Every citizen is in duty bound to respect and observe the constitution of the state and other binding legal enactments (statutes) and orders or regulations of the state and self-government authorities.

Art. 91. All citizens are subject to military service. The character and manner, the order and term of duration of the service, the release (exemption) from that duty and all contributions or services for military purposes shall be prescribed by means of legal enactments (statutory enactments).

Art. 92. All citizens are in duty bound to bear all public burdens and obligations which are established upon the basis of legal enactments (statutes).

Art. 93. All citizens are in duty bound to respect rightful (legal) authority and to facilitate the carrying out of its functions, and they are also bound conscientiously to perform public duties to which the nation or the proper authorities summon them.

Art. 94. All citizens are in duty bound to bring up their children as upright citizens of their motherland, and to insure to them at least elementary education. This duty will be more thoroughly defined by a separate legal enactment (statute).

Art. 95. The republic of Poland guarantees upon its territory to all, without regard to ancestry (origin), nationality, language, race or religion, full protection (safety) of life, liberty and property. Under the condition of reciprocity aliens shall enjoy equal rights with the citizens of the Polish state and they shall also have equal duties with them in everything where the legal enactments (statutes) do not specifically require Polish citizenship.

Art. 96. All citizens are equal before the law. Public offices are in the same degree accessible to all upon conditions prescribed by law. The republic of Poland does not recognize any privileges of birth or family, or of state or condition, neither does it recognize any "coat of arms," titles of descent (family) and all other titles, with the exception of educational, official and professional. It is not allowable for a citizen of the republic to accept, without the permission of the president of the republic, foreign titles or decorations.

Art. 97. Restrictions of personal liberty, especially personal search and arrest, are permissible only in cases prescribed by law and in a manner defined by legal enactments (statutes), upon the basis of orders of judicial authorities. In the event that the order of court could not immediately be issued it must be presented at latest within forty-eight hours, together with statement giving the reason for the search or arrest. Persons arrested, to whom within forty-eight hours have not been furnished the reasons for the arrest in a written statement containing the signature of the judicial authorities, shall without delay regain their freedom. Legal enactments (statutes) shall prescribe the compulsory method which shall be available to the administrative authorities for the enforcement of their orders.

Art. 98. No one can be deprived of a trial in the court to which he is subject as a matter of right and law. Exceptional court trials are permissible only in cases designated by legal enactments (statutes) which were published before the perpetration of the culpable deed. Prosecution of a citizen and inflicting of punishment is permissible only by virtue of the operation of the legal enactment (statute) actually in force. Punishments which are coupled with physical tortures are not permitted and no person shall be subjected to such punishments. No legal enactment (statute) can bar access to the courts to a citizen for the purpose of seeking redress for injuries and losses.

Art. 99. The republic of Poland recognizes all property whether it belongs personally to individual citizens or collectively to associations (organizations) of citizens, institutions, self-government bodies and finally of the state itself, as one of the most important bases of social arrangement and legal order; it also guarantees to all inhabitants, institutions and communities (elements) the protection of their property and permits only in cases provided by legal enactments (statutes) to abolish or to restrict the ownership of property whether it be personally or collectively owned for purposes or considerations of greater usefulness, and by compensation (damages) to the owner. Only a legal enactment (statute) may provide what possessions (lands) and to what extent because of considerations of public benefits they shall constitute exclusively the property of the state, and also to what extent the rights of citizens and of their lawfully recognized organizations (associations) to the free and unrestricted use of lands, waters, minerals and other treasures of nature because of public considerations (reasons) may be subject to abridgment. Land as one of the most im-

portant elements of the existence of the nation and state cannot be the subject of unlimited transfers (enterprise or handling). Legal enactments (statutes) shall define the rights of the state to forcibly (by condemnation against the will of the owners) buy up land, also of regulating the transfers of land, with due regard for the principle that the agrarian arrangement of the Polish republic shall be based upon agricultural property units capable of regular natural production and constituting personal property.

Art. 100. The home of a citizen is inviolable. Violation of this right by entering the home, by a search of the dwelling and by seizing and taking of papers or chattels beyond the necessity of executing of administrative orders based upon a definite authorization of a legal enactment (statute) may take place only upon the order of judicial authorities, in the manner and in cases prescribed by legal enactments (statutes).

Art. 101. Every citizen has the freedom to select upon the territory of the state a place of residence and sojourn, to move about (change residence and sojourn from one place to another) and to emigate, and has none the less, too, the freedom of choosing an occupation and the mode of earning, as well as that of transporting his own property. Restriction of these rights may only be brought about by legal enactment (statute).

Art. 102. Labor as the prinicpal basis of the wealth of the republic shall remain under the special protection of the state. Every citizen has the right of protection of the state for his work, and in the event of lack of work, illness, unfortunate accident or incapacity, to social insurance which shall be provided by a separate legal enactment (statute). The state is also duty bound to make accessible moral protection and religious consolation to the citizens with whom it is directly concerned (for whom it cares directly) in public institutions, such as training-educational institutions, barracks, hospitals, prisons and asylums.

Art. 103. Children without proper and sufficient parental care, those neglected with regard to rearing and education, have the right to the care and help of the state within the scope prescribed by legal enactment (statute). Taking from parents their authority over a child may take place by means or through court decisions. Separate legal enactments (statutes) shall protect maternity and the work of women and children. Work for wages of children below the age of 15 years, night work of women and youthful workmen in branches of industry injurious to their health, is forbidden. Permanent employment of children and youths of school age in work for wages is forbidden.

Art. 104. Every citizen has the right freely to express his thoughts and convictions in so far as such citizen does not thereby violate provisions of the law.

Art. 105. Freedom of the press is guaranteed. There cannot be introduced a censorship or a system of licensing or concessions to publish printed matter. There cannot be taken from domestic newspapers and publications the postal debit, nor can their dissemination (circulation) be restricted in the territory of the republic. Separate legal enactments (statutes) will prescribe the responsibility for the abuse of this freedom.

Art. 106. Secrecy of letters and other correspondence may be infringed only in cases prescribed by law.

Art. 107. Citizens have the right, individually or collectively, to submit petitions to all representative bodies and public authorities of the state and of self-governments.

Art. 108. Citizens have the right to unite (combine), to assemble and to form (organize) associations and unions. The exercise of these rights shall be prescribed by legal enactments (statutes).

Art. 109. Every citizen has the right to preserve his nationality and to cherish his own language and national characteristics. Separate legal enactments (statutes) of the state will insure to the minorities in the Polish state the full and free development of their national characteristics, with the help of autonomous minority unions (groups) which are of a public legal character, within the limits of unions of general self-government. The state in relation to their activities shall have the right of control and in case of need the right of completing or supplementing their financial means.

Art. 110. Polish citizens belonging to national, religious or language (linguistic) minorities have equal rights with other citizens to establish, supervise and manage at their own expense charitable, religious and social institutions, schools and other educational and training institutions, also to use therein freely their language and to fulfill the orders (prescriptions) of their religion.

Art. 111. Freedom of conscience and of worship is guaranteed to all citizens. No citizens on account of creed or religious convictions can be restricted in rights which are enjoyed by other citizens. All inhabitants of the Polish state have the right of freely professing their beliefs (creeds) equally in public as well as in private, and of performing the orders (prescriptions) of their religion in so far as it does not conflict with (oppose) public order or public decency.

Art. 112. Freedom of worship cannot be used in a manner contrary or opposed to legal enactments (statutes). No one can avoid the performing of public duties on account of his religious beliefs. No one can be compelled to participate in religious activities or ceremonies in so far as such person is not subject to parental or guardian's authority.

Art. 113. Every religious group (community) recognized by the state has the right to arrange collective and public services; it may independently conduct its internal affairs; it may possess and acquire movable and immovable (real and personal) property, manage and dispose of the same; it remains in possession and use of its endowments and funds, and also of its institutions for religious, educational and charitable purposes. No religious group (community) may, however, be in conflict or opposition to the legal enactments (statutes) of the state.

Art. 114. The Roman Catholic creed, being the religion of the preponderant majority of the nation, occupies in the state the chief position among the creeds, which have equal rights (are equally enfranchised). The Roman Catholic church governs itself under its own laws. The relation of the state to said church will be legally prescribed upon the basis of an agreement with the apostolic see, which shall be subject to ratification by the assembly (sejm).

Art. 115. Churches of religious minorities and other legally recognized religious groups (communities) shall govern themselves under their own laws, the recognition of which shall not be refused by the state in so far as they do not contain provisions in conflict with or opposed to the law. The relation of the state to such churches and creeds (persuasions) will be established by means of legislation (statutory provisions) after an understanding is reached with their legal representatives.

Art. 116. The recognition of a new or heretofore legally not recognized creed (persua-

sion) shall not be refused to religious groups (communities) whose arrangements (laws and institutions), teachings and organism are not opposed to or in conflict with public order and public decency.

Art. 117. Educational or scientific investigations and the publication of the results thereof shall be free. Every citizen shall have the right to teach, to establish or found a school or educational (training) institution, and to manage it as soon as the conditions prescribed by legal enactment (statute) are complied with with regard to the sphere of qualifications of teachers, to the safety of the child intrusted to such citizen and to loyal relation toward the state. All schools and educational institutions, the public as well as private, shall be subject to the supervision of the state authorities within the bounds prescribed by legal enactments (statutes).

Art. 118. In the bounds of the public school education is compulsory for all citizens of the state. The time, the extent and the manner of receiving such education shall be prescribed by legal enactments (statutes).

Art. 119. Education (instruction) in state and in self-government schools is free (without charge). The state will secure to exceptionally able or gifted pupils, but who are not affluent, allowances (scholarships) for their maintenance in the medium and higher (secondary and academic) institutions of learning.

Art. 120. In every educational institution the program of which includes the educating of youth under 18 years of age, and which is maintained wholly or in part by the state or by self-government bodies, instruction in religion is compulsory for all the pupils. The direction and supervision of religious teaching in schools belongs to the proper religious group (community), with the reservation of the supreme right of supervision to the school authorities of the state.

Art. 121. Every citizen has the right to compensation for damage caused to him or to her by organs of the state, civil or military authority, through official action not in accordance with law, right or duties of the service. The state is responsible for the damage, jointly and separately with the guilty organs; the bringing of action or complaint against the state and against officials is not dependent upon any permission of a public authority. Communities and other self-government bodies, as well as their organs, are in the same manner responsible. The carrying out or application of this principle shall be prescribed by separate legal enactments (statutes).

Art. 122. Provisions and legal resolves regarding the rights of citizens relate and apply also to persons belonging to the armed forces. Exceptions to this principle shall be prescribed by separate military legal enactments (statutes).

Art. 123. Armed force can be used only upon demand of the civil authority by the strict keeping of (or compliance with) the legal enactments (statutes) to quell disturbances or to compel by force the carrying out of legal provisions (statutes). Exceptions to this principle shall be permissible only by virtue of legal enactments regarding the state of emergency and the state of war. [Translator's note: The state of emergency exists when a temporary, partial or complete suspension of civil rights and laws takes place in times of emergencies not unlike in effect the state of affairs under martial law, or in times of war the state of siege.]

Art. 124. The temporary suspension of the rights of citizens, of personal liberty (article 97), of inviolability of the home (article 100), of the freedom of the press (article 105), of the secrecy of correspondence (article 106), of the rights of assembling and forming of associations (article 108), may take place for the entire territory of the state or for localities in which it shall appear necessary because of considerations of public safety. Such suspensions can only be ordered by the council of ministers, by permission of the president of the republic, during war or when an outbreak of war threatens, and likewise in case of internal disturbances or extensive conspiracies of a character dangerous to the state, threatening the constitution of the state or the safety of the citizens. Such a decision or order of the council of ministers made during the time when the assembly (sejm) is continuing in session must be submitted immediately to the assembly (sejm) for confirmation (approval). In the event of issuing such a decision or order, which shall be binding upon territory embracing more than one district (wojewedztwo) during an interruption or recess in the deliberations or proceedings of the assembly (sejm), automatically the assembly (sejm) shall meet within eight days from the issuing of the said decision or order for the purpose of taking appropriate action. If the assembly (sejm) refuses confirmation or approval, the state of emergency immediately loses its binding force or power. If the council of ministers decides or orders the state of emergency to be in effect after the ending of the term (life) of the assembly (sejm) or after the dissolving of the assembly (sejm), such decision or order of the government (council of ministers) must be submitted to the newly elected assembly (sejm) without delay at its first meeting (session). These principles will be more thoroughly prescribed by a legal enactment (statute) regarding the state of emergency. The principles of a temporary suspension of the above named (designated) rights of citizens in time of war upon the territory embraced by war operations shall be prescribed by a legal enactment (statute) regarding the state of war.

SECTION 6—GENERAL PROVISIONS.

Art. 125. A change of the constitution can be decided (accomplished) only in the presence of at least one-half of the legal statutory number of representatives (to the assembly) or members of the senate, respectively, by a majority of two-thirds of the votes cast. The motion for a change of the constitution must be signed by at least one-fourth of the legal statutory number of representatives and the offering of such motion must be proclaimed (or announced) in advance at least fifteen days. Every twenty-five years the constitution shall be submitted for revision by the ordinary majority of the assembly (sejm) and of the senate, joined for that purpose into the national congress. The second assembly (sejm), which is called (convened) upon the basis of this constitution, may accomplish the revision of these constitutional laws by its own decision or legal enactment (statute) taken by a majority of three-fifths in the presence of at least one-half of the legal statutory number of representatives.

Art. 126. This constitution has binding power from the day of its publication, or in so far as the realization of its various provisions is dependent upon the promulgation (issuing) of appropriate legal enactments (statutes) on the day of their going into effect. All legal provisions and arrangements (statutes, regulations, acts and laws) inconsistent with the enactments of this constitution shall at latest within one year of the adoption of this constitution be submitted to the legislative body for the purpose of bringing them to a reconciliation with this constitution in a legislative manner.

Membership in the academy is limited to fifty.

NATIONAL PROHIBITION AMENDMENT.

The house of representatives in Washington, D. C., by a vote of 282 to 128 adopted, Dec. 17, 1917, a senate joint resolution submitting to the states an amendment providing for the suppression of the liquor traffic one year after the ratification of the amendment by the required thirty-six state legislatures. The resolution had passed the senate Aug. 1, 1917, by a vote of 65 to 20. It was amended in the house and the senate accepted the resolution as amended Dec. 18 by a rising vote of 47 yeas to 8 nays.

The proposed amendment was submitted to state legislatures for ratification and by Jan. 16, 1919, more than thirty-six, the number required for making an amendment to the constitution valid, had taken affirmative action. The dates on which the various states ratified the amendment were as follows:

1918.

Mississippi, Jan. 9.
Virginia, Jan. 10.
Kentucky, Jan. 14.
South Carolina, Jan. 23
North Dakota, Jan. 25
Maryland, Feb. 13.
Montana, Feb. 19.
Texas, March 4.
Delaware, March 18.
So. Dakota, March 20
Massachusetts, April 2
Arizona, May 24.
Georgia, June 26.
Louisiana, Aug. 8.
Florida, Nov. 27.

1919.

Michigan, Jan. 2.
Ohio, Jan. 7.
Oklahoma, Jan. 7.
Idaho, Jan. 8.
Tennessee, Jan. 8.
Maine, Jan. 8.
W. Virginia, Jan. 9.
California, Jan. 13.
Washington, Jan. 13.
Illinois, Jan. 14.
Indiana, Jan. 14.
Arkansas, Jan. 14.
Kansas, Jan. 14.
No. Carolina, Jan. 14.
Alabama, Jan. 14.
Colorado, Jan. 15.
Iowa, Jan. 15.
New Hampshire, Jan. 15
Oregon, Jan. 15.
Utah, Jan. 15.
Nebraska, Jan. 16.
Missouri, Jan. 16.
Wyoming, Jan. 16.
Minnesota, Jan. 17.
Wisconsin, Jan. 17.
Nevada, Jan. 21.
Vermont, Jan. 29.
New York, Jan. 29.
Pennsylvania, Feb. 25

Connecticut, New Jersey and Rhode Island refused to ratify the federal prohibition amendment.

The states dry prior to December, 1917, were:

Alabama.	Maine.	Oregon.
Arizona.	Michigan.	South Carolina.
Arkansas.	Mississippi.	South Dakota.
Colorado.	Montana.	Tennessee.
Georgia.	Nebraska.	Utah.
Idaho.	North Carolina.	Virginia.
Iowa.	North Dakota.	Washington.
Kansas.	Oklahoma.	West Virginia.

Ratification of the prohibition amendment to the federal constitution was formally proclaimed Jan. 29, 1919, by Frank L. Polk, acting secretary of state in the absence of Secretary Robert Lansing, who was attending the peace conference in Paris. Though the document was dated the 29th, legal authorities in the department held that the ratification was accomplished when the thirty-sixth state acted affirmatively on Jan. 16 and that under the terms of the amendment itself prohibition would become effective one year from that date, or Jan. 16, 1920.

The British parliament, in which the highest legislative authority is vested, consists of the house of lords of 726 members and the house of commons of 707 members.

Area and Population—The total area of England, Scotland, Ireland, Wales, the Isle of Man and the Channel islands is 121,391 square miles; the total for the British empire is 11,498,825 square miles. The total population of the empire in 1911 was 421,178,965. The population of the united kingdom April 3, 1911, was: England, 34,045,290; Wales, 2,025,202; Scotland, 4,759,445; Ireland, 4,390,219; Isle of Man, 52,034; Channel islands, 96,900. Total, 45,369,090. [The result of the 1921 census had not been announced up to Nov. 15, 1921.]

The cities of England and Wales having more than 100,000 population each were in 1911:

London	4,522,961	Newcastle	266,671
Liverpool	746,566	Nottingham	259,942
Manchester	714,427	Stoke-on-Trent	234,553
Birmingham	525,960	Salford	231,380
Sheffield	454,653	Portsmouth	231,165

UNION OF SOUTH AFRICA.

Sept. 29, 1909, the British parliament passed an act empowering the four self-governing colonies of South Africa—Cape of Good Hope, Natal, Transvaal and Orange Free State—to form a federal government to be known as the Union of South Africa. This was pro-

claimed May 31, 1910, at Pretoria, the seat of government, other services taking place at Cape Town, the seat of the legislature.

The executive government is vested in the king, represented by a governor-general, and an executive council and in ten ministers of state. Legislative power is vested in a parliament consisting of a senate and a house of assembly. The senate contains forty members, eight of whom are nominated by the governor-general in council and thirty-two elected by the four provinces, each of which is entitled to eight senators. The assembly consists of 134 members, chosen in electoral division as follows: Cape of Good Hope, 51; Natal, 17; Transvaal, 49; Orange Free State, 17. Senators are elected for ten years and assemblymen for five. The English and Dutch languages are both official.

Imports and Exports—The total imports of the four states in 1919 were valued at $253,956,000, and the exports at $522,568,230. Exports to the United States in 1921, $10,838,040; imports, $46,925,067.

ALBANIA.

Albania before the great war was an autonomous kingdom created at a conference of ambassadors in London May 30, 1913, as a result of the Balkan wars. Its territory formerly comprised the Turkish provinces of Scutari and Yanina. It has an area of 11,500 square miles and a population of nearly 1,000,000. Until the outbreak of the European war in August, 1914, it was governed by a king (mpret) and an international commission. William I., prince of Wied, was the first king, but he was on the throne only half a year, an insurrection compelling him to leave the capital, Durazzo, Sept. 2, 1914. Since then the country has maintained an independent government at Tirana, though it has been at war with Italy, Jugo Slavia and Greece. Italy made peace with Albania in 1920, but Jugo Slavia and Greece were still pressing their claims to territory held by Albania. The league of nations was trying to adjust the frontiers in the fall of 1921.

REPUBLIC OF AUSTRIA.

Government—The various states composing the former Austro-Hungarian empire at the conclusion of the war broke away from the union and declared themselves independent of the mother country, each becoming a republic in form. Austria herself was proclaimed a republic Nov. 12, 1918, and the government was administered by a national assembly. On Feb. 16, 1919, a national constitutional assembly was elected and in October, 1920, the elections for the first parliament were held. The assembly on Oct. 22, 1919, formally adopted the name "Republic of Austria" for the state, omitting the word German from the title. The assembly is elected by popular vote and the first chamber, or bundesrat, is chosen by the provincial diets. Dr. Michael Hainisch was elected president Dec. 9, 1920, for a term of four years. Johann Schober was made premier June 20, 1921.

Area and Population—The area of Austria is 30,716 square miles and the population, according to the census of Jan. 31, 1920, was 6,139,197. The population of Vienna in 1920 was 1,842,005.

Hungary was proclaimed an independent republic Nov. 16, 1918, with Count Michael Karolyi as provisional president and a provisional assembly as the source of legislative power. This administration continued until March 22, 1919, when the Karolyi cabinet resigned and was succeeded by a bolshevist cabinet under Bela Kun. There was much rioting and bloodshed in Budapest and no material progress toward stability was made. Early in August Bela Kun was forced to flee from the country and then the Roumanians, who had been fighting the Hungarian bolsheviki, came in and took possession of Budapest. Though ordered by the peace council in Paris to leave Hungary, the Roumanians remained. A cabinet under Jules Peidll was in power a short time, when it was overthrown by Archduke Joseph, who established a new ministry. This lasted only about two weeks. In March, 1920, Admiral Nicholas von Horthy was elected regent and Hungary was declared a monarchy. Ex-King Charles in 1921 made two attempts to regain the throne, but was unsuccessful, and in November was exiled by the allies to Madeira.

Hungary has an area of about 109,000 square miles and in 1910 had a population of 18,142,200, not including Croatia and Slavonia, which joined the Jugo Slav republic. The imports of Hungary in 1921 from the United States amounted to $1,521,581 and exports to $262,410.

RELATIONS OF IRELAND AND GREAT BRITAIN.

Strong efforts to bring about peace in Ireland were made in 1921 and when this edition of The Daily News Almanac and Year-Book went to press they were still in progress, with at least a fair prospect of final success. The movement began with the speech of King George at the opening of the Ulster parliament on June 22. At that time he said:

"I speak from a full heart when I pray that my coming to Ireland to-day may prove to be the first step toward an end of strife amongst her people, whatever their race or creed. In that hope I appeal to all Irishmen to pause, to stretch out the hand of forbearance and conciliation, to forgive and to forget, and to join in making for the land which they love a new era of peace, contentment and good will. It is my earnest desire that in southern Ireland, too, there may ere long take place a parallel to what is now passing in this hall; that there a similar occasion may present itself and a similar ceremony be performed."

On June 24 Prime Minister Lloyd George sent the following letter to Eamon de Valera, president of the Irish "republic":

"Sir: The British government are deeply anxious that, so far as they can assure it, the king's appeal for reconciliation in Ireland shall not have been made in vain. Rather than allow yet another opportunity of settlement in Ireland to be cast aside, they feel it incumbent upon them to make a final appeal in the spirit of the king's words for a conference between themselves and representatives of southern and northern Ireland.

"I write, therefore, to convey the following invitation to you as the chosen leader of a great majority in southern Ireland and to Sir James Craig, premier of northern Ireland:

"1. That you should attend a conference here in London in company with Sir James Craig to explore to the utmost the possibility of a settlement.

"2. That you should bring with you for the purpose any colleague whom you may select. The government will, of course, give safe conduct to all who may be chosen to participate in the conference.

"We make this invitation with a fervent desire to end the ruinous conflict which has for centuries divided Ireland and embittered the relations of the peoples of these two islands who ought to live in neighborly harmony with each other and whose co-operation would mean so much not only to the empire but to humanity. We wish that no endeavor should be lacking on our part to realize the king's prayer, and we ask you to meet us as we will meet you, in the spirit of conciliation for which his majesty appealed.

"I am, sir, your obedient servant,

"D. LLOYD GEORGE."

MANSION HOUSE MEETING.

Gen. Jan Smuts, premier of the Union of South Africa, who had been active in his efforts to secure peace in Ireland and had the confidence of Mr. de Valera and other leaders, made a brief visit to Dublin July 5 and conferred with the heads of the Sinn Fein organization, returning immediately to London. On July 8 an armistice to go into effect July 11 was arranged at a conference at the Mansion House in Dublin between Gen. Sir Nevil MacReady, commander in chief of the British forces in Ireland, and representatives of all sections of opinion in southern Ireland, including Eamon de Valera and Arthur Griffith, who spoke for the Sinn Fein. At the conclusion of the conference Mr. de Valera sent the following telegram to Lloyd George:

"The desire you express on the part of the British government to end the centuries of conflict between the peoples of these two islands and to establish relations of neighborly harmony is the genuine desire of the people of Ireland. I have consulted with my colleagues and have secured the views of the minority of our nation with regard to the invitation you have sent me. In reply I desire to say that I am ready to meet and discuss with you on what basis such a conference as that proposed can reasonably hope to achieve the object desired.

"EAMON DE VALERA."

After an exchange of messages it was agreed that the conference should take place on July 14. Mr. de Valera was accompanied to London by Arthur Griffith, Austin Stack and Robert C. Barton. The delegates were received on their arrival at Euston station, London, by thousands of cheering Irish men and women. On the 14th Prime Minister Lloyd George and Mr. de Valera had a private conference lasting nearly three hours, at which a frank exchange of views was had. What was said at this and succeeding meetings was not made public at the time. The conversations ended July 22, when Mr. de Valera and his associates returned to Dublin. On their arrival there they held a series of conferences with other leaders of the Sinn Fein and on Aug. 4 it was announced that the dail eireann or southern assembly had been summoned to meet in Dublin on Aug. 16 for the purpose of reviewing the British government's peace offer. On the 6th Dublin castle announced that all members of the Irish republican parliament were to be released in time to attend the meeting. The exception was John J. McKeown, convicted of killing Inspector McGrath. He was, however, released a day or two after the others had been set at liberty. Before the meeting of the Irish parliament took place there was further correspondence between Mr. de Valera and Mr. Lloyd George. There were many reports that a crisis had been reached and that the prospects for peace were not bright.

BRITAIN'S PROPOSAL.

On the afternoon of Aug. 14 Prime Minister Lloyd George finally made public the government's offer to Ireland and the correspondence that followed. The British proposal made July 20 was as follows:

"The British government are actuated by an earnest desire to end the unhappy divisions between Great Britain and Ireland which have produced so many conflicts in the past and which have once more shattered the peace and well-being of Ireland at the present time.

"They long, with his majesty the king, as expressed in the words of his gracious speech in Ireland last month, for a satisfactory solution of those age-long Irish problems which for generations have embarrassed our forefathers as they now weigh heavily upon us, and they wish to do their utmost to secure that. Every man of Irish birth, whatever be his creed and wherever be his home, should work in loyal co-operation with the free communities on which the British empire is based.

"They are convinced that the Irish people may find as worthy and as complete an expression of their political and spiritual ideals within the empire as any of the numerous varied nations united in allegiance to his majesty's throne, and they desire such consummation not only for the welfare of Great Britain-Ireland empire as a whole, but also for the cause of peace and harmony throughout the world.

"There is no part of the world where Irishmen have made their home but what

suffers from our ancient feuds, no part of it but looks to the meeting between British government and Irish leaders to resolve these feuds in a new understanding of honorable satisfaction to all peoples involved.

"The free nations which compose the British empire are drawn from many races with different histories, traditions and ideals. In the dominion of Canada, British and French have long forgotten the bitter conflicts which divided their ancestors. South Africa, the Transvaal Republic and Orange Free State joined with two British colonies to make a great self-governing union under his majesty's sway. The British people cannot believe that where Canada and South Africa with equal or even greater difficulties have so signally succeeded Ireland will fail, and they are determined, in so far as they themselves can assure it, that nothing shall hinder Irish statesmen from joining together to build up an Irish state in the free and willing co-operation with other peoples of the empire.

Grant Status of Dominion.

"Moved by these considerations, the British government invites Ireland to take its place in the great association of free nations over which his majesty reigns. As an earnest of their desire to obliterate old quarrels and enable Ireland to face the future with her own strength and hope they propose that Ireland shall assume forthwith the status of dominion, with all powers and privileges set forth in this document.

"By adoption of the dominion status it is understood that Ireland shall enjoy complete autonomy of taxation and finance; that she will maintain her own courts of law and judges; that she will maintain her own military forces for home defense, her own constabulary and her own police; that she will take over the Irish postal services and all matters relating to education, land, agriculture, mines and minerals, forestry, housing, labor, unemployment, transport, trade, public health, health insurance and liquor traffic, and, in sum, that she will exercise all those powers and privileges upon which the autonomy of self-governing dominions is based, subject only to the considerations set out in ensuing paragraphs.

"Ireland is guaranteed in these liberties which no foreign people can challenge without challenging the empire as a whole, since the dominions hold each and severally, by virtue of their British fellowship, standing amongst nations equivalent not merely to their individual strength but to the combined power and influence of all of the nations of the commonwealth. That guarantee, that fellowship, that freedom, the whole empire looks to Ireland to accept.

"To this settlement the British government is prepared to give immediate effect upon the following conditions, which are in their opinion vital to the welfare and safety of both Great Britain and Ireland, forming as they do the heart of the commonwealth:

"1. The common concern of Great Britain and Ireland in defense of their interests on land and sea shall be mutually recognized. Great Britain lives by seaborne food and her communications depend upon freedom of the great sea routes. Ireland lies at Britain's side, across the seaways north and south that link her with her sister nations of the empire, the markets of the world and the vital sources of her food supply. Recognizing this fact which nature has imposed and no statesmanship can change, it is essential that the royal navy alone should control the seas around Ireland and Great Britain, and such rights and liberties should be accorded to it by the Irish state as are essential for naval purposes in Irish harbors and on the Irish coasts.

"2. In order that the movement toward limitation of armaments which is now making progress in the world should in no way be hampered it is stipulated that the Irish territorial force shall be held within reasonable limits and conform, in respect to numbers, to military establishments of other parts of these islands.

"3. The position of Ireland is also of great importance for air services, both military and civil. The royal air force will need facilities for all purposes it serves and Ireland will form an essential link in the development of air routes between the British isles and the North American continent. It is therefore stipulated that Great Britain shall have all necessary facilities for the development of defense and communications by air.

Financial Arrangement.

"4. Great Britain hopes that Ireland will in due course and of its own free will contribute a proportion of her wealth to the regular naval and military air forces of the empire. It is further assumed that voluntary recruitment for these forces will be permitted throughout Ireland, particularly for those famous Irish regiments which have so long and so gallantly served his majesty in all parts of the world.

"5. While the Irish people will enjoy complete autonomy in taxation and finance, it is essential to prevent a recurrence of ancient differences between the two islands, and particularly to avert the possibility of ruinous trade wars. With this object in view the British and Irish governments will agree to impose no protective duties or other restrictions upon the flow of transport, trade or commerce between all parts of these islands.

"6. The Irish people shall agree to assume responsibility for their share of the present debt of the united kingdom and liability for pensions arising from the great war, the share, in default of agreement between the governments concerned, to be determined by an independent arbitrator appointed from within his majesty's dominions.

"In accordance with these principles the British government proposes the conditions of the settlement between Great Britain and Ireland be embodied in the form of a treaty to which effect will in due course be given by the British and Irish parliaments. They look to such an instrument to obliterate old conflicts and forthwith to clear the way for a detailed settlement in full accordance with Irish conditions and needs, and thus to establish a new and happier relation between Irish patriotism and that wider community of aims and interests by which the unity of the whole empire may be freely sustained.

"The form in which the settlements are to take effect will depend upon Ireland herself. It must allow for full recognition of the existing powers and privileges of the parliamentary government of northern Ireland, which cannot be abrogated except by its own consent. For their part the British government entertain the earnest hope that the necessity for harmonious co-operation amongst Irishmen of all classes and creeds will be recognized throughout Ireland, and they will welcome the day when by these means unity is achieved.

"But no such common action can be secured by force. Union came in Canada by a free consent of the provinces. So in Australia and so in South Africa. It will come in Ireland by no other way than consent. There can, in fact, be no settlement on terms involving on one side or the other that bitter appeal to bloodshed and violence which all men of good will are longing to terminate.

"The British government will undertake to give effect so far as that depends on them to

any terms in this respect on which all Ireland unites. But in no conditions can they consent to any proposals which would kindle civil war in Ireland.

"Such a war would not touch Ireland alone, for partisans would flock from either side, from Great Britain and the empire and elsewhere, with consequences more devastating to the welfare both of Ireland and the empire than the conflict to which a truce has been called this month. Throughout the empire there is a deep desire that the day of violence should pass and that the solution be found consonant with the highest ideals and interests of all parts of Ireland which will enable her to co-operate as a willing partner in the British commonwealth.

Problem for Irishmen.

"The British government will therefore leave Irishmen themselves to determine by negotiations between them whether the new powers which the pact defines shall be taken over by Ireland as a whole and administered by a single Irish body or taken over separately by southern and northern Ireland with or without the joint authority to harmonize their common interests, and they will willingly assist in negotiations for such a settlement if Irishmen should so desire.

"By these proposals the British government sincerely believe they will have shattered the foundations of that ancient hatred and distrust which have disfigured our common history for centuries past. The future of Ireland within the commonwealth is for the Irish peoples to shape.

"In the foregoing proposals the British government have attempted no more than a broad outline for a settlement. The details they leave for discussion when the Irish people have signified acceptance of the principle of this pact."

TEXT OF DE VALERA'S REPLY.

Lloyd George's reply from De Valera follows:

"On the occasion of our last interview I gave it as my judgment that the dail eireann could not, and that the Irish people would not, accept the proposals of your government as set forth in the draft of July 20 which you had presented to me. Having consulted my colleagues, and with them given these proposals most earnest consideration, I now confirm that judgment. The outline given in the draft is self-contradictory and the principle of the pact is not easy to determine. To the extent that it implies recognition of Ireland's separate nationhood and her right of self-determination we appreciate and accept it.

"But in the stipulations and express conditions concerning matters that are vital, principles strangely are set aside and the claim advanced by your government to interference in our affairs and to control which we cannot admit.

"Ireland's right to choose for herself the path she should take to realize her own destiny must be accepted as indefeasible. It is a right that has been maintained through centuries of oppression and at a cost of unparalleled sacrifice and untold suffering, and it will not be surrendered. We cannot propose to abrogate or to impair it, nor can Great Britain or any other foreign state or group of states legitimately claim to interfere with its exercise in order to serve their own special interests.

"The Irish people's belief is that national destiny can best be realized in political detachment free from imperialistic entanglements which, they feel, will involve enterprises out of harmony with the national character, prove destructive to their ideals, and be fruitful of only ruinous wars, crushing burdens, social discontent, and general unrest and unhappiness.

"Like the small states of Europe, they are prepared to hazard their independence on the basis of moral right, confident that as they threaten no nation or people so they would in turn be free from aggression themselves. This policy they have declared for in plebiscite after plebiscite, and the degree to which any other line of policy deviates from it must be taken as the measure of the extent to which external pressure is operative and violence is being done to the wishes of the majority.

"As for myself and my colleagues, it is our deep conviction that true friendship with England, which military coercion has frustrated for centuries, can be obtained most readily now through amicable but absolute separation. Fear, groundless though we believe it to be, that Irish territory may be used as a basis for attack upon England's liberties can be met by reasonable guaranties not inconsistent with Irish sovereignty.

"Dominion status for Ireland is by every one who understands the conditions known to be illusory. The freedom which the British dominions enjoy is not so much the result of legal enactments or treaties as of immense distances which separate them from Great Britain and make interference by her impracticable. Most explicit guaranties, including the dominion's acknowledged right to secede, would be necessary to secure for Ireland an equal degree of freedom. There is no suggestion, however, in the proposals made of any such guaranties. Instead, the natural positions are reversed and our geographical situation with respect to Great Britain is made the basis of denials and restrictions unheard of in the case of other dominions: the smaller island must give military safeguards and guaranties to the larger and suffer itself to be reduced to a position of helpless dependency.

"It should be obvious that we could not urge acceptance of such proposals upon our people. Certain treaty-free association with the British commonwealth group, as with a partial league of nations, we would have been ready to recommend and as a government to negotiate and take responsibility for, had we assurance that entry of the nation as a whole into such association would secure for it the allegiance of the present dissenting minority, to meet whose sentiment alone this step would be contemplated.

"Treaties dealing with proposals for free intertrade and mutual limitation of armaments we are ready any time to negotiate. Mutual agreement for facilitating air communication as well as railway and other communications can, we feel certain, also be effected. No obstacle of any kind will be placed by us in the way of that smooth commercial intercourse which is essential in the life of both islands, each of which is the best customer and best market of the other.

People's Decision Final.

"It must, of course, be understood that all treaties and agreements would have to be submitted for ratification to a national legislature in the first instance, and subsequently to the Irish people as a whole, under circumstances which would make it evident that their decision would be a free decision and every element of military compulsion absent.

"The question of Ireland's liability for her share of the present debt of the united kingdom we are prepared to leave to be determined by a board of arbitrators, one to be appointed by Ireland, one by Great Britain,

and the third to be chosen by agreement, or, in default of such agreement, to be nominated, say, by the president of the United States of America, if the president would consent.

"In regard to the question at issue between the political minority and the great majority of Irish people, that must remain a question for the Irish themselves to settle. We cannot admit the right of the British government to mutilate our country either in its own interest or at the call of any section of our population. We do not contemplate the use of force. If your government stands aside we can effect a complete reconciliation.

"We agree with you that no common action can be secured by force. Our regret is that this wise and true principle which your government prescribe to us for settlement of our local problem they seem unwilling to apply consistently to the fundamental problem of relations between our island and yours. The principle we rely on in one case we are ready to apply in the other, but should this principle not yield an immediate settlement we are willing that this question, too, be submitted to external arbitration.

"Thus we are ready to meet you in all that is reasonable and just. Responsibility for initiating and effecting honorable peace rests primarily not with our government but with yours. We have no conditions to impose and no claims to advance but one—that we be freed from aggression.

Seek Lasting Friendship.

"We reciprocate, with a sincerity to be measured only by the terrible sufferings our people have undergone, the desire you express for mutual, lasting friendship. The sole cause of the ancient feuds which you deplore has been, as we know and as history proves, the attacks of English rulers upon Irish liberties. These attacks can cease forthwith, and if your government will stop, the road to peace and understanding lies open.

"EAMON DE VALERA."

THE PREMIER'S REPLY.

The premier's reply to Mr. de Valera's letter, made Aug. 13, follows:

"Sir: The earlier part of your letter is so much opposed to our fundamental position that we feel bound to leave you in no doubt of our meaning. You state that after consulting your colleagues you confirm your declaration that our proposals are such as dail eireann couldn't and Irish people wouldn't accept. You add that the outline given our draft is self-contradictory and that the principle of the pact offered you is not easy to determine. We desire, therefore, to make our position absolutely clear.

"In our opinion nothing is to be gained by prolonging a theoretical discussion of the national status which you may be willing to accept as compared with that of the great self-governing dominions of the British commonwealth, but we must direct your attention to one point upon which you lay some emphasis and upon which no British government can compromise—namely, the claim that we should acknowledge the right of Ireland to secede from her allegiance to the king.

"No such right can ever be acknowledged by us.

"The geographical propinquity of Ireland to the British isles is a fundamental fact. The history of the two islands for many centuries, however it reads, is sufficient proof that their destinies are indissolubly linked.

"Ireland has sent members to the British parliament for more than a hundred years. Many thousands of her people during all that time have enlisted freely and served gallantly in the forces of the crown. Great numbers in all the Irish provinces are profoundly attached to the throne. These facts permit one answer, and one only, to the claim that Britain should negotiate with Ireland as a separate and foreign power.

"When you, as the chosen representative of the Irish national ideals, came to speak with me I made one condition only, which our proposal has plainly stated, to the effect that Ireland should recognize the force of geographical and historical facts. It is those facts which govern the problem of British and Irish relations. If they did not exist there would be no problem to discuss.

"I pass, therefore, to the conditions which are imposed by these facts. We set them out clearly in six clauses in the former proposals and need not restate them here, except to say that the British government cannot consent to the reference of any such questions which concern Great Britain and Ireland alone to arbitration by a foreign power.

"We are profoundly glad to have your agreement that northern Ireland cannot be coerced. This point is of great importance because the resolve of our people to resist with their full power any attempt at secession by one part of Ireland carries with it of necessity the equal resolve to resist any effort to coerce another part of Ireland to abandon its allegiance to the crown.

"We gladly give you assurance that we will concur in any settlement which southern and northern Ireland may make for Irish unity within the six conditions already laid down which apply to southern and nothern Ireland alike, but we cannot agree to refer the question of your relations with northern Ireland to foreign arbitration.

"The conditions of the proposed settlement do not arise from any desire to force our will upon the people of another race, but from facts which are as vital to Ireland's welfare as to our own. They contain no derogation from Ireland's status as a dominion, no desire for British ascendency over Ireland and no impairment of Ireland's national ideals.

"Our proposals present to the Irish people an opportunity such as has never dawned in their history before. We have made them in a sincere desire to achieve peace, but beyond that we cannot go. We trust that you will be able to accept them in principle. I shall be ready to discuss their application in detail whenever your acceptance in principle is communicated to me. D. LLOYD GEORGE."

DAIL EIREANN MEETS.

The dail eireann began its sessions on Aug. 16 in the round room of the Dublin castle with a speech by De Valera, in the course of which he said:

"Only on a basis of our recognition as an Irish republic will we deal with any nation or foreign country whatever. The only government the people of Ireland recognize is the ministry of the dail eireann, the Irish republic parliament later."

The sessions of the dail eireann were secret, but it was generally known that there was strong opposition to the prime minister's proposal. This was confirmed when a letter written by De Valera on Aug. 24 on behalf of the assembly was made public on the 26th, together with the prime minister's reply to it. De Valera's letter follows:

"The anticipatory judgment I gave in my reply of Aug. 10 has been confirmed. I laid the proposals of your government before the dail eireann, and by a unanimous vote it has rejected them.

"From your letter of Aug. 13 it was clear that the principle we are asked to accept was that the 'geographical propinquity' of Ireland to Great Britain imposed the condition

of the subordination of Ireland's right to Great Britain's strategic interests, as she conceived them, and that the very length and persistence of the efforts made in the past to compel Ireland's acquiescence in a foreign domination imposed the condition of acceptance of that domination now.

"We cannot believe that your government intended to commit itself to the principle of sheer militarism, destructive of international morality and fatal to the world's peace. If a small nation's right to independence is forfeit when a more powerful neighbor covets its territory for military or other advantages it is supposed to confer, there is an end to liberty. No longer can any small nation claim the right to a separate existence. Holland and Denmark can be made subservient to Germany, Belgium to Germany or to France, Portugal to Spain.

"If nations that have been forcibly annexed to an empire lose thereby their title to independence there can be for them no rebirth to freedom.

"In Ireland's case, to speak of her seceding from a partnership she has not accepted or from an allegiance which she has not undertaken to render, is fundamentally false, just as the claim to subordinate her independence to British strategy is fundamentally unjust. To neither can we, as representatives of the nation, lend countenance.

"If our refusal to betray our nation's honor and the trust that has been reposed in us is to be made an issue of war by Great Britain, we deplore it. We are as conscious of our responsibilities to the living as we are mindful of principle or of our obligations to the heroic dead.

"We have not sought war nor do we seek war, but if war be made upon us we must defend ourselves, and shall do so; confident that, whether our defense be successful or unsuccessful, no body of representative Irishmen or Irishwomen will ever propose to the nation the surrender of its birthright.

"We long to end the conflict between Great Britain and Ireland. If your government be determined to impose its will upon us by force and antecedent to negotiations to insist upon conditions that involve a surrender of our whole national position and make negotiation a mockery, the responsibility for the continuance of the conflict rests upon you.

"On the basis of the broad guiding principle of government by the consent of the governed peace can be secured—a peace that will be just and honorable to all and fruitful of concord and inducing to amity.

"To negotiate such a peace the dail eireann is ready to appoint its representatives, and, if your government accepts the principle proposed, to invest them with plenary powers to meet and arrange with you for its application in detail. I am, sir, faithfully yours,

"EAMON DE VALERA."

PREMIER IN REPLY.

"Sir: The British government are profoundly disappointed by your letter of Aug. 24. You write of the conditions of the meeting between us as though no meeting had ever taken place.

"I must remind you, therefore, that when I asked you to meet me six weeks ago I made no preliminary conditions of any sort. You came to London on that invitation and exchanged views with me at three meetings of considerable length. The proposals I made to you after those meetings were based upon full and sympathetic consideration of the views which you expressed.

"They were not made in any haggling spirit. On the contrary, my colleagues and I went to the very limit of our powers in endeavoring to reconcile British and Irish interests. Our proposals have gone far beyond all precedent, and have been approved as liberal by the whole of the civilized world. Even in quarters which had shown sympathy with the most extreme of the Irish claims they are regarded as the utmost which the empire can reasonably offer or Ireland reasonably expect.

"The only criticism of them I have yet heard outside Ireland is from those who maintain that our proposals have overstepped both warrant and wisdom in their liberality. Your letter shows no recognition of this, and further negotiations must, I fear, be futile, unless some definite progress is made toward acceptance of a basis.

"You declare our proposals involve the surrender of Ireland's whole national tradition and reduce her to subservience. What are the facts?

"Under the settlement we outlined Ireland would control every nerve and fiber of her national existence. She would speak her own language and make her own religious life; she would have complete power over taxation and finance, subject only to an agreement for keeping trade and transport as free as possible between herself and Great Britain, her best market.

"She would have uncontrolled authority over education and all the moral and spiritual interests of her race; she would have it also over law and order, over land and agriculture, over conditions of labor and industry, over the health and homes of her people and over her own defense.

"She would, in fact, within the shores of Ireland be free in every respect of national activity, national expression and national development. The states of the American union, sovereign though they be, enjoy no such range of rights.

"Our proposals go even further, for they invite Ireland to take her place as a partner in the great commonwealth of free nations, united by allegiance to the king.

"We consider these proposals completely fulfill your wish that the principle of government by consent of the governed should be the broad and guiding principle of the settlement which your plenipotentiaries are to negotiate. That principle was first developed in England and is the mainspring of the representative institutions which she was first to create. It was spread by her throughout the world and is now the very life of the British commonwealth.

"We could not have invited the Irish people to take their place in that commonwealth on any other principle, and we are convinced that through it we can heal old misunderstandings and achieve an enduring partnership as honorable to Ireland as to the other nations of which the commonwealth consists. But when you argue that the relations of Ireland with the British empire are comparable in principle to those of Holland or Belgium with the German people I find it necessary to repeat once more that those are premises which no British government, whatever its complexion, can ever accept. In demanding that Ireland should be treated as a separate sovereign power, with no allegiance to the crown and no loyalty to the sister nations of the commonwealth, you are advancing claims which the most famous nationalist leaders in Irish history, from Grattan to Parnell and Redmond, have explicitly disowned.

"Grattan in a famous phrase declared that the ocean protests against separation and the sea against union.' Daniel O'Connell, most eloquent, perhaps, of all the spokesmen of the Irish national cause, protested thus in the house of commons in 1820:

" 'Never did monarch receive more undivided allegiance than the present king from the men who in Ireland agitate the repeal of the union.

Never was there grosser calumny than to assert that they wish to produce separation between the two countries. Never was there a greater mistake than to suppose that we wish to dissolve the connection.'"

The premier then quoted a letter written in 1854 to the duke of Wellington by Thomas Davis, "a fervent exponent of the ideals of young Ireland," advocating the retention of the imperial parliament and the giving to Ireland of a senate selected by the people, the right of levying customs and excise and other taxes, the making of roads, harbors, railways, canals and bridges, encouraging manufacture, commerce, agriculture and fishing, and the settling of the poor laws, tithes, tenures, grand juries and franchises.

"The British government offered Ireland all that O'Connell and Thomas Davis asked, and more. We are met only by an unqualified demand that we should recognize Ireland as a foreign power. It is playing with phrases to suggest that the principle of government by consent of the governed compels recognition of that demand on our part, or that in repudiating it we are straining geographical and historical considerations to justify claim to ascendency over the Irish race. There is no political principle, however clear, that can be applied without regard to limitations imposed by physical and historical facts. Those limitations are as necessary as the very principle itself to the structure of every free nation; to deny them would involve the dissolution of all democratic states. It was on these elementary grounds that we called attention to the governing force of the geographical propinquity of these two islands and of their long and historic association, despite the great difference of character of the races.

"We do not believe a permanent reconciliation between Great Britain and Ireland can ever be attained without recognition of their physical and historical interdependence, which makes complete political and economic separation impracticable for both. I cannot better express the British standpoint in this respect than in the words used of the northern and southern states by Abraham Lincoln in his first inaugural address. They were spoken by him on the brink of the American civil war, which he was striving to avert:

" 'Physically speaking,' he said, 'we cannot separate. We cannct remove our respective sections from each other now and build an impassable wall between them. * * * It is impossible then to make that intercourse more advantageous or more satisfactory after separation than before. * * * Suppose you go to war, you cannot fight always, and when, after much loss on both sides and no gain for either, you cease fighting, the identical old questions as to terms of intercourse again are upon you.'

"I do not think it can reasonably be contended that the relations between Great Britain and Ireland are in any different case. I thought I had made it clear, both in my conversations with you and in my two subsequent communications, that we can discuss no settlement which involves a refusal on the part of Ireland to accept our invitation to a free, equal and loyal partnership in the British commonwealth under one sovereign.

"I am reluctant to precipitate this issue, but just point out that a prolongation of the present state of affairs is dangerous. Action is being taken in various directions which, if continued, would prejudice the truce and must ultimately lead to its termination. This would indeed be deplorable. While therefore prepared to make every allowance as to time which will advance the cause of peace, we cannot prolong a mere exchange of notes. It is essential that some definite and immediate progress should be made toward a basis upon which further negotiations can usefully proceed. Your letter seems to us, unfortunately, to show no such progress.

"In this and my previous letters I have set forth the considerations which must govern the attitude of his majesty's government in any negotiations which they undertake. If you are prepared to examine how far these considerations can be reconciled with the aspirations you represent, I shall be happy to meet you and your colleagues.

"LLOYD GEORGE."

Before adjourning the dail eireann re-elected De Valera president and Arthur Griffith foreign minister of the Irish republic. Other cabinet officers were also chosen.

REPLY OF DAIL EIREANN.

Toward the end of August the British prime minister went for a brief holiday to Inverness, Scotland. There on the evening of Sept. 1 Irish couriers delivered to him the reply of the dail eireann to his letter of the 26th. It was dated Aug. 30 and was signed by Mr. de Valera. It was as follows:

"We, too, are convinced that it is essential that some 'definite immediate progress should be made towards a basis upon which further negotiations can usefully proceed' and recognize the futility of 'a mere exchange' of argumentative notes. I shall therefore refrain from commenting on the fallacious historical references in your last communication. The present is the reality with which we have to deal.

"Conditions to-day are a resultant of the past, accurately summing it up and giving in the simplest form the essential data of the problem.

"These data are:

"1. The people of Ireland, acknowledging no voluntary union to Great Britain, and claiming as fundamental and natural the right to choose freely for themselves the path they shall take to realize their national destiny, have by an overwhelming majority declared for independence, set up a republic, and more than once confirmed their choice.

"2. Great Britain, on the other hand, acts as though Ireland were bound to her by contract of union that forbade separation. The circumstances of this supposed contract are notorious, yet on the theory of its validity the British government and parliament claim to rule and legislate for Ireland, even to the point of partitioning Irish territory against the will of the Irish people and killing or casting into prison every Irish citizen who refuses allegiance.

"The proposals of your government submitted in the draft of July 20 are based fundamentally on the latter premises. We have rejected these proposals, and our rejection is irrevocable. They were not an invitation to Ireland to enter into a 'free and willing' partnership with the free nations of the British commonwealth. They were an invitation to Ireland to enter in the guise of, and under conditions which determine, a status definitely inferior to that of these free states.

"Canada, Australia, South Africa and New Zealand are all guaranteed against domination by the major state, not only by acknowledged constitutional rights which give them an equality of status with Great Britain and absolute freedom from control of the British parliament and government but by the thousands of miles that separate them from Great Britain.

"Ireland would have guaranties neither of distance nor of right. The conditions sought to be imposed would divide her into two artificial states, each destructive of the other's

influence in any common council and both subject to military, naval and economic control by the British government.

"The main historical and geographical facts are not in dispute, but your government insists on viewing them from your standpoint. We must be allowed to view them from ours. The history that you interpret as indicating union we read as dictating separation. Our interpretations of the fact of 'geographical propinquity' are no less diametrically opposed. We are convinced that ours is the true and just interpretation and as a proof we are willing that a neutral impartial arbitrator should be the judge.

"You refuse and threaten to give effect to your view by force. Our reply must be that if you adopt that course, we can only resist as generations before us have resisted.

"Force will not solve the problem. It will never secure the ultimate victory over reason and right. If you again resort to force and if victory be not on the side of justice, the problem that confronts us will confront our successors. The fact that for seventy-five years this problem has resisted solution by force is evidence and warning sufficient.

"It is true wisdom, therefore, and true statesmanship, not any false idealism, that prompts me and my colleagues. Threats of force must be set aside. They must be set aside from the beginning as well as during the actual conduct of negotiations. The respective plenipotentiaries must meet untrammeled by any conditions save the facts themselves and must be prepared to reconcile their subsequent differences, not by appeals to force, covert or open, but by reference to some guiding principle on which there is common agreement. We have proposed the principle of government by consent of the governed and do not mean it as a mere phrase. It is a simple expression of the test to which any proposed solution must respond, if it is to prove adequate, and it can be used as the criterion for the details as well as for the whole.

"That you claim it as a peculiarly British principle, instituted by Great Britain and 'now the very life of the British commonwealth,' should make it peculiarly acceptable to you.

"On this basis and this only we see a hope of reconciling 'the considerations which must govern the attitude' of Great Britain's representatives with the considerations that must govern the attitude of Ireland's representatives, and on this basis we are ready at once to appoint plenipotentiaries."

INVITED TO INVERNESS.

Several meetings of the British cabinet took place at Inverness in the first week in September. The prime minister also had conferences with Sir James Craig, the Ulster premier. On Sept. 7, after the final meeting of the British cabinet, Mr. Lloyd George sent the following letter to Mr. de Valera:

"Sir: His majesty's government have considered your letter of Aug. 30 and have made the following observations upon it:

"The principle of government by consent of the governed is the foundation of British constitutional development, but we cannot accept as a basis of practical conference an interpretation of that principle which would commit us to any demands that you might present, even to the extent of setting up a republic and repudiating the crown. You must be aware that a conference on such a basis is impossible. So applied, the principle of government by the consent of the governed would undermine the fabric of every democratic state and drive the civilized world back to tribalism.

"On the other hand, we have invited you to discuss our proposals on their merits in order that you may have no doubt as to the scope and sincerity of our intentions. It would be open to you, in such a conference, to raise the subject of guaranties on any points wherein you may consider Irish freedom prejudiced by these proposals.

"His majesty's government is loath to believe that you will insist upon rejecting its proposals without examining them in conference. To decline to discuss a settlement which bestowed upon the Irish people the fullest freedom and national development within the empire can only mean that you repudiate all allegiance to the crown and all membership to the British commonwealth.

"If we are to draw this inference from your letter, then further discussion between us will serve no useful purpose and all conferences will be in vain. If, however, we are mistaken in this inference, as we still hope, and if your real objection to our proposals is that they offer to Ireland less than the liberty which we have described, that objection can be explored at a conference.

"You will agree that this correspondence has lasted long enough. His majesty's government must, therefore, ask for a definite reply as to whether you are prepared to enter a conference to ascertain how the association of Ireland with the community of nations, known as the British empire, can best be reconciled with Irish national aspirations. If, as we hope, your answer is affirmative, I suggest that the conference meet at Inverness on the 20th instant. I am, sir, yours faithfully,

"DAVID LLOYD GEORGE.

"Town Hall, Inverness, Sept. 7, 1921."

LETTER OF SEPT. 12.

In reply to this communication Mr. de Valera sent five representatives to Scotland, who after some conversation with the prime minister, delivered to him the following note, written Sept. 12:

"We have no hesitation in declaring our willingness 'to enter a conference to ascertain how the association of Ireland with the community of nations known as the British empire can best be reconciled with Irish national aspirations.'

"Our readiness to contemplate such an association was indicated in our letter of Aug. 20. We have accordingly summoned the dail, that we may submit to it for ratification the names of the representatives it is our intention to propose. We hope that these representatives will find it possible to be at Inverness on the date you suggest, Sept. 20.

"In this final note we deem it our duty to reaffirm that our position is and can only be as we have defined it throughout this correspondence. The principle of government by consent of the governed must be the basis of any agreement which will achieve a final reconciliation. Our nation has formally declared its independence and recognizes itself as a sovereign state. It is only as representatives of that state and as its chosen guardians that we have authority at all to act on behalf of our people.

"As regards the principle of government by consent of the governed, in the very nature of things it must be the basis of any agreement that will achieve the purpose we have at heart—that is the final reconciliation of our nation with yours.

"We have suggested no interpretation of that principle save the everyday interpretation, the sense, for example, in which it was understood by the plain men and women of the world when on Jan. 5, 1918, you said:

" 'The settlement of new Europe must be based on such grounds of reason and justice as will give some promise of stability. Therefore it is that we feel that government with

the consent of the governed must be the basis of any territorial settlement in this war.'

"These words are the true answer to the criticism of our position which your last letter puts forward. The principle was understood then to mean the right of nations that had been annexed to empires against their will to free themselves from the grappling hook. That is the sense in which we understood it. In reality it is your government, when it seeks to rend our ancient nation and to partition its territory, that would give to the principle an interpretation that would undermine the fabric of every democratic state and drive the civilized world back into tribalism.

"I am, sir, faithfully yours,

"EAMON DE VALERA."

CANCELS CONFERENCE.

To this communication the prime minister telegraphed the following reply on Sept. 15:

"I informed your emissaries who came to me here Tuesday that reiteration of your claim to negotiate with his majesty's government as the representative of an independent and sovereign state would make a conference between us impossible.

"They brought me a letter from you in which you specifically reaffirmed that claim, stating that your nation 'has formally declared its independence and recognizes itself as a sovereign state,' and it is only, you added, 'as representatives of that state and as its chosen guardians that we have any authority or powers to act on behalf of our people.'

"I asked them to warn you of the very serious effect of such a paragraph, and offered to regard the letter as not delivered to me, in order that you might have time to reconsider it. Despite this intimation you have now published the letter in its original form. I must accordingly cancel the arrangements for the conference next week at Inverness and must consult my colleagues on the course of action this new situation necessitates. I will communicate this to you as soon as possible, but, as I am for the moment laid up here [with illness] a few days' delay is inevitable. Meanwhile I must make it absolutely clear that his majesty's government cannot reconsider its position, which I have stated to you.

"If we accepted a conference with your delegates on the formal statement of the claim which you have reaffirmed it would constitute an official recognition by his majesty's government of the severance of Ireland from the empire and of its existence as an independent republic. It would, moreover, entitle you to declare, as of right acknowledged by us, that in preference to association with the British empire you would pursue closer association by treaty with some other foreign power. There is only one answer possible to such a claim as that. The great concessions which his majesty's government made to the feeling of your people in order to secure a lasting settlement deserved, in my opinion, some more generous response, but so far every advance has been made by us.

"On your part you have not come to meet us by a single step, but have merely reiterated in phrases of emphatic challenge the letter and the spirit of your original claims. I am yours faithfully LLOYD GEORGE."

MORE TELEGRAMS EXCHANGED.

In response to this Mr. de Valera sent the following telegram on Sept. 16:

"I received your telegram last night and am surprised that you do not see that if we on our side accepted a conference on the basis of your letter of Sept. 7 without making our position quite clear Ireland's representatives would enter the conference with their position misunderstood and the cause of Ireland's right irreparably prejudiced. Throughout the correspondence that has taken place you have defined your government's position. We have defined ours.

"If the positions were not so definitely opposed there would indeed be no problem to be discussed. It should be obvious that in a case like ours if there is to be any result the negotiators must meet without prejudice and untrammeled by any conditions whatever except those imposed by the facts as they know them."

To this dispatch Mr. Lloyd George sent the following reply by wire Sept. 17:

"Sir: I have received the communication which you telegraphed me last night. It is idle to say that a conference in which we have already met your delegates as representatives of an independent and sovereign state would be a conference without prejudice.

"To receive them as such would be to constitute formal and official recognition of Ireland's severance from the king's domains. It would entitle you, if you saw fit, to make a treaty of amity with the king. It would equally entitle you to make no treaty at all, to break off the conference with us at any point and by a right which we ourselves had recognized to negotiate a union of Ireland with a foreign power.

"It would also entitle you, if you insisted upon another appeal to force, to claim from foreign powers by our explicit admission the rights of lawful belligerents against the king. For if we dealt with you as a sovereign and independent state we should have no right to complain of other powers for following our example. These would be the consequences of receiving your delegates as representatives of an independent state.

"We are prepared, in the words of my letter of Sept. 7, to discuss with you 'how the association of Ireland with the community of nations known as the British empire can best be reconciled with Irish national aspirations.'

"We cannot consent to any abandonment, however informal, of the principle of allegiance to the king, upon which the whole fabric of empire and every constitution within it is based. It is fatal to that principle that your delegates in the conference should be there as representatives of an independent and sovereign state while you insist upon claiming that a conference between us is impossible."

DE VALERA TO LLOYD GEORGE.

On the evening of the same day Mr. de Valera sent the following message to the prime minister:

"Sir: In reply to your last telegram just received, I have only to say that I have already accepted your invitation in the exact words which you quote from your letter of the 7th inst. We have not asked you to abandon any principle, even informally, but surely you must understand that we can only recognize ourselves for what we are.

"If this self-recognition be made reason for cancellation of conference we regret it, but it seems inconsistent. I have already had conferences with you and in these conferences and in my written communications I have never ceased to recognize myself for what I was and am. If this involves recognition on your part, then you have already recognized us.

"Had it been our desire to add to the solid substance of Ireland's right a veneer of technicalities and of international usage, which you now introduce, we might have claimed already the advantage of all these consequences which you fear would flow from a reception of our delegates now.

"Believe me, we have but one object at heart, that is the setting of a conference on

such basis of truth and reality as would make it possible to secure through it the result which the peoples of these two islands so ardently desire."

CLAIM NOT MODIFIED.

Replying to the foregoing, Mr. Lloyd George sent this message on Sept. 18:

"I received your telegram last night and observed that it doesn't modify the claim that your delegates should meet us as the representatives of a sovereign, independent state.

"You made no such condition in advance when you came to see me in July. I invited you then as the chosen leader of the great majority of the people of southern Ireland, and you accepted the invitation.

"From the outset of our conversations I told you we looked to Ireland to own allegiance to the throne. That was the basis of our proposals, and we cannot alter it.

"The status you now claim in advance for the Irish delegates is in effect a repudiation of that basis. My colleagues and I cannot meet the Irish delegates as representatives of a sovereign, independent state without disloyalty to the throne and to the empire.

"I must therefore repeat that unless the second paragraph of your letter of Sept. 12 is withdrawn a conference between us is impossible."

Following a conference with his cabinet Mr. de Valera sent this reply on the 19th:

"We have had no thought at any time of asking you to accept any conditions precedent to a conference. We would have thought it as unreasonable to expect you, as a preliminary, to recognize the Irish republic, formally or informally, as that you should expect us, formally or informally, to surrender our national position. It is precisely because neither side accepts the position of the other that there is a dispute at all and that a conference is necessary to search for and discuss such adjustments as will compose it.

"A treaty of accommodation and association properly concluded between the people of these two islands and between Ireland and the group of states in the British commonwealth would, we believe, end the dispute forever and enable the two nations to settle down in peace, each pursuing its own individual development and contributing its own quota to civilization, but working together in free and friendly cooperation in affairs of agreed common concern.

"To negotiate such a treaty the respective representatives of the two nations must meet, but if you seek to impose preliminary conditions which we must regard as involving the surrender of our whole position they cannot meet.

"Your last telegram makes it clear that misunderstandings are more likely to increase than diminish and the cause of peace is more likely to be retarded than advanced by the continuance of the present correspondence.

"We request you, therefore, to state whether your letter of Sept. 7 is intended for surrender on our part or an invitation to a conference free on both sides and without prejudice should an agreement not be reached.

"If the latter we readily confirm our acceptance of the invitation and our appointed delegates will meet your government representatives at any time in the immediate future that you designate."

PROPOSES CONFERENCE IN LONDON.

Prime Minister Lloyd George in a note sent from Gairloch, Scotland, Sept. 29 proposed another conference in London. The text of the note follows:

"Sir: His majesty's government have given close and earnest consideration to the correspondence which has passed between us since their invitation to you to send delegates to a conference at Inverness.

"In spite of their sincere desire for peace, and in spite of the more conciliatory tone of your latest communications, they cannot enter into a conference upon the basis of this correspondence.

"Notwithstanding your personal assurance to the contrary, which they much appreciate, it might be argued in the future that the acceptance of a conference on this basis had involved them in a recognition which no British government can accord. On this point they must guard themselves against any possible doubt. There is no purpose to be served by any further interchange of explanatory and argumentative communications upon this subject. The position taken up by his majesty's government is fundamental to the existence of the British empire, and they cannot alter it.

"My colleagues and I remain, however, keenly anxious to make, in co-operation with your delegates, another determined effort to explore every possibility of a settlement by personal discussion.

"The proposals which we have already made have been taken by the whole world as proof that our endeavors for reconciliation and settlement are no empty form, and we feel that conference, not correspondence, is the most practical and hopeful way to an understanding such as we ardently desire to achieve.

"We therefore send you these with a fresh invitation to a conference in London on Oct. 11, where we can meet your delegates as the spokesmen of the people whom you represent with a view to ascertaining how the association of Ireland with the community of nations known as the British empire may be best reconciled with Irish national aspirations.

"I am, sir, yours faithfully,

"D. LLOYD GEORGE."

INVITATION ACCEPTED.

The invitation to a new conference was accepted by Mr. de Valera, who sent the following reply to the prime minister on Sept. 30:

"We received your letter of invitation to a conference in London Oct. 11, with a view to ascertaining how the association of Ireland with the community of nations known as the British empire may best be reconciled with Irish national aspirations.

"Our respective positions have been stated and understood, and we agree that conference, not correspondence, is the most practical and hopeful way to an understanding.

"We accept the invitation. Our delegates will meet you in London on the date mentioned and explore every possibility of a settlement by personal discussion."

CONFERENCE OPENS.

The conference began in the cabinet room at 10 Downing street, London, Oct. 11. Ireland was represented by Arthur Griffith, Michael Collins, George Gavan Duffy, Eamon Duggan and Robert Barton, and Great Britain by Prime Minister Lloyd George, Winston Churchill, Lord Birkenhead, Sir Hamar Greenwood and Sir L. Worthington Evans. J. Austen Chamberlain, a member of the British delegation, was absent on account of illness. This and the following sessions were behind closed doors and the delegates refused to divulge what was going on.

ANOTHER CRISIS.

On Oct. 19 Pope Benedict sent the following message to King George:

"We rejoice in the resumption of the Anglo-Irish negotiations and pray to the Lord with all our heart that He may bless them and grant to your majesty great joy and the im-

perishable glory of bringing to an end the age-old dissension."

To the pontiff's message King George replied as follows:

"I have received the message of your holiness with much pleasure, and with all my heart I join in your prayer that the conference now sitting in London may achieve a permanent settlement of the troubles in Ireland and may initiate a new era of peace and happiness for my people."

Eamon de Valera on Oct. 20 sent the following message from Dublin to the pope:

"The people of Ireland read the message sent by your holiness to the king of Great Britain and appreciate your kindly interest in their welfare and the paternal regard which suggested it. I tender to your holiness their gratitude. They are confident that the ambiguities in the reply sent in the name of King George will not mislead you as it may the uninformed into believing that the troubles are 'in' Ireland, or that the people of Ireland owe allegiance to the British king.

"The independence of Ireland has been proclaimed by regularly elected representatives of the people of Ireland and ratified by subsequent plebiscites. The trouble is between Ireland and Great Britain, and its source is due to the fact that the rulers of Great Britain have sought to impose their will upon Ireland and by brutal force have endeavored to rob her people of their liberty, which is their natural right and ancient heritage.

"We long to be at peace and in friendship with the people of Great Britain, as with other peoples, but the same constancy through persecution and martyrdom that has proved the reality of our people's attachment to the faith of their fathers proves the reality of their attachment to their national freedom, and no consideration will ever induce them to abandon it."

This exchange of telegrams caused some excitement and for a time it seemed as if the conference might come to an end without having accomplished anything, but the situation was handled tactfully by Lloyd George and the Irish delegates and the conference continued. The opposition of the Ulster cabinet was the chief obstacle to a peaceful settlement encountered in the later stages of the negotiations

EVENTS PRECEDING THE TRUCE.

Following is a chronological account of the chief events in the Irish rebellion from the beginning of 1921 up to the truce which went into effect July 11:

Jan. 2—Military burn seven houses in County Cork in reprisal for ambushing troops.

Jan. 3—Announcement made that Eamon de Valera has landed in Ireland.

Jan. 4—Peter J. MacSwiney, brother of Terence MacSwiney, mayor of Cork, who died in prison from a hunger strike, and Daniel O'Callahan, his successor as mayor, arrive in New York as stowaways.

Jan. 7—Dublin castle announces its intention to destroy houses in the vicinity of scenes of outrages where the occupants are definitely known to be Sinn Feiners.

Jan. 19—Joseph McGuinness and David Kent, Sinn Fein members of parliament, arrested; eight houses reported burned in the Headford district of County Galway.

Jan. 20—Seven policemen killed in attacks in County Clare and County Kerry; District Inspector Tobias O'Sullivan was one of the victims.

Jan. 21—De Valera issues appeal to Irish people to be steadfast in the republican cause; about a dozen ambushers captured near Dublin.

Jan. 22—Sir Hamar Greenwood, chief secretary for Ireland, in a speech in Dublin declares that the government is determined to crush the conspiracy aimed at the disruption of the united kingdom; twenty houses destroyed in Broadford Hills village in reprisal for ambush.

Jan. 23—Two guests in Belfast hotel killed and one wounded by two strangers.

Jan. 30—Father Dominic, chaplain to Lord Mayor MacSwiney of Cork, given three years in prison.

Feb. 1—Cornelius Murphy shot by firing squad in Cork for having in his possession a loaded revolver.

Feb. 2—Lorry, near Ballinalee, County Longford, blown up by land mine; two men killed; two other lorries attacked; six auxiliaries killed; six Sinn Feiners killed in County Cork; District Inspector Francis W. Craven, a hero of the war, killed.

Feb. 3—Eleven policemen killed and two wounded in an ambush in County Limerick; two constables killed and another seriously wounded in County Cork.

Feb. 4—Sir Edward Carson resigns leadership in Ulster and is succeeded by Sir James Craig.

Feb. 5—Nineteen policemen killed and eleven wounded in six days.

Feb. 8—One hundred armed Sinn Feiners seize and hold railroad station in Dublin for an hour.

Feb. 9—Eleven houses in village of Abbeydorney burned by crown forces.

Feb. 14—Bomb thrown at city hall in Dublin.

Feb. 15—Train attacked at Upton station and eight civilians, including a woman, killed; ten others wounded; seven civilians killed and five wounded near Mourn Abbey, County Cork.

Feb. 20—Thirteen civilians killed and eight captured in a fight near Middleton, County Cork.

Feb. 22—More than twenty houses burned at Ballybaneen as a reprisal for the shooting of two constables; two policemen and a young woman killed at Mountcharles, County Donegal.

Feb. 23—Two "black and tans" killed at entrance to Dublin castle.

Feb. 24—Four "black and tans" killed near Macroom; one of them, Maj. Seafield Grant, won a military cross in the war.

Feb. 28—Six youths named Allen, O'Brien, O'Callahan, McCarthy, Lyons and O'Mahoney executed in the Cork military barracks; five unarmed soldiers killed in Cork.

March 1—Two attacks against crown forces in Tipperary repulsed.

March 5—Two officers and two enlisted men killed near Killarney; Brig.-Gen. Cumming, commander of the Kerry military area, one of the victims.

March 7—George Clancy, mayor of city of Limerick, and Councilor Michael O'Callahan killed in their homes by unidentified men; Mrs. Clancy wounded.

March 11—Six ambushers killed in an attack on thirty men of the Bedfordshire regiment near Mohill.

March 14—Six men executed in Mountjoy prison, Dublin, convicted of attacks on crown forces and complicity in killing of intelligence officers in Dublin Nov. 21, 1920.

March 17—Sixteen houses in Clifden, Connemara district, burned following an attack on a police patrol.

March 19—Seven soldiers and one policeman killed and several wounded and seven members of the attacking party killed in an ambush of military and police at Kinsale; fatalities to crown forces caused by blowing up of a bridge while three lorries were crossing it; two soldiers killed in Dublin.

March 21—Seven members of crown force

killed and twelve wounded by men ambushing train near Headford Junction, County Kerry; surviving soldiers drive off assailants.

March 23—Twenty-four persons killed and thirty wounded in ambuscades in various parts of Ireland; Irish prisoners freed in County Roscommon.

March 25—Hidden arsenal of bombs, weapons and ammunition discovered in Dublin.

March 27—Headquarters of Sinn Fein publicity department in Dublin raided; many fires in north of England attributed to Irish.

March 29—Capt. Cecil Rees, Dublin castle official, shot dead in Dublin.

March 31—Rosscarbery police barracks blown up, causing loss of six lives; summary issued by Dublin castle shows 1,000 casualties in first three months of 1921, including 490 persons killed, of whom 180 were members of the crown forces.

April 1—Lord Edmund B. Talbot appointed lord lieutenant of Ireland, succeeding Viscount French.

April 7—Two men in County Roscommon and three men in County Tyrone taken from their homes and shot by Sinn Feiners.

April 11—Bombers routed in attack on police auxiliaries in Dublin.

April 13—Attack on prison in Cork repulsed with machine guns.

April 14—Sir Arthur Edward Vickers, former Ulster king of arms, shot dead at Listowel and his residence burned; one policeman killed and three wounded in ambush at Fedamore, County Limerick.

April 17—Kitty MacCarron, aged 45, "executed" by Sinn Feiners in Scotstown, district of Monaghan; taken from home of her parents, octogenarians, and shot; nearly 1,000 Irish emigrate to the United States in one day.

April 23—One auxiliary and two civilians killed and three others seriously hurt in Belfast fight.

April 24—Fight lasting twelve hours takes place at Maam Cross, County Galway.

April 26—Seven policemen wounded in an ambush at Newry, County Down.

April 28—Four men executed in Cork military barracks for making war on crown forces.

May 1—Seven Irish republicans killed by police and troops in Counties Cork and Tipperary.

May 2—Six civilians killed in five-hour fight with crown forces near Galbally.

May 3—Four policemen killed and two wounded in ambush at Tourmakeady.

May 4—Sergeant and seven constables killed in ambush near Rathmore, County Kerry; Glasgow police inspector killed by Sinn Feiners; conference held in Dublin castle between Eamon de Valera and Sir James Craig.

June 22—Ulster parliament formally opened by King George.

June 23—Eamon de Valera arrested in Dublin, but released under order that he should not be interfered with.

June 24—Prime Minister Lloyd George invites Eamon de Valera to conference in London.

June 30—Arthur Griffith, Prof. John MacNeill and other Sinn Fein leaders released from prison.

July 11—Truce goes into effect.

NORTHERN IRELAND PARLIAMENT ESTABLISHED.

Under the government of Ireland act passed by the British parliament in 1920 a parliament for northern Ireland comprising the counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone and the parliamentary boroughs of Belfast and Londonderry was established in 1921. It is usually referred to as the Ulster parliament. Another body of the same kind was provided for the remainder of Ireland, but owing to Sinn Fein opposition was not organized.

Elections of members to the Ulster house of commons took place May 24 and to the senate June 11. Forty unionists and twelve nationalists and republicans were elected to the house. The nationalists and republicans, however, refused to take their seats. The members of the new parliament were sworn in June 6, but the chief formalities in connection with the organization of the new lawmaking body in Belfast took place June 22 in the presence of King George and Queen Mary.

The house of commons consists of fifty-two elected members and the senate of two ex officio and twenty-four elected members. Parliament has power to legislate except in imperial matters.

The Ulster ministry in 1921 was made up of the following:

Prime Minister—The Rt.-Hon. Sir James Craig, Bart., M. P.

Minister of Finance—The Rt.-Hon. Hugh Mac-Dowell Pollock, M. P.

Minister of Home Affairs—The Rt.-Hon. Sir Richard Dawson Bates, M. P.

Minister of Labor—The Rt.-Hon. John Miller Andrews, M. P.

Minister of Education—The marquis of Londonderry, K. G.

Minister of Agriculture and Commerce—The Rt.-Hon. Edward Mervyn Archdale, M. P.

THE LEAGUE OF NATIONS.

Headquarters, Geneva, Switzerland.
Covenant in effect, June 28, 1919.
Nations in league, 51.
First meeting of league council, Jan. 16, 1920.
First league assembly held, Nov. 15-Dec. 18, 1920.
Second league assembly held, Sept. 5-Oct. 5, 1921.
Permanent president, Jonkheer van Karnebeek, Netherlands.
Secretary-general, Sir James Eric Drummond, Great Britain.

SECOND LEAGUE ASSEMBLY.

The second assembly of the league of nations was held in Geneva, Switzerland, beginning Sept. 5 and ending Oct. 5, 1921. Thirty-nine nations were represented when the session opened and six more were admitted later, making the total represented forty-five. Argentina, Honduras, Guatemala, Nicaragua, Peru and Salvador were not represented. The full list of nations in the league follows:

Albania.
Argentina.
Australia.
Austria.
Belgium.
Bolivia.
The British Empire
Brazil.
Bulgaria.
Canada.
Chile.
China.
Colombia.
Costa Rica.

Roumania.
Salvador.
Serb-Croat-Slovene State.
Siam.
South Africa.
Spain.
Sweden.
Switzerland.
Uruguay.
Venezuela.

Jonkheer van Karnebeek, foreign minister of the Netherlands, was elected permanent president of the assembly. The work before the assembly was divided among six main committees, on each of which all the member nations were represented, giving them a plenary status. The committees, the character of their work and the chairman and vice-chairman of each were as follows:

No. 1. Constitutional and legal questions, including amendments to the covenant and the interpretation of article 18 for the registration of treaties. Chairman, M. Scialoja, Italy; vice-chairman, M. Urrutia, Colombia.

No. 2. Questions regarding the technical organizations, including the transit, the health, and the economic and financial organizations. Chairman, Mr. Jonescu, Roumania; vice-chairman, Freire d'Andrade, Portugal.

No. 3. Reduction of armaments and blockade. Chairman, H. Branting, Sweden; vice-chairman, M. Aguero y Betancourt, Cuba.

No. 4. The finances and the internal organization of the league, including the report of the committee on the secretariat and the allocation of expenses. Chairman, M. Edwards, Chile; vice-chairman, Herluf Zahle, Denmark.

No. 5. Humanitarian and social questions, such as typhus, opium, the traffic in women and children, deportation of women and children in Asia Minor, and the international co-ordination of intellectual work. Chairman, Mr. Doherty, Canada; vice-chairman, Tang Tsai-Fou, China.

No. 6. Political questions, including the applications of five states for membership and the Albanian situation. Chairman, M. le Comte de Gimeno, Spain; vice-chairman, M. Escalante, Venezuela.

The presidents of these six committees became ipso facto vice-presidents of the assembly. After their designation, the assembly proceeded to the election of six other vice-presidents to form the bureau of the assembly, consisting of the president, the secretary-general and the twelve vice-presidents. The six vice-presidents chosen by vote of the assembly were as follows:

M. Bourgeois, France.
M. da Cunha, Brazil.
Mr. Balfour, Great Britain.
Viscount Ishii, Japan.
M. Hymans, Belgium.
M. Benes, Czecho-Slovakia.

COURT OF INTERNATIONAL JUSTICE.

On Sept. 14 the assembly and the council elected the judges of the Permanent Court of International Justice. In accordance with the statute, the assembly and the council each proceeded to its selection simultaneously and independently of the other and on the principle that any candidates who might be selected by both bodies should be declared elected. For this purpose the assembly held a regular public meeting at the Salle de la Reformation, while the council met in private at the secretariat, thus assuring that there should be no communication between the two bodies. Because of the wideness of the choice and the necessary complexity of the election machinery, it had been estimated that many days might be required for balloting. Instead, however, all eleven judges and three of the four deputy judges were finally agreed upon and declared elected before nightfall of the first day's ballot, and the fourth and last deputy judge was elected two days later.

The following were elected full members of the court:

Viscount Robert Bannatyne Finlay, Great Britain.
Charles Andre Weiss, France.
Dionisio Anzilotti, Italy.
John Bassett Moore, United States.
Rafael Altamira, Spain.
Ruy Barbosa, Brazil.
Antonio de Bustamente, Cuba.
Max Huber, Switzerland.
B. J. C. Loder, the Netherlands.
Didrik Galtrup Gjedde Nyholm, Denmark.
Yorozo Oda, Japan.

The four deputy judges elected were:
Demetriu Negulescu, Roumania.
Wang Chung-hui, China.
Mihailo Johanovic, Jugo Slavia.
Frederick V. N. Beichman, Norway.

The definite creation of the Permanent Court of International Justice was assured before the assembly met, the statute having been ratified by a majority of the states members of the league. Some of the leading features of the approved draft creating the court follow:

This court shall be in addition to the court of arbitration organized by The Hague convention of 1899 and 1907, and to the special tribunals of arbitration to which states are always at liberty to submit their disputes for settlement.

The Permanent Court of International Justice shall be composed of a body of independent judges, elected regardless of their nationality, from among persons of high moral character, who possess the qualifications required in their respective countries, for appointment to

the highest judicial offices, or are jurisconsults of recognized competence in international law.

The court shall consist of fifteen members, eleven judges and four deputy judges. The number of judges and deputy judges may be hereafter increased by the assembly, upon the proposal of the council of the league of nations, to a total of fifteen judges and six deputy judges.

The members of the court shall be elected by the assembly and the council from a list of persons nominated by the national groups in the court of arbitration, in accordance with the following provisions:

At least three months before the date of the election the secretary-general of the league of nations shall address a written request to the members of the court of arbitration, belonging to the states mentioned in the annex to the covenant or to the states which shall have joined the league subsequently, inviting them to undertake, by national groups, the nomination of persons in a position to accept the duties of a member of the court.

At every election the electors shall bear in mind that not only should all the persons appointed as members of the court possess the qualifications required, but the whole body also should represent the main forms of civilization and the principal legal systems of the world.

Those candidates who obtain an absolute majority of votes in the assembly and the council shall be considered as elected.

In the event of more than one candidate of the same nationality being elected by the votes of both the assembly and the council the eldest of these only shall be considered as elected.

The members of the court shall be elected for nine years. They may be re-elected. They shall continue to discharge their duties until their places have been filled. Though replaced, they shall complete any cases which they may have begun.

The seat of the court shall be established at The Hague. The president and registrar shall reside at the seat of the court.

A session shall be held every year. Unless otherwise provided by rules of court this session shall begin on the 15th of June, and shall continue for so long as may be necessary to complete the cases on the list. The president may summon an extraordinary meeting of the court whenever necessary.

If, for some special reason, a member of the court considers that he cannot take part in the decision of a particular case, he shall so inform the president. If, for some special reason, the president considers that one of the members of the court should not sit on a particular case, he shall give notice to the member concerned. In the event of the president and the member not agreeing as to the course to be adopted in any such case, the matter shall be settled by the decision of the court.

The full court shall sit except when it is expressly provided otherwise. If eleven judges cannot be present, deputy judges shall be called upon to sit, in order to make up this number. If, however, eleven judges are not available, a quorum of nine judges shall suffice to constitute the court.

The expenses of the court shall be borne by the league of nations, in such a manner as shall be decided by the assembly upon the proposal of the council.

The court shall have jurisdiction to hear and determine suits between states.

The court shall be open of right to the states mentioned in the annex to the covenant, and to such others as shall subsequently enter the league of nations. Other states may have access to it. The conditions under which the court shall be open of right or accessible to states which are not members of the league of nations shall be determined by the council, in accordance with article 17 of the covenant.

When a dispute has arisen between states, and it has been found impossible to settle it by diplomatic means, and no agreement has been made to choose another jurisdiction, the party complaining may bring the case before the court. The court shall, first of all, decide whether the preceding conditions have been complied with; if so, it shall hear and determine the dispute according to the terms and within the limits of the next article.

Between states which are members of the league of nations, the court shall have jurisdiction (and this without any special convention giving it jurisdiction) to hear and determine cases of a legal nature, concerning: (a) The interpretation of a treaty; (b) any question of international law; (c) the existence of any fact which, if established, would constitute a breach of an international obligation; (d) the nature or extent of reparation to be made for the breach of an international obligation; (e) the interpretation of a sentence passed by the court.

The court shall also take cognizance of all disputes of any kind which may be submitted to it by a general or particular convention between the parties. In the event of a dispute as to whether a certain case comes within any of the categories above mentioned, the matter shall be settled by the decision of the court.

The court shall, within the limits of its jurisdiction as defined in article 34, apply in the order as follows:

1. International conventions, whether general or particular, establishing rules expressly recognized by the contesting states.
2. International custom, as evidence of a general practice, which is accepted as law.
3. The general principles of law recognized by civilized nations.
4. Judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.

The court shall give an advisory opinion upon any question or dispute of an international nature referred to it by the council or assembly. When the court shall give an opinion on a question of an international nature which does not refer to any dispute that may have arisen, it shall appoint a special commission of from three to five members. When it shall give an opinion upon a question which forms the subject of an existing dispute it shall do so under the same conditions as if the case had been actually submitted to it for decision.

The official language of the court shall be French. The court may, at the request of the contesting parties, authorize another language to be used before it.

A state desiring to have recourse to the court shall lodge a written application addressed to the registrar. The application shall indicate the subject of the dispute and name the contesting parties. The registrar shall forthwith communicate the application to all concerned. He shall also notify the members of the league of nations through the secretary-general.

The hearing in court shall be public, unless the court, at the written request of one of the parties, accompanied by a statement of his reasons, shall otherwise decide.

Whenever one of the parties shall not appear before the court, or shall fail to defend his case, the other party may call upon the court to decide in favor of his claim. The

court must, before doing so, satisfy itself, not only that it has jurisdiction in accordance with articles 33 and 34, but also that the claim is supported by substantial evidence and well founded in fact and law.

All questions shall be decided by a majority of the judges present at the hearing. In the event of an equality of votes, the president or his deputy shall have a casting vote.

If the judgment given does not represent, wholly or in part, the unanimous opinion of the judges, the dissenting judges shall be entitled to have the fact of their dissent or reservations mentioned in it. But the reasons for their dissent or reservations shall not be expressed in the judgment.

The judgment is final and without appeal. In the event of uncertainty as to the meaning or scope of the judgment, the court shall construe it upon the request of any party.

An application for revision of a judgment can be made only when it is based upon the discovery of some new fact, of such a nature as to be a decisive factor, which fact was, when the judgment was given, unknown to the court and also to the party claiming the revision, always provided that such ignorance was not due to negligence. The proceedings for revision will be opened by a judgment of the court expressly recording the existence of the new fact, recognizing that it has such a character as to lay the case open to revision, and declaring the application admissible on this ground. The court may require previous compliance with the terms of the judgment before it admits proceedings in revision. No application for revision may be made after the lapse of five years from the date of the sentence.

Should a state consider that it has an interest of a legal nature which may be affected by the decision in the case, it may submit a request to the court to be permitted to intervene as a third party. It will be for the court to decide upon this request.

Whenever the construction of a convention in which states, other than those concerned in the case, are parties, is in question, the registrar shall notify all such states forthwith. Every state so notified has the right to intervene in the proceedings; but if it uses this right, the construction given by the judgment will be as binding upon it as upon the original parties to the dispute.

AMENDMENTS TO THE COVENANT.

Though the election of judges and deputy judges of the Permanent Court of International Justice was perhaps the most important act of the second assembly, other subjects were dealt with. Proposed amendments to the covenant of the league were disposed of finally or passed over for action at the third session of the assembly. Owing to the establishment of the Permanent Court of International Justice certain drafting changes were made in articles 12, 13 and 15. In brief, they would give equal prominence to the process of "judicial settlement" as to that of arbitration as one of the methods enumerated in the covenant for the settlement of disputes.

The amendments proposed by the Norwegian and Swedish governments for the establishment of permanent commissions of arbitration and conciliation was not accepted, though the procedure of conciliation was approved as in conformity with the spirit of the covenant, and the council was invited to appoint a committee to investigate the specific proposals made, with a view to formulating a body of rules. Similarly, the Danish, Norwegian and Swedish proposals to render more absolute and more precise the obligation to resort to arbitration were not accepted, as it was felt desirable to leave to the parties to a dispute a free choice between various procedures of settlement, and not to impose compulsory arbitration.

What was considered the most important amendment offered, namely, the Canadian proposal for the elimination of article 10, developed a wide divergence of views. The original committee on amendments had proposed a detailed interpretative resolution for adoption by the assembly. It was decided, however, that owing to the widely different opinions expressed as to the legal bearing of article 10 in its relationship to other articles of the covenant, and owing to the great strength of the legal and political arguments made both for and against it, the assembly should postpone decision until its next session, with the understanding that this proposal be decided before any other amendment.

The Czecho-Slovak amendment, that agreements between a limited number of members of the league might not only be approved by the league but should also be encouraged by it and initiated under its auspices, was not accepted. Though the committee on amendments had approved a text along these lines, the assembly felt that there was not yet occasion to amend article 21, especially as the present text did not exclude the application of the ideas contained in the proposed amendment. At the same time it drew attention to the fact that agreements tending to define or complete the engagements contained in the covenant for the maintenance of peace or the promotion of international co-operation, may be regarded as of a nature likely to contribute to the progress of the league in the path of practical realizations.

The Argentine amendment, "that all sovereign states recognized by the community of nations be admitted to join the league of nations in such a manner that if they do not become members of the league this can only be the result of a voluntary decision on their part," was considered at length. It was recognized that the Argentine was actuated by the highest motives in proposing a clause which would unconditionally throw open the doors of the league to all states, but at the same time it was felt that the proposed amendment was not only admitted by its authors to be imperfect in drafting but that it aimed at a radical transformation of the whole character of the league, and would require several other fundamental changes in the covenant. Consequently, though certain of these difficulties might be met by textual changes, the assembly reluctantly decided that, in view of the regrettable absence of the Argentine delegation, and until the principle contained in its proposal could be accepted, any decision on the amendment proposed should be postponed.

Similarly, certain other less important proposals were not accepted. The Scandinavian proposal that the assembly should meet annually at a fixed date and that a certain number of members of the league might convene a special assembly at any other time was felt unnecessary, as adequate provision is already made to this end in the assembly's rules of procedure. Also, it was felt unwise to propose any amendment to article 1 as regards the admission or affiliation of small states with the league. The Colombian proposal that unanimity be not required for assembly decisions developing articles of the covenant was withdrawn.

ECONOMIC BLOCKADE.

The method of application of article 16, whereby states members of the league agree to declare an economic blockade against a state which goes to war in disregard of its engagements under articles 12, 13 and 15 of

the covenant, was discussed at length by the first assembly, formed the object of a study by the special blockade commission in August and was further analyzed both in committee and in full session of the second assembly. As a result, a series of amendments to the covenant were approved by the assembly without dissent, subject to the prescribed ratification of all the members of the council and half the states represented in the assembly. Pending that ratification, it was agreed that the amendments should constitute rules for guidance, which the assembly recommends as a provisional measure to the council and the members of the league as regards the application of article 16. The resolutions adopted follow:

1. Subject to the special provisions of article 17, the economic measures referred to in article 16 shall be applicable only in the specific cases referred to in this article.

2. The unilateral action of the defaulting state cannot create a state of war. It merely entitles the other members of the league to resort to war or to declare themselves in a state of war with the covenant-breaking state; but it is in accordance with the spirit of the covenant that the league of nations should attempt, at least at the outset, to avoid war and to restore peace by economic pressure.

3. It is the duty of each member of the league to decide for itself whether a breach of the covenant has been committed. The fulfillment of their duties under article 16 is required from members of the league by the express terms of the covenant, and they cannot neglect them without breach of their treaty obligations.

4. All cases of breach of covenant under article 16 shall be referred to the council as a matter of urgency at the request of any member of the league. Further, if a breach of covenant be committed, or if there arise a danger of such breach being committed, the secretary-general shall at once give notice thereof to all the members of the council. Upon receipt of such a request by a member of the league, or of such a notice by the secretary-general, the council will meet as soon as possible. The council shall summon representatives of the parties to the conflict and of all states which are neighbors of the defaulting state, or which normally maintain close economic relations with it, or whose co-operation would be especially valuable for the application of article 16.

5. If the council is of opinion that a state has been guilty of a breach of covenant, the minutes of the meeting at which that opinion is arrived at shall be immediately sent to all members of the league, accompanied by a statement of reasons and by an invitation to take action accordingly. The fullest publicity shall be given to this decision.

6. For the purpose of assisting it to enforce article 16, the council may, if it thinks fit, be assisted by a technical committee. This committee will remain in permanent session as soon as the action decided on is taken, and may include, if desirable, representatives of the states specially affected.

7. The council should fix the date on which the enforcement of economic pressure, under article 16, is to be begun, and should give notice of that date to all the members of the league.

8. All states must be treated alike as regards the application of the measures of economic pressure, with the following reservations:

(a) It may be necessary to recommend the execution of special measures by certain states;

(b) If it is thought desirable to postpone, wholly or partially, in the case of certain states, the effective application of the economic sanctions laid down in article 16, such postponement shall not be permitted except in so far as it is desirable for the success of the common plan of action, or reduces to a minimum the losses and embarrassments which may be entailed in the case of certain members of the league by the application of the sanctions.

9. It is not possible to decide beforehand, and in detail, the various measures of an economic, commercial and financial nature to be taken in each case where economic pressure is to be applied.

When the case arises the council shall recommend to the members of the league a plan for joint action.

10. The interruption of diplomatic relations shall, in the first place, be limited to the withdrawal of the heads of missions.

11. Consular relations may possibly be maintained.

12. For the purposes of the severance of relations between persons belonging to the covenant-breaking state and persons belonging to other states members of the league, the test should be residence and not nationality.

13. In cases of prolonged application of economic pressure, measures of increasing stringency may be taken. The cutting off of the food supplies of the civil population of the defaulting state shall be regarded as an extremely drastic measure which shall only be applied if the other measures available are clearly inadequate.

14. Correspondence and all other methods of communication shall be subjected to special regulations.

15. Humanitarian relations shall be continued.

16. Efforts shall be made to arrive at arrangements which will insure the co-operation of states nonmembers of the league in the measures to be taken.

17. In special circumstances and in support of economic measures to be taken it may become advisable: (a) to establish an effective blockade of the seaboard of the covenant-breaking state; (b) to intrust to some members of the league the execution of the blockade operations.

18. The council shall urge upon all the states members of the league that their governments should take the necessary preparatory measures, above all of a legislative character, to enable them to enforce at short notice the necessary measures of economic pressure.

BUDGET AND OTHER MATTERS.

Reports were submitted and approved with reference to improvement of means of transit and communication, health organization, statistics and co-ordination of intellectual work. The provisional health organization, it was decided, should comprise a health committee and an epidemic commission. A new allocation of expenses was adopted and the budget for 1922 was fixed at 20,748,455 gold francs (about $4,149,691).

Reports were made on the disputes between Poland and Lithuania, Bolivia and Chile, Albania and Jugo Slavia and on troubles in Austria, eastern Galicia and Armenia.

It was decided that the various nations could not be asked to grant official credits for the relief of famine sufferers in Russia. Dr. Fridtjof Nansen reported that in addition to what was being done by Mr. Hoover's organization and other agencies $25,000,000 was needed to save millions from death by starvation.

PRISONERS OF WAR.

Dr. Nansen, who had been intrusted by the council with the repatriation of prisoners of war, many of whom had suffered for as much as six years from hunger, disease, cold, bad accommodation, lack of clothing and mental anguish, read to the assembly a detailed report of his work and was congratulated by the president, M. van Karnebeek, on behalf of the assembly, for the results achieved. Dr. Nansen stated that he had secured from certain governments represented on the international committee of relief credits, at first Denmark, Sweden, Norway, Switzerland and Holland, and later Great Britain and France, credits totaling £400,000 ($2,000,000), against which approximately 380,000 men had been returned to their families, many of them from the most remote parts of the Russian empire, where communication was exceedingly difficult.

Associate Directors—Denys P. Myers, Allan P. Ames, Edwin Bjorkman.

LEAGUE OF NATIONS COVENANT.

The full text of the league of nations covenant, constituting part 1 of the treaty of Versailles, follows:

The High Contracting Parties,

In order to promote international co-operation and to achieve international peace and security

by the acceptance of obligations not to resort to war,

by the prescription of open, just and honourable relations between nations,

by the firm establishment of the understandings of international law as the actual rule of conduct among Governments, and

by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another,

Agree to this Covenant of the League of Nations.

Article 1.

The original Members of the League of Nations shall be those of the Signatories which are named in the Annex to this Covenant and also such of those other States named in the Annex as shall accede without reservation to this Covenant. Such accession shall be effected by a Declaration deposited with the Secretariat within two months of the coming into force of the Covenant. Notice thereof shall be sent to all other Members of the League.

Any fully self-governing State, Dominion or Colony not named in the Annex may become a Member of the League if its admission is agreed to by two-thirds of the Assembly, provided that it shall give effective guarantees of its sincere intention to observe its international obligations, and shall accept such regulations as may be prescribed by the League in regard to its military, naval and air forces and armaments.

Any member of the League may, after two years' notice of its intention so to do, withdraw from the League, provided that all its international obligations and all its obligations under this Covenant shall have been fulfilled at the time of its withdrawal.

Article 2.

The action of the League under this Covenant shall be effected through the instrumentality of an Assembly and of a Council, with a permanent Secretariat.

Article 3.

The Assembly shall consist of Representatives of the Members of the League.

The Assembly shall meet at stated intervals and from time to time as occasion may require at the Seat of the League or at such other place as may be decided upon.

The Assembly may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

At meetings of the Assembly each Member of the League shall have one vote, and may have not more than three Representatives.

Article 4.

The Council shall consist of Representatives of the Principal Allied and Associated Powers, together with representatives of four other Members of the League. These four members of the League shall be selected by the Assembly from time to time in its discretion. Until the appointment of the Representatives of the four Members of the League first selected by the Assembly, Representatives of Belgium, Brazil, Spain and Greece shall be members of the Council.

With the approval of the majority of the Assembly, the Council may name additional Members of the League whose Representatives shall always be members of the Council; the Council with like approval may increase the number of Members of the League to be selected by the Assembly for representation on the Council.

The Council shall meet from time to time as occasion may require, and at least once a year, at the Seat of the League, or at such other place as may be decided upon.

The Council may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

Any Member of the League not represented on the Council shall be invited to send a Representative to sit as a member at any meeting of the Council during the consideration of matters specially affecting the interests of that Member of the League.

At meetings of the Council, each Member of the League represented on the Council shall have one vote, and may have not more than one representative.

Article 5.

Except where otherwise expressly provided in this Covenant or by the terms of the present Treaty, decisions at any meeting of the Assembly or of the Council shall require the agreement of all the Members of the League represented at the meeting.

All matters of procedure at meetings of the Assembly or of the Council, including the appointment of Committees to investigate particular matters, shall be regulated by the Assembly or by the Council and may be decided by a majority of the Members of the League represented at the meeting.

The first meeting of the Assembly and the first meeting of the Council shall be summoned by the President of the United States of America.

Article 6.

The permanent Secretariat shall be established at the Seat of the League. The Secretariat shall comprise a Secretary General and such secretaries and staff as may be required.

The first Secretary General shall be the person named in the Annex; thereafter the Secretary General shall be appointed by the Council with the approval of the majority of the Assembly.

The secretaries and staff of the Secretariat shall be appointed by the Secretary General with the approval of the Council.

The Secretary General shall act in that capacity at all meetings of the Assembly and of the Council.

The expenses of the Secretariat shall be borne by the Members of the League in accordance with the apportionment of the expenses of the International Bureau of the Universal Postal Union.

Article 7.

The Seat of the League is established at Geneva.

The Council may at any time decide that the Seat of the League shall be established elsewhere.

All positions under or in connection with the League, including the Secretariat, shall be open equally to men and women.

Representatives of the Members of the League and officials of the League when engaged on the business of the League shall enjoy diplomatic privileges and immunities.

The buildings and other property occupied by the League or its officials or by Representatives attending its meetings shall be inviolable.

Article 8.

The Members of the League recognise that the maintenance of peace requires the reduction of national armaments to the lowest point consistent with national safety and the enforcement by common action of international obligations.

The Council, taking account of the geographical situation and circumstances of each State, shall formulate plans for such reduction for the consideration and action of the several Governments.

Such plans shall be subject to reconsideration and revision at least every ten years.

After these plans shall have been adopted by the several Governments, the limits of armaments therein fixed shall not be exceeded without the concurrence of the Council.

The Members of the League agree that the manufacture by private enterprise of munitions and implements of war is open to grave objections. The Council shall advise how the evil effects attendant upon such manufacture can be prevented, due regard being had to the necessities of those Members of the League which are not able to manufacture the munitions and implements of war necessary for their safety.

The Members of the League undertake to interchange full and frank information as to the scale of their armaments, their military, naval and air programmes and the condition of such of their industries as are adaptable to war-like purposes.

Article 9.

A permanent Commission shall be constituted to advise the Council on the execution of the provisions of Articles 1 and 8 and on military, naval and air questions generally.

Article 10.

The Members of the League undertake to respect and preserve as against external aggression the territorial integrity and existing political independence of all Members of the League. In case of any such aggression or in case of any threat or danger of such aggression the Council shall advise upon the means by which this obligation shall be fulfilled.

Article 11.

Any war or threat of war, whether immediately affecting any of the Members of the League or not, is hereby declared a matter of concern to the whole League, and the League shall take any action that may be deemed wise and effectual to safeguard the peace of nations. In case any such emergency should arise the Secretary General shall on the request of any Member of the League forthwith summon a meeting of the Council.

It is also declared to be the friendly right of each Member of the League to bring to the attention of the Assembly or of the Council any circumstance whatever affecting international relations which threaten to disturb international peace or the good understanding between nations upon which peace depends.

Article 12.

The Members of the League agree that if there should arise between them any dispute likely to lead to a rupture, they will submit the matter either to arbitration or to inquiry by the Council, and they agree in no case to resort to war until three months after the award by the arbitrators or the report by the Council.

In any case under this Article the award of the arbitrators shall be made within a reasonable time, and the report of the Council shall be made within six months after the submission of the dispute.

Article 13.

The Members of the League agree that whenever any dispute shall arise between them which they recognise to be suitable for submission to arbitration and which cannot be satisfactorily settled by diplomacy, they will submit the whole subject-matter to arbitration.

Disputes as to the interpretation of a treaty, as to any question of international law, as to the existence of any fact which if established would constitute a breach of any international obligation, or as to the extent and nature of the reparation to be made for any such breach, are declared to be among those which are generally suitable for submission to arbitration.

For the consideration of any such dispute the court of arbitration to which the case is referred shall be the Court agreed on by the parties to the dispute or stipulated in any convention existing between them.

The Members of the League agree that they will carry out in full good faith any award that may be rendered, and that they will not resort to war against a Member of the League which complies therewith. In the event of any failure to carry out such an award, the Council shall propose what steps should be taken to give effect thereto.

Article 14.

The Council shall formulate and submit to the Members of the League for adoption plans for the establishment of a Permanent Court of International Justice. The Court shall be competent to hear and determine any dispute of an international character which the parties thereto submit to it. The Court may also give an advisory opinion upon any dispute or question referred to it by the Council or by the Assembly.

Article 15.

If there should arise between Members of the League any dispute likely to lead to a rupture, which is not submitted to arbitration in accordance with Article 13, the Members of the League agree that they will submit the matter to the Council. Any party to the dispute may effect such submission by giving notice of the existence of the dispute to the Secretary General, who will make all necessary arrangements for a full investigation and consideration thereof.

For this purpose the parties to the dispute will communicate to the Secretary General, as promptly as possible, statements of their case with all the relevant facts and papers, and the Council may forthwith direct the publication thereof.

The Council shall endeavour to effect a settlement of the dispute, and if such efforts are successful, a statement shall be made public giving such facts and explanations regarding the dispute and the terms of settlement thereof as the Council may deem appropriate.

If the dispute is not thus settled, the Council either unanimously or by a majority vote shall make and publish a report containing a statement of the facts of the dispute and the recommendations which are deemed just and proper in regard thereto.

Any Member of the League represented on the Council may make public a statement of the facts of the dispute and of its conclusions regarding the same.

If a report by the Council is unanimously agreed to by the members thereof other than the Representatives of one or more of the parties to the dispute, the Members of the League agree that they will not go to war with any party to the dispute which complies with the recommendations of the report.

If the Council fails to reach a report which is unanimously agreed to by the members thereof, other than the Representatives of one or more of the parties to the dispute, the Members of the League reserve to themselves the right to take such action as they shall consider necessary for the maintenance of right and justice.

If the dispute between the parties is claimed by one of them, and is found by the Council, to arise out of a matter which by international law is solely within the domestic jurisdiction of that party, the Council shall so report, and shall make no recommendation as to its settlement.

The Council may in any case under this Article refer the dispute to the Assembly. The dispute shall be so referred at the request of either party to the dispute, provided that such request be made within fourteen days after the submission of the dispute to the Council.

In any case referred to the Assembly, all the provisions of this Article and of Article 12 relating to the action and powers of the Council shall apply to the action and powers of the Assembly, provided that a report made by the Assembly, if concurred in by the Representatives of those Members of the League represented on the Council and of a majority of the other Members of the League, exclusive in each case of the Representatives of the parties to the dispute, shall have the same force as a report by the Council concurred in by all the members thereof other than the Representatives of one or more of the parties to the dispute.

Article 16.

Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 or 15, it shall ipso facto be deemed to have committed an act of war against all other Members of the League, which hereby undertake immediately to subject it to the severance of all trade or financial relations, the prohibition of all intercourse between their nationals and the nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, whether a Member of the League or not.

It shall be the duty of the Council in such case to recommend to the several Governments concerned what effective military, naval or air force the Members of the League shall severally contribute to the armed forces to be used to protect the covenants of the League.

The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimise the loss and inconvenience resulting from the above measures, and that they will mutually support one another in resisting any special measures aimed at one of their number by the covenant-breaking State, and that they will take the necessary steps to afford passage through their territory to the forces of any of the members of the League which are co-operating to protect the covenants of the League.

Any Member of the League which has violated any covenant of the League may be declared to be no longer a Member of the League by a vote of the Council concurred in by the Representatives of all the other Members of the League represented thereon.

Article 17.

In the event of a dispute between a Member of the League and a State which is not

a Member of the League, or between States not Members of the League, the State or States not Members of the League shall be invited to accept the obligations of membership in the League for the purposes of such dispute, upon such conditions as the Council may deem just. If such invitation is accepted, the provisions of Articles 12 to 16 inclusive shall be applied with such modifications as may be deemed necessary by the Council.

Upon such invitation being given the Council shall immediately institute an inquiry into the circumstances of the dispute and recommend such action as may seem best and most effectual in the circumstances.

If a State so invited shall refuse to accept the obligations of membership in the League for the purposes of such dispute, and shall resort to war against a Member of the League, the provisions of Article 16 shall be applicable as against the State taking such action.

If both parties to the dispute when so invited refuse to accept the obligations of membership in the League for the purposes of such dispute, the Council may take such measures and make such recommendations as will prevent hostilities and will result in the settlement of the dispute.

Article 18.

Every treaty or international engagement entered into hereafter by any member of the League shall be forthwith registered with the Secretariat and shall as soon as possible be published by it. No such treaty or international engagement shall be binding until so registered.

Article 19.

The Assembly may from time to time advise the reconsideration by Members of the League of treaties which have become inapplicable and the consideration of international conditions whose continuance might endanger the peace of the world.

Article 20.

The Members of the League severally agree that this Covenant is accepted as abrogating all obligations or understandings inter se which are inconsistent with the terms thereof, and solemnly undertake that they will not hereafter enter into any engagements inconsistent with the terms thereof.

In case any Member of the League shall, before becoming a Member of the League, have undertaken any obligations inconsistent with the terms of this Covenant, it shall be the duty of such Member to take immediate steps to procure its release from such obligations.

Article 21.

Nothing in this Covenant shall be deemed to affect the validity of international engagements, such as treaties of arbitration or regional understandings like the Monroe doctrine, for securing the maintenance of peace.

Article 22.

To those colonies and territories which as a consequence of the late war have ceased to be under the sovereignty of the States which formerly governed them and which are inhabited by peoples not yet able to stand by themselves under the strenuous conditions of the modern world, there should be applied the principle that the well-being and development of such peoples form a sacred trust of civilisation and that securities for the performance of this trust should be embodied in this Covenant.

The best method of giving practical effect to this principle is that the tutelage of such peoples should be entrusted to advanced nations who by reason of their resources, their experience or their geographical position can best undertake this responsibility, and who are willing to accept it, and that this tutelage should be exercised by them as Mandatories on behalf of the League.

The character of the mandate must differ according to the stage of the development of the people, the geographical situation of the territory, its economic conditions and other similar circumstances.

Certain communities formerly belonging to the Turkish Empire have reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone. The wishes of these communities must be a principal consideration in the selection of the Mandatory.

Other peoples, especially those of Central Africa, are at such a stage that the Mandatory must be responsible for the administration of the territory under conditions which will guarantee freedom of conscience and religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military and naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other Members of the League.

There are territories, such as South-West Africa and certain of the South Pacific Islands, which, owing to the sparseness of their population or their small size, or their remoteness from the centres of civilisation, or their geographical contiguity to the territory of the Mandatory, and other circumstances, can be best administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population.

In every case of mandate the Mandatory shall render to the Council an annual report in reference to the territory committed to its charge.

The degree of authority, control, or administration to be exercised by the Mandatory shall, if not previously agreed upon by the Members of the League, be explicitly defined in each case by the Council.

A permanent Commission shall be constituted to receive and examine the annual reports of the Mandatories and to advise the Council on all matters relating to the observance of the mandates.

Article 23.

Subject to and in accordance with the provisions of international conventions existing or hereafter to be agreed upon, the Members of the League:

(a) will endeavor to secure and maintain fair and humane conditions of labour for men, women, and children, both in their own countries and in all countries to which their commercial and industrial relations extend, and for that purpose will establish and maintain the necessary international organisations:

(b) undertake to secure just treatment of the native inhabitants of territories under their control:

(c) will entrust the League with the general supervision over the execution of agreements with regard to the traffic in women and children, and the traffic in opium and other dangerous drugs:

(d) will entrust the League with the general supervision of the trade in arms and ammunition with the countries in which the control of this traffic is necessary in the common interest:

(e) will make provision to secure and maintain freedom of communications and of transit and equitable treatment for the commerce of all Members of the League. In this connection, the special necessities of the regions devastated during the war of 1914-1918 shall be borne in mind:

(f) will endeavour to take steps in matters

of international concern for the prevention and control of disease.

Article 24.

There shall be placed under the direction of the League all international bureaux already established by general treaties if the parties to such treaties consent. All such international bureaux and all commissions for the regulation of matters of international interest hereafter constituted shall be placed under the direction of the League.

In all matters of international interest which are regulated by general conventions but which are not placed under the control of international bureaux or commissions, the Secretariat of the League shall, subject to the consent of the Council and if desired by the parties, collect and distribute all relevant information and shall render any other assistance which may be necessary or desirable.

The Council may include as part of the expenses of the Secretariat the expenses of any bureau or commission which is placed under the direction of the League.

Article 25.

The Members of the League agree to encourage and promote the establishment and cooperation of duly authorised voluntary national Red Cross organizations having as purposes the improvement of health, the prevention of disease and the mitigation of suffering throughout the world.

Article 26.

Amendments to this Covenant will take effect when ratified by the Members of the League whose Representatives compose the Council and by a majority of the Members of the League whose Representatives compose the Assembly.

No such amendment shall bind any Member of the League which signifies its dissent therefrom, but in that case it shall cease to be a Member of the League.

ATTEMPT TO KILL AMBASSADOR HERRICK.

On Oct. 19, 1921, an attempt was made to assassinate Myron T. Herrick, United States ambassador to France, by means of an infernal machine presumably sent by communists in an effort to save from punishment two Italians convicted of murder in Massachusetts. The bomb was sent by registered mail to the embassy in Paris and taken by a secretary to the ambassador's residence, where it was opened by his valet. An explosion followed, resulting in painful injuries to the valet. The ambassador himself was in another room and was not hurt. Two days later seven policemen and five citizens were wounded by the explosion of a hand grenade thrown by communists in the lobby of the Salle Wagram as a body of gendarmes arrived at the hall to arrest a group of reds preparing to march on the American embassy. Many threats had previously been made against United States officials in various European capitals in connection with the same case.

THE SACCO-VANZETTI CASE.

On April 15, 1920, four or five men in an automobile shot Frederick A. Parmenter, paymaster, and his guard, Alessandro Berardelli, in an attempt to steal the Slater and Morrill Shoe company pay roll at South Braintree, twenty-five miles from Dedham, Mass.

Niccola Sacco and Bartolomeo Vanzetti were arrested on May 5, 1920. Elaborate plans were made for their defense, many of the country's leading radicals backing up their offers of support with contributions which finally totaled $60,000.

The case hinged on the question of identity. Several witnesses of the holdup and killing testified that the defendants were in the gang. Vanzetti was identified in the courtroom as one of a band who held up a paymaster at Bridgewater in December, 1919. He had been convicted and sentenced to ten to twelve years at state prison and was out on appeal when the South Braintree murder took place.

Both Sacco and Vanzetti were members of a group which disseminated soviet propaganda by voice and literature. They had been in this country more than a decade and neither had taken out naturalization papers. They were especially active, according to witnesses at the trial, before America entered the war, in their anti-allied mischief.

When the United States draft act went into effect both men fled to Mexico, returning only after the armistice. When arrested the police found enough ammunition to kill thirty-seven persons and heaps of anarchistic literature in their rooms.

Italy's interest in the case was awakened by the widespread announcement of fellow radicals that the two prisoners would be "railroaded to the gallows," and by the affidavit, presented by the defense, of one Cocci, a former clerk at the Italian consulate here, that Sacco was at the consulate on April 15, the day the murders occurred. Vanzetti advanced an alibi that he was in Plymouth selling fish at the time of the killing.

The trial took place in Dedham and lasted six weeks. It was characterized by intense feeling, citizens of Dedham clashing frequently with radicals who were attending the trial.

In his charge to the jury Superior Judge Webster Thayer said:

"Let your eyes be blinded to every ray of sympathy or prejudice and let them be willing to receive the sunshine of truth, reason, sound judgment, justice and common sense. You are not to allow the fact that these men are Italians to influence you at all. Guilt or innocence does not depend on the place of one's birth."

The men were found guilty of murder in the first degree and given until Nov. 1 to file exceptions on questions of law.

LEAGUE OF NATIONS ON DISARMAMENT.

The following resolutions were adopted by second assembly of the league of nations held in Geneva, Switzerland, Sept. 5 to Oct. 5, 1921:

1. That it is desirable that the temporary mixed commission should be asked to continue the work which it has begun.

2. That the temporary mixed commission be asked to make proposals on general lines for the reduction of national armaments, which, in order to secure precision, should be in the form of a draft treaty or other equally definite plan, to be presented to the council, if possible, before the assembly next year.

In order to enable the temporary mixed commission to accomplish this task, the council should be asked to strengthen the temporary mixed commission.

3. That a statistical investigation be made with regard to the armaments of the various countries upon the lines indicated in the body of the report of the third committee.

4. That the temporary mixed commission be requested to continue the examination of the question of the private manufacture of armaments and the trade in arms.

5. That the council be requested to invite all the members of the league and interested states which are not members of the league to take part in an international conference on the private manufacture of arms and the trade in arms, which should meet as soon as possible at a date to be fixed under the responsibility of the council. It is considered highly desirable that this date should be prior to the next session of the assembly. The temporary mixed commission should be intrusted with the task of preparing the program of the conference and of submitting to it a draft convention.

6. That the urgent importance of ratifying the convention at the earliest possible moment be strongly impressed on all the states signatories to the arms traffic convention of St. Germain, whether members of the league of nations or not, and that at the same time all nonsignatory states be invited to adhere to the convention. The assembly expresses its earnest desire that the importance of this subject may be strongly urged at the forthcoming conference on disarmament at Washington.

7. The assembly, taking note of the view expressed in the report of the temporary mixed commission on the reduction of armaments with regard to the desirability of making provision for excluding the import of arms and ammunition in time of peace from countries in which the traffic is uncontrolled, invites the council to prepare a draft protocol for this purpose for the consideration of the various governments. At the same time it expresses the earnest hope that this procedure will not in any way be permitted to delay the general ratification of the convention of St. Germain. The steps that may eventually have to be taken for the destruction of the surplus stocks of munitions may be considered by the temporary mixed commission.

8. That, subject to the conditions set out in the recommendation of the first assembly, the recommendation that members of the league should undertake not to exceed for the next two financial years following the present year the sum total of expenditure on military, naval and air forces provided for in the budget of that year, be again forwarded to all members of the league, together with a statement showing the replies already received to this recommendation.

9. That the temporary mixed commission be asked to examine—in consultation with the permanent advisory commission—whether it is advisable to address an appeal to the scientific men of the world to publish their discoveries in poison gas and similar subjects, so as to minimize the likelihood of their being used in any future war.

10. That it is desirable that propaganda in favor of the reduction of armaments, as contemplated in the covenant, should be carried out with earnestness and conviction among all nations.

11. In pursuance of the third resolution of the first assembly, the assembly is of opinion that the secretariat should be asked to complete the organization of the section of the secretariat dealing with the question of the reduction of armaments, and that this section should have a directorship of its own, or other equivalent official organization, quite separate from and, if necessary, in addition to those already proposed by the fourth committee of the assembly.

RESOLUTIONS OF LEAGUE COUNCIL.

Immediately after the adjournment of the second assembly a set of resolutions, drafted by M. Leon Bourgeois of France, was adopted by the league assembly. The resolutions formed a part of a report submitted by him in regard to the action taken by the council on the assembly resolutions concerning the limitation of armament.

The council, after adopting the Bourgeois report, decided to make a direct appeal to the Washington conference through all the member states of the league there represented for the immediate and full consideration of the important question of the suppression of the private traffic in arms. With this purpose in view a letter was ordered sent to the league participants in the Washington conference asking them to obtain the support of the latter body for the ratification by all governments of the St. Germain convention of 1919 for the control and gradual elimination of the private traffic in all war materiel.

In four instances the council decided explicitly to postpone action on as many assembly resolutions until the results of the Washington conference have become known. This decision referred to the proposed international conference for the suppression of the private traffic in arms, the drafting of a protocol for the exclusion of arms and munitions even in times of peace from countries where the trade in those materiels is left uncontrolled; the renewal of the plea to all governments to keep two successive military and naval budgets within the sum allotted for such purposes in the current budget, and, finally, the systematic starting of propaganda in favor of the reduction of armaments among all nations.

On the other hand, the council took immediate steps not only to continue the temporary mixed commission on disarmament headed by M. Viviani of France, who is the chief delegate to Washington after Premier Briand leaves, but to further strengthen that body, in accordance with the desire of the assembly, by the addition of six new members of an international standing equal or approaching to that of Viviani, Branting, Schanzer, Fisher, Tatsuke and Rivas Vicuna. The present temporary commission has already been invited to submit nominations for this additional membership to the council.

TEXT OF RESOLUTIONS.

The full text of the resolutions proposed by M. Bourgeois and adopted by the council follows:

"The council instructs the secretary-general to inform M. Viviani, the president of the

temporary mixed commission on limitation of armaments, that the latter is asked to continue the work it has begun.

"The temporary mixed commission is invited to meet as early as possible and to lay before the council the names of new members up to the number of six which it desires to co-opt. The commission is invited to make proposals on general lines for the reduction of national armaments which, in order to secure precision, should be in the form of a draft treaty or other equally definite plan, to be presented to the council if possible before the assembly next year.

"The temporary mixed commission is asked to carry out its statistical investigation upon the lines indicated in the body of the assembly report on the reduction of armaments.

"The temporary mixed commission is requested to continue the examination of the question of the private manufacture of armaments and the trade in arms.

"A communication should be sent to the governments which will participate in the forthcoming Washington conference on disarmament, in the terms of the draft included in this report. In the meantime a new letter should be sent to the states which have not yet notified their attitude in respect of the convention of St. Germain to request them to do so.

"The temporary mixed commission shall be asked to examine—in consultation with the permanent advisory commission—whether it is advisable to address an appeal to the scientific men of the world to publish their discoveries in poison gas and similar subjects, so as to minimize the likelihood of their being used in any future war."

CONFERENCE ON LIMITATION OF ARMAMENT.

On July 10, 1921, the state department in Washington, D. C., issued the following official announcement:

"By direction of the president the state department makes the following announcement:

"The president, in view of the far-reaching importance of the question of limitation of armament, has approached with informal but definite inquiries the group of powers heretofore known as the principal allied and associated powers—that is, Great Britain, France, Italy and Japan—to ascertain whether it would be agreeable to them to take part in a conference on this subject, to be held in Washington at a time to be mutually agreed upon. If the proposal is found to be acceptable, formal invitations for such a conference will be issued.

"It is manifest that the question of limitation of armament has a close relation to Pacific and far eastern problems, and the president has suggested that the powers especially interested in these problems should undertake in connection with this conference the consideration of all matters bearing upon their solution with a view to reaching a common understanding with respect to principles and policies in the far east. This has been communicated to the powers concerned, and China has also been invited to take part in the discussion relating to far eastern problems."

BORAH RESOLUTION.

The annual naval appropriation bill, approved July 12, 1921, contained the following clause (section 9), generally known as the "Borah resolution":

"The president is authorized and requested to invite the governments of Great Britain and Japan to send representatives to a conference, which shall be charged with the duty of promptly entering into an understanding or agreement by which the naval expenditures and building programs of each of said governments, to wit, the United States, Great Britain and Japan, shall be substantially reduced annually during the next five years to such an extent and upon such terms as may be agreed upon, which understanding or agreement is to be reported to the respective governments for approval."

SUGGESTION MEETS FAVOR.

President Harding's suggestion for a conference met with favor not only by the nations most directly concerned but by people generally throughout the world. The only note of skepticism came frome the militarists, especially in Prussia.

In the British house of commons on July 11 Prime Minister David Lloyd George said:

"The views of the president of the United States were made public by the American government this morning. It is known to the house that Mr. Harding has taken the momentous step of inviting the powers to a conference on the limitation of armaments, to be held at Washington in the near future, and he also suggests a preliminary meeting on Pacific and far eastern questions between the powers most directly interested in the peace and welfare of that great region which is assuming the first importance in international affairs. I need not say that we welcome with the utmost pleasure President Harding's wise and courteous initiative. In saying this I know that I speak for the empire as a whole. The world has been looking to the United States for such a lead. I am confident that the house will esteem it as an act of far-seeing statesmanship and will wholeheartedly wish it success. I need hardly say that no effort will be lacking to make it so on the part of the British empire, which shares to the full the liberal and progressive spirit inspiring it."

At a cabinet meeting in Tokyo July 12 the following conclusion was arrived at:

"Disarmament cannot be opposed as a principle. Naturally the different powers hold different ideas, but, provided a way is pointed out in which to secure disarmament without threatening the safety of the state, Japan will welcome such a move as a contribution to world peace and the happiness of mankind. Therefore, the imperial government welcomes President Harding's invitation and is ready to participate in the conference."

On the same date it was announced in Paris that France would be pleased to accept an invitation to the suggested conference. In Rome the foreign ministry officially notified the American embassy that President Harding's plan for a conference on the limitation of armament met with the full approval of the Italian government. China at the same time asked to be included in the conference.

TEXT OF INVITATION.

The text of the formal invitation to the limitation of armament conference sent to the powers by President Harding was made public by Secretary Hughes of the state department Aug. 11. It was as follows:

"The president is deeply gratified at the cordial response to his suggestion that there should be a conference on the subject of limitation of armament, in connection with which Pacific and far eastern questions should also be discussed.

"Productive labor is staggering under an economic burden too heavy to be borne unless the present vast public expenditures are greatly reduced. It is idle to look for stability, or the assurance of social justice, or the security of peace, while wasteful and unproductive outlays deprive effort of its just reward and defeat the reasonable expectation of progress.

"The enormous disbursements in the rivalries of armaments manifestly constitute the greater part of the incumbrance upon enterprise and national prosperity, and avoidable or extravagant expense of this nature is not only without economic justification but is a constant menace to the peace of the world rather than an assurance of its preservation.

"Yet there would seem to be no ground to expect the halting of these increasing outlays unless the powers most largely concerned find a satisfactory basis for an agreement to effect their limitation. The time is believed to be opportune for these powers to approach this subject directly and in conference, and while, in the discussion of limitation of armament, the question of naval armament may naturally have first place, it has been thought best not to exclude questions pertaining to other armament to the end that all practicable measures of relief may have appropriate consideration.

"It may also be found advisable to formulate proposals by which in the interest of humanity the use of the new agencies of warfare may be suitably controlled.

"It is, however, quite clear that there can be no final assurance of the peace of the world in the absence of the desire for peace, and the prospect of reduced armaments is not a hopeful one unless this desire finds expression in a practical effort to remove causes of misunderstanding and to seek ground for agreement as to principles and their application.

"It is the earnest wish of this government that through an interchange of views with the facilities afforded by a conference it may be possible to find a solution of Pacific and far eastern problems, of unquestioned importance at this time—that is, such common understandings with respect to matters which have been and are of international concern as may serve

to promote enduring friendships among our peoples.

"It is not the purpose of this government to attempt to define the scope of the discussion in relation to the Pacific and far east, but rather to leave this to be the subject of suggestions to be exchanged before the meeting of the conference in the expectation that the spirit of friendship and a cordial appreciation of the importance of the elimination of sources of controversy will govern the final decision.

"Accordingly, in pursuance of the proposal which has been made and in the light of the gracious indication of its acceptance, the president invites the government of Great Britain to participate in a conference on the subject of limitation of armament in connection with which Pacific and far eastern questions will also be discussed, to be held in Washington on the eleventh day of November, 1921."

MONEY FOR CONFERENCE.

The urgent deficiency appropriation act approved Aug. 24, 1921, contained the following provision:

"Conference on the subject of the limitation of armament: To enable the United States government suitably to participate in the conference on the subject of the limitation of armament to be held in the city of Washington and for the compensation of delegates or other representatives, clerks and employes, including personal services in the District of Columbia, notwithstanding the provision of any other act, expenses of transportation, subsistence, printing in English and other languages (including publication of the proceedings), stationery and supplies, entertainment of delegates and such other objects as the president may deem necessary, to be disbursed under the direction of the secretary of state, $200,000, or as much thereof as may be necessary: Provided, That a report shall be made to congress not later than June 30, 1922, of the expenditures hereunder."

AGENDA SUGGESTED.

It was announced in Washington on Sept. 20 that the following tentative agenda had been transmitted to the powers which had been invited to take part in the conference, with the information that it was essentially suggestive and subject to amendments or additions:

Limitation of Armament.

1. Limitation of naval armament—Basis of limitation. Extent of limitation. Fulfillment of conditions.

2. Rules for control of new agencies of warfare.

3. Limitation of land armament.

Pacific and Far Eastern Questions.

1. Questions relating to China—Principles to be applied.

2. Application to subjects.

(a) Territorial integrity.

(b) Administrative integrity.

(c) Open door—Equality of administrative and industrial opportunity.

(d) Concessions—Monopolies and other economic privileges.

(e) Development of railways.

(f) Preferential railroad rates.

(g) Status of existing commitments. Questions relating to Siberia. Similar questions relating to China.

3. Mandated islands.

OTHER NATIONS INVITED.

On Oct. 4 Secretary of State Hughes sent formal invitations to the governments of Belgium, the Netherlands and Portugal for the conference in Washington on Pacific problems. The decision to invite these powers to attend that conference, which was to be distinct from the conference on the limitation of armament, was reached unanimously by the principal powers in consultation, and the invitations were in recognition of the fact that Belgium has large investments in the far east, including the Chinese railways, the Netherlands in the Dutch Indies and Portugal in Macao.

DELEGATES CHOSEN.

The following delegates were chosen by the various powers concerned, and most of those from foreign countries were in Washington some days prior to the date set for the opening of the conference:

United States.

Charles Evans Hughes, secretary of state, republican.

Henry Cabot Lodge, senator from Massachusetts and chairman of the senate committee on foreign relations, republican.

Belgium.

Baron E. de Cartier de Marchienne, ambassador to the United States.

Portugal.

Viscount d'Alte, ambassador to the United States.

OPENING OF CONFERENCE.

Though the date originally set for the opening of the conference was Nov. 11, it was found impracticable to begin on that day, as the president and many other officials were participants in the honors paid to America's unidentified dead warrior when he was laid at rest in Arlington cemetery. The first meeting was therefore held on Saturday, Nov. 12. It took place in Continental hall, which has seats for about 1,500 persons. The members of the senate and house occupied a portion of the balcony. On the main floor green baize covered tables had been placed, at which the delegates, their secretaries and other officials sat. These tables were set out in the form of a "U," permitting the entry of interpreters and stenographers. The American and British delegation occupied the end facing the assemblage, thus throwing Mr. Hughes and Mr. Balfour side by side. On the left were the French and Japanese delegations respectively, M. Briand occupying the corner seat. Opposite them were the British dominions, Canada, Australia, and India, with the Italians next. Delegates from the four smaller powers occupied the side facing the Americans and English, the Chinese being next to the Japanese, then the Portuguese, then the Dutch, and on the other end, next the Italians, the Belgians.

M. Kamerlynck, official interpreter at the Paris conference and the league of nations at Geneva, was in the center, immediately facing Mr. Hughes, and the official stenographers were beside him.

PRESIDENT HARDING'S ADDRESS.

When President Harding entered the hall a burst of applause greeted him and all the delegates arose. At 10:30 o'clock the proceedings began with a prayer by the Rev. W. S. Abernethy, pastor of the Calvary Baptist church in Washington. The president, standing between Mr. Hughes and Mr. Balfour, then delivered the following address:

"Mr. Secretary and Members of the Conference, Ladies and Gentlemen: It is a great and happy privilege to bid the delegates to this conference a cordial welcome to the capital of the United States of America. It is not only a satisfaction to greet you because we were lately participants in a common cause, in which shared sacrifices and sorrows and triumphs brought our nations more closely together, but it is gratifying to address you as the spokesmen for nations whose convictions and attending actions have so much to do with the weal or woe of all mankind.

"It is not possible to overappraise the importance of such a conference. It is no unseemly boast, no disparagement of other nations which, though not represented, are held in highest respect, to declare that the conclusions of this body will have a signal influence on all human progress—on the fortunes of the world.

"Here is a meeting, I can well believe, which is an earnest of the awakened conscience of twentieth century civilization. It is not a convention of remorse nor a session of sorrow. It is not the conference of victors to define terms of settlement. Nor is it a council of nations seeking to remake humankind.

"It is rather a coming together, from all parts of the earth, to apply the better attributes of mankind to minimize the faults in our international relationships.

"Speaking as official sponsor for the invitation, I think I may say the call is not of the United States of America alone, it is rather the spoken word of a war wearied world, struggling for restoration, hungering and thirsting for better relationship, of hu-

manity crying for relief and craving assurances of lasting peace.

"It is easy to understand this worldwide aspiration. The glory of triumph, the rejoicing in achievement, the love of liberty, the devotion to country, the pangs of sorrow, the burdens of debt, the desolation of ruin—all these are appraised alike in all lands.

"Here in the United States we are but freshly turned from the burial of an unknown American soldier, when a nation sorrowed while paying him tribute. Whether it was spoken or not, a hundred millions of our people were summarizing the inexcusable causes, the incalculable cost, the unspeakable sacrifices, and the unutterable sorrows, and there was the ever impelling question: How can humanity justify or God forgive?

"Human hate demands no such toll; ambition and greed must be denied it. If misunderstanding must take the blame, then let us banish it, and let understanding rule and make good will regnant everywhere.

"All of us demand liberty and justice. There cannot be one without the other and they must be held the unquestioned possession of all peoples. Inherent rights are of God, and the tragedies of the world originate in their attempted denial. The world to-day is infringing their enjoyment by arming to defend or deny, when simple sanity calls for their recognition through common understanding.

"Out of the cataclysm of the world war came new fellowships, new convictions, new aspirations. It is ours to make the most of them. A world staggering with debt needs its burden lifted. Humanity, which has been shocked by wanton destruction, would minimize the agencies of that destruction. Contemplating the measureless cost of war and the continuing burden of armament, all thoughtful peoples wish for real limitation of armament and would like war outlawed.

"In soberest reflection the world's hundreds of millions who pay in peace and die in war wish their statesmen to turn the expenditures for destruction into means of construction, aimed at a higher state for those who live and follow after.

"It is not alone that the world cannot readjust itself and cast aside the excess burdens without relief from the leaders of men. War has grown progressively cruel and more destructive from the first recorded conflict to this pregnant day, and the reverse order would more become our boasted civilization.

"Gentlemen of the conference, the United States welcomes you with unselfish hands. We harbor no fears; we have no sordid ends to serve; we suspect no enemy; we contemplate or apprehend no conquest. Content with what we have, we seek nothing which is another's. We only wish to do with you that finer, nobler thing which no nation can do alone.

"We wish to sit with you at the table of international understanding and good will. In good conscience we are eager to meet you frankly, and invite and offer co-operation. The world demands a sober contemplation of the existing order and the realization that there can be no cure without sacrifice, not by one of us, but by all of us.

"I do not mean surrendered rights, or narrowed freedom, or denied aspirations, or ignored national necessities. Our republic would no more ask for these than it would give. No pride need be humbled, no nationality submerged, but I would have a mergence of minds committing all of us to less preparation for war and more enjoyment of fortunate peace.

"The higher hopes come of the spirit of our coming together. It is but just to recognize varying needs and peculiar positions. Nothing can be accomplished in disregard of national apprehensions.

"Rather, we should act together to remove the causes of apprehensions. This is not to be done in intrigue. Greater assurance is found in the exchanges of simple honesty and directness among men resolved to accomplish as becomes leaders among nations, when civilization itself has come to its crucial test.

"It is not to be challenged that government fails when the excess of its cost robs the people of the way to happiness and the opportunity to achieve. If the finer sentiments were not urging, the cold, hard facts of excessive cost and the eloquence of economics would urge us to reduce our armaments.

"If the concept of a better order does not appeal, then let us ponder the burden and the blight of continued competition.

"It is not to be denied that the world has swung along throughout the ages without heeding this call from the kindlier hearts of men. But the same world never before was so tragically brought to realization of the utter futility of passion's sway when reason and conscience and fellowship point a nobler way.

"I can speak officially only for our United States. Our hundred millions frankly want less of armament and none of war. Wholly free from guile, sure in our own minds that we harbor no unworthy designs, we accredit the world with the same good intent. So I welcome you, not alone in good will and high purpose, but with high faith.

"We are met for a service to mankind. In all simplicity, in all honesty, and all honor, there may be written here the avowals of a world conscience refined by the consuming fires of war and made more sensitive by the anxious aftermath.

"I hope for that understanding which will emphasize the guaranties of peace and for commitments to less burdens and a better order which will tranquilize the world.

"In such an accomplishment there will be added glory to your flags and ours and the rejoicing of mankind will make the transcending music of all succeeding time."

The assemblage rose and applauded President Harding as he withdrew at the end of his speech.

Secretary Hughes immediately arose and announced that French and English would be official languages at the conference, but that as copies of Mr. Harding's speech in French had been distributed, there would be no translation.

M. Briand was on his feet the instant M. Kamerlynck had translated Mr. Hughes' remark and thanked the secretary of state for the inclusion of the French language. Then Mr. Balfour rose, amid an outburst of cheering, and said:

"There is a universal practice that the nation which offers the conference hospitality shall provide the chairman and presiding genius. That would follow anyway, but the secretary of state not only has technical right but personal qualifications for the high and responsible duties of the office. I, therefore, feel on behalf of the British delegation that you, Mr. Secretary, should take the chair now and hereafter in all our sessions and on any committee of which you may be a member."

Another round of applause met this graceful compliment from the distinguished English diplomat as Mr. Hughes bowed his acceptance, while the heads of the other delegations nodded approvingly.

John W. Garrett of Baltimore, former minister at The Hague, was chosen secretary-general of the conference.

SECRETARY HUGHES' SPEECH.

Thereupon Secretary Hughes read a speech, which, it may be needless to say, was received with profound interest, not only by those who

heard it but by the whole world when it was published. It was as follows:

"It is with a deep sense of privilege and responsibility that I accept the honor you have conferred.

"Permit me to express the most cordial appreciation of the assurances of friendly cooperation which have been generously expressed by the representatives of all the invited governments. The earnest desire and purpose, manifested in every step in the approach to this meeting, that we should meet the reasonable expectation of a watching world by effective action suited to the opportunity is the best augury for the success of the conference.

"The president invited the governments of the British empire, France, Italy and Japan to participate in a conference on the subject of limitation of armament, in connection with which the Pacific and far eastern questions also would be discussed.

"It would have been most agreeable to the president to have invited all the powers to take part in this conference, but it was thought to be a time when other considerations should yield to the practical requirements of the existing exigency, and in this view the invitation was extended to the group known as the principal allied and associated powers, which, by reason of the conditions produced by the war, control in the main the armament of the world. The opportunity to limit armament lies within their grasp.

"It was recognized, however, that the interests of other powers in the far east made it appropriate that they should be invited to participate in the discussion of Pacific and far eastern problems, and, with the approval of the five powers, an invitation to take part in the discussion of those questions has been extended to Belgium, China, the Netherlands and Portugal.

"The inclusion of the proposal for the discussion of Pacific and far eastern questions was not for the purpose of embarrassing or delaying an agreement for limitation of armament, but rather to support that undertaking by availing ourselves of this meeting to endeavor to reach a common understanding as to the principles and policies to be followed in the far east, and thus greatly to diminish and, if possible, wholly to remove discernible sources of controversy. It is believed that by interchanges of views at this opportune time the governments represented here may find a basis of accord and thus give expression of their desire to assure enduring friendship.

"In the public discussions which have preceded the conference there have been apparently two competing views; one, that the consideration of armament should await the result of the discussion of far eastern questions, and another, that the latter discussion should be postponed until an agreement for limitation of armament has been reached. I am unable to find sufficient reason for adopting either of these extreme views. I think that it would be most unfortunate if we should disappoint the hopes which have attached to this meeting by a postponement of the consideration of the first subject.

"The world looks to this conference to relieve humanity of the crushing burden created by competition in armament, and it is the view of the American government that we should meet that expectation without any unnecessary delay. It is therefore proposed that the conference should proceed at once to consider the question of the limitation of armament.

"This, however, does not mean that we must postpone the examination of the far eastern questions. These questions, of vast importance, press for solution. It is hoped that immediate provision may be made to deal with them adequately, and it is suggested that it may be found to be entirely practicable through the distribution of the work among designated committees to make progress to the ends sought to be achieved without either subject being treated as a hindrance to the proper consideration and disposition of the other.

"The proposal to limit armament by agreement of the powers is not a new one and we are admonished by the futility of earlier efforts. It may be well to recall the noble aspirations which were voiced twenty-three years ago in the imperial rescript of his majesty the emperor of Russia.

"It was then pointed out with clarity and emphasis that the intellectual and physical strength of the nations, labor and capital are for the major part diverted from their natural application and unproductively consumed. Hundreds of millions are devoted to acquiring terrible engines of destruction, which though to-day regarded as the last word of science are destined to-morrow to lose all value in consequence of some fresh discovery in the same field.

"National culture, economic progress and the production of wealth are either paralyzed or checked in their development. Moreover, in proportion as the armaments of each power increase, so do they less and less fulfill the object which the governments have set before themselves.

"The economic crises, due in great part to the system of armaments a l'outrance and the continual danger which lies in this massing of war materiel are transforming the armed peace of our days into a crushing burden, which the peoples have more and more difficulty in bearing.

"It appears evident, then, that if this state of things were prolonged it would inevitably lead to the calamity which it is desired to avert, and the horrors of which make every thinking man shudder in advance. To put an end to these incessant armaments and to seek the means of warding off the calamities which are threatening the whole world—such is the supreme duty which is to-day impressed on all states.

Former Peace Conference.

"It was with this sense of obligation that his majesty the emperor of Russia proposed the conference, which was 'to occupy itself with this grave problem,' and which met at The Hague in the year 1899.

"Important as were the deliberations and conclusions of that conference, especially with respect to the pacific settlement of international disputes, its result in the specific matter of limitation of armament went no further than the adoption of a final resolution setting forth the opinion that the restriction of military charges, which are at present a heavy burden on the world, is extremely desirable for the increase of the material and moral welfare of mankind, and the utterance of the wish that the governments may examine the possibility of an agreement as to the limitation of armed forces by land and sea, and of war budgets.

"It was seven years later that the secretary of state of the United States, Mr. Elihu Root, in answering a note of the Russian ambassador, suggesting in outline a program of the second peace conference, said:

"'The government of the United States, therefore, feels it to be its duty to reserve for itself the liberty to propose to the second peace conference, as one of the subjects for consideration, the reduction or limitation of armaments, in the hope that, if nothing further can be accomplished, some slight advance

may be made toward the realization of the lofty conception which actuated the emperor of Russia in calling the first conference.'

"It is significant that the imperial German government expressed itself as 'absolutely opposed to the question of disarmament,' and that the emperor of Germany threatened to decline to send delegates if the subject of disarmament was to be discussed. In view, however, of the resolutions which had been adopted at the first Hague conference, the delegates of the United States were instructed that the subject of limitation of armament should be regarded as unfinished business, and that the second conference should ascertain and give full consideration to the result of such examination as the governments may have given to the possibility of an agreement pursuant to the wish expressed by the first conference.

"But by the reason of the obstacles which the subject had encountered, the second peace conference at the Hague, although it made notable progress in provision for the peaceful settlement of controversies, was unable to deal with limitation of armament except by a resolution in the following general terms:

"'The conference confirms the resolution adopted by the conference in 1899 in regard to the limitation of military expenditure; and inasmuch as military expenditure has considerably increased in almost every country since that time, the conference declares that it is eminently desirable that the governments should resume the serious examination of this question.'

"This was the fruition of the efforts of eight years. Although the effect was clearly perceived, the race in preparation of armaments, wholly unaffected by these futile suggestions, went on until it fittingly culminated in the greatest war of history; and we are now suffering from the unparalleled loss of life, the destruction of hopes, the economic dislocations, and widespread impoverishment which measure the cost of the victory over the brutal pretensions of military force.

"But if we are warned by the inadequacy of earlier endeavors for limitation of armament, we cannot fail to recognize the extraordinary opportunity now presented.

"We not only have the lessons of the past to guide us, not only do we have the reaction from the disillusioning experiences of war, but we must meet the challenge of imperative economic demands. What was convenient or highly desirable before, is now a matter of vital necessity.

"If there is to be economic rehabilitation, if the longings for reasonable progress are not to be denied, if we are to be spared the uprisings of people made desperate in the desire to shake off burdens no longer endurable, competition in armament must stop.

"The present opportunity not only derives its advantage from a general appreciation of this fact, but the power to deal with the exigency now rests with a small group of nations represented here, who have every reason to desire peace and to promote amity.

"The astounding ambition which lay athwart the promise of the second Hague conference no longer menaces the world, and the great opportunity of liberty-loving and peace-preserving democracies has come. Is it not plain that the time has passed for mere resolutions that the responsible powers should examine the question of limitation of armament? We can no longer content ourselves with investigations, with statistics, with reports, with the circumlocuiton of inquiry.

"The essential facts are sufficiently known. The time is come, and this conference has been called not for general resolutions or mutual advice, but for action.

"We meet with full understanding that the aspirations of mankind are not to be defeated either by plausible suggestions of postponement or by impracticable counsels of perfection. Power and responsibility are here and the world awaits a practical program which shall at once be put into execution.

"I am confident that I shall have your approval in suggesting that in this matter, as well as in others before the conference, it is desirable to follow the course of procedure which has the best promise of achievement rather than one which would facilitate division, and thus, constantly aiming to agree so far as possible, we shall, with each point of agreement, make it easier to proceed to others.

"The question, in relation to armaments, which may be regarded as of primary importance at this time, and with which we can deal most promptly and effectively, is the limitation of naval armament. There are certain general considerations which may be deemed pertinent to this subject.

"The first is that the core of the difficulty is to be found in the competition in naval programs, and that, in order appropriately to limit naval armament, competition in its production must be abandoned. Competition will not be remedied by resolves with respect to the method of its continuance. One program inevitably leads to another, and if competition continues its regulation is impracticable. There is only one adequate way out, and that is to end it now.

"It is apparent that this cannot be accomplished without serious sacrifices. Enormous sums have been expended upon ships under construction and building programs which are now under way cannot be given up without heavy loss. Yet, if the present construction of capital ships goes forward other ships will inevitably be built to rival them, and this will lead to still others. Thus the race will continue so long as ability to continue lasts. The efforts to escape sacrifices are futile. We must face them or yield our purpose.

"It is all so clear that no one of the naval powers should be expected to make the sacrifice alone. The only hope of limitation of naval armament is by agreement among the nations concerned, and this agreement should be entirely fair and reasonable in the extent of the sacrifices required of each of the powers.

"In considering the basis of such agreement and the commensurate sacrifices to be required, it is necessary to have regard to the existing naval strength of the great naval powers, including the extent of construction already effected in the case of ships in process.

"This follows from the fact that one nation is as free to compete as another and each may find grounds for its action.

"What one may do another may demand the opportunity to rival, and we remain in the thrall of competitive effort.

"I may add that the American delegates are advised by their naval experts that the tonnage of capital ships may fairly be taken to measure the relative strength of navies, as the provision for auxiliary combatant craft should sustain a reasonable relation to the capital ship tonnage allowed.

"It would also seem to be a vital part of a plan for the limitation of naval armament that there should be a naval holiday. It is proposed that for a period of not less than ten years there should be no further construction of capital ships.

Makes Concrete Proposal.

"I am happy to say that I am at liberty to go beyond these general propositions, and, on behalf of the American delegation acting under the instructions of the president of the United States, to submit to you a concrete proposition

for an agreement for the limitation of naval armament.

"It should be added that this proposal immediately concerns the British empire, Japan and the United States. In view of the extraordinary conditions, due to the world war, affecting the existing strength of the navies of France and Italy, it is not thought to be necessary to discuss at this stage of the proceedings the tonnage allowance of these nations, but the United States proposes that this matter be reserved for the later consideration of the conference.

"In making the present proposal the United States is most solicitous to deal with the question upon an entirely reasonable and practicable basis to the end that the just interests of all shall be adequately guarded and the national security and defense shall be maintained.

"Four general principles have been applied:

"1. That all capital shipbuilding programs, either actual or projected, should be abandoned.

"2. That further reduction should be made through the scrapping of certain of the older ships.

"3. That in general regard should be had to the existing naval strength of the powers concerned.

"4. That the capital ship tonnage should be used as the measurement of strength of navies and a proportionate allowance of auxiliary combatant craft prescribed.

"The principal features of the proposed agreement are as follows:

"The United States is now completing its program of 1916 calling for ten new battle ships and six battle cruisers. One battle ship has been completed. The others are in various stages of construction; in some cases from 60 to 80 per cent of the construction has been done. On these fifteen capital ships now being built over $330,000,000 have been spent. Still the United States is willing in the interest of an immediate limitation of naval armaments to scrap all these ships.

"The United States proposes, if this plan is accepted:

"1. To scrap all capital ships now under construction. This includes six battle cruisers and seven battle ships on the ways and in the course of building and two battle ships launched.

"The total number of new capital ships thus to be scrapped is fifteen. The total tonnage of the new capital ships when completed would be 618,000 tons.

"3. To scrap all of the older battle ships up to, but not including, the Delaware and North Dakota. The number of these old battle ships to be scrapped is fifteen. Their total tonnage is 227,740.

"Thus, the number of capital ships to be scrapped by the United States if this plan is accepted is thirty, with an aggregate tonnage (including that of ships in construction, if completed) of 845,740.

Plans for Great Britain.

"Great Britain—The plan contemplates that Great Britain and Japan shall take action which is fairly commensurate with this action on the part of the United States.

"It is proposed that Great Britain—

"1. Shall stop further construction of the four new Hoods, the new capital ships not laid down but upon which money has been spent. The four ships, if completed, would have a tonnage displacement of 172,000.

"2. Shall, in addition, scrap her dreadnoughts, second-line battle ships and first-line battle ships up to, but not including, the King George V. class.

"These, with certain predreadnoughts which it is understood have already been scrapped, would amount to nineteen capital ships and a tonnage reduction of 411,375.

"The total tonnage of ships thus to be scrapped by Great Britain (including the tonnage of the four Hoods, if completed) would be 583,375.

Proposal for Japan.

"It is proposed that Japan—

"1. Shall abandon her program of ships not yet laid down—viz., the K-11, Owari No. 7 and No. 8 battle ships and Nos. 5, 6, 7 and 8 battle cruisers.

"It should be observed that this does not involve the stopping of construction, as the construction of none of these ships has been begun.

"2. Shall scrap three capital ships (the Mutsu, launched; the Tosa, the Kogo, in course of building) and four battle cruisers (the Amagi and Akagi, in course of building, and the Atoga and Takao, not yet laid down, but for which certain material has been assembled).

"The total number of new capital ships to be scrapped under this paragraph is seven. The total tonnage of these new capital ships when completed would be 289,100.

"3. Shall scrap all predreadnoughts and battle ships of the second line. This would include the scrapping of all ships up to, but not including, the Settsu; that is, the scrapping of ten old ships with a total tonnage of 159,823.

"The total reduction of tonnage on vessels existing, laid down, or for which material has been assembled (taking the tonnage of the ships when completed), would be 448,928 tons.

To Destroy Sixty-Six Vessels.

"Thus, under this plan there would be immediately destroyed of the navies of the three powers sixty-six capital fighting ships built and building, with a total tonnage of 1,878,043.

"It is proposed that it should be agreed by the United States, Great Britain and Japan that their navies, with respect to capital ships, within three months after the making of the agreement shall consist of certain ships designated in the proposal, and number for the United States, eighteen; for Great Britain, twenty-two; for Japan, ten.

"The tonnage of these ships would be as follows:

"Of the United States, 500,650; of Great Britain, 604,450; of Japan, 299,700. In reaching this result, the age factor in the case of the respective navies has received appropriate consideration.

Proposals on Replacement.

"Replacement:

"With respect to replacement, the United States proposes:

"1. That it be agreed that the first replacement tonnage shall not be laid down until ten years from the date of the agreement.

"2. That replacements be limited by an agreed maximum of capital ship tonnage as follows:

"For the United States, 500,000 tons.

"For Great Britain, 500,000 tons.

"For Japan, 300,000 tons.

"3. That, subject to the ten-year limitation above fixed, the maximum standard capital ships may be replaced when they are twenty years old by new capital ships' construction.

"4. That no capital ship shall be built in replacement with a tonnage displacement of more than 35,000.

"I have sketched the proposal only in outline, leaving the technical details to be sup-

plied by the formal proposition, which is ready for submission to the delegates.

"The plan includes provision for the limitation of auxiliary surface combatant craft. This term embraces three classes, that is:

"1. Auxiliary surface combatant craft, such as cruisers (exclusive of battle cruisers), flotilla leaders, destroyers and various surface types.

"2. Submarine and

"3. Airplane carriers.

"I shall not attempt to review the proposals of these various classes, as they bear a definite relation to the provisions for capital fighting ships.

"With the acceptance of this plan, the burden of meeting the demands of competition in naval armament will be lifted. Enormous sums will be released to aid the progress of civilization. At the same time, the proper demands of national defense will be adequately met, and the nations will have ample opportunity during the naval holiday of ten years to consider their future course. Preparation for future naval war shall stop now. I shall not attempt at this time to take up the other topics which have been listed on the tentative agenda proposed in anticipation of the conference."

SPEECHES BY DELEGATES.

At the conclusion of his speech Secretary Hughes suggested that an adjournment be taken, but there were insistent calls for the leading foreign delegates, and one after another they arose and made brief speeches. Premier Briand said:

"When my country received the invitation to this conference my country immediately answered, 'Present.' My country was animated first of all by a feeling of gratitude, of unforgettable gratitude, because of the links that unite this republic and mine. It was also animated by her personal aspirations toward peace and her eager desire to associate herself with any action which could insure, consolidate, and as far as possible establish final peace in the world.

"In this conference France has a particular situation, as our American friends have been willing to recognize: that, however heavy and heartrending may be our preoccupation, however threatening may be the dangers that surround us and are so very near to us, France, with all her will and with all her heart, wants to find out with you the best means to limit these costly armaments.

"France has already taken steps in this direction, and we shall let you know what we have done, and we are ready to go to the end, because you can look at the history of France and you will find she has never been actuated by any spirit of conquest."

"We have heard the voice of a great people calling the other peoples to a work of civilization and human progress," said Sig. Carlo Schanzer of Italy. "I am happy to state that Italy can accept without reservation the great lines of your program and the sentiment by which it is inspired. The calling of the conference, which has in view the high ideal of creating a solid foundation for the maintenance of peace in the world, has found in Italy the most favorable and sympathetic reception.

"To-day Italy is one of the foremost influences for peace in the world. It has nothing to ask of anybody and nothing to fear. Our nation wishes only to proceed along the way of its economic and financial reconstruction in good harmony with all other nations in safeguarding the prestige of the Italian name in the world.

"Italy feels that it is capable of co-operating, and is ready to co-operate effectively and loyally, with the ideals which your president and you propose to attain in this conference, and to give its full contribution to whatever measures may be considered useful to guarantee the world against the dangers of war."

"The Japanese delegation is happy to feel that the presidency of this important conference has now been placed in the hands of a statesman who enjoys the respect and confidence of the whole civilized world," Prince Tokugawa, speaking in English, said.

"All humanity is interested in the great purpose for which this meeting has been called. We are here to compose difficulties—not to create them. We mean seriously to promote true and honest friendship among nations—not to impair it. We propose not to prescribe terms or to dictate a constitution to a dubious world—but to carry out the plain dictates of common sense.

"The world needs peace. It calls for political and economic stability. And to co-operate with the powers here so worthily represented for the accomplishment of such a lofty end, under the guidance of the distinguished presiding officer, will be for Japan a source of greatest pleasure."

Similar addresses were made by delegates representing China, Belgium, Holland and Portugal. The conference then adjourned until the following Tuesday—Nov. 15.

ACCEPTED IN PRINCIPLE.

Speech by A. J. Balfour.

The feature of the second plenary session of the conference held Nov. 15 was the acceptance in principle by the four powers, Great Britain, France, Italy and Japan, of the proposal made by Secretary Hughes. The Rt. Hon. Arthur J. Balfour, speaking for Great Britain, said:

"Mr. Chairman: You have invited those who desire to continue the discussion which began on Saturday last. I think it would be very unfortunate if we were to allow the events of Saturday to pass without some further observation on the part of those to whom you, Mr. Chairman, addressed your speech and, if for any reason which I shall venture to explain in a moment, I am the first to take up the challenge, it is because of all the powers here assembled the country which I represent is, as everybody knows, the most intimately interested in all naval questions.

"Statesmen of all countries are beginning to discover that the labors and difficulties of peace are almost as arduous and require almost as great qualities as those which are demanded for the conduct of a successful war.

"These struggles to restore the world to the condition of equilibrium, so violently interfered with by five years of war, is one that taxes, must tax, the efforts of everybody. And I congratulate you, if I may, Mr. Chairman, on the fact that you have added the new anniversary which will henceforth be celebrated in connection with this movement toward reconstruction in the same spirit in which we welcomed the anniversary celebration only a few hours ago, on the day on which hostilities came to an end.

"If the 11th of November in the minds of the allied and associated powers, in the minds perhaps not less of all the neutrals—if that is a date imprinted on grateful hearts, I think Nov. 12 will also prove to be an anniversary welcomed and thought of in a grateful spirit by those who in the future shall look back upon the arduous struggle now being made by the civilized nations of the world, not merely to restore prewar conditions but to see that war conditions shall never again exist.

"I count myself among the fortunate of the earth in that I was present, and to that extent had a share in the proceedings of last Saturday. They were memorable indeed. The

secret was admirably kept. I hope that all the secrets, so long as they ought to be secrets, of our discussions will be as well kept. In my less sanguine mood I have doubts.

"But, however that may be, the secret in this case was most admirably kept, and I listened to a speech which I thought eloquent, appropriate, in every way a fitting prelude to the work of the conference which was about to open or which, indeed, had been opened by the president, without supposing that anything very dramatic lay behind. And suddenly I became aware, as I suppose all present became aware, that they were assisting not merely at an eloquent and admirable speech, but at a great historical event.

"It was led up with such art, the transition seemed so natural, that when the blow fell, when the speaker uttered the memorable words which have now gone round and found an echo in every quarter of the civilized world, it came as a shock of profound surprise; it excited the sort of emotions we have when some wholly new event suddenly springs into view, and we felt that a new chapter in the history of world reconstruction had been warily opened.

"Mr. Chairman, the absolute simplicity of the procedure, the easy transition and the great dramatic climax were the perfection of art, which shows that the highest art and the most perfect simplicity are very often, indeed, very commonly, combined.

"Now, I said, I would explain, if I were allowed, why I venture to rise first to-day to deal with the subject which is in all our hearts. As I have hinted, it is because the British empire and Great Britain, these two together, are more profoundly concerned with all that touches matters naval than it is possible for any other nation to be, and this not, believe me, for any reasons of ambition, not for any reasons drawn from history or tradition, but from the hard, brutal necessities of claims and obvious facts.

"There never has been in the history of the world a great empire constituted as the British empire is. It is a fact no doubt familiar to everybody whom I am addressing at the present moment, but has everybody whom I am addressing imaginatively conceived precisely what the situation of the British empire is in this connection?

"Most of my audience are citizens of the United States. The United States stands solid, impregnable, self-sufficient, all its lines of communication protected, doubly protected, completely protected from any conceivable hostile act. It is not merely that you are 110,000,000 of population; it is not that you are the wealthiest country in the world; it is that the whole configuration of your country, the geographical position of your country, is such that you are wholly immune from the particular perils to which, from the nature of the case, the British empire is subject.

"Supposing, for example, that your western states, for whose safety you are responsible, were suddenly removed 10,000 miles across the sea. Supposing that you found that the very heart of your empire, the very heart of this great state, was a small, a crowded island, depending for oversea trade not merely, not chiefly, for its luxuries, but depending upon overseas communication for the raw material of those manufactures by which its superabundant population lives; depending upon the same oversea communication for the food upon which they subsist.

"Supposing it was a familiar thought in your mind that there never were at any moment of the year within the limits of your state more than seven weeks' food for the population, and that that food had to be replenished by oversea communication. Then, if you will draw that picture, and if you will see all that it implies and all that it carries with it, you will understand why it is that every citizen of the British empire, whether he comes from the far dominions of the Pacific or whether he lives in the small island in the north sea, never can forget that it is by sea communication that he lives, and that without sea communications he and the empire to which he belongs would perish.

"Now, ladies and gentlemen, do not suppose that I am uttering laments over the weakness of my empire. Far from it. We are strong, I hope, in the vigorous life of its constituent parts. We are strong, I hope, in the ardent patriotism which binds us all together. But this strategic weakness is obvious to everybody who reflects; it is present in the minds of our enemies, if we have enemies. Do not let it be forgotten by our friends.

"These reflections, with your kindness, I have indulged in in order to explain why it is that I am addressing you at the present time. We have had to consider, and we have considered, the great scheme laid before you by our chairman. We have considered it with admiration and approval. We agree with it in spirit and in principle. We look to it as being the basis of the greatest reform in the matter of armament and preparation for war that has ever been conceived or carried out by the courage and patriotism of statesmen.

"I do not pretend, of course—it would be folly to pretend—that this or any other scheme, by whatever genius it may have been contrived, can deal with every subject; can cover the whole ground of international reconstruction. It would be folly to make the attempt and it would be folly to pretend that the attempt has yet been made in any single scheme, as was most clearly explained by the secretary of state on Saturday. The scheme deals, and deals only, with three nations which own the largest fleets at present in the world. It therefore of necessity omits all consideration for the time being of those European nations who have diminished their fleets and who at present have no desire, and, I hope, never will have any desire, to own fleets beyond the necessities that national honor and national defense require.

"Again, it does not touch a question which every man coming from Europe must feel to be a question of immense and almost paramount importance—I mean the heavy burden of land armaments. That is left on one side, to be dealt with by other schemes and in other ways. What it does is surely one of the biggest things that has ever yet been done by constructive statesmanship. It does deal with the three great fleets of the world, and in the broad spirit in which it deals with those fleets, in the proportion of disarmament which it lays down for those fleets, the government of the country which I represent is in the fullest and the heartiest sympathy with the policy which the United States have brought before us for our consideration. They have, as we think most rightly, taken the battle fleet as the aggressive unit which they have in the main to consider; and in the battle fleet you must include those auxiliary ships without which a modern battle fleet has neither eyes nor ears, has little power of defense against certain forms of attack, and little power of observation; little power of dealing with any equal foe to which it may be opposed.

"Taking these two as really belonging to one subject—namely, the battle fleet—taking these two, the battle ships themselves and the vessels auxiliary and necessary to a battle fleet, we think that the proportion between these various countries is acceptable, we think the limitation of amounts is reasonable; we think

it should be accepted; we firmly believe that it will be accepted.

"In my view the message which has been sent around the world on Saturday is not a message which is going to be received by those most concerned with cool approbation. I believe it is going to be received by them with warm, hearty approval, and with every effort at full, loyal and complete co-operation.

"I think it would be ill fitting on such an occasion as this if I were to attempt to go into any details. There are questions—and I have no doubt that the secretary of state, our chairman, would be the first to tell us that there are details—which can only be adequately dealt with in committee. At the first glance, for example, and I give it merely as an example, our experts are inclined to think that perhaps too large an amount of tonnage has been permitted for submarines. Submarines are a class of vessels most easily abused in their use and which, in fact, in the late war were most grossly abused.

"We quite admit that probably the submarine is the defensive weapon, properly used, of the weak and that it would be impossible, or, if possible, it might well be thought undesirable, to abolish them altogether. But the amount of submarine tonnage permitted by the new scheme is far in excess, I believe, of the tonnage possessed by any nation at the present moment; and I only throw it out as a suggestion that it may be well worth considering whether that tonnage should not be further limited and whether, in addition to limiting the amount of tonnage it might not be practicable, and if practicable, desirable, to forbid altogether the construction of those vast submarines of great size, where not intended for defense, which are not the weapon of the weaker party, whose whole purpose is attack and whose whole purpose is probably attack by methods which civilized nations would regard with horror.

"However, there may be other questions of detail, questions connected with replacement, questions connected with cruisers which are not connected with or required for fleet action. But those are matters for consideration by the technical experts, and however they be decided they do not touch the main outline of the structure which the United States government desires erected and which we earnestly wish to help them in erecting.

"That structure stands, as it seems to me, clear and firm, and I cannot help thinking that in the broad outline, whatever may happen in the course of these discussions during the next few weeks, that structure will remain as it was presented by its original architects, for the admiration and for the use of mankind.

"I have little more to say except this: It is easy to estimate in dollars or in pounds, shillings and pence, the saving to the taxpayers of each of the nations concerned which the adoption of this scheme will give. It is easy to show that the relief is great. It is easy to show that indirectly it will, as I hope and believe, greatly stimulate industry, national and international, and do much to diminish the difficulties under which every civilized government is at this time laboring. All that can be weighed, measured, counted, and all that is a matter of figures. But there is something in this scheme which is above and beyond numerical calculation. There is something which goes to the root, which is concerned with the highest international morality. This scheme, after all—what does it do? It makes idealism a practical proposition.

"It takes hold of the dream which reformers, poets, publicists, even potentates, as we heard the other day, have from time to time put before mankind as the goal to which human endeavor should aspire.

"A narrative of all the attempts made, of all the schemes advanced for diminishing the sorrows of war, is a melancholy one. Some fragments were laid before you by our chairman on Saturday. They are not exhilarating. They showed how easy it is to make professions and how difficult it is to carry those professions into effect.

"What makes this scheme a landmark is that combined with the profession is the practice: that in addition to the expression, the eloquent expression of good intentions in which the speeches of men of all nations have been rich, a way has been found in which, in the most striking fashion, in a manner which must touch the imagination of everybody, which must come home to the dullest brain and the hardest heart, the government of the United States have shown their intention not merely to say that peace is a very good thing, that war is horrible, but there is a way by which wars can really be diminished, by which the burdens of peace, almost as intolerable as the burdens of war, can really be lightened for the populations of the world.

"And in doing that, in doing it in the manner in which they have done it, in striking the imagination not merely of the audience they were addressing, not merely of the great people to whom they belonged, but of the whole civilized world, in doing that they have, believe me, made the first and opening day of this congress one of the landmarks in human civilization.

Message from Lloyd George.

"I have said all that I propose to say, but if you will allow me I will read a telegram put into my hands just as I reached this meeting, this congress, from the British prime minister:

"'Many thanks for your telegram. If you think it will serve useful purpose to let them know the message might be published, as follows: Government have followed proceedings at opening session of conference with profound appreciation and wholeheartedly indorse your opinion that speeches made by President Harding and secretary of state were bold and statesmanlike utterances, pregnant with infinite possibilities. Nothing could augur better for ultimate success of conference. Please convey to both our most sincere congratulations.'"

Admiral Kato Suggests Modifications.

Admiral Kato, speaking for the Japanese delegation, said:

"Japan deeply appreciates the sincerity of purpose evident in the plan of the American government for the limitation of armaments. She is satisfied that the proposed plan will materially relieve the nations of wasteful expenditures and cannot fail to make for the peace of the world.

"She cannot remain unmoved by the high aims which have actuated the American project. Gladly accepting, therefore, the proposal in principle, Japan is ready to proceed with determination to a sweeping reduction in her naval armament.

"It will be universally admitted that a nation must be provided with such armaments as are essential to its security. This requirement must be fully weighed in the examination of the plan. With this requirement in view, certain modifications will be proposed with regard to the tonnage basis for replacement of the various classes of vessels. This subject should be referred to special consideration by naval experts.

"When such modifications are proposed I know that the American and other delegations

will consider them with the same desire to meet our ideas as we have to meet theirs.

"Japan has never claimed nor has she the intention of claiming to have a general establishment equal in strength to that of either the United States or the British empire. Her existing plan will show conclusively that she had never in view preparation for offensive war."

Senator Schanzer Speaks for Italy.

Senator Schanzer of the Italian delegation said:

"The time has come and this conference has been called not for general resolutions and for mutual advice, but for action. You proved at once that you mean to carry out your suggestion into practical execution. The first impression made by your statement concerning the limitations of naval armaments is one of great sincerity, great force, great courage. You stated clearly and unhesitatingly to the conference and to the public opinion of the entire world the question of the limitation of naval armament as concerns especially the great naval powers, and you did it with a precision of facts and of figures, thus affording a solid basis for discussion.

"We shall not consider the technical side of the question which concerns especially the great naval powers. We only wish to express in the name of the Italian delegation our great satisfaction in the proposals for general order. We hope that your proposal when accepted will be the source of the most beneficent economic consequences. The peace of the world cannot be permanently maintained if you do not consider the ways and means to re-establish the economic balance of the world.

"Modern civilization is an economic civilization, and the modern world, in spite of the distances and natural barriers, cannot be conceived except as a single great economic system. This economic system has been shattered by the war. It is necessary now to revise it and get it into motion again.

"We think that your proposal is the first effective step toward giving the world a release of such nature as to enable it to start the work of its economic reconstruction.

"In respect to Mr. Balfour's reference to the question of French and Italian naval forces, may I be allowed to say a few words?

"I think it rather difficult to separate the question of Italian and French naval armament limitation from the general question of the limitation of naval armaments of the world. Certainly as you have stated, Mr. Chairman, in your address, the question concerning the great naval powers must be considered in the first place, and you have stated that the United States proposes that this matter be left for the later consideration of the conference. So we wish and feel sure in accordance with your statement that the French and Italian naval question will be considered by the conference before concluding the question involved in your proposal.

"In conclusion, Mr. Chairman, I express in the name of the Italian delegation the most fervent wish that the conference, taking your proposal as its working basis, may lead to a result which would be extremely happy not only for the powers directly interested but for the entire world."

Premier Briand Concurs.

Premier Briand, speaking for France, said:

"Mr. Chairman: I fully concur with what the president of the British delegation has just said, when at the beginning of his eloquent statement he said that this conference would be one of the great landmarks in the history of the world and of civilization. While I do not quite agree with him, at least not to the same extent, as to his feelings, as expressed, when he first heard the statement made by the representative of the United States, I may say for my own part that when coming here I felt quite sure that a great people like the United States could not have begun such a momentous initiative without having some definite, clear-cut purpose. I think, gentlemen, that we have no longer the right in those questions of peace and war when we undertake to promise to the world that there shall be no more war, that there shall be everlasting peace—after the painful struggle from which we have just emerged—we have no right to let the people of the world hope for a final peace unless we have made up our minds to prepare and to decide upon the means that are most appropriate in order to realize these hopes.

"Many conferences and congresses have already met in order to try to carry out this noble idea, and Mr. Balfour was quite right when he pointed out the great danger there was in looking at this question through the glass of idealism. But, Mr. Secretary, you have shown us the way; you have shown that it was no longer a question of groping for a way out of the difficulty; you have struck out boldly the opportunity for us by setting the example. I may say that we are back of you, Mr. Secretary.

"Of course, during these difficult, arduous examinations of the details of the subject, upon which, after all, depends the practical realization, if it happens that we are taken out of the straight way and feel the temptation of using the devious paths, we on the part of France are ready to join our efforts to those of other men of good will and help in returning to the fair, straight road that would take us to our goal.

"The question with which we have first to deal here is of course one that mainly concerns the great naval powers, but I may say for my part that I have listened with great joy to the very large, broad and general adhesion given in principle by the governments of Great Britain and Japan. It is not that France feels entirely disinterested in this question. We shall have, I hope, an opportunity of saying this and showing it, but I may say now—and this will be carried out later on by figures and by demonstration—that we have already entered upon the right way and that we have already done somethnig in the direction you indicate. The war has kept us down to a certain level, of course. It has prevented us from carrying out our plans for a weak fleet, perhaps too weak for the necessities of national defense.

"But I will not dwell on this subject. I rather turn to another side of the problem to which Mr. Balfour has alluded, and I thank him for this. Is it only a question here of economy? Is it only a question of estimates and budgets? If it were so, if that were the only purpose you have in view, it will be really unworthy of the great nation that has called us here.

"So the main question, the crucial question, which is to be discussed here, is to know if the peoples of the world will be at last able to come to an understanding in order to avoid the atrocities of war. And then, gentlemen, when it comes on the agenda, as it will inevitably come, to the question of land armament, a question particularly delicate for France, as you are all aware, we have no intention to eschew this. We shall answer your appeal, fully conscious that this is a question of grave and serious nature for us.

"The question will be raised—it has been raised, gentlemen—and if there is a country that desires, that demands, that the question

of land armaments should be raised, it is France. It will come in due time before the conference, and I hope that I shall enjoy the opportunity and that I shall be able to state publicly in one of the meetings of this conference what the position of France is, so that the United States and the world may fully know, and when I have tried to prove this, when you have listened to this demonstration, I am quite sure that you will be convinced, gentlemen, that France, after the necessities of safety and life have been adequately secured, harbors no thought whatever of disturbing the peace of the world. The time will come for this demonstration.

"To-day I will simply record, with great feelings of joy, the agreement that has already been reached here on this first great problem of the conference, and expressing the wish that we shall come to a similar agreement upon all the other questions that await the conference."

Secretary Hughes Gratified.

Secretary Hughes in closing the session said:

"Gentlemen: We have listened not only with gratification but I may say with profound emotion to these expressions, so cordial, of agreement in principle with the proposal that has been made on behalf of the United States with respect to the limitation of naval armament. It will now be in order to consider the many details which must be associated with an exact agreement for that purpose.

"There are subjects, it has been suggested here, which will appropriately be examined by naval experts, and it is the desire of the American government that what has been proposed by that government, with the suggestions that have been made by Mr. Balfour on behalf of the British government, by Admiral Kato on behalf of the government of Japan and any other suggestions by way of modification or emendation or criticism that may be proper, shall all be thoroughly considered to the end that after the most mature and careful deliberation we may accomplish the great purpose which this conference in this matter has been assembled to achieve.

"But while the time is now opportune for the consideration of these details, the great first step has been taken in this notable expression of approval in principle of what has been suggested by the American government. And do I go too far in saying that we may commit this matter to a technical examination with the assurance, which I am very certain will be gratifying to the hearts of our people, that there will come out of this conference an appropriate agreement for satisfactory, important, essential reduction of naval armament, to the end that offensive naval warfare will be no more, and this great advance will be made to the accomplishment of an enduring peace?

"If it is not desired to have further discussion of the matter which has been brought before us, I suppose it will be in order to adjourn to give opportunity for the consideration of the project to which I have referred. And may I add that I have no doubt that I express the wish of the conference that at an opportune time M. Briand will enjoy the opportunity of presenting to the conference most fully the views of France with regard to the subjects of land armaments, which we must discuss?"

TECHNICAL ADVISERS AT WORK.

At a meeting of the delegations of the five allied and associated powers held in the Pan-American building on the afternoon of the same day a subcommittee of expert advisers was instructed to report on any detail of the reduction and limitation program as soon as an agreement had been reached. This step was taken in the belief that it would hasten progress in carrying out the purpose of the conference. This meeting was behind closed doors and after its adjournment the following official communique was issued:

"The first meeting of the committee on limitation of armament was held in the Pan-American building Tuesday, Nov. 15, 1921. There were present the delegates of the United States of America, the British empire, France, Italy and Japan, with a secretary for each delegation, and the secretary-general of the conference, who was chosen secretary of the committee.

"A subcommittee, composed of one technical naval adviser for each of the five powers, was constituted to take under immediate advisement the questions raised by the proposal of the United States for a limitation of naval armament and to report to the committee from time to time the program of their deliberations. The subcommittee is composed of the following: Col. Roosevelt, Admiral Beatty, Vice-Admiral le Bon, Vice-Admiral Acton and Vice-Admiral Kato, with full power of substitution for each adviser. At the suggestion of Mr. Balfour, it was agreed that Col. Roosevelt should act as chairman of this subcommittee.

"The committee adjourned to meet at the call of the chairman."

CHINA STATES HER PRINCIPLES.

At the first meeting of the committee on Pacific and far eastern problems, held Nov. 16, the Chinese minister to the United States, Dr. Alfred Sze, presented the following statement of principles:

"In view of the fact that China must necessarily play an important part in the deliberations of this conference with reference to the political situation in the far east, the Chinese delegation has thought it proper that they should take the first possible opportunity to state certain general principles which in their opinion should guide the conference in the determinations which it is to make.

"Certain of the specific applications of the principles which it is expected that the conference will make it is our intention later to bring forward, but at the present time it is deemed sufficient simply to propose the principles which I shall presently read.

"In formulating these principles the purpose has been kept steadily in view of obtaining rules in accordance with which existing and possible future political and economic problems in the far east and the Pacific may be most justly settled, and with due regard to the rights and legitimate interests of all the powers concerned.

"Thus it has been sought to harmonize the particular interests of China with these general interests of all the world. China is anxious to play her part not only in maintaining peace but in promoting the material advancement and the cultural development of all the nations. She wishes to make her vast natural resources available to all peoples who need them, and in return to receive the benefits of free and equal intercourse with them.

"In order that she may do this it is necessary that she should have every possible opportunity to develop her political institutions in accordance with the genius and needs of her own people. China is now contending with certain difficult problems which necessarily arise when any country makes a radical change in her form of government.

"These problems she will be able to solve if given the opportunity to do so. This means not only that she should be freed from the danger or threat of foreign aggression but that, so far as circumstances will possibly permit, she be relieved from limitations which now deprive her of autonomous administrative action and prevent her from securing adequate public revenue.

In conformity with the agenda of the conference, the Chinese government proposes for the consideration of and adoption by the conference the following general principles to be applied in the determination of the questions relating to China:

"1. (a) The powers engage to respect and observe the territorial integrity and political and administrative independence of the Chinese republic.

"(b) China, upon her part, is prepared to give an undertaking not to alienate or lease any portion of her territory or littoral to any power.

"2. China, being in full accord with the principle of the so-called open door, or equal opportunity for the commerce and industry of all nations having treaty relations with China, is prepared to accept and apply it in all parts of the Chinese republic without exception.

"3. With a view to strengthen mutual confidence and maintaining peace in the Pacific and the far east, the powers agree not to conclude between themselves any treaty or agreement directly affecting China or the general peace in these regions without previously notifying China and giving to her an opportunity to participate.

"4. All special rights, privileges, immunities, or commitments, whatever their character or contractual basis, claimed by any of the powers in or relating to China, are to be declared, and all such or future claims not so made known are to be deemed null and void. The rights, privileges, immunities, and commitments, now known or to be declared, are to be examined with a view to determining their scope and validity, and, if valid, to harmonizing them with one another and with the principles declared by this conference.

"5. Immediately, or as soon as circumstances will permit, existing limitations upon China's political, jurisdictional and administrative freedom of action are to be removed.

"6. Reasonable, definite terms of duration are to be attached to China's present commitments which are without time limits.

"7. In the interpretation of instruments granting special rights or privileges, the well established principle of construction that such grants shall be strictly construed in favor of the grantors is to be observed.

"8. China's rights as a neutral are to be fully respected in future wars to which she is not a party.

"9. Provision is to be made for the peaceful settlement of international disputes in the Pacific and the far east.

"10. Provision is to be made for future conferences to be held from time to time for the discussion of international questions relative to the Pacific and the far east, as a basis for the determination of common policies of the signatory powers in relation thereto."

NATIONS PLEDGE HELP.

The following official communique was issued Nov. 19:

The committee on Pacific and far eastern questions held its second meeting in the Columbus room of the Pan-American building this morning at 11 o'clock. All plenipotentiary delegates were present except Baron Shidehara for Japan, Ambassador Jusserand for France and Mr. Meda for Italy.

Admiral Baron Kato, on behalf of Japan, made the following statement:

"1. It seems to the Japanese delegation that existing difficulties in China lie no less in her domestic situation than in her external relations. We are anxious to see peace and unity re-established at the earliest possible moment, but we want to avoid all action that may be construed as an intervention in the internal affairs of China. All that this conference can achieve is, it seems to us, to adjust China's foreign relations, leaving her domestic situation to be worked out by the Chinese themselves.

"2. The Japanese delegation wishes to assure the Chinese delegation and the whole conference that Japan has every desire to cultivate the happiest relations with China. We are solicitous of making whatever contributions we are capable of toward China's realization of her just and legitimate aspirations. We are entirely uninfluenced by any policy of territorial aggrandizement in any part of China.

"We adhere without condition or reservation to the principle of 'the open door and equal opportunity' in China. We look to China in particular for the supply of raw materials essential to our industrial life, and for foodstuffs as well. In the purchase of such materials from China, as in all our trade relations with that country, we do not claim any special rights or privileges, and we welcome fair and honest competition with all nations.

"With regard to the question of the abolition of extraterritoriality, which is perhaps one of the most important questions proposed by the Chinese delegation, it is our intention to join with other delegations in the endeavor to come to an arrangement in a manner fair and satisfactory to all parties.

"We have come to this conference not to advance our own selfish interests; we have come to co-operate with all nations interested for the purpose of assuring peace in the far east and friendship among nations.

"3. The Japanese delegation understands that the principal object of the conference is to establish in common accord policies and principles which are to guide the future actions of the nations here represented.

"Although we are ready to explain or discuss any problem which in the wisdom of the conference is taken up, we should regret undue protraction of the discussions of detailed examination of innumerable minor matters."

Baron de Cartier, speaking for Belgium, Mr. Balfour for the British empire, and Senator Schanzer for Italy, then made statements in regard to the same subject as follows:

Baron de Cartier:

"I believe it advisable to point out briefly the spirit in which Belgium takes up the examination of the questions relating to the far east.

"She is happy to subscribe to the noble sentiments that inspired the words of the secretary of state at the opening session of the work of our committee.

"In so far as China is concerned, my country has for many years maintained important relations with her and has been among the first to contribute to the development of the natural resources of China through the large part she has taken in the construction of its railroad system; it has also established there industrial and financial enterprises of importance.

"The personal experience that I have been able to acquire through sojourns in China during the last twenty-five years, the evidences of the progress that she has made during that period, the manner in which she has been able to overcome her internal crises, inspire me with great confidence for her future.

"Belgium will take part willingly in all the measures that this conference may adopt to insure the territorial integrity of China and to furnish her with the means to overcome her present difficulties.

"She is convinced that the support of the action of the government is the necessary condition of all progress, and of the fruitful application of such rules as this conference

might lay down in accord with the government of the Chinese republic.

"Belgium will unreservedly favor the policy of the open door. She desires to see assured to the industry and commerce of all nations the possibility of sharing on a footing of complete and genuine equality the development of the resources of China to the greatest benefit of the Chinese people and of all humanity.

"She has heard with satisfaction the statement of the representatives of the Chinese republic that that country is ready to apply the policy of commercial liberty in all parts of its territory without exception. This commercial liberty will not produce its full effect unless the nationals of the powers obtain the rights and privileges which are a necessary condition of the full development of economic interests.

"Belgium, in accord with the powers concerned, is ready to consent to a fair increase in the customs duties.

"She will align herself willingly on the side of the countries which are disposed to accept the gradual abandonment of their rights of jurisdiction as soon as the Chinese government shall have completed the work that it has undertaken and shall be in position to give assurance of the many guaranties that the proper administration of justice demands."

Mr. Balfour said that he thought it unnecessary to add one word to what has been said by his colleagues in regard to the question of a general order which had been raised. His reason for saying this was that he had nothing to add to the frequent declarations of the government he had the honor to represent on all these questions. For example, the "open door" in China, the integrity of China and the desirability of leaving China to work out its own salvation and to maintain control over its own affairs, and of substituting when circumstances warranted the normal processes of law for extraterritoriality. All these principles had been formulated over and over again in explicit terms by the government which he represented.

Senator Schanzer's statement:

"I have the honor to state in the name of the Italian delegation that we fully subscribe to the noble sentiments that have been expressed by the orators who have preceded me. The Italian delegation is ready to examine, together with the other delegations, with the greatest care and in a spirit of sincere sympathy the questions relating to China.

"It will give its support to the solutions that shall appear to be best suited to assure the free development of China and to guarantee an equality in footing of the different nations in their efforts to promote the progress of China and of commerce with that country."

M. Briand expressed the warm sympathy that France feels for China, with which she has a common frontier about 1,500 kilometers long. The French delegation is disposed to consider in the most favorable light the Chinese claims in their entirety. But in order to reach a practical result it will be necessary to make a thorough examination of each claim.

Jonkheer Van Karnebeek, representing the Netherlands, remarked that in the present phase of the discussion there was not much for him to say of a general character and at the same time of material importance.

He wished, however, to seize this occasion to say, as the representative of one of China's neighbors, that the Netherlands delegation would be happy to consider the principles which China had laid down and the problems themselves from the standpoint of the world's general welfare and to examine them in a spirit of sympathy and friendship toward China.

Holland, Jonkheer Van Karnebeek said, had old friends along the shores of the Pacific. China knew that it was one of them. If China availed herself of the opportunity now afforded by this conference to assert her rights, to declare her position and to define her wishes she might count on Holland's good will and its willingness to aid her in the realization of legitimate aspirations and in her endeavors toward a consolidation and stabilization of her domestic affairs which were connected with the problems affecting the Pacific.

Viscount d'Alte said that the Portuguese delegation saw with pleasure that the delegates of other nations represented at the conference had expressed nearly identical views to the desirability, in the interests of all, of a prosperous and united China. He gladly associated himself with his colleagues in the expression of this desire.

Mr. Sze expressed on behalf of the Chinese delegation his sincere appreciation for the united sympathy and friendship of the delegations here for China and her proposals.

PREMIER BRIAND ON POSITION OF FRANCE.

The third plenary session of the conference, held on Nov. 21, was made memorable by Premier Aristide Briand, who in a powerful speech made the position of France on the question of land armament clear. He said:

"Gentlemen, you will readily admit that I, as a delegate of France, should feel moved when rising to speak from this wide-sounding platform, whence every word that is said goes to the attentive and anxious ear of the world and of all civilized people.

"I wish first of all to thank my colleagues of the conference, who, on the opening of this public meeting, so kindly allowed me to speak as the representative of my country.

"I shall endeavor to make my country appear to your eyes and to the eyes of the world with her true, genuine face, as she is; that will show you that she is ready, and I might say perhaps more ready than any other country, to direct her attention and her earnest will to whatever steps may be thought desirable in order to insure final peace for the world. Nothing for my colleagues and myself would be more pleasant than to be able to tell you this:

"'We bring here sacrifices to the fullest extent possible. We have our own security insured. We lay down arms. We should be so happy to be able to make that gesture in order to participate in the final disarmament of the world.'

"Unfortunately, we cannot speak in this way. I say, also unfortunately, we have not the right to do so. I shall briefly explain later on for what reasons. I shall tell you for France that she wants to make peace. If you want to make peace there must be two people, yourself and the neighbor opposite.

"To make peace—and I am speaking, of course, of land armament—it is not sufficient to reduce effectives and decrease war material. That is the physical side, a physical aspect of things. There is another consideration which we have no right to neglect. It is necessary that besides this physical disarmament there should be what I shall call a general atmosphere of peace. In other words, a moral disarmament is as necessary as the material one.

"I have the right to say this, and I hope to be able to prove it to you. And I have the right to say to you that in Europe, as it is at present, there are serious elements of instability, there are such conditions prevailing that France is obliged to face them with a view to her own security.

"I am now staying in a country many of

the men of which have already enjoyed the opportunity of seeing France and knowing exactly what she is. They came to us in the most critical time of the war. They came and shed their blood—mingled their blood—with ours, and they shared our life, and they have seen France, and they now know what France is. And certainly these men have done everything to dispel and drive away those noxious gases which have been spread about and under which certain people have been trying to mask and to conceal the true face of France.

"Here in this country you are living among states which do not know the entangled barriers and frontiers of Europe. Here you live in an immense expanse of space. You do not know any factions on your own land. You have nothing to fear. So that it is rather difficult for some of you—it must be difficult for some of you—to realize what are the conditions at present prevailing in Europe, after war and after victory.

"I quite admit that every citizen of the United States should come and tell me this: 'The war is won. Peace is signed. Germany has reduced her army to a great extent. Most of her war material has been destroyed. What is it that prevents peace from now reigning in Europe? Why is it that France keeps such a considerable army, abundantly provided with war material?'

"Of course, in saying this, only certain people have got something at the back of their minds. They suggest that France also has some hidden thought—some hidden design. It has been said that France wanted to install in Europe a sort of military supremacy and that after all she wanted to be so simply to take the place Germany occupied before the war. Gentlemen, perhaps this is the most painful, heartrending and cruel thing that a Frenchman can hear.

"Since the armistice we have had many disappointments. France has had to wait for certain realizations which she has not been able to get. She has seen Germany digress—haggle over the signature which had been given.

"Germany has refused to stand by her pledged word. She has refused to pay compensation due for the devastated regions. She has declined to make the gesture of chastisement that, after all, every man of sense would expect after the horrors that we have witnessed. Germany has refused to disarm. At that time France was strong and Germany could not resist. Public opinion in France was naturally impatient, while under this provocation France remained perfectly cool. There was not one gesture on her part to aggravate the situation.

"I may say here emphatically in the face of the world we have no hatred in our hearts and France will do everything she can. She will use every means to prevent between Germany and herself a recurrence of these bloody conflicts. She wishes for nothing else but that the two peoples should be able to live side by side in the normal conditions of peace. But after all we have no right to forget. We have no right to abandon ourselves. We have no right to weaken our position. And were it only because we must avoid giving rise in the bosom that would only be ready to take advantage of it—to give rise to certain hopes that would be encouraged by our weakness.

"Gentlemen, I spoke a few moments ago of the moral aspect of disarmament, and I referred in my remarks to Germany. I do not want to be unjust; nothing is further from my mind. But we know there is in Germany—there is one part of Germany that is for peace. There are many people, especially among the working classes, who want to work, who have had enough of this war, who have had enough of war altogether, and are most anxious to settle down in peace, and also to set to work. We shall do everything to help that Germany, and if she wants to restore her balance in the bosom of a pacific republic and democratic institution, then we can help her and we shall all be able to contemplate the future with feelings of security.

"But, gentlemen, there is another Germany, a Germany which has not changed her mind and to which the last war has taught no lesson. That Germany keeps thoughts in the back of her mind; she has the same designs which she entertained before the war; she has kept the same preoccupations and she cherishes the same ambitions as the Hohenzollerns did.

"And how can we close our eyes to this? How can we ignore this state of things? This, gentlemen, is happening at our very doors, we have only got to look. This is happening but a few miles from us, and we follow the thoughts of the Germans, or certain Germans, and the evolution which is taking place.
